Title 28, section 451, United States Code, defines "a court of the United States" as "any court created by act of Congress the judges of which are entitled to hold office during good behavior." A similar definition of "a judge of the United States" is contained in this legislation. It would seem to follow, therefore, that a judge of the Court of Military Appeals is not "a judge of the United States," and that the tribunal itself is not "a court of the United States." Thus it will be seen that the Senate's alterations exercised a far-reaching effect on the nature and position of the Court of Military Appeals. Reference to some of the results of this action will be made at subsequent points in this memorandum.

The U.S. Court of Military Appeals heads a judicial system which currently administers approximately one-ninth of the criminal trials of the entire Nation. On the basis of prior experience, it may be predicted with certainty that under total mobilization the military system will administer approximately one-third of such trials. The jurisdiction of the Court of Military Appeals is concerned not with mere property rights, but with the lives and liberties of Americans—principally young Americans—from all walks of life, all segments of society, and all sections of the land. It was the clear intent of Congress in enacting the Uniform Code to assimilate the administration of military justice as nearly as possible to that of the civilian community. All these factors argue strongly for a Court of Military Appeals which is firmly integrated into the Federal judicial system and which enjoys the authority and position of "a court of the United States."

Life tenure for the Court of Military Appeals will set at rest present doubts concerning the court's powers—and will enable it to perform all of the functions of a judicial tribunal.

As a result of changes in the Uniform Code of Military Justice effected after its initial adoption by the House, it is probable—as has been seen—that the Court of Military Appeals is not "a court of the United States." As a result, genuine doubt exists with respect to the body's power to punish for contempt, if necessary to subpena witnesses, to issue the several prerogative writs, and to perform other necessary judicial functions.

All these powers are enjoyed by "a court of the United States," and their exercise in proper cases by the Court of Military appeals is essential to its status as a Federal judicial tribunal with substantially final authority over the lives and liberties of literally hundreds of thousands of young men and women in the Armed Forces. It will be recalled that the Uniform Code provides for no appeal from the determinations of this court, with the result that—save as to jurisdictional questions—its dispositions are final. It is in every substantial sense a court of last resort in criminal cases, and should possess all of the authority of such a court.

The grant of life tenure to the judges of the Court of Military Appeals will free them from the danger of political and other pressures, regarded by many thoughtful persons as an inescapable peril under a term system.

This reason for a modification in the present tenure provision requires little elaboration. All Federal judges laboring under responsibilities even remotely comparable to those resting on members of the court under scrutiny hold office during good behavior. If, as has been said, a principal reason for this phenomenon lies in a desire to protect against clamor and the attempted use of influence—direct or the reverse—then it is applicable equally to the military system's highest judicial tribunal. In truth, it should be deemed to apply with even greater force—for in no other Federal court is the danger of pressure from organized blocs so great. Potential sources of this special danger are numerous and easily recognizable.

Nothing less than life tenure for the judges of the Court of Military Appeals is consistent with the overall intent of Congress as expressed in the Uniform Code of Military Justice.

It is manifest that, in enacting the Uniform Code, Congress intended to bring the administration of military criminal law into as complete accord as practicable with that obtaining in Federal civilian courts. Inescapable differences were recognized, of course—but it seems certain that the Congress was moved by no slightest purpose to approve their existence in the areas of quality and objectives. In other words, there can have been no wish to relegate to second-class citizenship the members of what is now predominantly a civilian—that is, a nonprofessional—Army, Navy, or Air Force.

The Federal criminal law applicable to nonmilitary people is, of course, administered and supervised by courts whose members enjoy life tenure—and thus have been placed in a climate favorable to the development of a proper independence and the highest sort of judicial integrity. Although the presence of minor differences cannot be denied, nothing in the nature of ultimate protections which are available to Mr. A can with safety be denied to Private B, Seaman C, or Airman D—if the basic objective of Congress in enacting the Uniform Code is to be supported and preserved.

This aim is demonstrated more specifically by the code's provision to the effect that the judges of the Court of Military Appeals shall enjoy the compensation of judges of the several U.S. courts of appeals. And the same legislation provides that if a judge of the former court is temporarily disabled, the vacancy thus created shall be filled by designation of a judge of one of the latter. These determinations would seem to indicate with force that Congress chose to assimilate the bench of the Court of Military Appeals to that of a U.S. court of appeals—the members of which, of course, hold office during good behavior.

Life tenure to judges of the Court of Military Appeals will provide for them retirement and survival-of-dependents benefits like those enjoyed by other judges of the Federal judiciary.

At present the judges of this bench are regarded as members of the Federal civil service, so far as retirement is concerned. Thus they are required personally to contribute toward such benefits—to the substantial reduction of their statutory compensation. If the court is to secure for the future personnel equal in professional capacity and standing to that from which other Federal judges are recruited, it is essential that the members of its bench enjoy similar treatment

in this particular. This result would be accomplished by assuring to the Court of Military Appeals recognition as a court of the United States.

Sufficient time has elapsed since establishment of the U.S. Court of Military Appeals to permit reliable evaluation of its contributions to the administration of military law.

Oaths of office were taken by the court's judges in June 1951, and thus the tribunal has been in existence for almost 10 years. During this period it has processed more than 15,000 records of trial by court-martial—and its three members have published written opinions in approximately 1,700 cases. The court has now completed the 11th bound volume of its reported decisions.

In addition, numerous articles dealing with the court and its work have appeared in professional journals, and many of its opinions have been the subject of comment and scholarly evaluation in recent case sections of these same periodicals. In short, there is every reason to suppose that sufficient data are now available to enable the Congress to reach a sound conclusion concerning the quality of the court's personnel and product, and in general the value of its contribution to the military justice scene.

There can be no doubt that the Court of Military Appeals has justified its existence. And if it is worthy of continuation at all as a judicial tribunal of the United States, it fully merits the protections, the powers, and the position enjoyed by comparable Federal courts. It is certain that, insofar as clarification of its powers is desirable, this critical need should be met without delay—and the most effective and economical means for accomplishing this result lie in action according to the body status as a court of the United States. This, in turn, may be accomplished readily by granting life tenure to its judges.

SENATE

TUESDAY, MARCH 21, 1961

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O thou God of truth, Father of our spirits, we thank Thee that Thou hast so fashioned our hearts that our deepest instincts anchor us to Thee, and that he who loves the truth can never miss Thee at the last.

In a mad and violent day, may we walk and work in the peace that the world cannot give, in the charity that thinketh no evil, in the good will that bridges all chasms.

In spite of the paganism that afflicts the world, grant us to dream great dreams and not to be disobedient to the heavenly vision. And though the hope betimes seems forlorn, may we be found ready to lead it. Without stumbling and without stain, may we follow the gleam until the day is over and our work is done.

We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Monday, March 20, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

LEAVE OF ABSENCE

On request of Mr. DIRKSEN, and by unanimous consent, Mr. AIKEN was excused from attendance on the sessions of the Senate during the remainder of this week.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, with the concurrence of the distinguished minority leader, I move that the Senate proceed to the consideration of executive business, to consider the nominations on the Executive Calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORT OF A COMMITTEE

The following favorable report of a nomination was submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Robert Sargent Shriver, Jr., of Illinois, to be Director of the Peace Corps.

The VICE PRESIDENT. If there be no further reports of committees, the nominations on the calendar will be stated.

U.S. ATTORNEY

The Chief Clerk read the nomination of Joseph D. Tydings, of Maryland, to be U.S. attorney for the district of Maryland for a term of 4 years.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

POST OFFICE DEPARTMENT

The Chief Clerk proceeded to read sundry nominations in the Post Office Department.

Mr. MANSFIELD. Mr. President, I move that these nominations be considered en bloc.

The VICE PRESIDENT. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. MANSFIELD. Mr. President, I ask that the President be immediately notified of the confirmation of these nominations.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

REPORT OF NATIONAL ACADEMY OF SCIENCES

A letter from the President, National Academy of Sciences, Washington, D.C., transmitting, pursuant to law, a report of that organization, for the fiscal year ended June 30, 1960 (with an accompanying report); ordered to lie on the table.

RECONVEYANCE OF CERTAIN REAL PROPERTY TO TOWN OF MALONE, N.Y.

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize the Secretary of the Army to reconvey to the town of Malone, N.Y., certain real property heretofore donated by said town to the United States of America as an Army Reserve center and never used by the United States (with an accompanying paper); to the Committee on Armed Services.

AMENDMENT OF TITLE 10, UNITED STATES CODE, RELATING TO SCHOLARSHIPS FOR MEMBERS OF ARMED FORCES

A letter from the Under Secretary of the Navy, transmitting a draft of proposed legislation to amend title 10, United States Code, to permit members of the Armed Forces to accept fellowships, scholarships, or grants (with an accompanying paper); to the Committee on Armed Services.

PROPOSED TRANSFER BY NAVY DEPARTMENT OF WATER BARGE TO THE VIRGIN ISLANDS

A letter from the Assistant Secretary of the Navy (Installations and Logistics), reporting, pursuant to law, on the proposed transfer of a non-self-propelled water barge to the territory of the Virgin Islands; to the Committee on Armed Services.

REPORT ON PRIME CONTRACT AWARDS TO SMALL AND OTHER BUSINESS FIRMS

A letter from the Assistant Secretary of Defense (Installations and Logistics), transmitting, pursuant to law, a report on prime contract awards to small and other business firms, for the month of December 1960 (with an accompanying report); to the Committee on Banking and Currency.

REPORT ON AUDIT OF ABACA FIBER PROGRAM

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the audit of the abaca fiber program administered by General Services Administration, fiscal year 1960 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF CERTAIN EXPENDITURES AT ARMY CHEMICAL CENTER, EDGEWOOD, MD.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of expenditures for selected maintenance and construction projects at the Army Chemical Center, Edgewood, Md., dated March 1961 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SUPPLY MANAGEMENT ACTIVITIES, MARINE CORPS AIR FACILITY, IWAKUNI, JAPAN

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of supply management activities of the Marine Corps Air Facility, Iwakuni, Japan, Department of the Navy, dated March 1961 (with an accompanying report); to the Committee on Government Operations.

ADDITIONAL ASSISTANT SECRETARY OF COMMERCE

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize an additional Assistant Secretary of Commerce (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

REGULATIONS AT WATER SUPPLY PROJECTS IN THE DISTRICT OF COLUMBIA

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to authorize the making and enforcement of regulations at water supply projects in the District of Columbia and environs, and for other purposes (with an accompanying paper); to the Committee on Public Works.

REPEAL OF SECTION 409 OF PUBLIC BUILDINGS ACT OF 1949, RELATING TO REPORT TO CONGRESS

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting a draft of proposed legislation to repeal section 409 of the Public Buildings Act of 1949, requiring the submission of a report to the Congress concerning eligible public building projects (with an accompanying paper); to the Committee on Public Works.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A concurrent resolution of the Legislature of the State of Pennsylvania; to the Committee on Labor and Public Welfare:

"Pennsylvania is proud of the many beautiful forests that dot our countryside. No other State can boast of such preserves, but without conservation some day our beautiful woodlands will be a barren area.

"The same is true of our water supply. Today it is abundant but without care and conservation we might find ourselves faced with a shortage of water in the future.

"A way to solve these problems would be to reestablish the Civilian Conservation Corps which worked so well during the thirties. The creation of this force would not only help our forests and water supply, but it would also aid in the curbing of juvenile delinquency, and the problems of unemployment which we face today: Therefore be it

"*Resolved* (*the house concurring*), That the General Assembly of Pennsylvania memorialize Congress to establish a Civilian Conservation Corps; and be it further

"*Resolved*, That copies of this resolution be transmitted to the presiding officers of each House of the Congress of the United States and to each Senator and Representative from Pennsylvania in the Congress of the United States."

A concurrent resolution of the Legislature of the State of New York; to the Committee on Appropriations:

"SENATE RESOLUTION 31

"Concurrent resolution of the Legislature of the State of New York memorializing the President and Congress of the United States, to provide adequate funds to the U.S. Army Corps of Engineers for necessary surveys and plans for, and to initiate the construction of, a deep water canal linking Lakes Erie and Ontario

"Whereas the United States has assumed an obligation with its good neighbor, the Government of Canada, to contribute its full share toward the successful operation of the St. Lawrence Seaway-Great Lakes shipping route; and

"Whereas the only existing navigable facility connecting Lakes Erie and Ontario is the Welland Canal which has been sorely pressed to meet the increasing demands of shipping; and

"Whereas the construction of an alternate ship canal would make a major contribution to the security of the United States as well as Canada, because:

"1. In the event of breakdown or destruction of the existing Welland Canal, the commerce of the entire Great Lakes area of the United States and Canada west of Lake Ontario would be denied access by water transportation to the St. Lawrence Seaway and international shipping lanes;

"2. It would provide a more secure inland route for the movement of iron ore in the event of war;

"3. It would ease the strain on congested rail facilities and east coast ports in the time of emergency; and

"4. It would allow the construction and repair of oceangoing vessels in the more secure areas of the Great Lakes; and

"Whereas the construction of the canal would contribute greatly to the prosperity of commerce, industry, and agriculture, not only in those States bordering the Great Lakes, but throughout the entire Nation; and

"Whereas the commerce of the lake ports of New York State—Buffalo, Rochester, Oswego, and Ogdensburg—would be increased by the benefits accruing to the St. Lawrence Seaway-Great Lakes shipping route; and

"Whereas the construction of the canal would stabilize employment, provide job security and expand job opportunities: Now, therefore, be it

"*Resolved* (*if the assembly concur*), That the Legislature of the State of New York hereby respectfully memorializes the President and Congress of the United States immediately to provide adequate funds to the U.S. Army Corps of Engineers for the necessary surveys and plans for, and to initiate the construction of, the canal, as aforesaid; and be it further

"*Resolved* (*if the assembly concur*), That copies of this resolution be transmitted to the President of the United States; to the President of the Senate and the Speaker of the House of Representatives of the U.S. Congress, and to each Member thereof from the State of New York; to the Governor of the State of New York; to the commissioner of commerce of the State of New York; to the chairmen of the Port Authorities of Buffalo, Rochester, Oswego and Ogdensburg; and to the Governors and State legislative leaders of the States of Pennsylvania, Ohio, Michigan, Indiana, Illinois, Wisconsin, and Minnesota.

"By order of the senate.

"WILLIAM S. KING,
"Acting Secretary.

"Concurred in without amendment, by order of assembly.

"ANSLEY B. BORKOWSKI,
"Clerk."

Two concurrent resolutions of the Legislature of the State of Utah; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION 1

"Concurrent resolution memorializing the Congress of the United States to provide legislation designed to afford adequate protection for domestic industry in the field of international trade

"Whereas the sheep and cattle industry of the United States has for the 3 years past sought adequate protection from excessive imports from low-wage foreign countries; and

"Whereas livestock production, employment, and related business in the producing communities have been seriously curtailed and are threatened with further curtailment; and

"Whereas definite relief from the livestock industry was unanimously recommended by the National Wool Growers Association and American National Cattlemen's Association in accordance with the escape clause provisions of that act, which recommendation was preceded by a thorough investigation made by the U.S. Department of Agriculture upon the request of the industry, the Congress and administration officials; and

"Whereas the Wool Act was provided for the sheep industry by the President and the Congress in lieu of the recommended tariff relief; and

"Whereas the effectiveness of the Wool Act has been seriously hampered by excessive importations of wool fabrics and lambs selling at prices below our costs of production, which has resulted in a progressive decline in sheep production in many areas; and

"Whereas the livestock situation is simply an example of the serious difficulty which any domestic industry might experience under the present Trade Agreements Act or the extensions thereof; and

"Whereas the policies and practices in the field of international trade which have resulted in such harm to the domestic livestock industry and to the domestic economy present a threat to all domestic industry involved in international trade: Now, therefore, be it

"*Resolved by the Legislature of the State of Utah* (*the Governor concurring therein*), That we believe that it is fitting and proper for citizens of this State or of the United States to exercise the right of petition, if and when injury to their persons or property is actual or imminent. We, therefore, respectfully petition the high office of the President of the United States for drastic and immediate relief from the vast and ever increasing quantities of meat and meat products, hides, wool, woolen and any such other related products as have flooded our domestic markets to the point of ruin to

our own stockraising industry. As a means to this end we pray you, Mr. President, to act at once under the terms of the escape or peril point clause to the Trade Agreements Act. We further recommend that the Trade Agreements Act of 1934 be permitted to expire.

"We favor the enactment of quotas on imports of dressed and live animals as well as wool, woolens and other meat animal products until domestic prices are at an economic level. Such quotas would permit the domestic livestock industry to: Maintain adequate numbers for national security; compete with foreign imports produced in low-wage foreign countries; return to its former status of employment and production; retain its skilled livestock producing personnel; and engage in the development work vitally necessary to future availability of food and fiber; and be it further

"*Resolved,* That the secretary of the State of Utah be and is hereby authorized and directed, to send copies of this concurrent memorial to the President of the United States, to the Senate and House of Representatives of the United States, to the Committee of Ways and Means of the House of Representatives and the Finance Committee of the Senate, to the Senators and Congressmen representing the State of Utah in the National Congress and to the honorable Secretary of Agriculture."

"SENATE CONCURRENT RESOLUTION 5

"Concurrent resolution proposing to urge Congress to enact legislation regulating importing of lead and zinc

"Whereas the lead-zinc mining industry of Utah has suffered severe economic reverses over the past decade; and

"Whereas the principal cause of such reverses has been the importation of foreign produced lead and zinc far in excess of the amount needed to supplement domestic supplies; which importation have resulted in loss of markets and drastic reduction of metal prices to domestic producers; and

"Whereas the lead-zinc mining industry is an important segment of Utah's economy; particularly as to employment, related business and tax revenue; and

"Whereas the U.S. Tariff Commission has on three occasions in the past decade found the domestic lead-zinc mining industry to be suffering serious injury from excessive importations of lead and zinc resulting in part from the reduction of import duties on those metals made under the Trade Agreements Act; and

"Whereas on the occasion of each such finding of serious injury the Commission, has, under authority provided in the escape clause of the Trade Agreements Act, recommended relief for the industry by way of increased duties and other import controls; and

"Whereas such recommended relief has not been granted the industry, and

"Whereas the domestic lead-zinc mining industry, including the Utah lead-zinc mining industry, has prepared and has had legislation introduced in the 87th Congress designed to provide the relief sorely needed by the industry: Now, therefore, be it

"*Resolved by the Legislature of the State of Utah (the Governor concurring therein),* That the National Congress be urged to favorably consider and to pass the proposed legislation providing needed and reasonable import control; and be it further

"*Resolved,* That a copy of this resolution be conveyed to the President of the United States, the President of the U.S. Senate, the Speaker of the House of Representatives, the Secretary of the Interior, and to the congressional delegation for the State of Utah."

A concurrent resolution of the Legislature of the State of Utah; to the Committee on Interior and Insular Affairs:

"SENATE CONCURRENT RESOLUTION 6

"Concurrent resolution memorializing the Congress of the United States to oppose national preservation acts

"Whereas a bill (S. 174) in its original form was introduced in the Senate of the United States of America, 87th Congress, 1st session, to establish a National Wilderness Preservation System, and it is anticipated that an identical bill will be introduced in the House of Representatives of the United States of America during the same session; and

"Whereas said bills, each to be known as a wilderness act authorize the withdrawal of large acres of federally owned lands and the continued withdrawal of federally owned or controlled lands in the future, upon decision of Federal officials into a National Wilderness Preservation System to be so protected and administered as to preserve the wilderness character of the lands withdrawn and contained therein; and

"Whereas approximately 72 percent of the land in the State of Utah is owned and controlled by the Federal Government; and

"Whereas any development of lands withdrawn inconsistent with the preservation of said lands for the single purpose of wilderness area is prohibited by the act; and

"Whereas Utah stands at the threshhold of a new era of prosperity through the multiple development of mineral, water, agricultural, industrial, recreational and wilderness resources on its federally owned lands as presently permitted under law; and

"Whereas there was in fact legislation enacted in 1957 by the Congress of the United States establishing an Outdoor Recreation Resources Review Commission to inventory our wilderness resource and report to the Congress in 1961: Now, therefore, be it

"*Resolved by the 34th Legislature of the State of Utah (the Governor concurring therein),* That the 87th Congress of the United States of America be and is hereby memorialized to oppose and vote against S. 174 in its original form as inimical to the future development of the State of Utah and the prosperity of those U.S. citizens residing therein, and as premature and unnecessary legislation; and be it further

"*Resolved,* That certified copies of the above be transmitted to the President and Vice President of the United States, the President of the Senate of the Congress, the Speaker of the House of Representatives of the Congress, U.S. Senator WALLACE F. BENNETT, U.S. Senator FRANK E. MOSS, Representative DAVID S. KING, Representative M. BLAINE PETERSON, Senate Committee on Interior and Insular Affairs, and the Governors and legislatures of the following States: Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Washington, and Wyoming."

A concurrent resolution of the Legislature of the State of Utah; to the Committee on Public Works:

"SENATE CONCURRENT RESOLUTION 7

"Concurrent resolution memorializing the Congress of the United States to provide adequate facility for the crossing of the Colorado River in the vicinity of Hite, Utah

"Whereas Utah State Highway Route No. 95, a Federal aid route upon which both State and Federal moneys have been spent, joins the southeastern section of the State of Utah with the remainder of the State through the facility of a ferry across the Colorado River at Hite, Utah; and

"Whereas said route and ferry constitute the only access to and crossing of the Colorado River for a distance of 154 miles in said section of the State; and

"Whereas as a result of the construction of the Glen Canyon Dam as a Federal project on the Colorado River, a portion of said highway route as it approaches Hite and the ferry facilities thereof will be inundated and the utility of said highway and ferry destroyed; and

"Whereas continuation of east-west traffic between areas of the State of Utah rich in natural resources and scenic wonder is in the public interest; and

"Whereas termination of such traffic and the facility therefor will greatly impede the development of southeastern Utah to the detriment of the public; and

"Whereas in fact access to and crossing of the Colorado River is necessary for utilization of the water recreational facilities contemplated as a result of the Glen Canyon Dam: Now, therefore, be it

"*Resolved by the Legislature of the State of Utah (the Governor concurring herein),* That the 87th Congress of the United States of America be and is hereby memorialized to promptly take the necessary and appropriate action to insure and provide adequate facility for vehicular crossing of the Colorado River in the general vicinity of Hite, Utah; and be it further

"*Resolved,* That certified copies hereof be promptly transmitted to the President and Vice President of the United States, the Speaker of the House of Representatives of the Congress, U.S. Senator Wallace F. Bennett, U.S. Senator Frank E. Moss, U.S. Representative David S. King, U.S. Representative M. Blaine Peterson, to the Secretary of the Interior Stewart L. Udall, to the Commissioner of Reclamation, the Upper Colorado River Commission, and to the Governors and legislatures of the following States: Utah, Colorado, Arizona, and New Mexico."

A joint resolution of the Legislature of the State of California; to the Committee on Banking and Currency:

"SENATE JOINT RESOLUTION 13

"Joint resolution relative to mass public transportation in metropolitan areas

"Whereas the Federal Government has historically pursued the policy of aiding and encouraging the development and maintenance of adequate public transportation throughout the country, including subsidies to railroads and airlines and financial grants for navigable rivers, harbors, interstate highways, farm-to-market roads, airports and other transportation facilities; and

"Whereas the Federal Government has been extremely active in encouraging the development of public highways for the use of motor vehicles through its Federal-aid highway program and other financial grants for highway purposes; and

"Whereas the development of interstate and other highways has encouraged greater and greater dependence upon motor vehicles for public transportation purposes; and

"Whereas the growing dependence upon motor vehicles, especially private passenger automobiles, is contributing greatly to the problem of traffic congestion in metropolitan areas and other centers of population, which in turn has allowed mass public transit and private commuter railroads to define in quality and quantity of service rendered; and

"Whereas the problem of growing traffic congestion is expected to become worse as the population of people and motor vehicles increases and approaches a doubling of the present level; and

"Whereas the recognized solution to the growing traffic congestion problem is the es-

tablishment of modern systems of rail rapid transit operating on grade-separated roadbeds which will not interfere with the movement of vehicular traffic on streets and highways, and which will move vast numbers of people efficiently and economically in a manner fully competitive with the attraction and convenience of individual passenger automobiles; and

"Whereas it is now evident that urban areas alone cannot assume their many pressing responsibilities in the field of education, social welfare, public health, police protection, public works and many others, and still provide the vast sums of money needed to build modern systems of public transportation for the mass movement of people; and

"Whereas there is pending in Congress legislation to encourage the States and their political subdivisions to plan, acquire, and/or construct facilities for mass public transportation in metropolitan areas, including financial grants and low-interest loans for such purposes: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California respectfully urges upon the Congress of the United States its favorable consideration of legislation providing Federal financial and other assistance to the States and their political subdivisions for mass public transportation purposes in metropolitan areas; and be it further

"Resolved, That the secretary of the senate be hereby directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Finance:

"SENATE JOINT RESOLUTION 7

"Joint resolution relating to imports of livestock and livestock products

"Whereas the sheep and cattle industry of the United States has for the 3 years past sought adequate protection from excessive imports from low-wage foreign countries; and

"Whereas livestock production, employment, and related business in the producing communities have been seriously curtailed and are threatened with further curtailment; and

"Whereas definite relief for the livestock industry was unanimously recommended by the National Wool Growers Association and American National Cattlemen's Association, which recommendation was preceded by a thorough investigation made by the United States Department of Agriculture upon the request of the industry, the Congress, and the administration officials; and

"Whereas the Wool Act was provided for the sheep industry by the President and the Congress in lieu of the recommended tariff relief; and

"Whereas the effectiveness of the Wool Act has been seriously hampered by excessive importations of wool fabrics and lambs selling at prices below our costs of production, which has resulted in a progressive decline in sheep production in many areas: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to provide immediate relief under the terms of the escape or peril point clause of the Trade Agreements Act, or by establishing import quotas or any other appropriate action to relieve the stockraising industry of the United States from the vast and ever increasing quantities of meat and meat products, hides, wool, woolens, and other related products flooding our domestic markets; and be it further

"Resolved, That the secretary of the senate is directed to transmit a copy of the resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of Montana; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 12

"Joint memorial of the Senate and House of Representatives of the State of Montana, providing that the application for license to construct these projects is consistent with the orderly, integrated and comprehensive development of the Columbia River Basin as recommended under provisions of the Corps of Engineers' '308' report; and providing that an acceptable agreement is consummated with the Kootenai, Salish, and Flathead Indian Tribes for the use of said sites, otherwise this memorial shall be of no force and effect; urging that the Federal Power Commission grant the application of a taxpaying enterprise to construct, own, and operate the dams and hydroelectric facilities at Buffalo Rapids sites Nos. 2 and 4 in Lake County and Sanders County, Mont.

"Whereas, an investor-owned taxpaying enterprise has announced its intention of applying to the Federal Power Commission for permission to immediately construct, own, and operate dams and hydroelectric facilities at the Buffalo Rapids sites Nos. 2 and 4 in the Buffalo Rapids stretch of the Flathead River, located in and between Lake County and Sanders County, Mont.; and

"Whereas the construction of said dams and hydroelectric facilities at Buffalo Rapids sites Nos. 2 and 4 by a taxpaying enterprise would improve local economic conditions, would result in a minimum of economic dislocation and is highly acceptable to the people of the immediate area; and

"Whereas the construction of said Buffalo Rapids projects would broaden the tax base of Lake County and Sanders County and the resultant greatly increased tax collections every year would strengthen county government services and local school systems as well as to substantially increase payments of State and Federal corporation taxes; and

"Whereas the construction, development, and operation of said Buffalo Rapids projects would respect the treaty rights of the Flathead Indian Tribe and would result in substantial annual payments of rentals to said tribe for the use of tribal lands, an aspect not contemplated by other developments which have been proposed in the area; and

"Whereas the construction of said Buffalo Rapids projects would mean a tremendous investment in materials and labor in that area of western Montana near presently distressed areas, which would create remedial employment without expenditures of tax moneys during the period of construction and thereafter; and

"Whereas the only remaining major obstacle to this much needed development in western Montana is the issuance of the necessary license by the Federal Power Commission: Now, therefore, be it

"Resolved by the 37th session of the Legislative Assembly of the State of Montana (the senate and house of representatives concurring), That the application for license to construct these projects is consistent with the orderly, integrated and comprehensive development of the Columbia River Basin as recommended under provisions of the Corps of Engineers' '308' report which is finally adopted; and providing that an acceptable agreement is consummated with the Kootenai, Salish, and Flathead Indian Tribes for the use of said sites, otherwise this memorial shall be of no force and effect; that we respectfully urge that the Federal Power Commission act favorably upon the application of a taxpaying enterprise for a license to construct, own, and operate dams and hydroelectric facilities at Buffalo Rapids sites Nos. 2 and 4 in Lake County and Sanders County, Mont., when such application comes before it in order that western Montana can gain the benefits of investment and employment as soon as possible; and be it further

"Resolved, That copies of this resolution be forwarded by the secretary of state of the State of Montana to the President of the United States, to the President pro tempore of the Senate of the United States, to the Speaker of the House of Representatives of the United States, and to the Honorable MIKE MANSFIELD and the Honorable LEE METCALF, Senators from Montana, and the Honorable ARNOLD OLSEN and the Honorable JAMES BATTIN, Representatives in Congress from Montana, to the Secretary of the Interior, the chairmen of the Appropriations Committees of the U.S. Senate and House of Representatives, the U.S. Army Corps of Engineers, and the Federal Power Commission in Washington, D.C.

"CLYDE L. HAWKS,
"Speaker of the House.
"TIM BABCOCK,
"President of the Senate."

Resolutions adopted at the annual meeting of the delegates of Land O'Lakes Creameries, Minneapolis, Minn., relating to price support for milk, and so forth; to the Committee on Agriculture and Forestry.

A letter in the nature of a memorial from the East Asiatic Co., Inc., San Francisco, Calif., signed by H. Rainer, manager, relating to imports of lumber and lumber products; to the Committee on Finance.

A letter from the Coordinating Secretariat of National Unions of Students, Leiden, Netherlands, signed by Norman W. Kingsbury, administrative secretary, transmitting a resolution adopted by the Ninth International Student Conference, relating to the Chamorro-Bryan Treaty; to the Committee on Foreign Relations.

A resolution adopted by the City Council of the City of Pomona, Calif., urging support and approval of legislation to allow municipal corporations to acquire Federal surplus property; to the Committee on Government Operations.

A resolution adopted by the 31st assembly of the California Society of the Daughters of the American Colonists, favoring the continuance of the Un-American Activities Committee; to the Committee on the Judiciary.

A letter in the nature of a petition from J. L. F. Harrigan, of Brooklyn, N.Y., relating to Federal aid to education; to the Committee on Labor and Public Welfare.

RESOLUTION OF TOWN BOARD OF UNION, N.Y.

Mr. KEATING. Mr. President, the Town Board of Union, N.Y., has sent me a copy of a resolution urging increased Federal aid to assist in paying the costs of sewage disposal. I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the town of Union has heretofore established the following sewer districts, to wit: (1) The Endwell Sewer District; (2) the West Corners Sewer District; and (3) the North Endicott Sewer District; and

Whereas it is proposed to construct a sewage disposal plant to serve said Endwell Sewer District, the location of said sewage disposal site to be in the town of Vestal, Broome County, N.Y., and to be constructed and operated in such a manner as to serve not only the Endwell Sewer District of the town of Union, but also sewer district No. 4 of the town of Vestal, on a contractual basis, each to contribute its proportionate share of the cost of construction and maintenance; and

Whereas it is proposed to construct sewer lines in the said West Corners and North Endicott Sewer Districts and connect the same with the village of Endicott sewer system and share the cost thereof on a contractual basis with said village of Endicott; and

Whereas the costs of said sewer systems are excessive and will constitute an undue burden on the taxpayers in the respective sewer districts above mentioned; and

Whereas the President of the United States has stated in a message to Congress in February 1961, that the matter of pollution of the public waters are of great concern to the Federal Government and has requested the Congress to appropriate sufficient funds to assist the local governments to defray the expenses of constructing sewage disposal plants to preserve the water resources of the country; and

Whereas Representative BLATNIK has introduced H.R. 4036 and Senator HUMPHREY (for himself and Mr. MCCARTHY, Mr. MOSS, Mrs. NEUBERGER, Mr. CLARK, Mr. LONG, Mr. MORSE, Mr. WILLIAMS and Mr. PELL) has introduced S. 861, to provide for increasing the Federal grants to municipalities from a limit of $250,000 to a limit of $600,000, and to further provide that "in the case of a project which will serve more than one municipality (A) the Commissioner shall, on such basis as he determines to be reasonable and equitable, allocate to each municipality to be served by such project, its share of the estimated reasonable cost of such project, shall then apply the foregoing limitations in this clause to each such share as if it were a separate project to determine the maximum amount of any grant which may be made under this section with respect to such project and (B) for the purposes of the limitation in the last sentence of subsection (d), the share of each municipality so determined shall be regarded as a grant for the construction of treatment works"; and

Whereas it is the opinion of this town board that the passage of the foregoing legislation is of vital importance to the taxpayers of said Endwell, West Corners and North Endicott Sewer District: Therefore be it

Resolved, that this town board request Senators JAVITS and KEATING and Representative ROBINSON, to support the foregoing legislation, to the end that the taxpayers of said sewer districts in the town of Union, may be assisted in bearing the excessive costs of constructing and furnishing sewage disposal for said areas of the said town of Union; and be it further

Resolved, That the town clerk be and he hereby is directed to forward duly certified copies of this resolution to Senators JAVITS and KEATING, to Representative ROBINSON, and to Senators HUMPHREY, MCCARTHY, MOSS, NEUBERGER, CLARK, LONG, MORSE, WILLIAMS and PELL, and Congressman BLATNIK; also to the Department of Public Works of the State of New York and to the Water Pollution Control Board of the State of New York.

DONALD E. KITCHIN,
Town Clerk.

RESOLUTION OF BOARD OF SUPERVISORS OF OUTAGAMIE COUNTY, WIS.

Mr. PROXMIRE. Mr. President, the Board of Supervisors of Outagamie County, Wis., recently adopted a resolution asking that soil bank contracts require the establishment of fire prevention breaks. The resolution was submitted by the agriculture and conservation committee, and adopted by the whole board. Because of the importance of the subject with which it deals, I ask unanimous consent that it be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the resolution was referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Whereas many soil bank acres, grown up into tall matured grass and other vegetative growth, present a fire hazard during the spring and fall months; and

Whereas many of the rural areas are not well equipped with firefighting equipment; and

Whereas human lives, many farm buildings, and fire equipment are endangered by fires from grass areas immediately adjacent to these buildings; and

Whereas considerable acreage of wildlife habitat and area, tree planted areas, and forest land are endangered by these potential fire hazards on soil bank lands: Therefore be it

Resolved, That—

1. A stipulation be included in soil bank contracts that would require the establishment of fire prevention breaks according to the following specifications:

(a) Areas shall be disked at least once between August 15 and September 15 of each year. All land that was considered cropland, at the time the farm was put into the soil bank, shall be protected by a disking firebreak at least 50 feet in width—this firebreak being on the outside perimeter of the land in the soil bank.

(b) A firebreak of at least 50 feet in width shall be maintained by disking around all buildings—irregardless whether these buildings are on land in the soil bank or on adjoining lands.

A firebreak shall also be maintained by disking of at least 50 feet in width around woodlots and woods, tree planted areas, or wildlife developed areas.

2. The county ASC committee be requested to contact all present owners of soil bank land, and ask them to comply with the above fire prevention measures.

3. That copies of this resolution be sent to the county agricultural stabilization and conservation committee, the State ASC office, all members representing this area in the State legislature, and all Wisconsin Senators and Congressmen in the U.S. Legislature.

Dated this 14th day of March 1961.

HAROLD SCHMEICHEL.
WALTER LAEDTKE.
GEORGE KROES.
RUSSEL DE LAHUNT.
ROLAND SONNLEITNER.

RESOLUTION OF CALUMET COUNTY, WIS., BOARD OF SUPERVISORS

Mr. PROXMIRE. Mr. President, I have received a letter from Mr. Roland E. Miller, clerk of Calumet County, Wis., transmitting a resolution unanimously adopted by the Calumet County Board of Supervisors, requesting fire prevention on soil bank land. I ask unanimous consent that Mr. Miller's letter and the resolution be printed in the RECORD and referred to the appropriate committee.

There being no objection, the resolution was referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

RESOLUTION 1

Resolution on fire prevention on soil bank land

Whereas many soil bank acres, grown up into tall, matured grass and other vegetative growth, present a fire hazard during the spring and fall months; and

Whereas many of the rural areas are not too well equipped with firefighting equipment; and

Whereas human lives, many farm buildings and fire equipment are endangered by fires from grass areas immediately adjacent to these buildings; and

Whereas considerable acreage of wildlife habitat and area, tree planted areas and forest land are endangered by these potential fire hazards on soil bank lands: Therefore, be it

Resolved, That—

1. A stipulation be included in future soil bank contracts that would require the establishment of fire prevention breaks according to the following specifications:

(a) Areas shall be disked at least once between August 15 and September 15 of each year. All land that was considered crop land, at the time the farm was put into the soil bank, shall be protected by a disked or fallowed firebreak at least 50 feet in width—this firebreak being on the outside perimeter of the land in the soil bank.

(b) A firebreak of at least 50 feet in width shall be maintained by disking around all buildings—irregardless whether these buildings are on land in the soil bank or on adjoining lands.

A firebreak shall also be maintained by disking of at least 50 feet in width around woodlots and woods, the tree planted areas of wildlife developed areas.

2. The county ASC committee be requested to contact all present owners of soil bank land, and ask them to comply with the above fire prevention measures.

3. That copies of this resolution be sent to the county agricultural stabilization and conservation committee, the State ASC office, all members representing this area in the State legislature, and all Wisconsin Senators and Congressmen in the U.S. Legislature.

Passed and adopted by the Calumet County Board of Supervisors on March 14, 1961.

ROLAND E. MILLER,
County Clerk.

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON, from the Joint Select Committee on the Disposition of Papers in the Executive Departments, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States, dated March 8, 1961, that appeared to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MAGNUSON:

S. 1388. A bill for the relief of Neda Brajkovic; to the Committee on the Judiciary.

By Mr. McCARTHY (for himself and Mr. HUMPHREY):

S. 1389. A bill to enable producers to provide a supply of turkeys adequate to meet the needs of consumers, to maintain orderly marketing conditions and to promote and expand the consumption of turkeys and turkey products; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. McCARTHY when he introduced the above bill, which appear under a separate heading.)

By Mr. JACKSON:

S. 1390. A bill to provide that an officer of the Army, Air Force, or Navy assigned to serve as Director of the Armed Forces Institute of Pathology shall hold the rank of not less than brigadier general or rear admiral, as the case may be, while so serving; to the Committee on Armed Services.

S. 1391. A bill relating to the election of certain business corporations not to be taxed as corporations in a community property State; to the Committee on Finance.

By Mr. CHURCH:

S. 1392. A bill relating to the Indian heirship land problem; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. CHURCH when he introduced the above bill, which appear under a separate heading.)

By Mr. HUMPHREY:

S. 1393. A bill to authorize a 10-year program of grants for construction of veterinary medical educational facilities, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By Mr. HUMPHREY (for himself and Mr. KUCHEL):

S. 1394. A bill to establish standards for hours of work and overtime pay of laborers and mechanics employed on work done under contract for, or with the financial aid of, the United States, for any territory, or for the District of Columbia, and for other purposes; to the Committee on Labor and Public Welfare.

By Mr. McCLELLAN:

S. 1395. A bill to amend section 504 of the Labor-Management Reporting and Disclosure Act of 1959 so as to broaden the prohibition against certain persons holding union office; to the Committee on Labor and Public Welfare.

S. 1396. A bill to amend the act entitled "An act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes," approved July 5, 1946, as amended; to the Committee on the Judiciary.

(See the remarks of Mr. McCLELLAN when he introduced the above bills, which appear under separate headings.)

By Mr. DOUGLAS:

S. 1397. A bill for the relief of Mate Ivan Jurasic (also known as Mike Jurasic); to the Committee on the Judiciary.

By Mr. BUTLER:

S. 1398. A bill for the relief of Erich Hoffinger; to the Committee on the Judiciary.

By Mr. HOLLAND (for himself and Mr. SMATHERS):

S. 1399. A bill to waive the application of section 142, title 28, United States Code, with respect to the holding of court at Fort Myers, Fla., by the District Court of the United States for the Southern District of Florida; to the Committee on the Judiciary.

By Mr. LONG of Louisiana (for himself and Mr. ELLENDER):

S. 1400. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending three marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources, within said boundaries; to the Committee on Interior and Insular Affairs.

By Mr. FONG:

S. 1401. A bill to amend section 404 of the act of June 10, 1955, in order to establish a more equitable system of longevity grades in the field postal service; to the Committee on Post Office and Civil Service.

By Mr. CLARK:

S. 1402. A bill to provide for an effective system of personnel administration for the executive branch of the Government; to the Committee on Post Office and Civil Service.

By Mr. CARLSON:

S. 1403. A bill to repeal section 711(c) of title 39 of the United States Code, which provides for the exclusion of proceeds of certain postal rate increases in computing the gross receipts for purposes of determining classification of post offices and salary rates of postmasters; to the Committee on Post Office and Civil Service.

By Mr. CARROLL:

S. 1404. A bill for the relief of Boris Edelman; to the Committee on the Judiciary.

NATIONAL TURKEY MARKETING ACT

Mr. McCARTHY. Mr. President, at the request of the National Turkey Federation, I introduce for appropriate reference a bill to provide a supply of turkeys adequate to meet the needs of consumers, to maintain orderly marketing conditions, and to promote and expand the consumption of turkeys and turkey products.

I am joined in sponsorship of this bill by my colleague, the senior Senator from Minnesota [Mr. HUMPHREY]. I believe that Senators from other large turkey producing States may be interested in sponsoring this bill, and I therefore ask unanimous consent that the bill be held at the desk for 1 week to give an opportunity for other Senators to become sponsors.

Turkey production has become an important part of the Minnesota farm economy. In 1960 Minnesota producers raised the largest number of turkeys of any State in the Nation. Of the 82 million turkeys produced last year, 14.4 million came from Minnesota farms, nearly 14 million from California, and 7.7 million from Iowa. Other States in which farmers raised large numbers in 1960 were Virginia, with 4.4 million turkeys; Missouri, with 4.3 million; Texas, 3.9 million; Utah, Indiana, and Ohio, with almost 3 million each; and Arkansas with over 2 million.

The year-round demand for turkeys has increased steadily, and turkey is no longer limited to sales during the holiday seasons. However, the industry is troubled with marketing problems and with temporary surpluses. There is need for market development and for some stabilization measures. Turkey raising is also a highly specialized form of farming, involving many risks, and research is required to increase efficiency of production as well as development of markets.

The bill which I am introducing today is identical with the bill (S. 1395) introduced in the 86th Congress by my colleague [Mr. HUMPHREY] and sponsored by a bipartisan group of 15 Senators. The bill is the product of many years of study by members of the National Turkey Federation and of discussion with representatives of the various State turkey organizations. The bill has the endorsement of the Minnesota Turkey Growers Association and of most of the State turkey federations. I am informed that some turkey producers do not think the bill goes far enough since it does not provide for production and market controls by allotments, but they are not opposed to this bill.

The bill is called the National Turkey Marketing Act, but it is more clearly defined as an enabling act. It establishes a legal procedure through which the turkey producers can create a marketing board and set up a plan to raise funds on an equitable basis. These funds would be used for research, market development, and stabilization.

The bill permits turkey producers to develop their own program, within limits set by Congress and subject to hearings held by the Secretary of Agriculture. The Secretary also would have the power to terminate or suspend any marketing order if he finds it does not effectuate the declared policy of the bill and to call for a referendum. Any marketing order developed under terms of the act would have to have the approval of not less than 65 percent of the number of producers voting and who produce not less than 51 percent of the market turkeys, or vice versa.

Likewise, the bill includes provisions for safeguarding consumers. The Secretary of Agriculture would be required to suspend any order when the average price of turkeys equals or exceeds parity price for the marketing season.

Finally, this bill does not involve Government expenditures for price supports or Government imposed production or marketing allotments.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk, as requested by the Senator from Minnesota.

The bill (S. 1389) to enable producers to provide a supply of turkeys adequate to meet the needs of consumers, to maintain orderly marketing conditions and to promote and expand the consumption of turkeys and turkey products, introduced by Mr. McCARTHY (for himself and Mr. HUMPHREY), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

HEIRSHIP LAND PROBLEM ON AMERICAN INDIAN RESERVATIONS

Mr. CHURCH. Mr. President, for many years those of us directly involved in the legislative and administrative aspects of American Indian affairs have been aware of the so-called heirship

land problem on many reservations. From time to time, individual tribes have come before our committee asking that something be done to alleviate the fractionated ownership of individual Indian allotted lands.

Two years ago Senator James E. Murray, of Montana, then chairman of the Committee on Interior and Insular Affairs, instructed Mr. James H. Gamble, of the committee staff, to engage the assistance of Dr. William H. Gilbert and Mr. Stephen A. Langone, consultants in Indian affairs of the Library of Congress, to undertake a study of the Indian heirship problem.

It was decided that a series of questionnaires should be sent out to the various central office and field officials of the Government and officials of the Indian tribes asking for information and opinion relating to the issue of heirship lands. The questions were directed to the central office of the Indian Bureau, the area offices of the Indian Bureau, the agencies of the Indian Bureau, to the Solicitor's Office of the Interior Department, to the field examiners of inheritance, and to the various tribal councils.

The returns from these questionnaires were compiled into a volume of materials which have been issued as part I of "The Indian Heirship Land Survey." In part II of "The Indian Heirship Land Survey" there is presented an analysis by the committee staff of the materials presented in part I, together with an index of the two parts. These reports have been recently made available as a result of 2 years of diligent labor on the part of the committee staff.

Mr. President, I ask unanimous consent that the analysis may be printed in the RECORD at this point in my remarks.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SUMMARY ANALYSIS: WHAT IS THE INDIAN HEIRSHIP LAND PROBLEM?

Heirship land is land owned by two or more Indians with the title held by the U.S. Government for them. This multiple ownership creates problems of administration and effective utilization of the land.

The Indian heirship land problem had its beginnings in the last century. Indian land was considered by the Indians as a tribal asset and when the Federal Government negotiated treaties, in deference to this point of view, the Indian land was always recognized by the Federal Government as belonging to the tribe as a whole. During 1887, the General Allotment Act (24 Stat. 388) was passed providing that tribal land (and in some cases Federal land) would be divided into tracts and given to individual Indians. It was thought that with land of his own the Indian would become more accustomed to the non-Indian's concept of private land ownership. The General Allotment Act provided that title to such allotments would be held in trust by the Federal Government for a period of 25 years. This was to protect the Indian until such time as he could assume full responsibility for the land.

It was obvious by 1906, however, that many allotted Indians were not then capable of managing the lands and an act was passed (34 Stat. 325) authorizing the President in his discretion to extend the period of trust. From time to time this trust period has been extended until at this time there remain 12,235,411 acres of individual Indian land with the title still held in trust by the Federal Government.

When the original allottee died his estate was probated and heirs were given a proportionate undivided interest in the tract, but the title was continued in trust. Through the years, successive probates affecting the same tract have taken place until at the present time it may have over 100 heirs holding various fractional undivided interests. One case brought to the attention of the committee serves as an excellent example of the compounding of this problem. This particular case (on the Wind River Reservation) involves 104 heirs and 7 estates not yet probated. Their heirs are described as both enrolled and nonenrolled Indians, resident and nonresident, non-Indians, minors, competent and incompetent Indians. The 7 unprobated estates are expected to add 22 additional heirs to the 104. One of the agency reports describes the effect of continuing fractionation on the utilization of Indian heirship lands as follows:

"The fact should be readily apparent that the probate problem is rapidly reaching an impossible situation, and if something is not done soon to reverse the trend of dividing and subdividing inherited interests in lands, it will clearly be impossible to sell, lease, or otherwise dispose of such allotted Indian land in the future."

The Comproller General, in his report to Congress, also made this point and discussed a particular case to substantiate it, as follows:

"On March 1, 1954, there were 66 heirs to one Winnebago allotment while on March 1, 1955, the heirs to this allotment had increased to 90, an increase of 24 heirs in 1 year."

STATISTICAL DATA ON HEIRSHIP LAND

The staff experienced great difficulty in using the statistics presented by the field offices of the Bureau of Indian Affairs. In some cases the statistics were contradictory and in others either incomplete or omitted entirely. Where possible, corrections have been made, but there remain unresolved conflicts in the statistical data. This is quite evident in attempting to prove totals by addition of subtotals.

There are about 12,235,411 acres of individual Indian land for which the Federal Government holds title in trust. Of this acreage about 6,222,754 acres, comprising 40,787 tracts, are already in heirship status. In an effort to determine how badly fractionated these lands are the number of heirs per tract was computed. We find that about half of the allotted land in heirship status is owned by five or less heirs, while the other half is owned by six or more. The area offices with the greatest amount of such lands are Aberdeen with 2,457,376 acres and Billings with 1,699,903 acres.

Of the lands in heirship status, there are approximately 211,344 acres irrigated, 869,037 dry farm, 4,381,109 grazing, 405,312 forest, and 309,225 classified as "other" types of land which include homesites, wasteland, etc. This analysis has established the best estimate of the value of heirship land (excluding timber and minerals) as $179,382,636. Over half of this heirship land (3,629,852 acres) is now being used by non-Indians, 541,305 acres are not used at all and 45,565 acres are used by the tribes. Of the 541,305 acres not used, 473,437 acres are not used because of the complicated heirship problem. The total loss to heirs as a result of such nonuse is estimated to be $417,868 per year.

The geographical location of heirship land, as reported, reveals that 711,992 acres are in public domain allotments, 1,239,554 acres adjoin tribal trust land, and 2,883,521 acres are within the reservation boundaries but not contiguous to tribal trust lands.

HOW DOES THE HEIRSHIP PROBLEM AFFECT THE INDIAN HEIRS?

One of the problems stated in the reports from various agencies was the difficulty in obtaining all heirs' signatures before leasing the land. As stated by the Secretary of the Interior to this committee:

"Under the existing law, a tract of trust or restricted Indian land that is held in multiple ownership can be sold or leased under most circumstances only with the consent of all of the owners of the undivided interests. This law for Indians is in marked contrast to the law that applies to non-Indians, because under the laws of the various States any one of the persons who owns an interest in land as a tenant in common forces a partition or sale of the land."

The staff notes, however, that the Bureau of Indian Affairs of the Department of the Interior interprets the law differently and states on page 8, part 1, of this report that—

"In the act of July 8, 1940 (56 Stat. 745), the Congress granted authority for the superintendents of the various reservations to lease restricted allotments when the heirs and devises had been determined and when such land was not in use by any of the heirs, in those cases where the heirs were not able to agree on a lease within a 3-month period by reason of their number, their absence from the reservation, or for any other cause."

Oftentimes, the owners cannot come to an agreement concerning what action should be taken to utilize the lands. As a result there is a stalemate which precludes any use or disposal of the land. A substantial amount of the land (due to this factor) is not leased and the heirs are losing up to a half million dollars yearly as a result. Because Indians, like other segments of our population, change their place of abode, they frequently cannot be located to ascertain what disposition they want to make of their land. Specifically, the heirs encounter the following problems:

1. Although the heir may own interests in several tracts of land, none can be used to live on or farm without approval of all other heirs.

2. Welfare assistance may be withheld because the heir owns an interest in such land. (This varies from State to State.)

3. Many times the land cannot be leased or sold due to difficulty in obtaining signatures, and the heir therefore loses income each year.

4. The heir cannot sell all his scattered interests in order to buy one consolidated unit.

5. Partitioning of the land is seldom feasible since it would result in subdividing tracts that are not now economic units.

6. Present procedures to sell the land are so complicated that an heir to a seriously fractionated estate encounters an all but impossible situation. In many instances the yearly income to an heir, and indeed, the entire value of his estate, may be only a few pennies.

The extent to which the heirs are interested in the administration of their lands is indicated by the varied number and kinds of requests made of agency personnel by the heirs. For example, during fiscal 1958, 1,723 heirs asked for immediate probates, 2,215 requested the tribe buy the land, 20,872 wanted it leased, 1,226 attempted to sell it to other heirs, and 12,835 requested it be disposed of in some way. In all a total of 38,871 requests were made of the agency personnel concerning their heirship interests during fiscal year 1958.

PROBLEMS OF ADMINISTRATION

The administration of heirship lands involves all levels of the Bureau of Indian Affairs—the central office at Washington, the 10 area offices and the field agencies—besides the Office of the Solicitor of the In-

terior Department and the 11 field examiners of inheritance.

The central office is affected by the problem in the following ways among others: (1) increase in the number of recordings required in maintaining official land records; (2) increase in the number of probate proceedings to be examined in determining current title status; (3) complicated computation of large common fractions in determining ownership of individual interests where common denominators have reached 54 trillion, billions are not uncommon, and millions are commonplace; and (4) increased work involved in answering inquiries concerning family histories in connection with the ownership of undivided interests in land.

The work of the area offices has been made more complicated and more costly by the heirship problem. For example, it was estimated at the Aberdeen area office that 40 percent of the realty work consisted of heirship matters and that by 1970 this would increase to 60 percent.

At many agencies the entire realty structure is affected by the tremendous workload of leasing, selling, and preparation of data for probate of estates. In addition, there is considerable recordkeeping that takes place after probate since there are new heirs for whom records must be made and kept. The cost of this work is rising every year and the administrative structure is often unable to keep up with this increase. Costs of leasing often exceed the returns to the Indians.

An additional complication is introduced into the administration of heirship land when subsurface rights are reserved to the owner at sale of the surface interests. The heirship problem continues so long as the subsurface interests remain in trust status.

One of the principal administrative problems at the agency level is in maintaining current mailing lists of heirs. When 100 percent concurrence of owners is necessary for a sale or lease and there are a large number of heirs, the problem of locating them often becomes insuperable. This was emphasized in many, if not most of the agency reports. In finding out what the heirs want done with their land, this is a primary stumbling block.

In fiscal year 1958, the Department of the Interior had 112 employees on the payroll at a cost of $675,387 who were engaged in the heirship problem. The Department estimates that by 1970 there will be 122 employees at a cost of $834,055. This is a minimal cost figure due to the complexities of the subject and the other Government agencies involved. The Interior Department in reporting on S. 311 of the 83d Congress stated that—

Thousands of such (heirship) allotments are subject to so many undivided interests that they cannot be effectively utilized by the Indian owners, and an enormous amount of Federal money is expended in the cumbersome mechanism required for the administration of these lands.

These totals included only the area offices and agencies of the Indian Bureau and the examiners of inheritance. The central office of the Indian Bureau and of the Solicitor's Office, could not provide such cost figures and this constitutes an unknown additional item for each year noted above. The estimated annual loss in 1958 of $417,868 to the Indians due to nonuse of heirship lands could be added to the total above making well over a million dollars in costs to the Federal Government and to the heirs themselves.

PREVIOUS HEIRSHIP REPORTS

Three recent studies of the Indian heirship land problem have been made. Two of the studies concern specific reservations and the third was an audit report by the Comptroller General to the Congress concerning the administration of Indian lands by the Bureau of Indian Affairs. The two studies of specific Indian reservations referred to are: Schoenfeld, William, "Oglala Sioux Trust Land Heirship Problem; Pine Ridge Reservation," July 1, 1955; Saunderson, Mont H., "Indian Heirship Lands; an Economic Study (Blackfeet Reservation)."

In the study by Mr. Schoenfeld it is pointed out that original allotments were not economic units and with the resulting fractionation are now totally inadequate to support an Indian family. Reference is made to the fact that income from these lands is "not frequently sufficient to warrant writing a Government check for the amount." Heirs are reluctant to sell because of mineral possibilities. If all the rangeland on the Pine Ridge Reservation were consolidated and divided into economic units they would support 600 of the current 2,200 families living there. In discussing the possibility of lending money to an Indian farmer or ranch operator, Mr. Schoenfeld states that there are very few cases on record where a 100-percent mortgage has resulted in success. Further, the point is made that at least $10,000 of the individual's own funds must be used and even then the chances of breaking even are "practically nil."

In the Saunderson report which was based on a study of the Blackfeet Reservation, the minimum capital for a stock ranch on consolidated heirship land would be $42,000, for a wheat farm $40,900, and for an irrigated farm $37,750. Emphasis is given to the point that if a ranch or farm is to pay off the debts it must "be considerably above the minimum in size and it must have better than average management." In discussing needed capital Saunderson states that "the small stock ranch could not make adequate financial progress with 50-percent equity" whereas wheat or irrigated farms could make acceptable progress with 50-percent equity.

The third report referred to is the audit report to the Congress of the United States; Administration of Indian Lands by Bureau of Indian Affairs, Department of the Interior, January 1956 by the Comptroller General of the United States. A typical heirship land case is cited where 40 acres of land earn an annual income of only $20, that must be divided among 75 heirs. Only 1 of the heirs receives more than a dollar, while 66 receive 25 cents or less. An extreme case is also cited where 1 heir receives only 3 cents. In discussing probate cases, mention is made of a probate action where of the 39 heirs, 14 received less than 10 cents each. The fractional shares in this estate ranged from 837/4,515,840 to 263,655/4,515,840.

In summing up the problem one of the recommendations made was as follows:

"Congress consider legislation to authorize the Secretary of the Interior to sell or partition inherited lands held under trust patent, without requiring the consent of all competent owners and without limiting that authority, as at the present time, to cases where one or more of the heirs is determined to be incompetent."

SOME LEGISLATIVE ATTEMPTS TO HELP SOLVE THE INDIAN HEIRSHIP LAND PROBLEM

Recent legislation (1956–58) has provided mechanics to help solve the heirship land problem at certain agencies. It was felt that a study of such legislation and its degree of success would be very pertinent to this analysis. The legislation referred to has concerned the following reservations: Tulalip (70 Stat. 290); Standing Rock (72 Stat. 1762); Crow Creek (72 Stat. 1766); and Lower Brule (72 Stat. 1773). Three different formulas were enacted: (1) At Tulalip any heir can bring an action in the State courts under State law for partition or sale of his heirship land; (2) at Standing Rock the heirs owning at least a 25-percent interest in the tract can request the Secretary of the Interior to sell or partition the land; and (3) at Lower Brule and Crow Creek the Secretary of the Interior can sell or partition heirship land at the request of heirs owning a 51-percent interest.

On September 12, 1960, the chairman of this committee requested the Secretary of the Interior to report on any progress in solving the heirship problem brought about by these acts.

Under the Tulalip legislation (70 Stat. 290) where a single heir can bring the action, 12 allotments have been sold. It is significant that 12 have been sold even though the heirs have had to pay court costs of $500 to $1,000. Were this cost not a factor, it would seem reasonable to assume that other heirs would avail themselves of this legislation. The effect of such sales on the reservation has been good, bringing about the location of industry on these lands. The Secretary points out that in the absence of such legislation this industrial development could not have taken place.

At Standing Rock, while the tribe is intending to purchase seven tracts and one heirship tract is to be partitioned, no heirship land has been removed from that status through use of this legislation. The Secretary's letter makes no specific comment concerning the use of this legislation at Crow Creek and it is therefore assumed that no progress has been made in the solution of the problem at that reservation.

The Secretary's letter states that the use of this legislation will accelerate "as the Indians and tribe become more familiar with the provisions of the law." It would seem that when such legislation is passed the Department of the Interior would feel an obligation to notify everyone concerned.

The Comptroller General in his report to the Congress on Indian lands discusses the problem of how many heirs should be needed to bring about a partition or sale and compares Indian and non-Indian law as follows:

"Although there appears to be no clear authority in Federal statutes for the sale or partition of undivided interests in Indian land without consent of the competent owners, the right of any owner of an undivided interest in land to force a partition or sale of land not under Federal jurisdiction is well settled by the courts. In this connection, section 27 of the title 'Partition,' volume 40 of American Jurisprudence, states that 'whenever persons interested in land as owners and cotenants cannot, by consent and agreement among themselves, make a division thereof, that is, have a voluntary partition, any one or more of them may apply for a partition by judicial proceedings—a compulsory partition—which takes place without regard to the wishes of one or more of the owners.' Section 83 of the same title states that 'the manifest hardship arising from the division of property of an impartable nature has been almost universally avoided by statutory provisions which give to a person entitled to partition the right to have the premises sold, if they are so situated that partition cannot be made.'"

The method of handling such estates for non-Indians has prevented such a situation from developing although all the basic ingredients were present. In both cases (Indian and non-Indian land ownership) the single owner, the probate, and the multiple heirs are present.

One of the factors that must be kept in mind concerning the Indian heirship land problem is that present laws make it difficult for an Indian heir to sell his interests and consequently make it difficult for any heir to consolidate and utilize his interests.

FINDINGS

Heirship land is a major problem for our Indian population. Resulting ramifications create other problems of administration and use that are themselves approaching the point of becoming insoluble.

1. Approximately 6 million acres of land is now in heirship status and another 6 million acres will become heirship land in the near future unless prompt action is taken.

2. The heirship problem is not only present in surface ownership of land but also in mineral ownership.

3. Requiring all heirs to sign lease or sale papers is one of the foremost obstacles to the American Indian in utilizing his heirship land, and to the Federal Government in administering it.

4. The heirs themselves have expressed an active interest in the problem as evidenced by the 38,871 requests for various actions made to Bureau of Indian Affairs officials during fiscal year 1958.

5. Most local jurisdictions of the Bureau feel that present authority is inadequate to solve the problem and are almost unanimous in recommending corrective legislation.

6. Some tribal councils have evidenced an interest in this problem as it relates to consolidation of the tribal land base.

7. Continuing to hold allotted Indian lands in trust or restricted status without any consideration given to the individual's ability to manage his own land without supervision is serving to intensify the heirship problem.

Mr. CHURCH. Mr. President, simultaneously with the Senate committee study of heirship the House committee has also been attacking the same subject but in a different way. Early in the 86th Congress the House Committee on Interior and Insular Affairs instructed Dr. J. L. Taylor, of the committee staff, to obtain the assistance of the Library of Congress consultants in Indian affairs, Mr. Stephen A. Langone and Dr. William H. Gilbert, to make a comprehensive study of the heirship problem and to prepare a thorough analysis of their findings.

In anticipation of the formulation of legislation on the subject, the House committee sought to determine the opinions of the Indian heirs who are directly concerned. It sought for answers to questions regarding individual experiences with heirship land, their particular problems with their land, what they think should be done about this matter and why. Since hearings would be physically impossible over so wide an area as the distribution of the heirs was extended, it was decided that all known heirs would be contacted by means of a questionnaire through the mail. House Committee Print No. 27, volumes I and II, issued December 31, 1960, contains the responses of the Indians to the questionnaire. It gives a complete picture of the range of opinions of Indian owners of heirship land.

Mr. President, the congressional committee staffs have compiled for us the most complete and up-to-date information on what the heirship problem is and where it exists. We now have adequate background material on which to frame a legislative solution to the multiple ownership of allotted land. Therefore, I instructed the staff to prepare a bill that would effectively and realistically aid in the alleviation of this long-standing and complex problem.

I wish to make it very clear that this proposal is a vehicle for the purpose of exploring further the viewpoints and wishes of the people most affected by this problem. We expect to hold hearings on the bill in the near future, and I am sure we will receive many valuable suggestions and recommendations which will aid us in our effort to enact effective heirship legislation.

This proposal is quite different from others which have come before us in recent years. It is the result of a prolonged and detailed investigation of the problem by the staffs of the Senate and House Committees on Interior and Insular Affairs. And, it is to the character of this investigation that I would most particularly like to draw attention. It was directed not only to the Government officials involved and the tribal officials but also to the Indians themselves, the owners of heirship land whose interests are most immediately involved in any legislative action on this subject.

Mr. President, I ask unanimous consent that the bill, and an accompanying explanatory statement prepared by the staff, be printed following my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill, together with the explanatory statement, will be printed in the RECORD.

The bill (S. 1392) relating to the Indian heirship land problem, introduced by Mr. CHURCH, was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That upon the request of any owner of an Indian interest in any tract of land in which any undivided interest is held by the United States in trust for an individual Indian or an Indian tribe, or in which any undivided interest is held by an individual Indian or an Indian tribe subject to a restriction against alienation imposed by the United States, the Secretary of the Interior is authorized and directed to partition or to sell all undivided Indian trust or restricted interests in the land, unless the Secretary finds that such a partition or sale would not be in the best interests of the Indian owners and reports annually to the Congress the basis for his finding in each case. Any interest in oil, gas, or other minerals that is reserved to an Indian owner in any sale made pursuant to this section shall be reserved in a nontrust and unrestricted status, unless the Secretary makes the determination referred to in subsection 10(b). The Secretary is authorized to execute all appropriate title documents for sales made pursuant to this section, and to distribute the proceeds of such sales in accordance with the regulations applicable to individual Indian moneys. No sale under the provisions of this section shall include any mineral estate that has been reserved to any Indian tribe by other provisions of law.

SEC. 2. The Secretary may, when he deems it in the best interests of the Indian owners, obtain a power of attorney from the owner of a non-Indian or unrestricted interest in the land to be sold authorizing the Secretary to sell and convey such interest.

SEC. 3. For the purposes of this Act, the Secretary may represent any Indian owner who is a minor, or who is non compos mentis, and after giving reasonable notice by publication of the proposed sale, he may represent an Indian owner who cannot be located.

SEC. 4. All sales of lands authorized by section 1 of this Act shall be by competitive bid, except that a sale may be made to one of the owners of an interest in the land, or to the tribe within whose reservation the land is located, at not less than the appraised value of the land if none of the owners after reasonable notice objects. If a timely objection is made, the sale shall be by sealed, competitive bid, subject, upon request made prior to the solicitation of bids, to the right of the tribe or any of the Indian owners to ask immediately after bids are opened that the land be sold at auction, in which event auction bidding shall be limited to persons who submitted sealed bids in amounts not less than 75 per centum of the appraised value of the land, the Indian owners, and the tribe. The highest sealed bid shall be considered the opening auction bid. No sale shall be made unless the price is substantially equal to the appraised value. Title to any land purchased by a tribe may be taken in trust for the tribe if it is located within the boundaries of the reservation. Title to any land purchased by an individual Indian, or by a tribe if the land is outside the boundaries of the reservation, shall be taken in the name of the purchaser without any restriction on alienation, control, or use, unless the Secretary makes the determination referred to in subsection 10(b) with respect to an individual Indian.

SEC. 5. (a) In order to assist tribes that wish to purchase land offered for sale under the provisions of this Act, the Secretary of the Interior is authorized to make a loan to any tribe under the conditions stated below, provided the tribe does not have funds available in an amount that is adequate to make the purchase and is unable to obtain a loan from other sources. Such loan shall be made from the revolving funds referred to in section 9 of this Act.

(b) The amount of the loan shall not exceed the appraised value of the land plus the value of any other property the tribe may mortgage or pledge as security for the loan.

(c) The tribe shall give to the United States a mortgage on the land purchased with the loan, and on any other tribal property which the Secretary deems necessary to secure the loan adequately.

(d) The loan shall be for a term of not to exceed twenty-five years, and shall bear interest at a composite rate consisting of (1) a rate equal to the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the month in which the loan is made, as such rate is determined by the Secretary of the Treasury, plus (2) a rate, to cover losses and administrative expenses, determined by the Secretary of the Interior, which rate shall be not less than one-half of 1 per centum and not more than 1 per centum. The loan need not require repayment in equal installments, but it shall require repayment according to a schedule that will fully amortize the loan within the time specified. In the event of a default in the repayment of the loan, the Secretary of the Interior shall take such action as he deems necessary to protect the interests of the United States. If during the period of repayment the tribe is awarded a money judgment against the United States in excess of the unpaid balance of the loan, the entire unpaid balance shall be collected from the appropriation to satisfy the judgment.

(e) Before a loan is made the tribe shall submit for approval of the Secretary of the Interior a master plan for the use of all lands to be purchased. Any tribe preparing a plan may call upon the Secretary for technical assistance and the Secretary shall

render such assistance as may be necessary. Such plan shall include provision for consolidation of holdings of the tribe, or acquisition of sufficient lands in conjunction with those held to permit reasonable economic utilization of the land and repayment of the loan. The Secretary shall not approve a tribal plan unless it is agreed to by a majority of adult tribal members, both on and off the reservation, who vote in a referendum for that purpose. Such plan may be revised from time to time with the approval of the Secretary, but without the need for a referendum.

(f) The cost of managing any land purchased by a tribe pursuant to this Act shall be borne by the tribe and not by the United States.

SEC. 6. Any tribe that adopts, with the approval of the Secretary of the Interior, a plan pursuant to subsection 5(e) of this Act, or any other plan that does not involve a loan from the United States but which provides for the consolidation, management, use, or disposition of tribal land, is hereby authorized, with the approval of the Secretary of the Interior, to sell any tribal land or other property in furtherance of such plan.

SEC. 7. The Secretary of the Interior shall approve no plan pursuant to this Act that contains any provision that will prevent or delay a termination of Federal trust responsibilities with respect to the land during the term of the plan.

SEC. 8. Nothing in this Act shall repeal any authority to sell trust or restricted land that is conferred by any other provisions of law.

SEC. 9. (a) All funds that are now or hereafter a part of the revolving fund authorized by the Act of June 18, 1934 (48 Stat. 986), the Act of June 26, 1936 (49 Stat. 1968) and the Act of April 19, 1950 (64 Stat. 44), as amended and supplemented, including sums received in settlement of debts of livestock pursuant to the Act of May 24, 1950 (64 Stat. 190), sums collected in repayment of loans heretofore or hereafter made, and sums collected as interest or other charges on loans made, shall hereafter be available for loans to organizations of Indians, Eskimos, and Aleuts (hereinafter referred to as Indians), having a form of organization that is satisfactory to the Secretary, and to individual Indians of one-quarter degree or more of Indian blood who are not members of or eligible for membership in an organization that is making loans to its members, for any purpose that will promote the economic development of such organizations and their members, or the individual Indian borrowers.

(b) The appropriation authorization in section 10 of the Act of June 18, 1934 (48 Stat. 986), is hereby amended by increasing it from $10,000,000 to $50,000,000.

SEC. 10. (a) In order to prevent the problem of multiple ownership of undivided interests in Indian trust and restricted land from growing as rapidly as it has grown in the past, and at the same time protect the land ownership interests of Indians who need special protection, the provisions of this section shall apply notwithstanding any other provision of law.

(b) In any case of transfer of title to Indian trust or restricted land or an interest therein by inheritance or devise, the title shall pass by operation of law in a nontrust and unrestricted status unless the Secretary of the Interior determines before the close of the probate proceedings that the Indian heir or devisee lacks ability, knowledge, experience, and judgment to manage his business affairs with such reasonable degree of prudence and wisdom as will be apt to prevent him from losing his property or the benefits thereof.

(c) The Secretary of the Interior shall not approve any acquisition by an Indian of title to land or an interest in land in a trust or restricted status unless he makes the determination referred to in subsection (b) of this section.

(d) The Secretary of the Interior shall not extend by a general order applicable to a class of Indians a trust period that would otherwise expire on or after January 1, 1964, and a trust period that expires prior to such date shall not be extended beyond that date by a general order. After January 1, 1964, a trust period shall be extended only by an order applicable to specified individual Indians and only on the basis of the determination referred to in subsection (b) of this section. Any extension of a trust period on an individual basis after January 1, 1964, may be for such term of years as the Secretary of the Interior deems appropriate, for the life of the individual, or until the individual reaches the age of 21, subject to the right to terminate the trust in accordance with the provisions of this Act or any amendment thereof or supplement thereto.

(e) Any trust or restrictions on the title of an individual Indian that do not extend for a stated number of years or for an ascertainable term shall terminate on January 1, 1964, unless extended by the Secretary of the Interior in accordance with subsection (d) of this section.

(f) The Secretary of the Interior shall review as rapidly as possible each trust or restriction on title to land or an interest in land that extends beyond January 1, 1964, and he shall terminate the trust or restriction on title unless he makes the determination referred to in subsection (b) of this section. Thereafter, the Secretary of the Interior shall continue to make such reviews in order to keep his determinations current.

(g) If the Secretary of the Interior terminates the trust or the restrictions on title to land or an interest in land owned by an Indian (and for this purpose a failure to extend a trust period shall not be regarded as a termination), the Indian may apply to the United States district court for the district in which the land is located for an order setting aside the Secretary's action and the court shall have jurisdiction to issue such order if in its judgment the Indian does not meet the standard referred to in subsection (b) of this section.

(h) The Secretary of the Interior is authorized to issue such orders, documents, or evidences of title as he may deem appropriate to carry out the provisions of this section.

SEC. 11. This Act shall become effective six months after the date of enactment. During this interim period, the Secretary of the Interior shall notify each Indian tribe of the rights afforded by this Act in order that the tribe may make its plan for consolidating Indian holdings. Upon the conclusion of each Indian probate proceeding after the date of this Act, the Secretary shall also notify each Indian heir of the rights afforded by this Act.

The explanatory statement presented by Mr. CHURCH is as follows:

EXPLANATORY STATEMENT OF A BILL RELATING TO THE INDIAN HEIRSHIP LAND PROBLEM

This particular bill is designed to provide an effective program to assist individual Indians and tribes in alleviating the heirship land problem and to prevent other lands from entering this status. It is difficult to arrive at the necessary balance needed between the indiscriminate disposal by Indians of their land as opposed to an effective solution to this problem. Such legislation must provide for partitionment of Indian interests if feasible, an opportunity for the heir to buy out other interests, an opportunity for the tribes to purchase the more important heirship tracts needed to strengthen their economy, and a realistic approach to the problem that will result in the more efficient and less costly administration of trust property. The legislation must also provide the Secretary of the Interior with sufficient authority to solve the problem and yet leave enough discretion on his part to protect the best interests of Indian owners in each case. This bill is based on thorough congressional studies of the problem through contact of Government officials directly concerned, the heirs themselves and the tribes.

Section 1: Provision is made for a single heir to bring about a partition or sale of an heirship tract. An examination of the various acts of Congress passed in recent years having to do with heirship land indicated that the most effective method in solving the heirship problem is that requiring only one heir to bring the action. The specific legislation referred to is the Tulalip (70 Stat. 290). That legislation would be even more effective if the Indians did not have to pay necessary court costs of such actions. This bill authorizes a single heir to bring an action without court costs to hamper him in these proceedings. The desire of the Indians themselves for such legislation is evident when we consider that 55 percent of the heirs answering a congressional questionnaire wanted all their heirship lands sold and another 13 percent wanted to sell some. One important point that was established in both congressional studies concerns the heirs living on heirship lands in which they own an interest. In many cases these individuals may not be financially able to move from the land should it be sold. Therefore, this bill provides that if partitionment is not feasible the Secretary may withhold approval of sales in cases where it would not be in the best interests of such Indian owners.

The bill is also tailored to meet the problem of mineral rights. Should an heir decide to sell the land and retain the mineral rights in trust, the heirship problem would continue. The Federal Government's responsibility for probating estates, posting interests, disbursing income, etc., would remain and the heirship problem with it. At the same time it is recognized that if the Indian does want to retain his mineral rights he should certainly have that opportunity. The studies of both the Senate and House Interior Committees have recognized this problem and section 1 of the bill was therefore drafted in such a way that this potential mineral heirship problem would not arise and yet the Indian is given the option of retaining the mineral interest.

One of the most important factors that must be kept in mind concerning this section is that it provides a device for the individual Indian and the tribe to sell scattered interests and buy one consolidated unit that he or they can use for either residential or commercial purposes.

Section 2: The Secretary of the Interior is given the authority to sell a non-Indian interest (with power of attorney) in heirship lands. Both congressional studies have noted this problem since there are non-Indians, Mexican Indians and Canadian Indians owning interests in heirship lands. A survey of their (alien Indian and non-Indian) opinion has been made and the majority want to sell their heirship interests and would therefore utilize this particular method. The Department itself in a report on H.R. 1150, 86th Congress, recognized this problem also. This particular section of the bill is designed to provide the opportunity for these people to sell their land and this in turn would be beneficial to those American Indians holding interests in the same tract.

Section 3: One of the greatest problems in the field of heirship land is that Indian owners are many times impossible to locate and as a result the land may lie fallow. Another problem is that the cost of guardianship for minors would in many cases exceed the income from the estate. Section 3 of this

bill authorizes the Secretary of the Interior to represent the non compos mentis, minors, and heirs who cannot be located.

To illustrate how widespread this problem is, the House Interior Committee attempted to contact heirs to survey their opinions on the subject. Many of the names on the mailing lists of heirs supplied by the Bureau of Indian Affairs had notations stating that addresses were not known. Of the 52,000 with addresses to whom the questionnaire was mailed, over 10 percent could not be delivered.

Section 4: Special preference is given to heirs and the tribe in purchase of heirship lands offered for sale. Many heirs expressed a desire to sell their interests either to another heir or the tribe, and others expressed a desire to purchase the other interests. In addition to the Senate and House studies calling attention to this situation, it was recognized in a report of the Interior Department to the Senate Interior Committee stating in part that "each of the tenants in common should be given a preferential right to buy the land that is to be sold and thus retain it in Indian ownership," and that "if none of the tenants in common wants to buy the land, the tribe should be given a right to buy the land either by negotiation at the appraised value, or by meeting the high competitive bids, or by participating in an auction." This bill, then, allows the individual or the tribe to purchase such lands with the consent of the other owners. There is need for a careful balance here between the preference rights of the purchaser and the right of the other heirs to a fair price for their interest. Therefore, the individual owners also have a right to object to this special preference if they feel it is not a fair price. The procedure for sealed bids and then an auction is a protective device for the heirs and the tribe, since some tribes do own interests in heirship tracts and they are given the right to protect such interests.

Any lands purchased by a tribe may be taken in trust if they are within reservation boundaries. Heirship lands purchased by a tribe or an heir that are outside of the reservation would not be taken in trust, except in the case of an individual Indian in need of continued supervision.

Section 5: Long-term loans are authorized to assist tribes not having adequate funds of their own to purchase needed heirship lands and to consolidate present holdings into more economic areas. This section is intended to implement the opportunity for tribes who have expressed interest in doing so to purchase needed heirship lands and to provide the Secretary of the Interior with authority to see that such programs are economically feasible for the tribe concerned. Loans would be made from the revolving credit loan fund. In order to assure that any plan involving the use of loans has the support of the Indians, the bill provides that the plan must be agreed to by a majority of adult tribal members voting in a referendum. This process would assure that any plan presented to the Secretary of the Interior would have been thoroughly discussed by the tribal members and they in turn would have an adequate understanding of the program and would have had an opportunity to express their views.

Section 6: Tribes are authorized to sell any tribal land to further their land consolidation programs. This particular section (6) is intended to assist any tribe that adopts an approved plan to have more flexibility in consolidating its holdings and purchasing needed heirship lands. A typical land consolidation program might very well provide for the sale of inferior land or land that cannot be effectively utilized in order to purchase other more desirable heirship land.

Section 7: In an effort to avoid any programs that might tend to confuse any termination activities, no plan can be approved that will prevent or delay such actions.

Section 8: All other authorities through which this problem can be solved or alleviated are not affected by this bill.

Section 9: All funds presently authorized for loans to Indians would be consolidated into one revolving fund. This is in keeping with a recommendation of the Senate Appropriations Committee. An additional $40 million is authorized for loans, making a total of more than $50 million in authorizations for this purpose and other requirements.

Section 10: The intent of this section is to provide the Secretary of the Interior with authority to determine whether an individual Indian is capable of controlling his land and if so, to give him a fee title to it. Many Indians have informed the Congress that they consider themselves fully capable of doing so. In the past there has been an extension of the trust period over land without any consideration given to whether the individual wants it or if continued trusteeship is needed. This has been one of the prime factors in compounding the heirship problem. There is, as brought out in both the Senate and House studies, a potential 6 million acres of land that will become heirship unless some action is taken, and as the Comptroller General stated in his report to the Congress, "All allotted lands will fall eventually into heirship status unless the land is removed from trust status before the death of the allottee." The Comptroller further recommended that "* * * the Congress consider legislation which would—without prejudicing any existing exemption from taxation constituting a vested property right—authorize the Secretary of the Interior to issue patents-in-fee, certificates of competency, or orders removing restrictions, whichever is appropriate, to all Indians holding restricted lands who have been determined by the Secretary to be competent, without requiring the application or authorization of the Indian, where such authority is not granted under existing legislation." This section incorporates the findings of Senate, House, and Comptroller studies on the subject by providing the Secretary with authority to take such actions and yet giving the Indian an opportunity to protect his interest.

Section 11: A period of delay is provided during which time the Secretary can notify the tribes and they can plan their programs. Provision is also made for notifying heirs of their rights under this legislation. This period can also be utilized by the Department to formulate necessary regulations, etc., to implement the program.

VETERINARY MEDICAL EDUCATION FACILITIES

Mr. HUMPHREY. Mr. President, I introduce for appropriate reference a bill to authorize a 10-year program of matching grants for construction of veterinary medical education facilities. It would provide:

First. For each of the next 4 years $5 million for expansion and improvement of existing schools of veterinary medicine, and

Second. For each of the next 10 years $1 million for construction of new schools of veterinary medicine.

The Federal Government's share of the cost would be limited to two-thirds. The program would be administered by the Surgeon General of the U.S. Public Health Service.

The proposed legislation is based on the fact that veterinary medical science plays a crucial role not only in the Nation's agriculture effort, but in human health as well. The cornerstone of all science—veterinary and other—is education. But today veterinary education faces a critical shortage of modern facilities comparable to the shortage which exists as regards other schools of medicine. The result is to seriously handicap the Nation.

The bill represents an effort to cope with but one phase of the overall problems of veterinary science. Other actions will also be necessary. There is a serious insufficiency of veterinarians today and far from being remedied, the manpower crisis will be growing more acute unless a comprehensive program—of which the bill being introduced today is but one part—is developed. This will require the fullest cooperation of the profession, the States, and municipalities with the Federal Government. This fact is elaborated upon in a committee print on veterinary science to be released next month by the Subcommittee on Reorganization and International Organizations, of which I am the chairman.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1393) to authorize a 10-year program of grants for construction of veterinary medical educational facilities, and for other purposes, introduced by Mr. HUMPHREY, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

AMENDMENT OF SECTION 504(a) OF LABOR - MANAGEMENT REPORTING AND DISCLOSURE ACT OF 1959

Mr. McCLELLAN. Mr. President, I introduce for appropriate reference a bill to amend section 504(a) of the Labor-Management Reporting and Disclosure Act of 1959.

In January 1961 the Permanent Subcommittee on Investigations, under its authority to investigate criminal and other improper activities in the labor-management field, held hearings on James R. Hoffa, provisional general president of the International Brotherhood of Teamsters, and the continued control of segments of the Teamsters organization by criminals and powerful underworld figures.

As I stated publicly at the conclusion of those hearings, the evidence received by the subcommittee clearly demonstrated the need for stronger laws to protect the rank-and-file workingman against the depredations of hoodlums and racketeers who continue to hold positions of authority and trust within the Teamsters Union.

Mr. President, section 504 of the Labor-Management Reporting and Disclosure Act of 1959 disqualifies persons from holding union office who have been convicted and imprisoned for certain specific crimes. I am convinced, on the basis of the recent hearings before the Investigation Subcommittee, that the section should be broadened to include other crimes which I shall discuss hereafter.

Mr. President, I should like to cite some of the more vivid examples which demonstrate clearly the need of amendatory legislation.

During the subcommittee hearings in January 1961, conclusive evidence was placed in the record relating to one Frank Matula, who is secretary-treasurer of local 396 of the Teamsters in Los Angeles, Calif. On May 11, 1957, he was convicted of perjury in connection with testimony he gave before a legislative committee of the California State Assembly. The committee was looking into alleged improper activities on the part of Matula in his capacity as a union official. It must be borne in mind, Mr. President, that the general president of the International Brotherhood of Teamsters, under the provisions of the international constitution, has ample authority to take action looking toward the removal of officers who have been convicted of crimes. However, President Hoffa, who assumed his present office not long after Matula's conviction and before his imprisonment, not only failed to take such action, but in face of a perjury conviction, a crime involving moral turpitude, Mr. Hoffa actually elevated Matula to the position of international trustee.

An international trustee has the responsibility of auditing the international's financial books and records on behalf of the rank-and-file members. Thus, it is a position involving the highest fiduciary responsibility.

Following his appointment by Hoffa as international trustee, Matula commenced serving a 6-month prison sentence and was actually temporarily released from prison by a county judge to proceed to Washington to perform his duties as trustee.

Another situation demonstrating the need for stronger legislation is that involving William Presser.

Presser is president of the Ohio Conference of Teamsters, president of Joint Council 41 of the Teamsters, Cleveland, Ohio, and president of local 555 of the Teamsters in Cleveland, Ohio.

On February 1, 1960, Presser was convicted of contempt of the U.S. Senate and on June 6, 1960, was convicted of obstruction of justice, both cases arising out of appearances of Presser before the select committee.

James Hoffa, in complete defiance, has refused to take any action with respect to Presser, who continues to occupy the aforementioned important positions in various Teamster bodies.

I strongly believe that such crimes as robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, kidnaping, perjury, obstruction of justice or a crime involving the misuse of the funds of a labor organization or a trust in which a labor organization is interested or attempts to commit any of the above crimes should act as a bar to the holding of responsible union positions.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1395) to amend section 504 of the Labor-Management Reporting and Disclosure Act of 1959 so as to broaden the prohibition against certain persons holding union office, introduced by Mr. McCLELLAN, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

AMENDMENT OF ACT TO PROVIDE FOR REGISTRATION AND PROTECTION OF TRADEMARKS USED IN COMMERCE

Mr. McCLELLAN. Mr. President, I introduce for appropriate reference a bill to amend the act entitled "An act to provide for the registration and protection of trademarks used in commerce," to carry out provisions of certain international conventions, and for other purposes.

I ask unanimous consent to have printed at this point in the RECORD a summary of the bill and its purposes.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the summary will be printed in the RECORD.

The bill (S. 1396) to amend the act entitled "An act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes," approved July 5, 1946, as amended, introduced by Mr. McCLELLAN, was received, read twice by its title, and referred to the Committee on the Judiciary.

The summary presented by Mr. McCLELLAN is as follows:

THE PROVISIONS OF THE BILL

Summarily stated, the bill provides that the owner of a registered trademark, or of one sought to be registered, and persons permitted by such owner to use the mark on goods or services the quality of which is controlled by the trademark owner, may file an application with the Patent Office pursuant to which the users may be registered as "registered users" of the mark (secs. 5(a)(1), 5(b)). Authorization of registration is conditioned upon compliance with two main conditions:

(1) submission in the application to the Patent Office of information identifying the applicants and describing the relationship existing between them; the goods or services for which registration is sought; the control exercised by the owner of the mark over the nature and quality of the goods or services; the duration, mode, or place of the use that the registered user is permitted to make of the mark; and other conditions or restrictions that might be imposed by the owner of the mark with respect to its use by the registered user (sec. 5(b)); and

(2) satisfying the Commissioner that the permitted use of the mark by the proposed registered user "is not likely to cause confusion or mistake or deception" (sec. 5(d)).

Provision is made in the bill for protecting trademark owners and users from the unnecessary disclosure of their affairs (sec. 5(c)).

Upon authorization of registration of a registered user, notice thereof is given in writing to the trademark owner and the registered user, and to the public by publication in the Official Gazette of such particulars as the Commissioner considers proper (sec. 5(e)).

Subsequent to registration as a registered user, the Commissioner is empowered to modify or cancel the registration upon the joint request of the trademark owner and the registered user, or upon a showing by either or both, that the registration no longer reflects the facts of the relationship between them (sec. 5(f)(1)(2)). Registration as a registered user may be canceled by the Commissioner on his own motion in respect of goods or services for which the mark is no longer registered (sec. 5(f)(3)). Such registration may also be canceled by the Commissioner under section 5(g)(1), upon the verified application of any person who believes himself to be damaged by the registration and a finding by the Trademark Trial and Appeal Board or the Court of Customs and Patent Appeals, or upon final judgment of a court of competent jurisdiction that—

(i) The registered user has used the mark, otherwise than in accordance with the terms of his registration, or in such manner as to be likely to cause confusion or mistake or deception;

(ii) The applicants misrepresented or failed to disclose some material fact which, if accurately represented or disclosed, would have caused refusal of the registration;

(iii) Circumstances have materially changed since the date of registration as registered user and such registration does not reflect the true facts as of the present; or

(iv) The registration is inconsistent with superior rights of the person seeking cancellation.

Notice of cancellation will be given by publication in the Official Gazette (sec. 5(g)).

The use of the mark by the registered user in accordance with the registration is, from the legal standpoint, to be regarded as use by the registered owner of the mark; and registration as a registered user neither confers rights in the mark upon the registered user, nor gives him any transferable right to the use of the mark (sec. 5(j)).

Subject to agreement by the parties, the registered user may call upon the owner of the mark to institute proceedings for the infringement of the mark and, if the owner fails or refuses to do so within 3 months, may institute such proceedings in his own name (sec. 5(i)).

The bill provides that irrespective of any affiliation between a registrant and registered users, the registrant of a mark may impose conditions and restrictions as to mode and place of permitted use by each registered user of the mark.

CLARIFICATION OF APPLICATION OF ANTITRUST LAWS TO CERTAIN CONTRACTS ENTERED INTO BY STATE ALCOHOLIC BEVERAGE AGENCIES—ADDITIONAL COSPONSOR OF BILL

Mr. CLARK. Mr. President, I ask unanimous consent that my name may be added as a cosponsor of the bill (S. 1247) to clarify the application of the antitrust laws to certain contracts and agreements entered into by State alcoholic beverage agencies with suppliers of alcoholic beverages, and for other purposes, the next time it is printed.

The VICE PRESIDENT. Without objection, it is so ordered.

PROPOSED CIVIL RIGHTS LEGISLATION—ADDITIONAL COSPONSOR OF BILLS

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the name of the junior Senator from Michigan [Mr. HART] be added as a cosponsor of the following civil rights measures

which I introduced on March 8—S. 1253, S. 1254, S. 1255, S. 1256, S. 1257, and S. 1258.

The VICE PRESIDENT. Without objection, it is so ordered.

EXTENSION OF NATIONAL WOOL ACT OF 1954, AS AMENDED—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 16, 1961, the names of Senators KUCHEL, ALLOTT, CASE of South Dakota, CHAVEZ, CAPEHART, ENGLE, CARROLL, and MUNDT were added as additional cosponsors of the bill (S. 1369) to extend the operation of the National Wool Act of 1954, as amended, introduced by Mr. YARBOROUGH (for himself and Mr. METCALF) on March 16, 1961.

NOTICE OF HEARINGS ON S. 1154, THE MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961

Mr. FULBRIGHT. Mr. President, as chairman of the Committee on Foreign Relations, I have today announced that the committee will hold public hearings on March 28 and 29, 1961, on S. 1154, a bill introduced by me to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges. I ask unanimous consent that the announcement of the hearings be printed in the RECORD at this point.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

ANNOUNCEMENT FROM THE U.S. SENATE, COMMITTEE ON FOREIGN RELATIONS

MARCH 21, 1961.

Senator J. W. FULBRIGHT, Democrat of Arkansas, chairman of the Committee on Foreign Relations, U.S. Senate, announced today that the committee has scheduled 2 days of public hearings on S. 1154, a bill to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges. The hearings will take place on March 28 and 29 at 10:30 a.m. in room 4221, New Senate Office Building.

In introducing the bill on March 2, Senator FULBRIGHT described it as "designed to consolidate and improve the existing legislative base for the international educational and cultural exchange programs carried out and supported by the U.S. Government."

He further stated:

"The bill deals primarily—but far from exclusively—with academic and cultural exchange-of-persons programs of the kind now carried out or generally supervised by the Department of State and the U.S. Information Agency. It does not attempt to go deeply into the ICA activities in the education field which are authorized by the Mutual Security Act, although it should be remembered that such activities in the last analysis are under the direction of the Secretary of State. Moreover, though it is difficult to make concrete distinctions, the more strictly informational activities of the USIA have not been touched upon; the bulk of the Smith-Mundt Act therefore is left intact. Finally—and this also is particularly relevant to any possible accusations that we are seeking to show partiality in the tangled field of departmental jurisdiction—the bill grants authority to the President to determine the organizational structure needed to give it effect."

NOTICE OF HEARINGS BY SUBCOMMITTEE ON PUBLIC LANDS OF THE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. BIBLE. Mr. President, as chairman of the Public Lands Subcommittee of the Committee on Interior and Insular Affairs, I should like to announce the scheduling of hearings on certain legislation which I believe to be of interest to the general public. The schedule is as follows:

March 28: S. 476, to establish the Point Reyes National Seashore in the State of California.

April 11: S. 4, to provide for the establishment of the Padre Island National Seashore in the State of Texas.

April 12: S. 77, to establish the Chesapeake and Ohio Canal National Historical Park in the State of Maryland.

Each hearing will be held at 10 a.m. in room 3110, New Senate Office Building. Individuals or organizations interested in testifying at such hearings or who desire to submit statements for the record should contact the committee at room 3108, New Senate Office Building.

NOTICE OF MEETING OF CONGRESSIONAL INTERPARLIAMENTARY UNION GROUP

Mr. MONRONEY. Mr. President, I desire to announce that the Congressional Interparliamentary Union Group will meet at 9 a.m. on Tuesday, March 28, 1961, in room F–39 of the Capitol.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. WILEY:

Excerpts of interview on communism, participated in by Senator WILEY and Senator DODD.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 307. An act to authorize certain beach erosion control of the shore in San Diego County, Calif.;

S. 449. An act to extend the time in which the Outdoor Recreation Resources Review Commission shall submit its final report;

S. 1028. An act to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959"; and

S. 1116. An act to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special program for feed grains for 1961.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLS, Mr. KING of California, Mr. O'BRIEN of Illinois, Mr. MASON, and Mr. BYRNES of Wisconsin were appointed managers on the part of the House at the conference.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 1822) to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended, and it was signed by the Vice President.

ROBERT FROST MEDALS

Mr. MANSFIELD. Mr. President, again with the concurrence of the minority leader, I move that the Senate proceed to the consideration of Calendar No. 71, Senate bill 712, to authorize the Secretary of the Treasury to coin and sell duplicates in bronze of a gold medal presented to Robert Frost by the President.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 712) authorizing the Secretary of the Treasury to coin and sell duplicates in bronze of a gold medal presented to Robert Frost by the President of the United States.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement in regard to the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

This bill would amend Public Law 86–747, which authorized the presentation of a gold medal to Robert Frost. This bill would permit the Secretary of the Treasury to make duplicates in bronze of the Robert Frost Medal, to be coined and sold to the public at a price sufficient to cover their cost.

Public Law 86–747, approved September 13, 1960, authorized the President of the United States to present in the name of the Congress a gold medal to Robert Frost. It authorized the Secretary of the Treasury to strike the medal and it authorized the appropriation of $2,500 to cover the cost of the medal. The Bureau of the Mint is now en-

gaged in designing the medal and appropriations have been requested.

S. 712 would permit the Secretary of the Treasury to make bronze duplicates of the medal for sale to the public at cost.

The VICE PRESIDENT. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 712) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Act entitled "An Act authorizing the President of the United States of America to present a gold medal to Robert Frost, a New England poet", approved September 13, 1960 (74 Stat. 883), is amended (1) by inserting "(a)" immediately after the word "That", and (2) by adding at the end thereof a new subsection (b) to read as follows:

"(b) The Secretary of the Treasury shall cause duplicates in bronze of such medal to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor), and the appropriations used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale."

TRIBUTE TO SENATOR MANSFIELD

Mr. PASTORE. Mr. President, like thousands of others, I read in the Evening Star of Monday, March 20, a laudatory article entitled "Mansfield Makes Good as Majority Leader."

Probably the best and most concise comment I could make on this excellent article, written by the Star staff writer, J. A. O'Leary, is a firm and fervent "Amen."

It is thrilling to hear in the fine language of an experienced observer this estimate of our colleague—the calm, considerate, courageous MIKE MANSFIELD.

As one who has been soldier, sailor, and marine, Leader MANSFIELD is not one to be carried away by the sometimes apparently undisciplined self-determination that makes a Senate day the interesting phenomenon it can be.

MIKE MANSFIELD is not one to lose his head—or lose his headway. His experience as a teacher amid the diversions of the class, stands him in good stead. His experience as a miner in his beloved Montana must have inculcated a deep love for the very earth—the body and soul of this country—and the loyalty to lofty ideals, which make him the patriot and statesman all of us regard him in the privacy of our thoughts.

It seems fitting to seize this occasion to convert the privacy of our thoughts into a public expression of the appreciation, esteem and affection we hold for one who leads with sweet reasonableness—and even sweeter success.

Mr. President, I salute the man who wrote this article; and, in turn, I salute our majority floor leader, MIKE MANSFIELD.

I ask unanimous consent to have the article to which I have referred printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 20, 1961]

MANSFIELD MAKES GOOD AS MAJORITY LEADER

(By J. A. O'Leary)

After nearly 3 months in the driver's seat, the Senate's new majority leader—quiet, low keyed MIKE MANSFIELD, of Montana—appears to be making good.

The six major bills and two treaties that have cleared the Senate since January 3 give him a fairly high batting average, considering the fact that the new administration could not even submit its program to Congress until after the January 20 inaugural ceremonies.

The Senate spent those preinaugural days holding hearings on the Kennedy Cabinet appointees. Since January 20 it has confirmed scores of Presidential appointees.

But Senator MANSFIELD himself has said many times that he hopes this Congress will be judged by the quality and not by the quantity of its legislation.

If adherence to the Kennedy New Frontier program is to be the yardstick for determining quality, then Senator MANSFIELD has achieved his goal thus far.

ROUGH ROAD STILL AHEAD

The roughest part of his road may still lie ahead, when such Kennedy-backed legislation as Federal aid to education, medical care for the aged under social security, a broader minimum wage law and the new Kennedy farm program come before the Senate.

But if he is as successful on those issues as he was during the past week in sustaining Mr. Kennedy's viewpoint on aid to depressed areas and emergency unemployment compensation, his first year as majority leader will be a noteworthy one.

Senator MANSFIELD said today he still intends to try to give the Senate another chance this year to consider a new antifilibuster rule.

He considers this the one roadblock to prevent Congress from completing its work by the end of July.

The Democrats were confronted by this controversial issue on January 3, the opening day of the session. Fearing that it would endanger the legislative program of the new administration by splitting the northern and southern Democrats, Senator MANSFIELD moved to send the proposed new rules to the Rules Committee, of which he is chairman.

WANTS RULES CHANGED

"I gave a promise that I would hold hearings and try to get a revision of the rules out of committee later," said the majority leader, making it clear he expects to keep that promise.

He added that he would support a reduction from two-thirds of those present to three-fifths as the number of votes required to curb Senate debate.

A three-fifths rule would allow 60 Senators to limit debate. Under the present rule, if all Senators were present, it would take 67 to apply the limitation.

Liberals want the rule changed partly to help obtain action on additional civil rights legislation. If a new rule should be reported from committee after the Kennedy program has been acted upon, it could keep the Senate in session all summer.

Senator MANSFIELD stepped into a large pair of shoes on January 3. His predecessor, Vice President JOHNSON, had built up an enviable record for getting things done.

KNACK OF GETTING THINGS DONE

Although the Vice President had to deal with a Republican President during most of his 8 years as Democratic Senate leader, he steered many controversial bills to passage, including the first civil rights law in 80 years.

During the past week Senator MANSFIELD demonstrated that he, too, can get things done. Watching him from the galleries, an observer gets the impression that the new leader is not pulling in very tightly on the reins, and that he leaves the whip in its socket as he coaxes his Democratic colleagues to pull together.

Even when he disagrees with some of his colleagues, as he did on the method of financing temporary unemployment compensation, he does it in terms that will leave no lasting sting, and that seem to recognize that there are two sides to every question.

His task undoubtedly has been helped by the presence in the White House of a Democratic President.

One change Senator MANSFIELD has tried to bring about has been to avoid night sessions. In recent years it was almost standard procedure to hold the Senate in session until 11 p.m. or later to bring major bills to a vote.

This year there has been only one late evening session, last Thursday, when the Senate ratified two treaties and passed two unemployment compensation bills.

PROPOSED ESTABLISHMENT OF SOIL MOISTURE CONSERVATION RESEARCH CENTER

Mr. CARLSON. Mr. President, the Great Plains Agricultural Council proposes the establishment at one of the experiment stations in the Great Plains of a research center for soil moisture conservation research.

The Kansas State University and the U.S. Department of Agriculture, working together during the past years, have conducted extensive experiments in this field; and I can truly state that Kansas has developed more material on this problem than has any other Great Plains State. Therefore, I am urging that the research center be located in our State.

Those of us who live in the Great Plains area realize that the underlying problem of agriculture and industrial development is a recurring deficiency of moisture. This deficiency in moisture reduces production and farm income, and increases wind erosion.

Despite the fact that most farmers in the Great Plains attempt to make efficient use of the rainfall they receive, a large portion of this rainfall is lost. Estimates indicate that about two-thirds of the rainfall in the Great Plains area is lost by evaporation, alone. The importance of this can be realized when attention is called to the fact that in a 20-inch rainfall area, a loss of 8 percent of the rainfall through evaporation is equivalent to a loss of 3 inches of precipitation. It is estimated that the saving of this moisture loss by evaporation in the Great Plains area would have a value of $400 million annually in crop production.

These figures stress the importance of additional research in this field. The proposed moisture conservation research laboratory would make further studies, with a view to recommending changes in our present methods of dealing with the problem of evaporation of water from the soil.

Those of us who are familiar with the Great Plains area realize that every effort must be made to control water runoff for use for beneficial purposes, and, in addition, to establish soil practices that will retain in the soil, for crop purposes, the rain that falls. I cannot stress too strongly the need for the establishment of this research laboratory.

My colleague, Senator SCHOEPPEL, and I are going to appear before the Subcommittee on Agricultural Appropriations, and we shall urge the establishment in our State of this soil moisture conservation research laboratory.

Following this opening statement, I hope to develop the reasons why this laboratory should be located in the State of Kansas.

Therefore, Mr. President, in cooperation with my colleague, Senator SCHOEPPEL, I urge and sincerely hope that consideration will be given to our recommendation that the proposed research laboratory be located in our State.

I ask unanimous consent to have printed at this point in the RECORD a memorandum and an attached list of outstanding soil conservationists and the studies they have made.

There being no objection, the memorandum and the list were ordered to be printed in the RECORD, as follows:

JUSTIFICATIONS FOR LOCATING A FEDERAL GREAT PLAINS SOIL MOISTURE CONSERVATION RESEARCH FACILITY IN KANSAS

A. KANSAS IS CENTRALLY LOCATED IN THE GREAT PLAINS

The Great Plains Soil Moisture Research Laboratory will conduct research to serve the entire Great Plains area. A portion of the function of the laboratory will be to conduct experiments at diverse locations over the Plains which will complement the fundamental research done at the central location. The laboratory will also have a board of collaborators representing land-grant institutions in each State in the region. These collaborators, together with other scientists in the States, will be frequent visitors to the main research facility. Thus, a location central to the Great Plains as is afforded by Kansas will have many advantages from the standpoint of efficiency in operation and convenience. This fact was recognized by the U.S. Department of Agriculture in its report on facility needs for soil and water conservation research, Senate Document No. 59 of the 1st session of the 86th Congress, where Kansas was listed first among the possible locations for this facility.

B. KANSAS IS THE LEADING STATE IN SOIL MOISTURE CONSERVATION RESEARCH

The combined efforts of Kansas State University and the U.S. Department of Agriculture, working hand in hand, have made Kansas the leading State in soil moisture conservation research. This research has been underway, on a limited scale, since 1906. I shall include a list of technical publications from Kansas which are concerned with soil moisture research as a part of these remarks.

Many important facts have been discovered and many practices developed in Kansas which have increased the efficiency of rainfall use. This may be illustrated by the fact that the drought of the 1950's had much less severe economic and social effects in Kansas than the drought of the 1930's, due, at least in part, to improved moisture conserving practices developed through research.

At the present time 10 research scientists are devoting their time in Kansas to problems of soil moisture conservation. Eight of these men are supported by the Kansas Agricultural Experiment Station and two by the U.S. Department of Agriculture. In addition, the USDA has located its wind erosion research laboratory at Manhattan in cooperation with Kansas State University. This laboratory has four scientists doing research on wind movement and erosion. Studies of the effects of wind on moisture losses will be an integral part of the research of the proposed soil moisture conservation laboratory.

The research which has been accomplished and the scientists now engaged in work on soil moisture conservation would be a great asset to the proposed Federal laboratory. These scientists would be available to assist the laboratory in its work and to apply its findings to field conditions.

C. OUTSTANDING FACILITIES ARE AVAILABLE TO SUPPLEMENT A FEDERAL LABORATORY

Kansas State University has many facilities, several of which cannot be found in other States, that would be important to and available for use by personnel of a Federal laboratory. These facilities include the following:

1. A nuclear reactor (to be constructed in 1961) which may be used to make short-lived isotopes of value in certain fundamental research studies.

2. An IBM 650 computer making possible the rapid solution of complex mathematical problems and the swift analysis of large volumes of statistical data.

3. A 3-by-3-by-70-foot operating wind tunnel to supplement one to be constructed as a part of the Federal laboratory.

4. Four walk-in type and several smaller plant growth chambers with controlled temperature, light, and humidity.

5. A large library with complete sets of volumes of all American and foreign publications of interest to science and technology, including all phases of agricultural science.

6. Many well-equipped research laboratories for studies in soil science, plant science, physics, chemistry, meteorology, engineering, and mathematics.

7. Land for experimental purposes at 18 locations in the State, including the main station at Manhattan, 5 branch experiment stations, and 12 experiment fields. At each location there is one or more professionally trained scientist. The total amount of land owned or leased at all locations is nearly 10,000 acres. This land would be available for field experimentation under diverse climatic conditions by laboratory personnel.

D. KANSAS HAS ONE OF THE MOST DISTINGUISHED LAND-GRANT UNIVERSITIES TO ASSIST THE LABORATORY

The land-grant university at which the proposed Federal laboratory will be located will be a very important factor in the success of the laboratory. Specialists in all phases of science will be available for ready consultation and exchange of ideas with laboratory personnel. Many specialized items of equipment can also be used by workers of the laboratory.

Kansas State University has an international reputation for its work in agricultural science. It was established in 1862 as the first land-grant institution. Strong departments are available in all phases of science, mathematics, engineering, and agriculture which could assist laboratory personnel. The Agronomy Department of Kansas State, with which the laboratory would be most closely associated, is one of the largest in the United States. A faculty of 41 full-time State employees and 8 USDA scientists is present in this department. The department also has 34 graduate students working for the M.S. and Ph. D degrees.

The presence of a strong graduate training program at the associated university will be a significant factor in attracting and holding a qualified research staff for the laboratory. Such a program makes possible employment of graduate students on a part-time basis and additional training of laboratory personnel. Four of the USDA employees located in the department of agronomy at Kansas State at the present time are doing advanced studies for the Ph. D degree. A strong graduate program also provides a supply of potential scientists for the laboratory staff.

Mr. CARLSON. As proof of the studies that have been made in this field in Kansas, I submit for the RECORD a listing of outstanding soil conservationists and the studies they have made:

Zacharis, W. W.: "Effect of Hedges on Evaporation of Soil Moisture." M.S. thesis, Agronomy Department, Kansas State College, Manhattan; 1913.

Call, L. E.: "The Effect of Different Methods of Preparing a Seedbed for Winter Wheat Upon Yield, Soil Moisture, and Nitrates." Jour. Am. Soc. Agron., 6: 249–259; 1914.

Call, L. E., and Hallsted, A. L.: "The Relation of Moisture to Yield of Winter Wheat in Western Kansas." Kans. Agr. Exp. Sta. Bull. 206; 1915.

Miller, E. C.: "Relative Water Requirement of Corn and the Sorghums." Jour. Agr. Research. 6: 473–484; 1916.

Call, L. E., and Sewell, M. C.: "The Soil Mulch." Jour. Amer. Soc. Agron., 9: 49–61; 1917.

Miller, E. C., and Coffman, W. B.: "Comparative Transpiration of Corn and the Sorghums." Jour. Agr. Research, 13: 579–604; 1918.

Salmon, S. C.: "A Preliminary Note on Soil Moisture and Temperature Factors in the Winterkilling of Grain Crops." Science, 47: 173–174; 1918.

Tuttle, W. P.: "Lateral Movement of Soil Moisture and Nitrates in Soil." M.S. thesis, Agronomy Department, Kansas State College, Manhattan; 1919.

Cole, J. S., and Hallsted, A. L.: "Methods of Winter Wheat Production at the Fort Hays Branch Station." USDA Bull., 1094; 1922.

Cole, J. S., and Mathews, O. R.: "Use of Water by Spring Wheat on the Great Plains." USDA Dept. Bull. 1004; 1923.

Mathews, O. R.: "Storage of Water in Soil and Its Utilization by Spring Wheat." USDA Dept. Bull. 1139; 1923.

ALL AMERICA HONORABLE MENTION RECEIVED BY ABILENE, KANS.

Mr. CARLSON. Mr. President, Abilene, Kans., is one of four cities in the Nation to receive all America honorable mention in a study made by the National Municipal League and Look magazine.

The National Municipal League and Look magazine cited 11 cities for all-America honors, and 4 received honorable mention in the All America Cities Award contest for 1960.

The other three cities which received honorable mention citations are Clayton, Mo.; Skokie, Ill.; and Traverse City, Mich.

The awards were made on the basis of vigorous citizen action in bringing about major civic improvements within a community.

The winners were selected, from a total of nearly 300 original contestants, by a jury headed by Dr. George H. Gallup, director of the American Institute of Public Opinion.

We in Kansas are proud of this honor that has come to Abilene, the home of our No. 1 citizen, President Eisenhower.

The citizens of Abilene are entitled to much credit for the outstanding cooperative efforts they have made in civic accomplishments over the past few years. I want to extend my personal congratulations to the citizens of Abilene and to our State of Kansas for this signal honor.

I ask unanimous consent that an editorial entitled "A Real Abilene Honor," written by Henry B. Jameson, be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A REAL ABILENE HONOR

(By Henry B. Jameson)

Abilene certainly should not be disappointed that it received honorable mention rating in the All America Cities contest instead of one of the top ranking citations.

We were in mighty fast competition.

Yet Abilene was recognized over such larger cities as Long Beach, Calif.; Galveston, Tex.; Baltimore, Md.; St. Petersburg, Fla., and Tucson, Ariz. These and others were among the 22 finalists which we beat out in the final judging.

It would have been nice to be among the top winners but that's the way the ball bounces. And it was a high honor to be selected among the 22 finalists and an even higher distinction to be given the honorable mention rating.

Four of this year's top winners were honorable mention cities during recent years.

Without knowing specific opinions of the judges, I would guess that the main reason Abilene was not selected as one of the winners was that our entry was not based on the sensational or crisis type of achievement.

Most of the cities named (see news story details) were where spectacular progress has been made in connection with either rapid growth expansion or "throw the rascals out" type of good-government cleanup campaigns.

This apparently held greater appeal for the jury of 12 judges representing various parts of the country. It must be admitted, however, they had a most difficult task. All 22 cities had been carefully screened down from a field of nearly 300. All had good stories to tell or they would not have been invited to participate in the finals. It's something like a basketball tournament. Everybody can't be a winner.

Without wanting it to sound like sour grapes, I would say that Abilene was "penalized," or at least handicapped, because its story of outstanding community achievement and progress was not based on a crisis situation. As the spokesman for Abilene in the finals contest at Phoenix, Ariz., last November, I had an opportunity to hear the testimony of most of the other cities.

No other city presented a story of community achievement just like that of Abilene—progress and development not necessarily born out of an emergency. Most of the others were.

The Abilene application for national honors was based on this city's program of civic accomplishments over a period of the past 10 years. These covered such things as the Mud Creek flood control project, new business and industry, new schools, courthouse, hospital, street and highway improvements, the Eisenhower Center development and others. Wih two exceptions, every presentation that I heard during the 2-day panel dealt with what the cities had done to combat crime, crooked city office holders and population explosions and the complex community problems related to them.

With this new honor Abilene can proudly keep moving forward.

CHIEF JUSTICE EARL WARREN

Mr. ENGLE. Mr. President, on Sunday an eminent American observed his 70th birthday. Chief Justice Earl Warren is a son of California, and we Californians take special pride in his long record of distinguished public service.

He has held the offices of district attorney of Alameda County and attorney general of our State, and was three times elected Governor of California. His service to the people of the Golden State is gratefully remembered by countless Californians, without regard to party adherence.

When Earl Warren became Chief Justice of the United States in the fall of 1953, he brought to the Supreme Court the strengths of a towering personality, a broad experience, and a deep devotion to the people's service. He has been at times a controversial figure on the High Court, as men who achieve great things are often controversial figures. The landmark unanimous decision of the Court in the segregation cases alone assures him a place in history, but his claim to such a place is not confined to that one momentous decision. He is the constant guardian of individual rights against the encroachments of government, and I believe that those rights are more secure because Earl Warren holds the highest judicial office in our land.

Earl Warren's life is a vividly American story—the son of a new American, a man who has sat in high places but never lost touch with the needs and the aspirations of his fellow man, the husband of a gracious lady, and the father of lovely children. Chief Justice Warren reaches three score and ten full of the vigor which has always been part of both his charm and his ability to do significant things. I am honored to call him my friend. I am happy to join the multitude of his admirers in saluting him on the 70th anniversary of his birth.

Mr. GRUENING. Mr. President, will the Senator from California yield?

Mr. ENGLE. I am glad to yield to the distinguished Senator from Alaska.

Mr. GRUENING. I wish to associate myself with the tribute which has been paid to the Chief Justice of the United States by our able colleague, the distinguished junior Senator from California. The tribute is well deserved. Earl Warren is one of our greatest Americans, not merely of our time, but of all time.

I believe that when history is written, it will record that one of the outstanding achievements of the Eisenhower administration was the appointment of Earl Warren to be Chief Justice of the United States.

THE VOTE ON ANGOLA

Mr. McGEE. Mr. President, I should like to call to the attention of my colleagues an article by Walter Lippmann which appeared in the press of this morning, in which he discusses the implications of the recent United Nations vote on the Angola question.

In this instance the United States voted with the Asian-African group to favor an inquiry into the question. This action indicates a significant departure in American policy. The implication of the vote, according to Mr. Lippmann, is that it demonstrates a turning point which is in sharp contrast to the previous position of the United States on African-Asian questions, a position which was epitomized by the refusal of this Government to vote for the anti-colonial resolution on December 15th last.

I ask unanimous consent that the Lippmann article be printed in the body of the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 21, 1961]

THE VOTE ON ANGOLA

(By Walter Lippmann)

In African affairs, two separate but parallel and similar historic events took place last week. One was the refusal of the Commonwealth nations to condone the racial policy of apartheid in order to keep the Union of South Africa in the Commonwealth. The other was the vote of the United States, differing openly with its NATO allies, for an inquiry by the U.N. into the Portuguese colonial policy in Angola.

In both cases the decision was a very hard one to take—whether to risk the unity of the Commonwealth, whether to risk the unity of NATO, on a question of principle. In both cases there was the same decision—by the eight nations that if the Commonwealth was to be preserved, it could not condone apartheid, by the United States that NATO and even the U.N. itself would be gravely jeopardized if the NATO nations alined themselves in support of colonialism.

There are some who think that the United States could have, and should have, avoided the decision. It could have abstained, that is it could have declined to vote, as it did under the Eisenhower administration last December. But could the United States have done that now? Is abstention, a refusal to vote in order to evade a hard issue, a workable policy for a great power which holds the place we hold in the leadership of the non-Communist world? The Eisenhower abstention of last December could at least be justified as a stopgap measure in the closing days of an administration. The new Kennedy administration could not take refuge in the evasion of an issue which involves the destiny of Africa and Asia, and affects profoundly the peace of the world.

When the issue is posed nakedly as it is in Angola where it is the policy of the colonial power not to prepare the colony for independence, how could the United States refuse to declare itself? Had we done that, we would by our abstention have abdicated our influence. For had we abstained, we would have identified NATO with colonialism, and the Soviet Union would have stood out as the only great power in the white man's world which took the other side. What is more, we would have supported Portuguese colonialism not boldly by voting against the resolution but timidly and apologetically by refusing to vote at all.

What an image that would have been of the leadership of the free world.

The question has been raised as to whether this American vote means that the development of Africa has now taken priority over the consolidation and stabilization of Europe. It is an understandable question, and undoubtedly there is a certain difference of emphasis between those who are preoccupied with European affairs and those who are preoccupied with African affairs. But the truth is that our concern with Europe and our concern with Africa are not competitive. They are complementary.

Unless Europe becomes a more powerful and flourishing community of nations, the resources cannot be found to finance the development of Africa. And unless the Europeans and the North Americans are able jointly and severally to promote the peaceful development of Africa, the future is very dangerous indeed. The unity of the West is gravely menaced by the convulsive problems of Africa, be it in Algeria, the Congo, South Africa, or Angola.

The American view, which is not sufficiently understood in Europe, is that the liquidation of empires is always a great danger to the peace. The seedbeds of the two World Wars were in the liquidation of the Turkish, the Austro-Hungarian, and the czarist empires. In the American view the liquidation of the African empires, which is very far from being completed, is in this age of nuclear armaments a very great threat to peace. Our view is that if we and the Europeans are to achieve a constructive influence in African affairs, it can be done only through the medium of the United Nations. That is the only forum in which the old colonial powers, the newly liberated nations, the Soviet Union and the United States can meet and deal with one another in the context of the law of the charter.

Our European allies must not underestimate the weight and the seriousness of the American judgment in this affair. It is not inspired by a cheap attempt to win votes in Harlem. Nor is it, though it is often expressed in the noble old phrases, the naive

liberal idealism of the old orators. This judgment, of which the vote on Angola is a symbol, comes not from a soft but from a hard judgment, a hard judgment based on two decades of responsibility for a worldwide coalition.

Mr. CHURCH. Mr. President, when the United States voted in the Security Council last Wednesday in favor of a resolution calling upon Portugal to account for its policies with respect to the territory of Angola, dramatic evidence was given that we will indeed support the "peaceful revolution of hope" to which President Kennedy referred in his inaugural address.

I welcome this clear and decisive demonstration that our basic African policies have been reversed. I agree with the Indonesian Ambassador, who said of this vote:

> The United States [in recent years] had lost its direction. Now it is going back to Jefferson. You are the pioneers.

Last Friday's Washington Post contained a short article, by its staff reporter Murrey Marder, explaining the significance of this vote in the Security Council. I ask that this article, and an Associated Press story on the same subject, may be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 17, 1961]

AFRO-ASIANS PLEASED, LISBON ANGERED—VOTE AGAINST PORTUGAL ALINES UNITED STATES WITH REFORM

(By Murrey Marder)

In concrete terms which Afro-Asians—and America's own allies—can understand, the Kennedy administration has shown the United Nations it means business about aligning itself with world forces of independence and reform.

By voting to light a fire under Portugal's handling of its huge African territory of Angola, the Kennedy administration on Wednesday executed a complete reversal of the position taken by the Eisenhower administration.

The resolution, ironically, did not pass. The United States and the Soviet Union, for once, found themselves together on the losing side of a Security Council vote, only joined by Liberia, Ceylon, and the United Arab Republic.

Profoundly more important than the vote, however, was the evidence that the United States is determined to recapture its role in the vanguard of what President Kennedy in his inaugural address called the peaceful revolution of hope.

The news was a delight to many diplomats of the Afro-Asian countries, and a cause of dismay in Portugal.

In Lisbon, a government newspaper, Diaro da Manha, yesterday said the United States vote for the resolution challenging conditions in Angola was "an act of stupidity." A Portuguese Foreign Office spokesman, speaking in officialese which actually reflected the same indignation, said Portugal regards the American action with "the greatest apprehension."

As added evidence that its vote on Angola was no fluke, the United States yesterday voted in the U.N. General Assembly to censure South Africa for its policies in the territory of South-West Africa which it governs under a former League of Nations mandate.

Here again the United States voted contrary to five NATO allies—Britain, France, Belgium, Luxembourg and Portugal—who were among the abstainers on a 74-to-0 vote.

The key resolution reflecting the Kennedy administration's determination to associate itself with Afro-Asian sensibilities, was the Angola resolution.

Embodied in it was a direct endorsement of the anti-colonialism resolution of last December on which the United States abstained after British Prime Minister Harold Macmillan made a personal appeal to President Eisenhower.

That White House order to the American delegation to shift its position from "yes" to "abstain," caused internal turmoil at the time. In a celebrated example of open revolt, Zelma Watson George, a Negro member of the delegation, caused a sensation by applauding the resolution when it passed on an 89 to 0 vote, with the United States in a tiny group of abstainers.

By reversing that policy line now, the United States has won such accolades as this from Ambassador Wirjopranoto Sukardjo of Indonesia: "The United States (in recent years) had lost its direction. Now it is going back to Jefferson. You are the pioneers."

What the United States, on the other hand, has done to its relationship with countries like Portugal, remains to be seen.

Among other things, the United States holds important base rights in the Portugese Azores, in mid-Atlantic. It would not like to lose them—and does not think it will. The Kennedy adminstration, however, has made a conscious determination that in global policy it will not be frozen into immobility by following the pace of the slowest members in the allied fold, even if it means creating some antagonisms.

At the same time, it feels—although Portugal in this case hardly agrees—that it is operating in its allies' long-term interests as well.

U.S. support of the resolution which set Portuguese teeth on edge, was described by Ambassador to the United Nations Adlai E. Stevenson as "an invitation to Portugal to work with members of this Organization (the United Nations) to insure the more rapid progress of the peoples in Portuguese territories."

American officials regard the resolution as moderate—not punitive. They note that it is likely to be pressed in the General Assembly where it may emerge in harsher terms.

State Department Spokesman Lincoln White reiterated yesterday what Stevenson had told the Security Council: "We would be remiss in our duties as a close and long friend of Portugal if we failed to express honestly our belief" that "step-by-step planning for the political, economic and social advancement of all the inhabitants" of Angola is "now imperative."

This was intended as balm, but Portugal may regard it as salt in the wound.

[From the Washington Post, Mar. 17, 1961]

UNITED STATES AFFIRMS INDEPENDENT AFRICA POLICY

UNITED NATIONS, N.Y., March 17.—The United States confirmed today that it would pursue an independent policy on African problems while maintaining a deep and common interest with the Western allies.

The U.S. position was outlined in a statement to the press explaining the vote of U.S. Ambassador Adlai E. Stevenson in the Security Council Wednesday night on a proposal for reforms in Portuguese Angola.

On this issue, the United States voted along with the Soviet Union and three Asian-African countries. Britain, France and four other countries abstained.

Today's statement by Francis W. Carpenter, U.S. delegation spokesman, said the decision to vote for the Angola resolution was made only after Stevenson had consulted with State Department officials and after approval by Secretary of State Dean Rusk and President Kennedy.

"The policy decisions behind the vote, which were all reflected in Stevenson's speech before the Security Council," Carpenter said, "had been carefully considered."

"Our allies were informed in advance. We have a deep and continuing common interest with them. The difficulty and complexity of African questions are, however, such that there are and may continue to be differences in approach in some of them."

THE PRESIDENT'S VORACIOUS READING HABITS

Mr. McGEE. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Hugh Sidey, Time-Life correspondent, entitled "The President's Voracious Reading Habits," in which he describes President Kennedy's intense interest in getting his mind wrapped around the issues of the day and the issues of the world, in the philosophical realm as well as in the realm of practical politics.

I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Life magazine, Mar. 17, 1961]

THE PRESIDENT'S VORACIOUS READING HABITS—HE EATS UP NEWS, BOOKS AT 1,200 WORDS A MINUTE

(By Hugh Sidey)

One morning recently President John F. Kennedy opened the door of his oval White House office and strode to the desk of his secretary, Mrs. Evelyn Lincoln.

"Mrs. Lincoln, where's my London Economist?" he asked in some agitation. The President was not inquiring about a delayed appointment with a distinguished visitor. He was asking about a British magazine that is crammed full of meaty reading about the state of the world, particularly economics.

Mrs. Lincoln suggested that the delivery system must have broken down and said she would check. But a few hours later the magazine still was not on the Presidential desk. "Mrs. Lincoln," said the President, sticking his head out of his office again, "where is that London Economist?"

Next morning as the President prepared to leave for his country estate in Middleburg, Va., staff members noticed that he finally had his Economist. It was rolled up, tucked under his arm, as he walked through the snow toward his helicopter.

John Kennedy is always a stubborn pursuer of reading matter. He is a reader of magazines, newspapers, books, Government reports, technical papers, and just about anything else he encounters on his cruises through White House corridors. He devours printed pages at an enormous rate and retains most of what he reads. He has caused a revolution in the reading habits of his staff members. For self-protection against the President's voracious appetite for information they have had to increase their own reading range.

Press Secretary Pierre Salinger now has his own White House chauffeur bring five newspapers when he picks him up at 8 a.m. each morning. This gives him a chance to scan the papers before facing the inevitable Presidential questions about the news.

NO ABBREVIATIONS

Recently Kennedy asked to see the entire official story of Castro and communism in Cuba. The massive State Department document arrived in three parts: a synopsis, a chronology, and a detailed account. The aid

suggested that the President read only the synopsis, but Kennedy waved him off. He did not want the abbreviated version. He pored through the entire chronology of events, began to browse around in the section of the report with the details, extracting what he wanted. Now in Government departments staff members labor hours over memorandums that used to be dashed off. The word is out: "The President may read them."

Kennedy's voluminous reading habits sometimes give him extra information about the activities of his own staff. When somebody decided to cut off the courtesy tours of the White House for constituents of Congressmen and Senators, Kennedy spotted the complaints of the legislators in a Washington Post and Times Herald story one morning and immediately called Salinger to reverse the decision. When he read, also in the Post, that Eisenhower's skeleton staff had inadequate quarters and help to take care of the mail pouring in to the ex-President, Kennedy jumped to the phone and ordered a change.

The Kennedy day begins with reading. He starts with five newspapers: the New York Times, the New York Herald Tribune, the Washington Post, the Baltimore Sun, and the Wall Street Journal. Usually he gets through two or three of them before he climbs out of bed, finishes the rest at breakfast or in his office, where he has the same papers put on a small table behind his desk along with the Atlanta Constitution, the Philadelphia Inquirer, and the St. Louis Post-Dispatch. In the afternoons he gets the Washington Evening Star, and News. Although this staggering pile is his regular newspaper diet, he does not limit himself to that. When he hears of a good story in another paper, he demands it, and when other papers are brought to him, he likes to search through them. In his campaign days his airplane looked like a traveling newsstand. He insisted that copies of all the local papers be picked up at each stop.

He is equally omnivorous about magazines. His staff has orders to keep him supplied regularly with Time, Life, Newsweek, U.S. News & World Report, Business Week, Nation's Business, Saturday Review, the New Yorker, Harper's, Atlantic Monthly, the Spectator, New Republic, History Today, Foreign Affairs, Manchester Guardian Weekly and, of course, the London Economist. Every issue of these gets his attention. He also sends for special features in other magazines, such as Stewart Alsop's recent article on the Congo in the Saturday Evening Post.

Kennedy does not by any means absorb every word in the newspapers and magazines. With the newspapers, the front page gets his first attention. He scans all headlines, flits through pieces of marginal interest, takes a moment or so longer with the vital stories. His next stop is usually the editorial page. He is almost as interested in comment on him and his activities as he is in the big news, but he likes columns better than editorials. He is a great admirer of Columnists Walter Lippmann and Joseph Alsop, but aids have noted that in the afternoon he hurries to check Doris Fleeson's tart column in the Star. "He wants to see who she's sticking the knife in today," explains a friend.

A READER OF REVIEWS

When he is through with newspaper opinion, Kennedy skims through the rest of the pages. He likes movie reviews, touches on drama, sports, and other features and takes a close look at the financial page. He passes by the comics and pays little attention to the society section. A reader of bylines, he will often compliment a reporter on a story or challenge him when he thinks the reporter wrong.

On an airport apron in Palm Beach one evening he thumped a magazine article and said to the reporter, "There's one item right in that, the rest are wrong." Then by the headlights of his car he pointed out the correct item. Before he got into presidential politics Kennedy used to fire off notes to offending newsmen or call them with his complaints, but since there is now such an avalanche of material about him in print, he takes most criticism with little flinching. In fact, though he may not like the criticism, he searches it out.

When he has time, he does not hesitate to quibble about usage. Recently the White House introduced a cocktail bar at a reception for new appointees, and there was great clucking in all the papers. The President said nothing about being criticized for serving drinks, but he did stop a newsman in the executive lobby to ask why the term "hard liquor" was used in his story. "That's a bad term," he said. "It makes it sound like we are sinning."

Last month a journalist met the President for the first time and was greeted in the doorway with: "Hello, Mr. ——— I've read your articles for a long while." The writer, with a dozen questions on his tongue, scarcely had a chance to ask them. Instead, Kennedy spent the time grilling the reporter about his previous stories. He is not only interested in writers but also knows a great deal about the editors of newspapers and magazines and on occasion he has astounded reporters by his familiarity with the inner workings of their publications. Once he detected, simply by noting a change in the line of a magazine, a switch in top editorial management.

The amount of stray information Kennedy collects through his reading has impressed everyone who knows him. Before his nomination for the Presidency he was flying from New York to Washington with a small group of journalists, all of the men riding together in the tourist section of a commercial airplane. While Kennedy was reading a paper, an unidentified passenger, stuck on a crossword puzzle, turned to the journalists and asked what famous book Lincoln Steffens had written other than his autobiography. One by one the reporters shrugged unknowingly. Then Kennedy looked up from his paper, said "Shame of the Cities" and went back to his reading.

One staff member says that the President takes an abnormal interest in what is written because he is really a "repressed journalist." The President himself says that if he had not gone into politics, he would have been a journalist. In his college days, he recalls, he thought the best thing of all would be to become a writer for Fortune. Since that time he has written two best-selling books ("Profiles in Courage" and "Why England Slept") and many special articles and book reviews.

Kennedy's reading is not limited to newspapers, magazines and reports, although this gets more of his time than it did a few years ago. The President loves books. No one knows how many books he has read or looked into during his first weeks in office, but those he has been seen reading or has asked his staff to get make a formidable list. He called for two books written by Chinese Communist leader Mao Tse-tung and a photostated translation of Cuban "Che" Guevara's 1960 book on guerrilla warfare. On a recent weekend to Middleburg he took with him Vannevar Bush's "Science, the Endless Frontier." Shortly after that he asked for another military book, "The Green Curve" by Sir Ernest Swinton.

RECENT CHOICES

In recent days he has been through Henry Kissinger's "The Necessity for Choice," completed the Elting Morison biography of Henry Stimson, read Cornelius Ryan's "The Longest Day," a story of D-day, and read John Kenneth Galbraith's "The Liberal Hour." Between times he has been dipping into a compendium on nuclear testing and arms control.

The other evening in the White House he spotted the New York Herald Tribune's Robert Donovan, author of "The Inside Story," a book about Eisenhower in the White House. Kennedy ran out in the lobby of the White House executive wing, calling to Donovan, "Come in here, I want to see you." Once in the office Kennedy took down Donovan's book and began to question him about it.

Kennedy has confined himself mostly to nonfiction, but like many of the world's leaders he has a weakness for detective stories, especially those of British Author Ian Fleming and his fictitious undercover man, James Bond. When CIA Director Allen Dulles learned about this, he told Fleming, and the next time Fleming came to the United States, Kennedy had him over for dinner.

On occasion in the past the President has had spurts of reading realistic historical novels and especially likes those by Mary Renault on ancient Greece. He has enjoyed several of Anthony Trollope's 19th century novels about England and, among current novels on contemporary themes, liked Allen Drury's "Advise and Consent." But his main interest is history and biography. Not long ago a friend gave the President John Plumb's 407-page biography, "Sir Robert Walpole; the Making of a Statesman." "He finished it in an evening," the friend said in awe.

Just how fast Kennedy reads has not been precisely determined, but his speed is at least 1,200 words per minute and sometimes more than that (the average person reads 250 words per minute). One adviser remembers seeing the President read a 26-page economics memorandum in just 10 minutes. Then he "asked 25 questions about it—intelligent questions."

VITAL QUESTIONS

Another staff member has seen Kennedy flip the pages of a report so fast that he appears to be merely skimming. Suddenly he looks up and begins to question the author closely. He has picked out the vital facts and may even recall exactly where certain statements were located on a page.

When Kennedy moved into the White House, one of his first acts in decorating the new quarters was to have an aid get some 200 books on the Presidency from the Library of Congress and put them in the empty shelves in the Cabinet room. Kennedy's own books from his former Georgetown home have been shipped to Glen Ora, his Middleburg estate. He is not a book collector as such and gets no special pleasure from possessing books or owning valuable editions. He seeks the contents.

James MacGregor Burns, who wrote "John Kennedy: a Political Profile," claims that the President's reading is strictly utilitarian. "He roots around in a book looking for what he wants," says Burns. "He might start in the back, then go to the parts that can help him." The President likes particularly to read things that have some specific value for him. "What good are ideas unless you make use of them?" he once asked a friend.

Burns recalls sitting on a restaurant stool during Kennedy's cold and weary campaigning a year ago in the Wisconsin primary. Suddenly Kennedy turned to Burns and asked, "What have you been reading?"

For the next few minutes they talked books. A reporter on the junket kept informal score as the two men discussed books, mostly early American history. The tally showed Kennedy had read more of the books discussed than Professor Burns.

The significance of reading in Kennedy's life is best summed up by the President himself. Not long ago he said to Burns, "Roosevelt got most of his ideas from talking to people. I get most of mine from reading."

In spite of its enormous quantity the President's book reading is quite specialized, being concentrated on political history and current events. His favorite American book is Samuel Flagg Bemis' biography of John Quincy Adams, and probably his favorite of all books is David Cecil's "Melbourne," a biography of Queen Victoria's first prime minister. He also admires Churchill's "Marlborough" ("It is the best thing he has done"). Kennedy's top aid, Ted Sorensen, fully believes that many of Kennedy's ideas about how to exert leadership come from his close study of history's great men.

The President appreciates skillful use of language. He admires the style of Harvard economics professor, John Kenneth Galbraith, whom he plans to name Ambassador to India. "Ken's memos are great," says the President. He considers memo writing an important governmental art and takes great pains with the memos he sends to his departments. He has studied Churchill's memos and says about him, "Churchill is very graceful at this." Secretary of State Dean Rusk and Paul Nitze, Assistant Secretary of Defense for International Security Affairs, made important headway with Kennedy when he was considering their appointments because their papers displayed a lucid style.

READING IN BED

Though Kennedy always has been interested in books, there have been three periods in his life of especially intensive reading. Each coincided with an illness. The first period was during his freshman year at Princeton when he became ill and eventually had to drop out, later enrolling at Harvard. Again in 1944–45, recuperating from his Navy duty in the Pacific, he read omnivorously. And in the years 1954–55, when he had the final bout with his ailing back, he read for hundreds of hours and conceived the idea for his Pulitzer prize-winning book, "Profiles in Courage."

Today Kennedy squeezes in reading whenever he can. A recent office visitor noticed the President buried in a magazine for the few seconds it took the man to walk from the door to the desk. Then the President jumped up and came around for the greeting. Kennedy reads at night when there is no social function, and he takes books and papers to his Middleburg retreat. If work flags for a moment during the day, he will pick a book off his desk. He always reads when he travels.

It is not safe to leave attractive reading in the open near Kennedy. "He reads what he encounters," says one staffer. As he passes a desk, he will pick up books and magazines that catch his eye—and the owners have only a 50–50 chance of getting them back.

Kennedy has no news digest system or daily briefing on highlights of the news. Occasionally Salinger will compile comment from across the Nation on a single event such as the inaugural address and put it in a scrapbook for Kennedy to read. But usually, says Salinger, "he gets it all himself." During one of their pre-inaugural meetings Kennedy was rather startled to hear President Eisenhower say that he read newspapers only on Sunday.

The fact that Kennedy is so great a reader, is, of course, immensely gratifying to a large number of people. Editors, writers, reporters and publishers are all delighted. Government officials, especially those who must write lengthy and detailed reports and memorandums, are particularly pleased. But the happiest man of all is probably a Republican named A. T. Schrot. Mr. Schrot owns the Cosmopolitan newsstand on Washington's 15th Street, only a block from the White House, and it is there that the White House staff buys most of its papers and magazines. Since John Kennedy took office, Mr. Schrot's business has increased 400 percent.

TEN KENNEDY FAVORITES

1. "Melbourne," by David Cecil.
2. "Montrose," by John Buchan.
3. "Marlborough," by Winston S. Churchill.
4. "John Quincy Adams," by Samuel Flagg Bemis.
5. "The Emergence of Lincoln," by Allan Nevins.
6. "The Price of Union," by Herbert Agar.
7. "John C. Calhoun," by Margaret L. Coit.
8. "Byron in Italy," by Peter Quennell.
9. "From Russia With Love," by Ian Fleming.
10. "The Red and the Black," by M. de Stendhal.

YOUTH CONSERVATION CORPS: A VALUABLE PROPOSAL BY PRESIDENT KENNEDY

Mr. GRUENING. Mr. President, I was most gratified to read in this morning's New York Times that President Kennedy will shortly propose a Youth Conservation Corps.

This is a most refreshing new look by the executive branch of the Government at a vital problem. It is the sponsorship of a program which is long overdue.

A bill to establish such a Corps was passed by the Senate last year. That bill was introduced by the distinguished senior Senator from Minnesota [Mr. HUMPHREY], and was cosponsored by a number of Senators, including myself. The able senior Senator from West Virginia [Mr. RANDOLPH] labored mightily and effectively for it. A similar bill, S. 404, is now pending before the Senate Committee on Labor and Public Welfare. I hope that speedy action will be taken on this bill, so that it can be enacted during this session of the Congress, and the contemplated Youth Conservation Corps becomes a reality before the end of the year.

This is not really a new proposal. It was tried and proven successful in the 1930's under President Franklin D. Roosevelt. Our land abounds with countless examples of the works of the old Civilian Conservation Corps. Its enrollees did splendid work in Alaska—needed work, but which without the existence of the Corps would not have been done. But more than that useful labor on desirable projects, there are countless thousands of our citizens who are today much better citizens for the training experiences they had as members of the CCC.

Time and conditions are today favorable for the establishment of a youth corps modeled after the CCC, even though not following its method of operation in every detail. Much in the way of natural resource development remains to be done. There are many youths in the Nation who could profit greatly by being taken from the city streets and put to work in rural surroundings doing useful work of benefit both to themselves and to the Nation.

I ask unanimous consent that the news article from the New York Times on this bold, vigorous program be printed in the CONGRESSIONAL RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 21, 1961]

PRESIDENT PLANS NEW YOUTH CORPS FOR CONSERVATION—COMPANION TO PEACE CORPS WOULD RESEMBLE CCC OF DEPRESSION YEARS—FOR MALES OF 17 TO 19—PROGRAM IS AIMED TO HELP SCHOOL DROPOUTS, WHO FIND JOBS HARD TO GET

(By Peter Braestrup)

WASHINGTON, March 20.—The Kennedy administration will propose a Youth Conservation Corps of male teenagers to work on conservation projects across the Nation.

A Department of Labor study group has completed recommendations, which are under review by Secretary of Labor Arthur J. Goldberg. Other Cabinet officials will also be consulted. The proposals are expected to go to President Kennedy later this week.

The departmental report calls for a combined education-work program for 150,000 boys aged 17 through 19. Applicants would volunteer for 1 year's service as laborers, technician's helpers, and light construction workers.

The volunteers would draw token wages, live in special camps, and work under such conservation agencies as the National Park Service, the Forest Service, and the Bureau of Reclamation.

WOULD RESEMBLE CCC

The Youth Corps would most closely resemble the Civilian Conservation Corps of the depression-ridden 1930's. It would have no connection with the Peace Corps, an oversea aid program largely involving college graduates, which was created by President Kennedy on March 1.

According to the Labor Department report the new group would have two principal goals.

It would furnish useful work for a large share of the 200,000 male youths who have dropped out of school and cannot get jobs. Some 7,500,000 school dropouts are expected in the 1960's.

It is this group that suffers the highest unemployment rate, 20 percent, of any age category and it is this group that is much involved in juvenile delinquency.

It would also provide needed low-cost labor for a massive program to catch up with a $3 billion backlog of forest, water, park, and soil conservation projects.

"The program," the Department report said, "should not become something to lean on, but should rather be a stepping stone to normal participation in the labor force."

Initially, 80,000 volunteers would be recruited, with expansion over a 2-year period.

The total outlay would run about $2,700 a year for each volunteer, according to Labor Department estimates. Thus, a 150,000-member program would cost $405 million.

The Youth Corps idea has had considerable Democratic support in the recent past.

In a campaign speech at Scranton, Pa., on October 25, Mr. Kennedy urged creation of a Youth Conservation Corps, echoing the Democratic Party platform. Just before his inauguration, a Kennedy task force on natural resources recommended the corps' establishment.

Senator HUBERT H. HUMPHREY started the ball rolling in January 1959, when he introduced a Youth Corps bill.

Opposed by the Eisenhower administration, the Minnesota Democrat's bill narrowly passed the Senate in a 47–45 vote last August 18. A companion measure submitted in the House of Representatives by Representative JOHN A. BLATNIK, another Minnesota Democrat, never came to a vote.

This year, Senator HUMPHREY has submitted a new Youth Corps bill and 10 similar measures have been introduced in the House. One of the House bills, sponsored

by Representative CARL D. PERKINS, Democrat, of Kentucky, calls for an urban renewal youth work program in addition to conservation projects.

President Kennedy himself, in a television broadcast with Mrs. Franklin D. Roosevelt on March 6, said he hoped to use the Peace Corps concept in slum and depressed areas—another slightly different approach.

In its report, the Labor Department study group endorsed a separate public-service work program for both girls and boys in city areas.

This type of program is scheduled for discussion by the Department's Advisory Committee on Youth Employment, which meets here Thursday and Friday.

PROGRAM PONDERED

Although it made no hard recommendations on the city program, the Labor Department group suggested that this work-education effort should enlist volunteers who would live at home.

There might be part-time work for 16-year-olds still in school. The tasks assigned the volunteers would include furnishing unskilled help in hospitals, homes for the aged, and other nonprofit institutions.

"Care should be taken to avoid job placement which would be in competition with the regular labor force," the Labor Department report said.

Labor Department sources emphasized that in both types of program, the greatest care would be taken not to take jobs away from the building trades and other workers. These sources said the Youth Corps would necessarily involve added use of skilled craftsmen in a stepped-up conservation program.

The Youth Corps educational program, the Labor Department study group recommended, would involve roughly 20 percent of the workday plus 4 hours on Saturday. Small classes on a staggered schedule would be the rule.

The curriculum would include, where applicable, remedial reading, arithmetic and more advanced academic and job training. No extensive vocational or technical training would be attempted. Counseling, citizenship training, and calisthenics would be included. Able youths would be promoted to head groups, with pay increases.

NINE-YEAR PROGRAM

The Youth Corps' ancestor the Civilian Conservation Corps, was established by act of Congress in March 1933. It lasted until June 1942, 6 months after Pearl Harbor.

During its 9 year lifespan, the corps gave employment and work training to 3 million men, most of them joining up at the age of 17 or 18. But World War I veterans and Indians were admitted regardless of age.

BURNS CREEK DAM AND RESERVOIR

Mr. CHURCH. Mr. President, last week, the Subcommittee on Irrigation and Reclamation of the Senate Interior and Insular Affairs Committee held hearings on S. 66, a bill to authorize the construction of the Burns Creek Dam and reregulating reservoir on the Snake River in eastern Idaho. Legislation to authorize this project has twice passed the Senate. The project itself has overwhelming support from virtually all interests in the State of Idaho, other than the private utility companies. At last week's hearings, representatives of water-users groups in Idaho, of power consumers, of municipal governments, and of chambers of commerce again testified in its favor.

The only testimony offered in opposition was from representatives of private utility interests. These interests continue to oppose the project in spite of the fact that the authorizing legislation contains provisions which insure that power to be generated at the Burns Creek Dam, and additional power which will result at the existing Palisades Dam, as a consequence of the reregulating feature of the Burns Creek project, cannot invade the private utility market in the area.

Before the hearings were held, the Utah Power & Light Co. circulated, in its service area, a pamphlet labeling the Burns Creek project as a "$50 million white elephant." The charges contained in this pamphlet represented such a serious distortion of the facts that I felt it advisable for the Bureau of Reclamation to prepare an objective reply to them. The Bureau has furnished, in the form of a letter to me, signed by Commissioner Dominy, a statement designed to set the record straight. I ask unanimous consent, Mr. President, that the letter be printed in full at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, D.C., March 20, 1961.

Hon. FRANK CHURCH,
U.S. Senate, Washington, D.C.

DEAR SENATOR CHURCH: As requested in your letter of March 8, we have reviewed the pamphlet entitled "Burns Creek $50 Million White Elephant," and we present for your information the following detailed rebuttal of specific statements contained therein.

This, of course, is supplementary to the rather extensive discussion of some of these points during the hearings on S. 66 on March 15 before the Senate Interior and Insular Affairs Committee.

An urgent need exists for a reregulating dam and reservoir below Palisades. A reregulating project as planned by the Bureau of Reclamation would provide badly needed water conservation storage capacity and, in addition, would make possible the fluctuating of water releases from Palisades. Water releases from Palisades are now made in strict conformity with downstream beneficial uses and rights which follow a generally uniform pattern. With the reregulating reservoir, fluctuating releases can be made from Palisades and smoothed out in the reregulating reservoir so that the uniform pattern is moved downstream and released from Burns Creek. Thus a more efficient use is made of an existing powerplant, added conservation space is obtained, and a new resource, falling water through a new powerplant, is obtained.

The pamphlet infers that the Burns Creek project is not an irrigation project because it would not irrigate any new land. This is like saying that all irrigation projects must supply water to new lands despite existing needs for supplemental water for inadequately irrigated lands. Such a policy which is not followed by either the States or the Federal Government, would foster economic insecurity. It is only logical to first devote water supplies to filling out presently insufficient irrigation supplies to land already devoted to irrigated agriculture rather than to bring into production new irrigated lands. Some 650,000 acres are now irrigated in the Upper Snake River Basin in Idaho, and most of them are in need of more water to achieve optimum production.

The 100,000 acre-feet of storage space to be provided in Burns Creek Reservoir would help to satisfy that need, in addition to which the energy generated at Palisades and Burns Creek Dams could be sold during the irrigation season to encourage the development by private capital of wells and pumping plants to serve about 65,000 acres of new lands. The increased agricultural production, new farms, and supporting population which results will expand the general economy and tax base, both locally and nationally.

The pamphlet labels Burns Creek a flood control project that won't help control floods. The Bureau has made no claim of benefits or allocated any space or money to flood control. Because of this fact, 99.9 percent of the project cost is reimbursable, and the taxpayers of the Nation are not bearing the cost as they do for flood control throughout the country, particularly in the Eastern States.

The charge is made that the project would provide subsidized below-cost power to a favored few. The payout studies show that in accordance with accepted practices of operation and analysis the entire cost allocated to power is repaid with interest, in this case in 40 years. The costs and rates are determined, as a matter of fact, on the same basis as are rates in contracts for the sale of Government power to Utah Power & Light Co.

The reference to the "favored few" refers, of course, to the preference customers, such as REA's, cooperatives, and municipalities, which under Federal law have first call upon Federal power not needed for project purposes. All power not used for project purposes or sold to preference customers is available for purchase by the private utilities in the area. Between July 1, 1959, and June 30, 1960 (fiscal year 1960), these utilities purchased 44 percent of the total sales from the southern Idaho Federal power system.

The statement is made that efforts have been made to camouflage the true purpose of the Burns Creek project. The facts are clearly on the record through voluminous testimony and through the Bureau reports. It is not fiction that 42.7 percent of the reservoir capacity is for conservation space, and, when and if necessary, 92.7 percent of the reservoir capacity can be utilized to provide water for beneficial consumptive use, and that only 7.3 percent of the total capacity is not available for water conservation. The power function is, of course, vitally important to the financial feasibility of the project, as it is power revenues that assure repayment of the project.

About 97 percent of the project cost is allocated to power. This entire allocation, with interest, plus $554,000 of the irrigation allocation, will be returned to the Treasury from power revenues. It is not fiction that the water users need and want the water to be conserved by the reservoir. There can be no better proof of the need for, and value of, this function than the fact that applications are already on file for more space than will be available and that the water users are prepared to pay for the use of that space.

The fact that the majority of the cost of the project is allocated to power is no true measure either of its function or its worth. The Hoover Dam, a part of the Boulder Canyon project of the Bureau of Reclamation, one of the most famous of water conservation structures, has not one cent of its cost allocated to irrigation or to municipal or industrial water, or any purposes other than power and flood control. Yet, upon this structure hangs the lifeblood of many thousands of acres of irrigated land and the drinking water of thousands of people in Arizona, California, and Nevada. Incidentally, Hoover Dam was also labeled a "white elephant" during its authorization days; so, for that matter, was Grand Coulee Dam.

The project will be built by appropriations made by the Congress. These appropriations constitute an investment in the future and welfare of the United States. About 40 percent of the money will come from the reclamation fund, which is available only for the purpose of building reclamation projects and is not derived from taxation. The increase in investment in the Palisades project, because of adding Burns Creek, is 73 percent, while the power revenues are increased 94 percent. That the total allocation to power is an investment, and a good one, is also illustrated by the fact that after the entire power allocation is repaid with interest the investment produces an annual cash return of 4.4 percent in addition to the irrigation benefits that continue indefinitely.

Much space is devoted to an attack on the irrigation aspects of the project. The fact that the storage space provided will be needed infrequently merely points up the purpose of the storage, i.e., for long-term holdover. Existing storage provides the annual regulation needed to conserve normal flow fluctuations, but occasional years of abnormally high runoff do occur, when water desperately needed in normal and subnormal years now must be wasted.

The storage capacity provided in Burns Creek Reservoir would permit the conservation of such flows for release when needed. The value of such water is clearly evidenced by the water users' oversubscription of the potential storage space and their willingness to pay for it.

Burns Creek Dam, Reservoir, and powerplant would not remove 3,000 acres from production. The reservoir at maximum pool elevation would cover 4,190 acres, of which 1,400 acres are cultivated agricultural lands used primarily for hay and grain crops, the remainder being poor grazing land, rough and rocky hillsides, or river bottom and unclear riverbank and flood plain.

The pamphlet refers to reregulation as though that is a purpose separate and apart from other purposes. Reregulation, of course, is not a project purpose in and of itself. It is a method of operation by which the real purposes of the project are achieved. Therefore the costs incurred to reregulate releases are allocated to the purpose or purposes directly benefited. That such charges are bruited about are not only insults to the intelligence of every engineer, including those employed by the company, but also demonstrates the absurd lengths to which the company has gone in an effort to mislead the public and the Congress. In the case of Burns Creek Dam, this reregulating function serves a very constructive purpose. Palisades Dam cannot now be and is not being operated to optimum efficiency for power generation because the releases are dictated by other requirements. Addition of Burns Creek to the system would have the effect of essentially freeing Palisades Dam for short-term operation from the restrictive effect upon power generation imposed by riverflow requirements.

The quotation from Mr. Bennett's testimony in regard to peaking capacity is out of context. Mr. Bennett made his statement in connection with a question regarding a possible small reservoir at the Conant Valley site, which was investigated as one possible means of serving the reregulation function only. It is clear in the record that the statement made has nothing to do with the Burns Creek project and its relationship to Palisades.

Some of the power generated in the Federal system is sold to municipalities as preference customers, but the pamphlet is in error in ascribing more than half to such sale.

In determining what power is available, it must be borne in mind that the first call for power produced on reclamation projects is for project use. Under this criterion, there is first allocated to irrigation pumping 73,000 kilowatts out of a total of 155,000 kilowatts, or about 47 percent. Out of the remainder of about 82,000 kilowatts, three municipalities (Idaho Falls, Rupert, and Burley) receive 34,500 kilowatts, which is 22 percent of the total. The remainder, about 48,000 kilowatts, is allocated to REA's cooperatives, and several small towns. The statement in the pamphlet is based upon commercial sales only and hence ignores the important aspect of irrigation pumping power.

To say that incremental Burns Creek revenues must equal or exceed the annual costs, including interest chargeable to the specific project operating in a system, is like trying to say that each time you ride a fleet taxicab your fare in that cab must be related to the cost of purchase and operation of the particular car in which you are then riding. Obviously this would result in chaos. The Secretary is required to maintain power rates in a power system adequate to return the costs associated with that system and this is done by a uniform rate applicable to all power in the system. In the same manner the owner of the taxi fleet makes the same zone or meter charge regardless of which one of the cars in his fleet of cabs you ride in. No power company operates on the basis the company urges here.

The power company seems to feel that construction of Burns Creek would adversely affect coal mining for the thermal powerplant it is building at Kemmerer, Wyo. The president of the power company has stated that his company supported authorization of the Colorado River storage project. That project has an associated 1,168,000 kilowatts of hydroelectric power, but he did not here claim that this large amount of power had the same adverse effect on coal as the relative minor 90,000 kilowatts of Burns Creek power.

In view of these facts, the power company argument seems to be saying that its decision to construct the 500,000-kilowatt Kemmerer thermal plant hung upon the thin thread of serving some 10,000 average kilowatts of winter power and 23,000 average kilowatts of summer power in those portions of Idaho and Wyoming it now serves. Obviously, these responsible people made the decision to build such a large plant taking full account of load growth above that to be served by the Colorado River storage project and other outside sources.

To argue that the estimates of load growth are so delicately balanced that the comparatively small output of the Burns Creek proposal will upset the thermal production schedule is ridiculous.

The record does not show that the power company was solicitous of the coal miners when it built its own hydroplant on the Bear River. Neither does it show that the company expressed such solicitude over the hydro developments in the Hells Canyon reach of the river (i.e. Brownlee, Oxbow, and low Hells Canyon), nor over their own thermal plants that are fired with gas, and even pitch. The improvement in crop production on present lands, due to more water supply and private development of the new lands by ground-water pumping, will automatically increase markets for coal and coal products. The gains thus created will far offset any temporary questionable less use of coal in steam generating plants which might result from construction of Burns Creek.

The Burns Creek project proposal evolved from the water users' need for more storage capacity and from a Federal Power Commission analysis of hydropower potential. Water users oversubscribed for Palisades space, illustrating the need for more space. Wyoming was opposed to construction of any more reservoir space in that State on the Snake River, and the only remaining satisfactory site on the main stem of the Snake River in Idaho above points of water use was the Burns Creek site.

Burns Creek is a good project. It has a benefit-cost ratio of 1.65 to 1. In common terms this means the United States receives $1.65 of value for every $1 spent on the project. All reimbursable costs of the project will be repaid and 97 percent of that cost is repaid with interest.

All 650,000 acres of presently irrigated land in the valley can benefit from the conservation storage in the reservoir. Some 65,000 acres of new land can be privately developed by using summertime power produced on the project to pump ground water. The tax base of the counties, the State, and the Nation can thus be broadened materially.

The investment which the United States has made in the Palisades power facilities, plus that to be made in Burns Creek, will, after return of the reimbursable costs, produce net revenues annually equal to 4.4 percent on the investment. Not only does the United States thus receive back its capital with interest, but continues to receive an excellent return on the property it owns.

Burns Creek repaymentwise is comparable to, and in one respect better than, the total investment in reclamation facilities in the United States. These facilities, in contrast to many Government programs, are 92 percent reimbursable with 30 percent of the total being reimbursed with interest. Burns Creek cost is 97 percent reimbursable with interest.

Sincerely yours,

FLOYD E. DOMINY,
Commissioner.

EFFECT OF TEXTILE IMPORTS

Mr. WILEY. Mr. President, yesterday I spoke about the pioneer spirit of America. I illustrated my comment by two examples, one from my own experience as a boy, and the other the experience of a mill in Reedsburg, Wis. In those remarks I called attention to the fact that the manager of that mill said foreign fabrics delivered in Reedsburg can be bought for 40 to 50 cents a yard less than what it costs them to make the fabric.

Mr. Wirth, president of the mill, feels that the Government has gone too far in furnishing the latest textile machinery to competitors in Germany, Italy, and Japan.

One of the problems facing us in this country is the matter of imports. After the late war, of course, much of the resources of the world was depleted. Under the Marshall plan, we furnished many countries with a great deal of material that was needed. However, those countries have now reestablished their facilities, and are producing goods in competition with our own products.

In the letter I received today Mr. Wirth calls attention to the fact that the three mills which he mentions—

Are owned and managed by friends of mine, and it is heartbreaking to see these mills struggle against unscrupulous dumping of foreign goods into our market. It appears that we have Government officials who have taken it upon themselves to help liquidate and destroy an industry which has been built up in this country over hundreds of years just in order to stay in the good graces of some pressure groups from Japan, Italy, and Germany, and other countries. Our country is the only country in the world that will first of all worry and protect foreign industries before they pay heed or have

any understanding for problems of American industry. Is it not possible that you can help?

Mr. President, I wrote a letter to the Commission. I asked the Commission what was the situation and whether any relief was in sight. In my humble opinion, the woolen mills of this country must get together and must make application to the Commission for such relief as the Commission can give.

In this period we talk about unemployment. In my office today were 50 or 100 men speaking on that subject.

The PRESIDING OFFICER. The Chair regrets to inform the Senator from Wisconsin that his time has expired.

Mr. WILEY. Mr. President, I ask unanimous consent that I may have 1 additional minute.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin? The Chair hears none, and it is so ordered.

Mr. WILEY. Mr. President, their position is the same as I have stated today.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

REEDSBURG WOOLEN MILLS, INC.,
Reedsburg, Wis., March 17, 1961.

Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR WILEY: My name is Ralph Wirth. I am president of the Reedsburg Woolen Mills. I have been acquainted with you for many years, when you were governor of Kiwanis for the Wisconsin and upper Michigan districts, and made trips occasionally to meet with our group at the Hotel Huntly in Reedsburg. Since then I have followed your career with a great deal of interest, and only on one occasion did I write to you on a matter which is very important to me, as well as to the city of Reedsburg, and that is the condition of woolen industry, and also the textile industry in general in the United States.

You are no doubt aware of the fact that our industry has been hard hit by imports, especially from Japan and Italy, and because of such imports many mills had to close their doors and go out of business permanently over the last 4 or 5 years. It seems now with the yearly increase of foreign merchandise being dumped in the United States the death of these mills is increasing at a fantastic rate.

I have always voted Republican because I was under the mistaken presumption that the Republican Party would protect American industry and American workers against the encroachment of cheap foreign goods, but unfortunately I have been completely mistaken. Nothing has been done, and nothing is being done to stop foreign countries from destroying the great and important woolen textile industry in the United States. With the wage rates that are being paid by our industry compared to the wage rates paid in Italy and Japan we just do not have a ghost of a chance for survival, unless vigorous action is taken by the Government.

This is the reason I write to you, and appeal to you to help the woolen textile industry, especially to help such mills as the Reedsburg Woolen Mills in Reedsburg, Wis., the Chippewa Falls Woolen Mills in Chippewa Falls, Wis., and the Rock River Woolen Mills in Janesville, Wis.

There are others, but these three mills are owned and managed by friends of mine, and it is heartbreaking to see these mills struggle against unscrupulous dumping of foreign goods into our market. It appears that we have Government officials who have taken it upon themselves to help liquidate and destroy an industry which has been built up in this country over hundreds of years just in order to stay in the good graces of some pressure groups from Japan, Italy, and Germany, and other countries. Our country is the only country in the world that will first of all worry and protect foreign industries before they pay heed or have any understanding for problems of American industry. Is it not possible that you can help?

I would appreciate an answer to my letter, and if you feel that I should see you in Washington to discuss further this problem I will be happy to make an appointment with you, and see you at your convenience.

With kind personal regards, I am,

Yours very truly,

RALPH WIRTH,
President and General Manager.

HOW THE PEACE CORPS CAME TO BE

Mr. WILEY. Mr. President, on the subject of "How the Peace Corps Came To Be," there was published in the Sunday Washington Post and Times-Herald an article written by Drew Pearson which states that the Peace Corps idea came out of Russia. The article comments on how the idea was taken up by the Kennedy administration. I ask unanimous consent to have the article printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW THE PEACE CORPS CAME TO BE

(By Drew Pearson)

Here is the inside story of how President Kennedy happened to propose one of his most electrifying programs—the Peace Corps. It has aroused such response from American youth that its Director, Sargent Shriver, is swamped.

The Peace Corps was finally sold to Mr. Kennedy during the closing days of the election campaign by a Philadelphia businessman, M. J. Shapp, president of the Jerrold Electronics Corp. A further interesting fact is that Shapp got the idea from Moscow, where the Soviet Union is training a peace corps of young Russians for work in the underdeveloped countries.

Shapp had been in Moscow on a people-to-people friendship program and saw how the Soviet was giving intensive training to young people in foreign languages, foreign customs and the economic problems of Africa and Asia, for the purpose of spending part of their lives in these areas.

If the Russians could do this, Shapp decided, America could do likewise. He also was impressed with the fact that American dollars were not winning the battle of foreign aid, and that it needed more than dollars to win the cold war.

So during the recent election campaign he tried to see Bobby Kennedy in Philadelphia. Bobby was busy being monopolized by the henchmen of Representative BILL GREEN, Democrat, of Pennsylvania, so Shapp learned that Bobby was flying to Pittsburgh, got a ticket and sat beside him during the flight. During the trip he unfolded his idea of a peace corps.

FAST-MOVER KENNEDY

"Write me a memo about it," said Kennedy, "and I'll see what we can do."

This was on Tuesday, October 25. Shapp took the next plane back to Philadelphia and wrote Kennedy a memo that night.

"When I was in Moscow last year," Shapp wrote to Robert Kennedy, "I met a young couple who were studying Swahili at the Moscow Institute of Languages. He was a sanitation engineer; she was a nurse. They were also studying the native customs of African countries.

"They told me that upon completion of their special training they were going to move to Africa to live. They had the same zeal and outlook as I have found in many of our religious missionaries. It is this type of person that we must train and inspire to carry the message of American idealism to all parts of the world.

"The carrying of this message must be accomplished by service to the people in order that our way of life can prevail."

By Friday Shapp was in Washington conferring with Roger Tubby of Senator Kennedy's staff, and on Sunday he conferred further with Ted Sorensen, Senator Kennedy's right-hand adviser.

The Kennedys move fast. By Tuesday, November 1, candidate Kennedy had made the Peace Corps one of his most important campaign proposals.

(NOTE.—Shapp emphasizes that to be successful, Peace Corps members must have the same religious fervor as American missionaries. He also emphasizes that the Russians spend 3 years training their youth corps members and most of them have graduated from college before they join up. The American Peace Corps, therefore, cannot be a slapdash operation.)

APARTHEID IN THE UNION OF SOUTH AFRICA

Mr. JAVITS. Mr. President, the whole world will view with alarm and concern the headline news from the Union of South Africa that a race riot broke out on the return of the Prime Minister, with respect to the withdrawal of the Union of South Africa from the British Commonwealth. I had occasion to refer to this tragic event in the Senate last week.

Mr. President, the United States has an opportunity to take a very constructive role in respect to this problem. I do not see how the world can refrain from condemning apartheid in the Union of South Africa as being contrary to the Charter of the United Nations, to which the Union of South Africa is a party, and as being contrary to international law and international morality.

When we observe this kind of crisis developing, so dangerous not only to the Union of South Africa but also to the peace of the world—knowing, as we do, the revolutionary atmosphere throughout Africa, the Middle East, and the Far East in terms of the determination of people whose skins are yellow, black, or brown to be considered human beings of equal dignity with all others—I think it is important to consider the role the United States can play. It should be a very constructive and effective role.

An opportunity is afforded to us by reason of the fact that the special political committee of the General Assembly will be considering the same question this week. Our representative on that committee is Mr. Plimpton, recently appointed as deputy United States representative to the United Nations. The committee will be discussing discrimina-

tion against Indians in the Union of South Africa, and will also be discussing the whole problem of apartheid.

Mr. President, the United States, through Mr. Bingham, has joined in voting condemnation of South African apartheid policies as applied by the Union of South Africa in the trust territory of South-West Africa. This took place last week in ithe fourth commttee on the United Nations, the so-called Dependent Areas Committee, which asked the Union of South Africa to give effect to the resolution adopted by the United Nations General Assembly on this subject last December.

Mr. President, certainly the United States has a duty to engage in the greatest amount of moral suasion in helping marshal the whole public opinion of the world in respect to this very critical question. We must understand that what is going on in the Union of South Africa now will have an enormous effect upon world peace and upon racial tensions throughout the world.

Racial problems which we have experienced in the United States for very long are now international problems, and the highest order of international statecraft is required. The United States is called upon to play a constructive role in terms of the preservation of peace and the international implications of race relations and equal opportunities for all men, whatever may be their colors.

I express hope that the Congress will demonstrate that it fully supports the action of the President of the United States, a grave and serious action already taken in one committee of the United Nations, to be taken in another, and to be taken in the United Nations General Assembly. We should make clear, with all the moral and diplomatic force we have, that we are against apartheid not only because it is morally and legally wrong, but also because it is a threat to the peace of the world.

NEED FOR UNITED NATIONS PERMANENT FORCE

Mr. KEATING. Mr. President, I have read with great interest the speech of Secretary of State Dean Rusk delivered at the University of California's Charter Day exercises. Secretary Rusk made it clear that the United States must seriously consider the possibility of calling for a permanent United Nations police force to handle such situations as those occurring in the Congo. In order to meet the need for rapid action and to have enough troops available to meet the challenges arising in all corners of the globe, a permanent United Nations force with a unified direction is virtually a necessity.

Had such a force been ready and available in the Congo from the start, the ill-fated developments in that land might well have been averted, or at least minimized.

Mr. President, under the circumstances, I believe that the resolution submitted by the Senator from New Jersey [Mr. CASE] on February 22, of which I was a cosponsor, is particularly appropriate. We have called for the establishment of such a permanent force, to be under the permanent and effective control of the Secretary-General, or whomever else shall be designated as commander in chief. Moreover, it should be budgeted as a part of the regular United Nations budget so that every nation would be obligated to pay its share or lose its voting privileges.

Furthermore, Mr. President, there are two other points suggested by Secretary Rusk's statements. He stresses also the need for continued action in the field of disarmament. I believe it would be useful to explore the possibility of establishing a permanent United Nations force in connection with the disarmament talks now being studied anew. If the nations themselves disarm to any appreciable extent, the need for a permanent, ready United Nations force will be greater than ever.

Finally, Mr. President, I think we would do well to consider the possibility of urging that a United Nations force be sent to Laos where the Communists are moving forces in rapidly in an attempt to take over the country, or at the least to divide it in two, like Korea and Vietnam. A United Nations force in Laos would be invaluable in guaranteeing the genuine neutrality of the country and in preventing a forcible Communist takeover.

WORCESTER, MASS.—AN ALL AMERICA CITY

Mr. SMITH of Massachusetts. Mr. President, the city of Worcester, Mass., has just been cited by the National Municipal League and Look magazine as one of the country's "All America Cities."

Its citizens were given this recognition for the exceptional record which they have made in recent years in the field of civic improvement. This shows that local pride and local initiative are still the strongest weapons which our cities wield against the encroachments of blight and decay.

I ask unanimous consent to have these articles regarding Worcester printed in the RECORD.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

DEAR SENATOR SMITH: It is with great pleasure that we announce that Worcester, Mass., is being honored this month as an All America City.

The citizens of Worcester, by their outstanding action in bringing about major civic improvements, have earned the coveted title for their community, and will receive one of the annual All America City Awards presented under the joint sponsorship of the National Municipal League and Look magazine.

The citations are given each year to 11 U.S. communities selected by a jury of distinguished citizens and experts on government impaneled by the league. As cosponsor, Look is proud to announce the names of the winning cities, together with the story of why they won.

I feel sure you will be interested to know of this well-deserved honor which has come to the people of one of the fine cities in your State.

Cordially yours,

JANE DOUGLAS,
Coordinator of Civic Programs.

WORCESTER, MASS.—Citizens of New England's third largest city have a long record of civic achievement.

Leaders of this industrial city of 186,587 believe that a greater proportion of its residents participate in civic affairs than in any other city in the United States. Two reform-bent nonpartisan organizations, the Citizens Plan E Association and the League of Women Voters, have over 2,000 active members each. In 1947, they persuaded voters to adopt a council-manager government. Voters approved it again in 1959.

Another large group, Citizens for Neighborhood Improvement, has 53 neighborhood associations. An organization that grew from a slum survey by students of Worcester Polytechnic Institute, it has upgraded health, housing, traffic, and playground facilities. Yet another group, the Emergency League for School Construction, campaigned for the adoption of an $8.5 million school-building program. And a Committee on Aging last year established the first municipal information center for the aging in the United States to provide professional consultation service.

EFFECT OF MINIMUM WAGE LEGISLATION ON UNEMPLOYMENT

Mr. MILLER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter I have received from the chairman of the legislative committee of the Mason City, Iowa, Chamber of Commerce. The letter sets forth information collected from a study and survey of the effect upon Mason City retailers of minimum wage legislation pending before Congress, and indicates the potential unemployment which this legislation entails. The chairman of this committee is one of our most respected Iowa lawyers, and I am sure his letter merits the attention of all who are concerned over our unemployment situation in this country.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MASON CITY, IOWA, *March 14, 1961.*

Re minimum wage bill, S. 895.

Hon. JACK MILLER,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MILLER: I am writing as chairman of the legislative committee of the Mason City Chamber of Commerce which has recently completed a study and survey of the effect upon Mason City retailers of proposed Federal legislation increasing the minimum wage to $1.25 per hour and broadening the coverage to include in general retail and service businesses with volume of $1 million per year or those with $500,000 per year volume if half thereof is in interstate commerce. After considerable study of the proposed legislation, a subcommittee of the legislative committeee recommended that the committee as a whole oppose this proposed legislation and this recommendation has been approved by the legislative committee.

In connection with this study, the subcommittee sent out questionnaires to 120 retail establishments in Mason City and received returns from 37 thereof. I enclose to you herewith a copy of the questionnaire so that you may see the information sought.

The 37 reporting employers have a combined payroll in Mason City of 887 employees, of whom 385 are now being paid less than $1.25 per hour. In the event of the employer being affected by the minimum wage law, from 57 to 67 employees would

be discharged. Fifteen retailers reported that they would reduce or eliminate overtime work and 14 stated that they would increase prices immediately to cover any wage increase, with the price increase ranging from one-half of 1 percent to 15.7 percent.

Six of the reporting retail establishments indicated a volume of business between $20,000 and $100,000, nine indicated a volume between $100,000 and $250,000, five indicated a volume between $250,000 and $500,000, six reported volume between $500,000 and $1 million, four reported volume in excess of $1 million, and seven made no response to this part of the questionnaire. Fifteen of the questionnaires contained some additional comment at the bottom and all but one indicated opposition to the proposed legislation.

None of the retailers responding to this questionnaire reported as much as 50 percent of their business being interstate sales, although Mason City is a retail center for a considerable area and is relatively close to the Minnesota border.

At the meeting of the legislative committee which adopted the position of opposing this proposed legislation, several Mason City retailers who are not members of the committee were present. It seemed to be the consensus of the group that although a particular retailer may not be directly covered by the proposed legislation, the fact that other retailers in Mason City would be covered would tend to establish the minimum wage of the covered retailers as the minimum wage of the noncovered retailers.

Although I am not informed that you are on the committee considering this legislation, I thought you might be interested in the foregoing information. The 30 members of the legislative committee urge your opposition to the proposed minimum wage bill.

Very truly yours,

RAY E. CLOUGH.

GOVERNOR NELSON'S RESOURCE DEVELOPMENT MESSAGE TO WISCONSIN LEGISLATURE

Mr. PROXMIRE. Mr. President, on March 15 the Governor of Wisconsin, the Honorable Gaylord Nelson, delivered his resource development message to our State legislature. Governor Nelson's message is a thoughtful analysis of the resource needs and potential of our State, and it outlines a course of action to preserve and improve our wealth of scenic, recreational, forest, and other resource assets. To bring this statement to the attention of a wider audience, I ask unanimous consent that it be printed in the RECORD.

I may say, incidentally, the message has been very enthusiastically received by people throughout our State, in both parties, and by all economic groups.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATE OF WISCONSIN RESOURCE DEVELOPMENT MESSAGE TO THE LEGISLATURE, MARCH 15, 1961

(By Gov. Gaylord Nelson)

I want to talk to you today about Wisconsin's vast but endangered outdoor resources, and I want to urge dramatic and decisive action now.

Every thoughtful man and woman in Wisconsin realizes what these assets mean to us. They are a large part of the reason we live in Wisconsin, and why others travel hundreds of miles to share our heritage.

On the north and east, our State is bounded by two of the greatest fresh water bodies in the world, Lake Superior and Lake Michigan. On the west, our boundaries are marked by two great rivers, the St. Croix and the Mississippi. And within our borders, we have more than 9,000 lakes, 1,500 trout streams, and 5 million acres of publicly owned forests.

But these resources can no longer be taken for granted. We are losing them. We are losing them not by the inch and the ounce, but by the square mile and the ton.

We face a challenge that demands immediate action. This is not something that can be put off for 10 years. It cannot be put off for even 2 years without the permanent loss of some of our most vital assets. The choice we are faced with, quite simply, is now or never.

Wisconsin's entire recreational future will continue to be undercut, month by month, unless we start immediately on a program of wise and prudent investment in our outdoors assets, enhanced for future generations by careful planning and by multiple-use concepts.

As a result of the jet plane, more than 180 million Americans are now within a few hours' travel of Wisconsin's famous musky waters. Completion of the Interstate Highway System will bring most of our lakes, streams, parks, and forests within weekend reach of 6,560,000 people in the Chicago metropolitan area, which is 1½ times the entire population of Wisconsin.

State population has also increased an unprecedented 518,000 in the past 10 years, equivalent to all the people in Dane, Racine, and Waukesha Counties. Within Wisconsin alone, this has added 58 potential new users for each of our State's 9,000 lakes and more than 16,000 new people for each of our 32 State parks.

In addition, the vast majority of Americans have more cars, more boats, more motors, more leisure time, and more money to be spent on outdoor recreation. As just one startling example, the number of fishermen in the United States is increasing almost twice as fast as our national population. And as more of our State and National population is squeezed into vast urban centers, the urge to get out of the city and back to nature is multiplied many times over.

Beyond this, there is the massive subdivision of the surrounding countryside that once helped meet the recreational needs of our city people. In Wisconsin, experts say that urban expansion will eat up nearly 1 million acres of our remaining rural lands within the next 15 years. There is also the pressure of industrial expansion, with its new demands for land, water, and timber. And there is the constant striving of our hard-pressed farmers to increase their income by diverting additional water for irrigation and by putting new land under the plow.

I'm sure that each of us can recall a favorite picnic spot that is now a housing development, a wonderful duck marsh that has been drained for farming, a scenic highway stretch that is now cluttered with billboards and roadside stands, a once-secret trout stream that is no more, or a peaceful lake that has been encircled and closed off by private landowners, or overrun and heavily pressured by powerboats.

Many of these losses, however, occurred over several decades. In the face of today's huge and threatening pressures, the best of what is left can be lost for our children in a handful of years. This is the challenge we must meet, and meet now.

Our failure to act will do far more damage to Wisconsin's future than that inflicted by the lumber barons when they thoughtlessly destroyed our virgin stands of white pine and hardwood 75 years ago.

Let's look at a few harsh facts.

In the past 10 years, daytime use of our parks has increased 72 percent and camping has increased 246 percent, compared to a 15-percent rise in State population. At my request, the 1959 legislature approved a 50 percent increase in funds for these facilities, yet they are still at the breaking point. Last year, for the first time in Wisconsin history, we turned away campers at our State parks. Tents had become so jammed together that they created a major fire hazard; the ground had been worn bare in many areas and had been so tamped down that it was impossible to drive a tent spike.

While overcrowding thus threatens destruction of existing facilities, the cost of acquiring new parks and campgrounds is increasing about 10 percent a year, or more than 100 percent every 10 years that we allow to pass. But it is not just a question of cutting our buying power in half. It is also a question of the best sites being permanently lost to the public, since all this prime land will be subdivided for private use long before the 10 years are up. In 1970, we would pay more for remaining second- and third-rate sites than we would pay for first-rate sites today.

In this critical situation, Wisconsin is spending only 9 cents per park visitor, while Illinois spends 42 cents and Minnesota 28 cents.

Unless we take emergency action, our park and forest recreation system is destined to remain the weakest link in our entire conservation program, dependent largely on what can be spared from other conservation revenues and from the State's general tax funds. Even the park sticker fee proposal would fall far short of providing adequate funds.

Wisconsin's other outdoor assets face much the same dangers as our parks and camping sites. Carp now occupy lakes and streams that once belonged to game fish. Our native brook trout are slowly losing out. Most of the trout waters in southeastern Wisconsin are already destroyed, and the belt is moving steadily west and north. Even in central and northern Wisconsin, the platting of stream and river shorelines places both fish and game habitat in grave danger, as does the lack of public control of many headwaters.

Shoreline filling, sand blankets, dredging, drainage, subdivision, and pollution have already destroyed major spawning beds and nursery areas for muskellunge, northern pike, walleyes, and bass. In our more populated areas, up to 50 percent of the remaining northern pike spawning grounds face destruction in the next decade. And again, public control and management offers the only hope.

Public access to lakes and streams, as demanded by our State constitution, is also endangered, despite the new statewide access program we authorized in 1959. Private interests are buying the last segments of shoreline and closing lakes to the public at a rapid rate. In the far northern areas of Wisconsin, such as Vilas County, lake frontage prices have doubled and tripled within the last 5 years, and the situation is even worse in other parts of the State.

The same hard, cold facts apply to Wisconsin's remaining resources for wildlife habitat. Wetlands provide the main habitat and breeding grounds for many species of game, including snipe and woodcock, duck and deer, pheasant and rabbits, beaver, otter, mink, muskrat, raccoon, and wild birds of all kinds. In some counties, these damp pockets of vegetation furnish the last remaining wildlife habitat.

More than half of our original 5 million acres of wetlands have been drained in the past 60 years; and in southeastern Wisconsin, drainage of wetlands continues at the rate of almost 750 acres per county each year. With each acre drained, Wisconsin forever loses part of its potential for wildlife.

In brief, this is the pattern. In the face of massive and unprecedented pressures on our outdoor recreational resources, we are steadily losing ground—in scenic beauty, in parks and campsites, in fish and game, in fresh water assets and wilderness areas.

I believe the facts demand a crash program. I propose that we spend $50 million over the next 10 years on this program. I propose that first priority be given to securing for the public these vital assets that are fast disappearing, and that only secondary priority be given to their immediate development. I propose a 1-cent tax on cigarettes, which will pay for this program.

Of the $50 million total, $33 million would be spent for State parks and State forest recreation areas, $9 million for fish and game habitat, $2½ million for youth conservation camps, $2 million to protect scenic resources along our highways, $1½ million for creation of new lakes under the Federal small watershed program, $1 million in State aids to help metropolitan areas acquire rural recreation areas to meet the needs of their people, $392,000 for tourist information centers at key points of entry to Wisconsin, $270,000 for careful planning of future projects and priorities, and $50,000 for a survey of the Lake Superior region's recreational potential, including possible construction of a south shore scenic drive.

A 1-cent increase in the cigarette tax is expected to produce $9.7 million in the next biennium, and the revenue from this 1 cent is increasing $260,000 a year. Thus, in the 10-year period, the total revenue produced would be more than $50 million.

Except for restoration of all fish and game license funds now diverted to parks, all this money would be used to supplement present conservation activities. Even $50 million would fail to meet our needs, however, without one novel feature. In brief, I propose that a substantial share of these funds be spent for easement rights, rather than outright purchase of lands.

This easement program has operated with great success in such other States as New York. It has two distinct advantages. First, the land stays on the local tax rolls. Second, and more important, the State pays for only those rights it deems are essential to the public interest, and then only on the portion of the property considered necessary.

The Wisconsin Highway Commission already has a limited easement plan underway for purchase of scenic rights along the Great River Road, which follows the Mississippi River for almost 250 miles from the Illinois border to Pierce County. We have purchased scenic easements on 53 miles of this road, including State control of billboards, construction, tree removal, dumping, and subdivision. At a cost of less than $700 a mile, the public has been guaranteed protection of much of the finest scenery along the Mississippi for all time. Outright purchase of these lands would have cost us two to three times as much.

I propose that we use easements on a far broader scale, with a prospect of equal or even greater savings. In addition to scenic easements, I propose that we purchase public access rights, public hunting and fishing rights, use and alteration rights of headwaters and springheads, wetlands drainage rights, scenic overlook rights, fencerow rights for the protection of game cover, platting rights along trout streams, subdivision and timber cutting rights along lake shorelines, and development rights to protect lands adjacent to State parks and campgrounds from the clutter of billboards, taverns, and concessions. The right or combination of rights to be purchased would be determined case by case. But in each case, the State would pay only the difference between the market value of the land with and without the rights sought by the State. And in many cases, landowners would be willing to sell such rights, even though they have no intention of parting with their property.

In the 10-year program, I propose that about $7½ million of the $50 million total be reserved for these easements. I am convinced that this $7½ million will assure the public permanent preservation of outdoor assets that would cost Wisconsin between $15 and $20 million if we had to rely solely on outright purchase.

Of the total acreage to be put under public control, more than one-third will be covered solely by easement rights.

The 1-cent increase in the cigarette tax will produce $9.7 million in the 1961–63 biennium. I propose that we spend $5.6 million on parks and forest recreation areas, $2.7 million on fish and game lands, $525,000 on youth conservation camps, $293,000 for scenic easements along our highways, $200,000 to help metropolitan areas acquire rural recreation areas, $140,000 for tourist information centers, $90,000 for creation of lakes under the Federal watershed program, $52,000 for planning, and $50,000 for the Lake Superior recreational survey.

STATE PARK AND FOREST RECREATION AREAS

The $5.6 million in new funds that I propose for parks and forest recreation areas in 1961–63 includes $4 million for land acquisition, $1 million for development, $493,000 to restore all fish and game funds that otherwise would be used for parks, and $150,000 for added maintenance costs. Of the $4 million for land, $500,000 would be earmarked for easements and $3½ million for outright purchase.

This $4 million increase in appropriations would enable us to move with maximum speed to acquire 18,000 acres at four existing facilities and an additional 18,000 acres to establish nine new facilities. The four existing areas are Terry Andrae, Kettle Moraine, High Cliff, and Governor Dodge.

The new parks include Mirror Lake in Sauk County, Whitefish Bay and Europe Lake in Door County, Lake Wissota in Chippewa County, Sugar Creek in Walworth County, and Pike Lake in Washington County. The new parks also include three to be acquired in 1961–63 at key interchanges of the Interstate Highway System, thereby providing recreation, rest, and camping facilities for those traveling the new system. Final determination has not been made of the exact sites for these three parks, but at least one will be within easy range of the Milwaukee metropolitan area.

These 13 parks, involving 37,000 acres of new land, are the top priority projects listed by the Wisconsin Conservation Department for the next biennium. In addition, three other park projects will be included in the 1961–63 program if they are found feasible after further study. These are Lac du Flambeau Pines in Vilas County, Raspberry Bay on Lake Superior, and possible leasing of park facilities in the Menominee Indian Reservation. I also believe that engineers should study the possibility of creating a lake at Wildcat Mountain, and that this project should be included in the 1961–63 program if it proves feasible.

Over the 10 years of the proposed program, the State would spend—in addition to its normal budget for acquisition and development—$17 million on park and forest recreation lands, $13 million for development and $1 million for maintenance of these lands. A 10-year total of about $2½ million in hunting and fishing license fees would also be replaced so that these funds can be restored to the fish and game programs where they rightfully belong. A total of $493,000 in license fees would be restored in the next biennium alone.

This 10-year program will permit the State to acquire 145,000 additional acres of park and forest recreation area lands through easements or outright purchase. It will permit adding almost 5,000 camping units to our existing 2,900 individual campsites. And it will also permit development of 41 new or improved beaches, 35 bathhouses, 50 new electrical, sewage, and water distribution systems, 80 new picnic areas, and 304 miles of new or improved hiking trails. Under present limitations on funds, the State in the next 10 years could finance less than 13 percent of this land acquisition program and only 7 percent of the development program.

Major emphasis in this program is on development of an entire recreational complex in congested southeastern Wisconsin to serve the metropolitan populations of Milwaukee, Waukesha, Racine, and Kenosha counties. When this complex is complete in 10 years, it will extend northward from the proposed Sugar Creek Park in Walworth County to the southern Kettle Moraine unit, to the new park on the interstate highway system west of Milwaukee, to the new Pike Lake Park in Washington County, to the northern Kettle Moraine unit, and then east to Terry Andrae Park on Lake Michigan. The 10-year program also earmarks $1 million for acquisition and development of about 3,000 additional acres of recreational lands in southeastern Wisconsin at sites to be determined later. Along with the proposed $1 million in the State aids to help metropolitan areas acquire rural park facilities, this will give us a complete chain of public recreation areas in the most populated part of Wisconsin.

GAME HABITAT

In 1961–63, I propose a $1.7 million increase for preservation of game habitat, including $1.4 million for outright wetlands purchase and $300,000 for easement rights. This $1.7 million is in addition to the funds proposed for wetlands acquisition in the conservation budget, and would give us a total program of $2.4 million for the next biennium.

This is more than three times as much as we could spend using current sources of revenue. It will permit great acceleration in acquiring more than 94,000 acres of wetlands at 36 existing game management areas and 17 new areas, including a $208,000 purchase and development project on a portion of the abandoned Bong Air Base in southeastern Wisconsin if this area becomes available from the Federal Government. Nine of the major expansions, involving an average acquisition of 3,100 acres apiece, are at Mud Lake in Dodge County, Theresa Marsh in Dodge and Washington Counties, Eldorado Marsh in Fond du Lac County, Collins Marsh in Manitowoc County, the George W. Mead area in Marathon, Portage, and Wood Counties, Peshtigo Harbor in Marinette County, Avon Bottoms in Rock County, and Scuppernong and Vernon Marshes in Waukesha County. Together, these nine projects involve eventual control of 23,000 acres of new game lands at a cost of $1.3 million.

New game land projects include the Brillion Marsh in Calumet County, Wildcat Marsh in Dodge County, Silver Creek Marsh in Green Lake County, and the wetlands along the Wolf River in Outagamie County. These projects total 21,500 acres and will cost an estimated $720,000 for land purchase and easements. Significant starts will also be made on easement control of approximately 40,000 acres of small wetland areas scattered throughout 32 of our counties, at an eventual cost of $711,000.

The 10-year program for game lands includes purchase or easements on an additional 353,000 acres of prime game habitat at a total cost of $8.4 million, including $5 million in new funds from the 1-cent cigarette tax. Under present limits on funds, the conservation department estimates that it would carry out less than 30 percent of its total acquisition goal in the next 10 years.

Of the $8.4 million for game habitat, more than $1½ million would be reserved for easements. The easement program would include purchase of drainage rights on wetlands, subdivision rights, public hunting and trapping rights, and refuge rights.

FISH HABITAT

For the next biennium, I also propose a $1 million increase for land acquisition under the fish management program, including $750,000 for outright purchase and $250,000 for easements. With the existing $425,000 proposed for new lands for fish management in the conservation budget, this will give us a total program of $1.4 million for 1961–63.

This, again, is more than three times what we could spend using current revenues. It will permit the State to proceed as fast as possible in beginning outright ownership or easements on 41,000 new acres of shoreline property on lakes and streams in the next 2 years, including expansion of 32 existing projects. The eight largest expansions, involving an average of 2,500 acres apiece, are on the Upper Waubesa Marsh in Dane County, the Prairie River in Langlade and Lincoln Counties, Chaffee Creek in Marquette and Waupaca Counties, Turtle Creek in Rock and Walworth Counties, Radley Creek in Portage and Waupaca Counties, the Kinnickinnic River in St. Croix County, and Willow Creek and the Pine River in Waushara County. Together these eight projects involve eventual control of 20,000 additional acres of land which will cost $858,000.

The 10-year land program for fish management covers outright purchase or easement rights on 103,000 new acres at 57 existing projects and 46 new projects. It will also include preservation of wilderness areas along our most remote rivers. The total cost of this program would be $3.6 million, including $1½ million in new funds from the cigarette tax. Under present limits on funds and programs, the conservation department estimates that less than half this land could be secured by 1971.

In addition to the $6½ million in new land acquisition funds for fish and game management, I propose to earmark $2½ million for development of these lands during the later stages of the 10-year program. This brings the total in new funds for fish and game management to $9 million for the 10-year program.

YOUTH CONSERVATION CAMPS

I propose that we spend $525,000 in the next biennium and $2½ million in the next 10 years on conservation camps for young men between 16 and 19. These camps would be operated by the welfare department, with the conservation department providing personnel to supervise work projects. Each camp would be designed for about 100 boys. The camps would operate for 12 weeks during the summer months, with each group of boys staying for 6 weeks. The boys would work on fish, game, forest, and park projects, and would be paid $18 a week in addition to receiving room and board.

On the basis of priorities set by the Director of the Conservation Department, the first camp would be established at Interstate Park outside St. Croix Falls. Every effort would be made to have this camp constructed and in operation by the coming summer. The second camp would be constructed in the Rhinelander area and would be in operation in the summer of 1962. The third camp would be constructed and opened in the summer of 1963 and would be located in the Kettle Moraine region in southeastern Wisconsin. All Wisconsin boys between the ages of 16 and 19 would be eligible to apply to these youth conservation camps.

I believe that these camps present a marvelous opportunity for conservation education, as well as giving 600 young men a chance for healthy and constructive outdoor activity each summer. The conservation department informs me that it has a backlog of thousands of man-years in work projects which could be handled by young men based at the three locations selected by the department. Without added help, the department estimates that some of these projects will be delayed for more than 30 years.

In addition, there is a bill now pending in the U.S. Senate that would establish a national conservation camp program and would set up funds for matching State programs on a 50–50 basis. This bill passed the Senate in the last session, and has a good chance to pass both Houses in this session. If the legislature adopts this proposal, Wisconsin would become one of the very few States in the Nation that is prepared for immediate use of Federal aids for conservation camp activities.

SCENIC EASEMENTS

I also propose that we spend $293,000 in 1961–63 and $2 million in the next 10 years to acquire scenic easements along our State highways. On the basis of what it has cost the State to purchase easements on 53 miles of the Great River Road, this program should enable us to acquire scenic rights on 450 miles of Wisconsin highways in the next 2 years and more than 3,000 miles of highways in the next 10 years. I propose that top priority be given to completing scenic easements along the Great River Road. When this road is completed to the Gulf of Mexico, it will be the longest scenic highway in the Nation, and I believe that Wisconsin can show some real leadership on this project. I also propose to acquire scenic rights on highways along Lake Michigan, Lake Superior, and Green Bay, along the Chippewa, Wisconsin, Fox, Milwaukee, and Wolf Rivers, in the lake and forest country of northern Wisconsin, and through the Menominee Indian Reservation and the Kettle Moraine area.

CREATION OF NEW LAKES

I propose that we spend $90,000 in 1961–63 and a total of $1½ million in the next 10 years to help create as many as 25 to 30 new lakes scattered throughout southwestern Wisconsin. This is the only part of our State that is now totally devoid of lakes, and therefore deprived of the scenic, swimming, fishing, and boating pleasures that are afforded by such waters.

Under the National Small Watershed Act, the Federal Government pays for flood-control dams on approved small watershed projects, while local governments provide for other costs such as land, easements, and maintenance. But the Federal Government will also pay 50 percent of the cost of an improved dam that will create a permanent lake, as well as 50 percent of the cost of creating a lake that is not for flood control but is an integral part of a multipurpose watershed project.

My proposal, essentially, is that the State pay the other 50 percent of the added costs. This will permit us to create permanent lakes that will cost local governments very little more than the basic flood-control projects to which they are already committed on a total of 18 projects.

This program would be supervised by the State soil conservation committee, with applications for aid originating in local soil conservation districts and with approval required from the State conservation department.

Although detailed surveys have not yet been completed for the 18 projects, engineers, watershed technicians, and biologists agree that all 18 offer definite possibilities for creation of lakes. In view of the additional projects for which applications can be expected within the next few years, this State aid program envisions the possible creation of more than 1,000 acres of new lakes in southwestern Wisconsin by 1971.

Two of these projects can be constructed in 1961–63 if present estimates of their feasibility are borne out by final studies. These two projects are in the Bad Axe River watershed, 4 miles west of Viroqua in Vernon County. They would create lakes of 40 and 68 acres, of which the State's share of the added cost would be $90,000.

Another 16 projects with definite potential for lakes have been approved and are now in the planning stages. These projects include eight additional potential lakes in Vernon County, four in Iowa County, and one apiece in La Crosse, Pierce, Richland, and St. Croix Counties.

OPEN SPACE FOR METROPOLITAN AREAS

I propose that we spend $200,000 in the next biennium and $1 million in the next 10 years to help metropolitan areas acquire recreational land for our urban citizens. Wisconsin's largest cities and even some of the smaller cities in the nine most heavily populated counties have exhausted the open spaces within their borders. And as the rural land around them is rapidly consumed by suburban development, their people are isolated farther and farther from outdoor recreational areas.

Before another 1 million acres of rural land are completely urbanized, I recommend that the State help these communities by paying 50 percent of the costs of acquiring recreational land beyond the urban sprawl. I believe that this program will benefit not only the communities I have mentioned, but the suburbs that will be developed around them in the next few years, for it will provide large pockets of recreational space for these new suburbs as well.

Urban planners are convinced that this is one of the most pressing problems facing our State and Nation. They believe that we must act now to provide for the future outdoor needs of the low-mobility groups who live in the congested centers of our cities and find their recreational opportunities ever more limited. This plan is designed in large part for just such opportunities.

TOURIST INFORMATION CENTERS

I propose that we spend $140,000 in the next 2 years and $392,000 in the next 10 years to construct and operate tourist information centers at key points of entry to Wisconsin. Appropriating more than one-third of the total in the first 2 years would allow us to construct one permanent center and to purchase two mobile units in the immediate future.

The first permanent tourist center should be established near the Illinois border adjacent to the interstate highway between Chicago and Milwaukee, since this is the greatest point of entry to Wisconsin. The two mobile centers should be tried at various experimental locations near Hudson, which is on the Interstate System opposite Minneapolis-St. Paul, and near Beloit, which is on the other fork of the Interstate System between Illinois and Wisconsin. In the 10-year program, permanent tourist information centers could replace the mobile units at the locations that prove best near Beloit and Hudson, and the mobile units could then be used at such other points of entry as those near Superior, La Crosse, and opposite Dubuque, Iowa.

Province of Ontario officials have had great success with tourist information centers, and they have provided substantial help in designing this program. They report that more than 600,000 tourists used their information centers last year alone. Wisconsin could expect corresponding use. I believe that these centers can be of real help in directing out-of-State tourists to public facilities that can most easily stand the added pressure and to private facilities that can best meet their vacation requirements.

These information centers would thus promote the recreational enjoyment of our own citizens, as well as the interests of Wisconsin's vital vacation industry.

LAKE SUPERIOR REGION DEVELOPMENT

In addition to buying scenic rights along Lake Superior and possible acquisition of the new Raspberry Bay area in Bayfield County, I propose that we spend $50,000 in the next 2 years for a complete survey of the Lake Superior region's recreational potential. This magnificent region is Wisconsin's last great outdoor asset that remains relatively untapped. I think we should plan wisely and carefully for its development, preventing the thoughtless exploitation that has destroyed so many of our other outdoor resources. In the 10-year program, I also propose reserving $2.9 million for the later coordinated development of fish, game, forest, park, and scenic values in the Lake Superior region, as well as for preservation of scientific and wilderness areas in this region.

PLANNING AND COORDINATION

Finally, I propose that we spend $52,000 in the next 2 years and $270,000 in the next 10 years for planning and periodic reexamination of this entire $50 million program.

Many State agencies would participate in this program, including the conservation department, the attorney general's office, the highway commission, the department of resource development, the soil conservation committee, and the welfare department.

Coordination is essential. I therefore propose the creation of a State recreation committee to consist of one representative from each of the agencies named, with the Governor serving as chairman, and with adequate provision for staff.

The State recreation committee would refine all details of the 10-year plan and would prepare specific recommendations for the Governor and the legislature for each succeeding biennium.

To encourage action by participating agencies and to prevent accumulation of idle funds under any part of this program, all unspent moneys would revert to a special fund to be included in the committee recommendations for the next biennium.

CONCLUSION

I have offered you a $50 million program to save Wisconsin's finest outdoor resources. This program is the result of many weeks of intensive effort by many people, and represents the best thinking of the agencies involved.

Now is the time to move boldly to preserve our great heritage of scenic beauty, fresh water assets, and wilderness areas. Once this opportunity is lost, it is gone forever. No succeeding legislature will again have the same chance to make such a lasting mark in the field of conservation. Ten years from now will be too late. Two years from now will be too little, for each passing month we witness the permanent dissipation of some valuable asset.

This surely is an area of concern where bipartisan cooperation is a mark of responsibility and statesmanship. Whatever our differences in other matters, we stand together in our determination to preserve for posterity those gifts of nature that were here when our ancestors arrived.

If you adopt this program, whatever else you do this session, you will leave a permanent mark in history as the conservation legislature.

AGRICULTURE DEPARTMENT TO RECONSIDER WATERED HAM DECISION

Mr. PROXMIRE. Mr. President, there is good news for consumers and farmers in the announcement that the Department of Agriculture will reconsider the redefinition of Federal meat standards which permits ham and other pork products to contain substantial amounts of added moisture. Considerable concern has been expressed by consumer groups about the redefinition, which took effect December 30, 1960, under which ham could contain up to 10 percent added moisture, with no label indication that this was the case. Prior to the revision of standards, any ham which contained added moisture had to be labeled "imitation ham." In effect, the revision simply removed the adjective "imitation" from the label of the identical product.

According to Secretary of Agriculture Orville Freeman, the question of allowable water content in hams and other pork products will be reopened. Secretary Freeman said that public hearings would be held to give consumer groups a chance to present their recommendations to the Department. He commented:

> We shall seek the counsel of the housewife as avidly as we seek the opinion of the food processing industry. The content of the market basket is of vital importance to both, just as it is to the farmer.

Secretary Freeman observed that the action taken last year to revise ham standards did not include a public hearing.

The immediate consequence of the revision was that the ham on the meat counter today contains a significant amount of added water, while consumers continue to pay full ham prices. The decision to permit added moisture also hurts the farmer who sells hogs, because each extra pound of water added represents that much less ham sold.

The March 8, 1961, issue of the Co-op News Letter gave voice to the dismay that resulted from this revision. A front page article in the News Letter comments:

> It will be a rare housewife who will be able to detect a watered ham from that reduced to green weight. This means that packers will most likely all water their product to the legal limit to be competitive.

A picture accompanying the article showed a ham being weighed on a balance scale. According to the caption:

> As it warmed at room temperature, the water dripped copiously from its cut surface. If its water content was the USDA-OK'd limit of 10 percent, consumers will pay 35 cents for the half pound of added water a half ham like this contains.

Over the years careful shoppers have learned to rely on Federal grade and quality standards. These Federal standards help insure that consumers will get good value for their spending. Because they generally reflect accepted standards of quality and purity, they also aid honest farmers to market their produce with a minimum of difficulty, without haggling, at fair prices. The recent redefinition of ham was all the more alarming because it violates the faith which consumers and farmers alike have built up in Federal standards.

Widespread concern was expressed about the failure to hold public hearings in connection with the original announcement. The announcement by Secretary Freeman that hearings will be held is, therefore, most welcome. It will give all interested groups, including consumers and farmers, a chance to present their views.

It may prove to be the case that consumers prefer the "juicier" ham with extra added water. Even if this turns out to be so, it would not justify having changed the definition without a clear label indication. And it would not justify charging full ham prices for a product that is part water.

I ask unanimous consent that the announcement from the Department of Agriculture and the article from the Co-op News Letter be printed in the RECORD.

There being no objection, the announcement and article were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF AGRICULTURE TO REOPEN HAM STUDY

U. S. DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 17, 1961.

Secretary of Agriculture Orville L. Freeman said today that he is directing the Department's Agricultural Research Service to reopen the question of allowable water content in smoked hams and other pork products, and to conduct public hearings to gather additional information.

The USDA last December 30 issued an order which for the first time allowed federally inspected meatpackers to market smoked hams with up to 10-percent additional moisture over the original uncured weight.

Prior to the order, departmental regulations prohibited federally inspected packing plants from shipping smoked pork products which weighed more than the meat did in an uncured state.

Secretary Freeman said the action is being taken to allow fuller opportunity for consumer groups to present their recommendations to the Department. Under the Meat Inspection Act, the Department has the responsibility to establish standards for meat which moves in interstate and foreign commerce.

The Secretary said the hearings would be held in five major metropolitan areas and would be open to the public. Further announcements with details as to time and place of the hearings will be published in the Federal Register and released to the press.

"I wish to emphasize that this administration is strongly concerned with the needs and problems of the consumer, and that this Department shall constantly seek to serve the best interest of the public. In doing this we are serving the best interests of the Nation's farmers.

"We shall seek the counsel of the housewife as avidly as we seek the opinion of the food processing industry. The content of the market basket is of vital importance to both, just as it is to the farmer."

Secretary Freeman noted that the action taken last year to study possible revision of the standards for smoked pork products did not include public hearings.

The order was issued following a 60-day period when written recommendations were received by the Meat Inspection Division of USDA's Agricultural Research Service.

The review came as a result of a request by meatpackers who found that the development of a new curing process in the mid-1950's would permit faster curing and the addition of more weight to the ham.

The new process, which involves pumping pickling brine into the meat under pressure, allows the curing to take effect almost immediately. Prior to this development, hams were cured by a lengthy

procedure in which the solution slowly permeated the meat.

Secretary Freeman said the directive to hold public hearings would allow the meatpacking industry to present its case to the public, and give the Department the advantage of receiving more adequate consumer opinion.

He said the order of December 30 would remain in effect during the review period and the decision to suspend or continue the order would be made after the recommendations has been evaluated.

[From Co-op News Letter, Mar. 8, 1961]

WATER IN SMOKED HAMS DRAWS CONSUMER FIRE—ADULERATION HAS USDA'S O.K.

The U.S. Government, through the Food and Drug Administration, recently seized a shipment of Atlantic Ocean water being sold at $3.75 per gallon as a "fountain of youth" and cure-all for an assortment of serious illnesses. The distributor—an Ohio promoter—now faces court action on charges that the labeling made false and misleading therapeutic claims.

But the U.S. Government, through its Agricultural Research Service, has legalized the sale of water as ham and other smoked pork products—and no labeling is required. The cost of this water will, in many instances, make $3.75 a gallon appear like a reasonable figure.

It all came about December 23 of last year when the Agricultural Research Service of the U.S. Department of Agriculture amended its meat inspection regulation to permit the addition of "10 percent added moisture" to smoked hams, smoked pork shoulders, smoked pork shoulder picnics, and smoked pork shoulder butts.

Prior to that time, water used in the curling of these pork products was minimized by proper smoking and drying which removes water and brings these products back to uncured weight. Overpumped hams had to carry the label "imitation ham" if they carried the insignia of Federal inspection.

Under the amended order as it has been interpreted for enforcement, ham may legally weigh about 116 percent of the green or uncured weight, thus in effect permitting a 16 percent addition of water.

Last week, we purchased a watered butt half of ham from a competitor. At its cost of 69 cents a pound, the water in it carried the price tag of $5.52 a gallon (equal to 8 pounds had the ham been big enough to accommodate that much water). This butt actually weighed 5½ pounds, and assuming it contained 10 percent of water, cost its purchaser about 36 cents for slightly over a half pound of water.

In a discussion with Dr. John R. Scott, chief staff officer for labels and standards of identity in the Meat Inspection Division, it was learned that the justification for the amended regulation was mainly based on representations from packers and processors (represented by the American Meat Institute) to the effect that 50 percent of all hams sold were being cured in small processing plants whose products did not cross State lines and therefore did not come under USDA regulations. Since it is possible to inject up to 60 percent of the original weight of pickle (chiefly water) in the ham, processors of products moving into interstate commerce complained that they found themselves at a severe price disadvantage. Dr. Scott also pointed out that unsupervised small plants might be unsanitary, use phosphate and sodium nitrate above the legal tolerance, and—finally—that a lengthy curing process robs the ham of some nutrients (chiefly fat).

But there is no record of an effort made to educate consumers in the advantages of federally inspected smoked meat products and those which are not.

The processors asked the USDA to waive all legal limitations on the injections of water.

The Agricultural Research Service, in response, appointed a task force to review the validity of the requirement for smoked meats from the standpoint of consumer protection and current production and marketing practices.

Fifteen consumer organizations were contacted to submit within 60 days their comments and supporting information in writing. But the release failed to indicate that a change in water content was contemplated or the background of that change and the consumer groups did not reply both because they failed to realize the significance of the USDA release and because of the time limitation. Consumers' Union, technically best equipped to testify, was not contacted. In this unusual procedure, no public hearings were held. As of now, public disclosure of testimony providing basis for the change was withheld.

The consumer interest was represented solely by testimony from the Packinghouse Workers Union of the CIO and the Meat Cutters' Union who favored the change. Dr. Scott somewhat reluctantly concedes these two groups "might have had an inherent interest."

Proper labeling of the watered hams for consumer guidance was apparently not considered on the basis that USDA lacks jurisdiction beyond the packing plant. But the Federal Trade Commission does have jurisdiction for proper labeling at the retailer-to-consumer level. * * *

Pete Caruso, Co-op's meat buyer, views the new regulation with genuine dismay. He says it will be a rare housewife who will be able to detect a watered ham from that reduced to green weight. This means that packers will most likely all water their products to the legal limit to be competitive. Ham prices are already churning and uncertain, with the spread between smoked and fresh hams narrowing, thus even further increasing the cost of watered ham.

Dr. Scott, asked if the question of the watered hams might be reopened, replied that this is possible, "if new evidence is supplied." Since no objective evidence from bona fide consumers was received initially, this appears to be easy. * * *

In the meantime, Pete Caruso will endeavor to concentrate his buying on hams containing minimum water as has always been Co-op's policy. Whether this will continue to be possible in the face of market developments remains a question unless the USDA regulation is revised.

SMALL BUSINESS SUBCONTRACTING PROGRAM

Mr. PROXMIRE. Mr. President, last Thursday, Prof. Spencer M. Smith, Jr., of the Department of Economics at the University of Maryland, testified before the Small Business Subcommittee of the Banking and Currency Committee. He appeared in support of S. 836, a bill similar to the one which passed the Senate unanimously last year to establish a small business subcontracting program. The 1960 bill was blocked and died in a House conference.

Professor Smith is presently engaged in a study entitled "Potential Small Business Expansion in Electronic and Related Research Development Industries," in the area of Washington, D.C. Dr. Smith speaks for no group, no Government agency, nor any company or group of companies. He is an objective researcher. Big business, the Defense Department, and the Small Business Administration come in for a share of criticism.

The reasons why an effective small business procurement program, as established in S. 836, is essential is so well argued by Professor Smith that I ask unanimous consent to have this statement reprinted in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF MR. SPENCER M. SMITH, JR., PROJECT DIRECTOR, ECONOMICS DEPARTMENT, UNIVERSITY OF MARYLAND; ACCOMPANIED BY MR. MICHAEL BOAKE CARTER, RESEARCH ASSISTANT

Mr. SMITH. I know your interrogation of some other witnesses, Senator, and I should say here that I am speaking only for myself. This certainly is not the position, either of the Small Business Administration, obviously, to which we have a grant, nor is it the official position of the University of Maryland.

Mr. Chairman and members of the committee, I am Dr. Spencer M. Smith, Jr., assistant professor of economics at the University of Maryland.

I am presently engaged in a study entitled "Potential Small Business Expansion in Electronic and Related Research Development Industries in the State of Maryland and the Area of Metropolitan Washington, D.C." This study is being financed by the University of Maryland, through a grant from the Small Business Administration. I am being assisted in this study by Mr. Michael Boake Carter, research assistant in the Department of Economics, University of Maryland.

We have been asked to indicate to the committee some of the preliminary findings of our efforts to date. We must caution all concerned, however, that our project is not quite one-third completed and very little statistical data is available to lend quantitative substance to much of the analysis that follows.

The recent emphasis upon research and development in our society has caused new industries to take shape and has changed the character and dimensions of the established ones. A number of factors make it apparent that this area is one in which small business might play a major and more significant role.

After having been present at a national conference on small business in the research and development field at Omaha, Nebr., last year, and analyzing the information from the interviews, questionnaires, and exchanges of information with others, our analysis of the 160 or so research and development firms in the Washington D.C., area, is more than representative of the problems facing small businessmen generally. A common denominator in the field of research and development applying to firms in this area and elsewhere in the country is the reliance upon the Defense Department procurement dollar.

If our efforts are to be pertinent in appraising the limitations on the growth and development of small business, it is necessary to determine what factors are preventing small businesses from receiving their needed share of the defense procurement dollar. With this understanding, the results of our investigation and study to date leads us to the following tentative conclusions:

1. Small businesses have not participated in the overall economic expansion and have lost ground relatively.

2. The principal deterrents to maintaining their relative position have been:

(a) Inability to obtain sufficient capital for basic growth.

(b) Inability to obtain prime and subcontracts from the Government, primarily defense.

(c) Inability to obtain, maintain, or develop patents.

(d) Inability to have an agency of sufficient power consider Government procurement procedures.

Mr. Chairman, I notice that some of the witnesses have placed their statistics into the RECORD. It would seem to me to be somewhat redundant to read them here. I would appreciate it, however, if they would be included with my testimony in the RECORD, if that is possible.

Senator PROXMIRE. Without objection, so ordered. We are very happy to have the statistics. We need a lot more than we have so far.

(The material referred to is as follows:)

"I. SMALL BUSINESSES HAVE NOT PARTICIPATED IN THE RESEARCH EXPANSION FOSTERED ESSENTIALLY BY GOVERNMENT

"The share of Government procurement dollars secured by small business continues to decline. Statistics for the fiscal year 1960 show that the downward trend in the net value of military procurement actions awarded to small business since 1955 is endangering the health and welfare of small business and the country as a whole. In a report issued by the Department of Defense entitled "100 Companies and Subsidiary Corporations Listed According to Net Value of Military Prime Contract Awards for the Fiscal Year 1960," it is revealed that, in the year 1960, 73.4 percent of the prime contract awards have gone to 100 companies. These 100 companies can be classified in the category of big business. The report also shows that only 20 companies received 49.8 percent of the net value of all military prime contracts awarded. Total procurement from all business firms totaled $21.3 billion in fiscal 1960. Of this, small business received only $3.44 billion in prime contract awards, which was 16.1 percent of the total procurement from all business firms, as compared to 16.6 percent in fiscal 1959, 17.1 percent in 1958, 19.8 percent in 1957, 19.6 percent in 1956, and 21.5 percent in 1955. Awards for experimental, developmental, test, and research work to all business totaled $5.5 billion, of which $0.2 billion went to small business. This is 3.4 percent of total research work.

"Transactions in the category of only $10,000 or more totaled $19.7 billion in fiscal year 1960. (Contracts of less than $10,000 were $1.4 billion and only 7 percent of the total.) In other words, small businesses were excluded from 77.6 of the total which represented $15.3 billion. Of the remaining $4.36 billion, however, only $2.44 billion was actually awarded to small business. Only 12 percent of the total was awarded small business."

Mr. SMITH. There may be many of us who stand in awe of the probing of outer space, the miracle of nuclear energy, and the present day marvels of physical science and admittedly, we may have little to say as to their understanding and effect. Apparently, no one is similarly humbled by the diagnosis of small business problems or the urgency of their remedy. Everyone appears concerned about the plight of small business, but—paraphrasing Mark Twain's much quoted observation that everyone talks about the weather—nobody has been able to do much about it.

Perhaps part of the difficulty has been in the method of considering the problems of small business and part in insisting upon some one plan—one that will solve all known problems confronting small business.

If the aims and objectives of our economy are to be met, small business problems cannot be ignored. It should be freely admitted, however, that all small business problems are not necessarily amenable to or deserving of collective action. The identity and precise definition of small business must be looked upon as group concepts rather than descriptions of a firm typical of all firms.

Size concepts will, likewise, vary from industry to industry so that any classification must be flexible and still be meaningful. This fact is very apparent in our study. Because of the Small Business Administration's definition of a small business as having 500 or less employees, we must exclude from our study local firms like Melpar, Atlantic Research, and Vitro, to name just a few. If a flexible definition existed, the inclusion of these firms would add greatly to the knowledge of those who wish to enter small business because here are some firms who have grown despite some overwhelming problems.

Certainly, some small business problems cannot be solved, since to do so would alter seriously the adjustment process of our entire economy. Changes in technique of manufacturing, changes in product, or a new product that better meets the need than the old, abilities or lack of them by individual businessmen, are all variations that can be loosely described as small business problems.

Society should be reluctant, however, to interfere with efficient utilization of our country's resources even if this does work some hardship on some businesses. If society tried to stop change because of problems, then the harness shop would continue and the automobile would yet be an inventor's fancy. Neither should society seek to save the inefficient at the expense of the efficient.

If all of the problems of small business fell into the above classification, there would be no need for anyone to appeal to this committee for special consideration for small business. There are other compelling problems, however, that are not in conflict with society's most efficient use of its resources and which have nothing to do with an inefficient entrepreneur. On the contrary, the primary problem of many efficient small businesses is that they are being denied the opportunities for growth which were available to many of our most successful larger concerns in their formative years.

The present desperate need of small business is one of capital to expand. Small businesses must either grow or perish. This is their turning point. In many instances, we have counted on them for the stimulus and vigor essential to our economic system. This is not to say that they are automatically a success or that positive assurance exists that they will be a success.

The argument of many, however, that these businesses would expand if they were successfully operated begs the question. The test of their success or failure is whether they can continue as a going concern after digesting certain degrees of expansion. Many large firms of today would never have reached their present size if—to exist at all—they were forced to expand under the present circumstances.

The problem of credit for small businesses has not been as materially aided as many seem to think. It is easy to calculate loans made, but difficult to determine loans refused and the implications resulting. If a firm applies at a bank, due to the rate of risk, his interest may be 6 to 7 percent, or excessive in view of his opportunities. If he then applies for a loan under the Small Business Act of 1957, the SBA attempts to ascertain whether the applicant has been turned down by a bank, and upon learning he has not, finds its own directives and authorizations often preclude a loan being made.

Thus, being priced out of the market is not the equivalent of being turned down. If the small firm mentioned in the foregoing has a good product, the open arms policy of a large corporation will be available—this aid may take the form of an out-and-out sale with no strings, a sale contingent on particular employment of one or more of small business employees, a loan with rather rigid detail as to the conduct of the small businessman.

There are many more problems involved in capital financing confronting small business, such as the inability to shift the incidence of taxation; inability to enter the capital market by the sale of stocks and bonds, the inability to retain sufficient earnings, et cetera. But, in the interest of time, I will not try and expand on these, since they have only general relevance and the purpose here is of greater specificity.

The inability to obtain prime and subcontracts from the Government is illustrated by the figures mentioned earlier in this statement.

These figures tend to indicate that the Defense Department continues to award an overwhelming proportion of its procurement dollar to large corporations. Also, many of these awards are done by negotiations rather than by formal advertising. Formally advertised contracts accounted for only 14 percent of the total procurement from U.S. business firms in 1960. Sixty-seven percent were negotiated with one source. These figures are important because small business received 39 percent of all advertised awards, but only 12 percent of all negotiated awards.

Formal procedure has the Department of Defense, State Department, Department of Agriculture, the National Institutes of Health, and Health, Education, and Welfare list their intentions to contract actions, production goods, and/or research sources at monthly intervals. These contracts may be open bidding or selected bidding at the discretion of the agency. These contracts will be so described in their releases.

The difficulty with the bidding procedure is the approved list procedure. The open bid is open to the lists only and problems of obtaining a listing is one which often confronts many small businesses with an insurmountable obstacle. Obviously, in the case of Defense, security is a major problem, but even the kindest apologist for Defense procurement would not contend that the criterion is used for judgments other than security.

When taken together, a seemingly abnormal block of powerful restraints act upon small business participation. Some contracts are negotiated—small businesses are excluded. Some contracts are open for bids, but many small businesses cannot qualify for the bid list—hence they are excluded. Some contracts are of such size and magnitude small businesses are automatically excluded.

All of these factors, plus the usual reluctance of the contracting officer to place orders with other than name companies, present a formidable deterrent to small businesses in their efforts to participate in the defense program.

The above procedure applies to prime as well as to subcontracts, and on the basis of cursory observations of the figures, and from interviews we have had with small businessmen, it appears that not many small businesses received contracts through these formal channels. It does, however, appear that by far the largest majority of small business recipients of research and development contracts receive information by word of mouth or similar contacts within the industry, rather than by the formal procedures.

Actually, many contracts are awarded the day they are formally announced——

Senator PROXMIRE. Do you have any documentation or any substantiation on that. That is very interesting—the large majority of small businesses have knowledge of this through word of mouth associations or through an informal procedure.

Mr. SMITH. We have a questionnaire that has been out for a kind of select list to try and determine whether the questionnaire is going to be adequate, and we are mailing it out. As I indicated at the outset, much of this is by word of mouth, and much of our judgment is by certain experiences we have had.

I think that limits its effectiveness here, and I am sorry about it, but you can see a number of the great, overwhelming waves that come before this committee in support of this bill to give you some idea as to how important these small business people think it is. That is partly sarcasm, but it is quite obvious that no small businessman is going to come down here and testify in front of this committee very strongly if he has hopes of getting a subcontract which he has not realized. And no small businessman is going to come down here now as a result of the administration position, the Small Business Administration, yesterday.

In fact, one of them mentioned to me this morning. I asked him why he did not go down and testify on this bill. It is very simple, the reason he does not come down here. "I hope some day to have a contract, and if the administration is going to take the position that we are going to leave all of these things to the tender mercies of the Defense Department, then, you will pardon me, I am not going to get on record for anything."

I think this may be one of the reasons why a number of people who speak to us privately, begging us at the same time not to mention their names, "but we certainly hope to see some strong testimony for the bill."

I bring these things in, and I am unable to document them, except to say they are simply personal observations and we have no ax to grind one way or another. We are just trying to find out what the situation is. This is not going to make us very popular, and we are not going, probably, to be spearheading the majority as to this bill, but that should not make any difference to us.

Actually, many contracts are awarded the day they are formally announced, and often the subcontractor is named simultaneously. This situation has not improved the morale of many of the small businessmen.

The significance of this might be that for all practical purposes the decision to award the contract has been made at the time of formal announcement. The explanation often given for this trend away from competitive bidding is the complexities of new weapons, the exigencies of time and the reorders involved in previous commitments.

We feel, however, that far too many negotiated contracts are awarded without the benefit of competition. This is particularly true in the purchase of spare parts, in the area of electronic and other components. Then, too, basic research often involves no great plant and equipment outlay, and the automatic superiority of efficiency on the part of all big business enterprise cannot be assumed.

No credence is apparently given to the merits of competition in meeting this criterion. Many feel that delivery is stimulated, companies have incentives to provide better products, and results favor such an organization rather than the automatic assumption that big corporations can do it cheaper than small business.

No one is contending that small business is properly eligible to handle all or even the majority of contracts entered into by the Government, but the contention that small business can participate to a greater degree at many levels, appears to us, most difficult to rebut. Many small businesses can play an important role in subcontracting, even in connection with large complex contracts that must necessarily be awarded to large corporations.

The inability to obtain, maintain, or develop patents is a serious problem for small business and directly associated with the other factors mentioned heretofore. Many small businesses find upon reading the fine print in their subcontract that all discoveries, patentable inventions and innovations are the property of the prime contractor. Some subcontractors contend that they had verbal assurances of the contrary, but this, of course, did not hold in court. Many companies have candidly stated their position in this matter.

On December 31, 1959, the Martin Co., in response to a request for information from the Defense Department wrote the Secretary of Defense stating that "when Martin Co.'s own funds are involved, title to invention conceived or reduced to practice by subcontractors rests in the company."

Boeing Airplane Co. has a similar policy; the same is true of Western Electric, General Dynamics and General Motors. In fact, the general counsel of General Motors informed the Defense Department on January 21, 1960, "When the corporation finances research and development work to be performed by others in connection with its operations, it ordinarily expects to get all rights with respect to any inventions made in the course of the work."

Senator PROXMIRE. Supposing the Federal Government financed that?

Mr. SMITH. The next paragraph covers that. That is exactly what I say. It seems to me the prime contractor, Senator, takes the position it is his money, the Government is in a perfect position to take precisely that position. If it is awarded the prime contract, it could say, "You are doing this on our money. Therefore, we would retain patent rights."

If the Government retains patent rights, this has the challenging effect of making them available as it sees fit, or generally. The effect is when it retains patent rights to make them generally available, the thought being this would accelerate and provide incentive for competition.

It has been the Department of Defense policy for some time that they do not want to hold patent rights. They have, obviously, taken themselves out of it, and now it is between the prime contractor and the subcontractor. And that is hard to contest.

Senator PROXMIRE. If you push it back that far, it seems to me—I have the feeling—I could be wrong, and some Senators have spoken on the floor in disagreement—I have a feeling it would discourage research. In other words, if the Federal Government said, "You are going to do prime contract work for us and research on it and develop patentable processes and so forth, and it is public domain," you would lose a lot of incentive for taking some of these contracts. And you would not have as much research as you need at the time we desperately need research.

What you are saying is, therefore, the prime contractor should provide the same incentive to the subcontractor.

Mr. SMITH. I do, indeed, if that is going to be the effect. But I would quarrel pretty specifically with the idea they would not take it. I think some of the overhead contracts I have seen on research and percentage allowed for overhead, I think that is sufficient incentive. I do not think the retention of patents would be a determining thing here at all.

I think we have had some experiences with it in the past. I do not think it is a prime motivation of research on the part of these organizations. I think that they will naturally take this as long as they are operating anything in addition, but I think the funds themselves are sufficient to be a motivating or strong incentive.

The problems of defense of patent rights is most difficult for one with limited funds. Few can strive through the courts for a period of years to obtain ultimate justice. On the other hand, large corporations will deal with alleged patent infringements at the drop of a hat.

We know that this present bill does not provide for such a measure, but it does provide for the investigation of factors that will endanger competition, by the Attorney General and the Small Business Administration. This situation is a serious deterrent to competition. It is highly relevant to indicate that the awarding of subcontracts by a large corporation is left much to the descretion of the prime contractor. If the stimulus for a greater subcontracting program is to be provided by this bill, the situation of patents must not be overlooked.

The Small Business Administration has been greatly handicapped by the law they now administer. One critic indicated that this organization was excellent in that it did not offend big business because it did little for small business, but its very existence indicated a genuine interest in small business. This is not the best of two possible worlds. The Small Business Administration must have greater latitude in awarding loans and courageous enough leadership to use such latitude.

Some protection must be afforded small business as to their patent rights. The present attitude of the Defense Department to small business patent rights is a cross between Ivan the Terrible and Marie Antoinette and little effort to remove inequities will be forthcoming here.

Last, if not least, the Small Business Administration should be permitted to take a more active part in the awarding of the Defense Department dollar. As the situation exists now, the Defense Department is almost the sole judge and jury to what contracts shall be issued and to whom.

The Small Business Administration has what is called a set-aside program, in which the SBA tries to get the Defense Department to set aside certain contracts for the exclusive use of small business. However, this set-aside program has had dwindling success to the present. The figures for 1960 for the SBA set-aside program has shown a 27 percent decrease over the same period for 1959.

The total dollar value of the set-aside initiated by the SBA in 1960 was $600 million as compared to $1.2 billion in 1959, and the dollar value of those contracts actually awarded under this program was only $480 million compared with $600 million in 1959. This decline over 1959 is continuing in 1961, and if the present trend continues, it will be less significant than it is now—which is difficult to believe.

The SBA Administrator should have the authority and should use such authority in the screening of military purchases for potential set-aside. If small business is going to be able to survive and continue to grow, more power must be given to the Small Business Administration to oversee the awarding of the Defense Department dollar.

In analyzing the shift of our economy from small to large corporations, we have seemed to take it for granted that the small businesses still existing shall continue to survive in the little section of the competitive world that the large corporations have left to them to fight over. This little section, however, is slowly being tightened like a noose around the neck of small business. It is slowly dying and unless something is done, be it through legislation or other means, this small section of competition that is left will completely disappear and small business along with it.

S. 836 is a big step forward in the fight to help small business secure its fair share of the defense dollar. Section 5 of this bill will do much to strengthen competition by requiring the Attorney General to make sur-

veys and submit yearly reports to Congress on any activity of the Government which may affect small business, for the purpose of determining any factors which may endanger competition.

A most important point in section 5 is the reference "the Administrator of SBA may also request the Attorney General to make supplemental surveys and reports on any particular activities of the Government which may affect a small business."

Sections 6 and 7 further strengthen the SBA by encouraging a greater allocation of subcontracts to small business and allowing the SBA to have access to a more complete record of procurement actions.

Sections 8 and 9 of this act broaden the authority of the SBA as to subcontracting awards and improve the program for advertising Government contracts. It is much to be desired to have the bid lists and the criteria, therefore, revised. Also, the provisions requiring publication in the daily U.S. Department of Commerce, "Synopsis of U.S. Government Proposed Procurement, Sales, and Contract Awards" of all military procurement actions over $10,000 and all civilian actions over $5,000 will provide small business with a more complete list of what the Government is buying.

This provision of S. 836 will give small business a greater opportunity to compete with firms who have heretofore enjoyed a head start by virtue of the concentration of research contracts in the laboratories of large corporations.

This important segment of our economy is losing its position, and it will continue to lose its position if adjustments are not made in the Small Business Act of 1947 and the SBA itself, as proposed by S. 836. The area wherein small business can effectively compete must be widened and strengthened. This act takes a good firm step in the right direction.

There are one or two other things I would like to add, Senator, in light of some of the testimony of yesterday and today. It is that the bill would unnecessarily complicate the administrative procedure.

Senator PROXMIRE. The bill does what—unnecessarily complicates the administrative——

Mr. SMITH. The thought is that the bill would unnecessarily add to the administrative cost and unnecessarily complicate.

Senator PROXMIRE. You want to comment on that?

Mr. SMITH. I want to comment because I think the opposite would occur. In the first place, I defy anyone to greater complicate the procedure than it is today.

Secondly, it would occur to me that in many instances, they are unduly complicated. Some businesses cannot afford a bid when the specifications of the bid come out. In one instance, a medium-sized firm here in this area said it cost about $150,000 to bid on this particular product. I think I can visualize very definitely that some of these specifications may have to be very complex. We are dealing in complex properties, but others do not. And many of them are unnecessarily elaborate and have been unnecessarily elaborate for years and years.

Senator PROXMIRE. Is it your view that the SBA might, under this bill, play a role in persuading the procuring agencies to simplify their procurement policies?

Mr. SMITH. Absolutely. As anyone who has observed this over a period of time, I think it is difficult to criticize the Defense Department. This is like becoming a critic of God or motherhood, something like that. The Defense Department is involved in providing automatic weapons for our defense. And the tendency has been that if any criticism is made of it, No. 1, you do not understand; this is too complicated for the lay mind and please shut up.

The second thing is, when you do understand, you have not had the experience. Have you actually been an administrator and so forth? And, basically, the attitude of the public is to tend to go with the Defense Department. I was literally stunned when I saw the statement by the SBA Administrator on this bill. I do not know what happened.

I am just guessing, and this may not be the proper province for it. On the other hand, it may, but my guess would be that the Defense Department, with its flags flying, rushed screaming to the Budget Bureau, and the Budget Bureau said, "See here, we have got to make a decision." And the policy of the administration became, in a short time, that the SBA Administrator would say, "No, we do not want this bill." Maybe I am wrong. I cannot even prove that I am right, but I just suggest that the problem of interjecting any judgmental attitude other than the Defense Department itself over its procedure has always been called meddling, No. 1.

And No. 2, you are interfering with the defense effort. I do not think either one of these could be justified. I think some of the laymen ought to gird their loins, so to speak, and even without full knowledge, ask them very pointed questions and keep asking them until they get some respectable answers to them.

One of the first ones is the idea that these problems are too complex, and we just cannot handle things in little businesses. Yet, big businesses are decentralizing all over the place. The solution of some of these problems of research and development they are involved in requires smaller units and can be broken into many smaller component parts.

This is one of the big fields for development of small business research and development because much of this is paperwork. You don't have to have a steel plant or tremendous capital indicated here. And then, when a large contractor gets ahold of a contract, what happens? Quite often, he develops a situation and announces he is decentralizing. What is so specific and precious about having single ownership? It is one thing to have a big plant because he needed it on a mass basis to get low cost per unit, but what does single ownership contribute, necessarily, when this single owner will turn around and distribute out on a decentralized basis?

I suggest that in many instances, the area of small business participation can greatly accelerate, and the reason that they have not gotten more of it, I can understand in some instances. If I was a member of the Defense Department and had to undertake the responsibilities for some of these things and three firms came to my attention—and I am just picking this out of the air; I have no brief, for or against—but one happens to be General Motors and another XYZ and another ABC. If I give it to General Motors, and it comes up, probably nobody is going to jump on it. Maybe no one else could do it, but if I give it to the ABC Corporation and the thing does not work out, you all say, "Why did he not give it to the large company, and you will have demonstrated the ability to do this type of thing."

This is part of the difficulty of having the responsibility and having it diluted, or having the ability to meet this responsibility, I do not think is governing at all. And I think it ought to be vitiated.

Senator PROXMIRE. You think it would be a tendency on the part of the Defense Department without this bill or with the kind of proposal that was made by the three agencies when they were in here to be safe and make their determination for an established, blue-chip outfit?

Mr. SMITH. Sure.

Senator PROXMIRE. Whereas, with this bill, there would at least be a countervailing pressure for them to make a showing on small business where they could.

Mr. SMITH. Let me put it this way: It would take them at least 10 years to overcome the effects of this bill, and that would be somewhat helpful. I do not think that this bill, even as good as it is in the step that it has taken, it would take some time for them to overcome the effects, but I have great confidence in this administrator in overcoming legislative effects of almost any kind. And I think in all probability, this would happen here.

But I do say this: I am not so sanguine as to assume that the plans of the three administrative agencies are going to work. I can just see the Small Business Administration sitting between the Department of Defense and GSA and carrying the day. I would not like to look upon its chances at all.

I think unless you have some specific statutory authority that puts the onus squarely and directly and then places an administrative agency to carry that out that you are not going to have any kind of success. And I wish that the number of people who have expressed that to me would come here and express it to you because I am sure that there are significant amounts of them.

Senator PROXMIRE. We have one other factor involved here we did not have when this bill was introduced and up until a couple of days ago. That is the President of the United States has given orders to the Department of Defense to set a goal at least of an increase in prime contracts for small business of from 16 percent to 17.6 percent, or something like that. That is the way it has been interpreted this morning.

Do you think this can be done by administrative edict for effective——

Mr. SMITH. This has been more specific than we have had before, but if you recall, Mr. Truman urged the Defense Department to take into consideration small business. You recall on three different occasions, Mr. Eisenhower called upon the Defense Department to take this into consideration.

But I have seen the statistics, and they go straight down, and they have been going down in terms of these relative amounts, small business participation. Oddly enough, just the other day, it has come out that the Defense Department is going to spend an increase of $2 billion on conventional weapons.

It has also been announced that it is questionable as to how much this can be Small Business Administration activity or small businesses activity because it involves mass production. If we are talking about missiles, it is too complicated for them. Now, we are talking about conventional arms, not complicated any more. But the industry process is too big for them.

This reminds me of when I was a kid flipping nickels with the corner bully. If it came up heads, I got to keep it, but all the others went to him.

It seems to me that under the circumstances, unless you have certain specific descriptions, statutory provisions, nothing is going to take place. And I am sure that President Kennedy is just as sincere as he can be, but I do not think he can implement an administrative decision that way.

There is no way to check on it. Suppose 6 months from now, it shows there has been a further reduction? What recourse does the President have except calling in the Defense people and saying, "Do this." And, certainly, you would be reluctant to do that, at least under the administrative procedure that most executives operate on.

I do not think that is the solution. I do not think it is going to be effective.

Senator PROXMIRE. They can say that national defense must come first.

Mr. SMITH. Absolutely, and this will be the argument.

Interestingly enough, I was a bureaucrat at one time, and I do know that we were concerned at that time with the price control, and we were concerned about the voluntary methods by which the banking industry was working. This was when everyone took an oath and got a little pin, you know, for a member of a commercial bank if you would make only loans in terms of defense policy, no other loans unless you could prove to yourself that it was going to increase and enhance.

I know one commercial bank that made a loan who had a most interesting rationale. They made it for high priced steel kitchenware, and it was good for defense purposes because the morale of the housewife would be immeasurably improved. That was the classification.

I think you can sell almost anything or preclude almost anything on the basis it is good for defense. And I think it is time whether we have another Truman committee or whether it be this committee, I think it is time that the American people started looking pretty close at some of the activities. I know that the actions of General Electric took place only in an outside world. I know it is a thing that could never conceivably happen in Defense, but I think, to keep that record clear, we ought to just keep looking carefully.

I think small business ought to share more in it, and I would again say that much of the activity they contended they cannot do, they can do. I also guess that in many instances, especially in research and development, they will do a better job.

I think there is an excellent book out, Senator, on a study that has been going on since 1900 on 61 basic inventions in industry. The 61 basic inventions come without such benefit of great elaborate research. I am referring now to a book published by Macmillan Co. in 1958 by Jewkes, Sawers, and Stillerman, "The Sources of Invention." I think it is a pretty good analysis.

I think we have been brainwashed of the fact that all our inventions are coming out of these huge corporate laboratories. We mentioned nylon and a few others. I think a careful look at this indicates this is not quite a fact. And I think small businesses can and do an excellent job.

I am not worried about small businesses just for small businesses per se. I am thinking about the overall aspect of our economy. I am not thinking of small businesses, some little business in a musty fashion with simply walls around him, and the Government takes a commitment to support him for the rest of his life. That is not what I am thinking of.

I am thinking of the small businesses that provided the yeast for this economy in the past, the ones that have stuck their head up and challenged others. I would suggest to you that the big innovations that have occurred in the steel companies are not coming from the leaders of the steel companies. The inventions are coming from the small companies—the oxygen converter and various other things that are threatening right now to revolutionize steel.

Let me quote one of the most knowledgeable people I know, Mr. Fairless, who used to be president of the United States Steel. He said, "Unfortunately, bigness in industry also runs to the head." And I think it is extremely important that it does. And they have a tendency quite often to defend their committed capital and not be very representative on inventions.

I am thinking about the things that caused Sunbeam Corp. in electronics to take on Westinghouse and General Electric that everybody said could not be done. I think if we have these small businesses—and I am not interested in saying they will stay small—the same businesses, I hope they have opportunity for growth—will come up, provide new inventions and much of the vigor that our economy has had in the past.

I think one of the most and great paradoxes I have seen, I think more is probably said in behalf of the free enterprise system by the large businesses, and I think that they practice it less and create a climate less for it than any other institutions in the United States.

If the little businessman cannot come up with a patentable product that is a good article that can help, perhaps, and facilitate greatly defensibility and the welfare of society, cannot get money for it, cannot patent it, cannot get into operation himself, then, I think something has gone out of the country and something else is going to have to replace it. And I think the thing is going to replace it is greater and more vigorous Government activity.

And nobody seems to like it, but it seems to be ever increasingly necessary. And I think that is why it is necessary.

I did not mean to get wound up.

Senator PROXMIRE. I think it was wonderful. I was glad to hear it.

A number of witnesses have said that the cost of the defense program will be increased by this bill. What is your answer to that?

Mr. SMITH. It is another thing. Cost of the program, I suppose it could conceivably be increased, but——

Senator PROXMIRE. I am talking about the overall cost of defense.

Mr. SMITH. I think that if the effects of this bill, if both provisions we mentioned in our prepared statement—one, the Attorney General watching very carefully for the competitive action; the other the Small Business Administration who determines this bill, that the total cost of doing business on a dollar-for-dollar basis will be less and not greater.

I am convinced that the competition and the bidding for some of this material, that the lack of it has added to the cost. I am not questioning anybody's integrity. That is not the important thing, but two people can get together. These people have a budget to go by. They deal with one person. It is handy; it is easy; it is quick. They are interested in defense or not interested in all the hanky-panky or interested in this business of procurement. They want to get it over with. They want to get on with the program.

They are willing to pay a little more to expedite in that fashion. I think the cost will come down. I do not know how anybody can judge this, really, but all I am saying is we have just as much documentation on our side to suggest the cost will be less as they do on their side to suggest it will be more because I think the effect of competition is going to do more than offset some of these other dragons that have been raised in the last day or two.

Senator PROXMIRE. I just cannot see any significant increased cost except the usual kind of argument about more bureaucracy. But I can see specific savings and more competition. Just the section 9 alone would seem to me would provide a greater opportunity for more people to bid. And if more people bid, you are going to get somebody who is going to come in at a lower price.

Mr. SMITH. I think one of the things that is important here, too, it is automatically assumed if you get two bureaucrats together, you get a proliferation of bureaucracy. I do not mind a little quarrelsome attitude. I do not mean raging warfare, but I do not mind a little quarreling of two bureaucracies. There is a tendency to watch each other rather carefully.

Anybody talking about bureaucracy or worried about increasing bureaucracy, if this is the worry regarding the Defense Department, this concern should have been manifested many years ago. I do not think it is terribly important here now, the idea of the increased bureaucracy. I do not see that as offsetting the other obvious values that are involved.

Senator PROXMIRE. You say on page 2, "Small businesses have not participated in the overall economic expansion and have lost ground relatively." And under II D, you say, "Inability to have an agency of sufficient power consider Government procurement procedures."

How important do you think this is because this is, in my judgment, the most significant part of the bill, section A.

Mr. SMITH. Well, I think it is of crucial importance. And, by the way, I think the other things in the bill are nice, but I do not think they are crucial. I think if section A is knocked out of the bill, you might as well forget it. It is my judgment.

Senator PROXMIRE. My name would not be on it; I will tell you that.

Mr. SMITH. Godspeed, Senator. I am glad you feel that way because there is no particular reason to have the bill if section A comes out of it. I think this is important. As I said before, small business in its general posture in the economy is having its troubles.

Now, in some cases, it is not all due to the evil design of either Government or business. In some cases, it is inherent in the technological process. I grant you that. What I am saying is here is an area, just the area of research and development, plus other areas, too, for subcontracting, for participation, for small business. If there is ever going to be an opportunity for them to get their foot back on the rung of the ladder, this is it. And if they fail to do it herein, it is going to be a usual winnowing away of their effort and impact on society.

And I do not like the maturity aspect of our economic society in the sense of each significant industry being dominated to the extent that it is. I think it is an unhealthy situation. That is why, one of the reasons, I feel so strongly about the bill. Because I think this will—I do not look at it as a panacea at all. I think it is a step in the right direction. And I think some important results will flow from it. I would certainly like to see us be inventive enough to try it.

Senator PROXMIRE. On page 7, you give these figures that are pretty compelling on the difference between small business portion of advertised awards and of negotiated awards—39 percent compared to 12 percent. This seems to me a tremendously persuasive figure, but I am wondering if there are not some pretty good reasons for that discrepancy. And I think maybe we ought to put them in the record.

Mr. SMITH. I would imagine so. I think we have to remember that 67 percent of these are negotiated with one source. And when you have just one source involved on contract awards, I would imagine that some of that 67 percent, for example, should very definitely be one source.

I do not think there are many things that would come up there would be only one firm, perhaps, in the country that could handle it. I am not willing to put into the record that all the 67 percent being negotiated with one source could not have been opened up to greater bidding. I would agree that a percent very well normally could go into future bidding.

Senator PROXMIRE. Thank you very much.

Mr. CARTER. Senator PROXMIRE?

Senator PROXMIRE. Yes, Mr. Carter.

Mr. CARTER. I would like to inject and refer back to a statement or question that you had asked Dr. Smith about the Small Business Administration in section 8 of the bill.

In our interviews, and also I had the opportunity to attend a small business conference in Troy, N.Y., for small businesses that had been tied to the textile industry,

but had been cut loose and were floundering because the textile industry had moved—from them and from the small businessmen in this area and other men I have talked to, they have made the one statement, a one-sentence statement, that I think can adequately sum up their opinion.

They said, "What has the Small Business Administration done for us?"

I wanted to get this into the record because this is the feeling of many.

Senator PROXMIRE. Sounds like one of my constituents talking about me.

Mr. SMITH. Mr. Carter has done a lot of interviewing on the basis of a very elaborate questionnaire, and this is one of the things that has impressed him very much.

Senator PROXMIRE. I think that is a very useful observation because I have heard that in Wisconsin over and over and over again with the SBA. There is great feeling of disillusion and disappointment.

Frankly, it has not got much to do with this kind of thing—procurements—but it has everything to do with loans.

Mr. CARTER. For instance, on loans, Senator, in this conference in New York, a man from the Small Business Administration came up to address this conference on loans. He gave them a four-page statement and immediately after his statement, he said, "I have to fly back to Washington; I have important business. Therefore, we will cut the questioning short, and I have to leave."

And after he left, all the small businessmen who had problems with the loans, getting loans, said, "This is typical of the Small Business Administration." And they felt that the Small Business Administration needs more power and more administrative ability to award loans and to be able to have more latitude in loans.

Senator PROXMIRE. I just wanted to say at this point that I called this to the attention of the Small Business Administrator, Mr. Horne, and indicated that we urgently hoped he would correct that. While there are all kinds of restrictions on SBA and it is about as tough a job as you find, they have to take loans, after all, that the people cannot get from banks, at the same time, they have to be safe because, otherwise, they would get the dickens from the Congress. And it is very, very difficult to meet this combination.

Nevertheless, at least, they can be courteous and attentive and as helpful as they can be.

Mr. SMITH. I should say in behalf of them that all the operative people I know of in SBA are trying extremely hard and are very competent folks. I think the difficulty is the tremendous restrictions of that law. I do not think anyone really fully appreciates it until they get into trying to administer that law.

It started out as a good law. It has been amended pretty significantly, and I think, also, there was an attitude, whether it will continue now or not, that there were certain things and certain areas that SBA just could not get into. And they did not.

So, when you impose these restrictions on that group of people, you cannot expect very exciting results.

Senator PROXMIRE. I thought this was very, very compelling testimony. I thought you were devastating. I think it would be hard for anybody to argue with what you said. Your statement to begin with, explaining why you thought small business would not come down and testify was interesting and useful.

The fact is, we have small business representatives here for the bill. The New England Small Business Association represents many, many people and appeared to support the bill, as did others. We had fairly good balance. I think that by and large, we have had testimony which represents more small businessmen on the side of the bill than against, although there is vehemence and vigor and eloquence on the side of the people opposing it.

Mr. SMITH. I appreciate that, and I can understand why. I suppose if you have been successful under one circumstance, you have a tendency to feel that anyone who has not, it is his fault as well as anything.

Senator PROXMIRE. When I was in the Wisconsin Legislature, I found the strongest desire of those who came to us was to "fence me in; just let us have this all to ourselves." This is the attitude of chiropractors and others. They do not want competition, or as they might put it others butting into their business. They want it for themselves.

I am not charging it is the prime motive of the people appearing this morning, but it is certainly an understandable motive.

Mr. SMITH. It is one that has continued. I do feel, however, that some of the people who are testifying and some of the organizations, I would like to go back and try and find out what their attitudes have been about other measures such as—if I seem to recall, the Chamber of Commerce's testimony—when the Small Business Administration bill was up—didn't feel that it was very effective. I do not say that the Chamber of Commerce is precisely in league with the National Association of Manufacturers because I would not wish to place that brand on anyone, but I do feel that the chamber, in many instances, have taken a pretty strong line, which has not been, in my judgment, financially as——

Senator PROXMIRE. As you may know Senator BENNETT, a distinguished member of this committee, was formerly the national head of the National Association of Manufacturers.

Mr. SMITH. I know. I am aware of that.

Senator PROXMIRE. I want to thank you very much, Mr. Smith. This has been a pleasure. The hour is late, and I think this was a fitting climax to our testimony.

ORDER OF BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

Mr. MAGNUSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UTILIZATION OF TELEVISION FACILITIES FOR EDUCATIONAL PURPOSES

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 205, which is the pending business, but which under normal circumstances would not be laid before the Senate until 2 o'clock. I wish to proceed.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Washington?

There being no objection, the Senate resumed the consideration of the bill.

Mr. MAGNUSON. Mr. President, under a prior arrangement, I yield to the Senator from Nevada [Mr. BIBLE].

Mr. DIRKSEN. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. I ask the Chair to state the unanimous-consent request previously made.

The PRESIDING OFFICER. The request was to resume the consideration of the bill.

Mr. DIRKSEN. Did the Chair say that the request was agreed to? I have not yet agreed, and the question was not put.

The PRESIDING OFFICER. The Chair is informed that the request had been agreed to.

Mr. DIRKSEN. It has not been agreed to, because I was on my feet.

Mr. MAGNUSON. No; the Senator from Illinois was speaking with the Senator from Idaho.

Mr. DIRKSEN. But the Senator from Washington yielded to the Senator from Idaho.

Mr. MAGNUSON. To save time, I repeat my unanimous-consent request.

Mr. DIRKSEN. Mr. President, reserving the right to object, first I should like to propound an inquiry to the distinguished Senator from Washington. The Senator from South Dakota [Mr. MUNDT] is vitally interested in the bill. I understand he is out of the city. He had expressed the hope that it would not be called up unless he were here. I recognize full well that the schedule of the Senate cannot be contingent upon the convenience of any one Senator. However, if there is no immediate urgency about the bill, it occurs to me that action should be deferred.

Mr. MAGNUSON. I have no objection to accommodating the Senator from South Dakota. I do not know what his interest is, or whether his interest is of such major proportion that we need postpone consideration of this very important bill. He did not appear before the committee on the bill. He never spoke to the chairman or any members of the Subcommttee on Communications regarding the bill; nor is there any amendment at the desk which bears the name of the Senator from South Dakota. Therefore, I do not know what his interest may be. It may be a great interest. However, I do not know whether we should postpone consideration of the bill. I am trying to accommodate the Senate, because there are no other measures on the calendar at the present time. Therefore, I thought we could begin the debate on the bill. If the Senator from South Dakota would like to postpone a vote on the bill, perhaps, or desires to submit an amendment, we could accommodate him, I am sure.

Mr. DIRKSEN. When the matter was under consideration before the Senate last year, I did oppose the bill. The then Secretary of Health, Education, and

Welfare felt it was unnecessary. I understand that new hearings have been held on the bill this year. Is that correct?

Mr. MAGNUSON. That is correct.

Mr. DIRKSEN. I would defer, of course, to the wishes of the ranking minority member of the committee. I would abide by his judgment in the matter. He tells me that he is favorable to the bill and will support it. I am willing to forgo the interest of the Senator from South Dakota, who is out of town, if the ranking minority member of the committee so suggests.

Mr. MAGNUSON. When will the Senator from South Dakota return to the city?

Mr. DIRKSEN. I believe he will return tomorrow.

Mr. MAGNUSON. If my colleague on the committee, the Senator from Kansas, wishes to accommodate the Senator from South Dakota, it is agreeable to me.

Mr. SCHOEPPEL. Inasmuch as I have heard stated here on the floor the interest of the distinguished Senator from South Dakota in the bill, I would like to accommodate him if it were at all possible to do so, especially if it is satisfactory to the chairman of our committee.

Mr. DIRKSEN. The matter is of no great urgency, so far as I know.

Mr. MAGNUSON. No.

Mr. DIRKSEN. Then I would respectfully suggest to my distinguished friend from Washington that he withdraw his request and let the bill go over. Tomorrow, if he cares to call it up, I will have no objection at all.

THE PEACE CORPS

Mr. BIBLE. Mr. President, I was heartened by the President's special message to the Congress seeking the establishment of a Peace Corps. I am even more encouraged by the overwhelming response of the American people to the bold and courageous approach to the unsettled and highly dangerous world situation.

Through this proposal, President Kennedy is demonstrating anew America's pioneering spirit that carved this great Republic from a wilderness. To those who harbor doubts that present-day Americans lack the spirit of their forefathers, let them watch the vigor and imagination of this new Peace Corps.

The President has called on all Americans—young and old alike—to accept the responsibility of helping their fellow men, and bringing about a true and everlasting peace.

In defining this responsibility, President Kennedy's vision and energy have created a new and powerful weapon in freedom's arsenal—one which will not only combat the Red plague, but one which will help eliminate the poverty and ignorance and disease that plagues so much of the world.

What he has proposed is a corps of young, and not so young, men and women who will go forth into the underdeveloped areas of this world—not to preach political doctrines and usurp personal freedom, but instead to take positive action in teaching the illiterate, demonstrating modern farming methods to primitive farmers, caring for the sick and building productive free countries which can take their rightful places in the community of nations.

The future growth of this country depends greatly on the growth and social progress of these underdeveloped nations. If we are to win this fight for survival, then we must lead the way in stamping out the ignorance and poverty which are great allies of our foes.

This is truly a new concept of foreign aid—foreign aid which utilizes American know-how, rather than American dollars.

There is a great deal of talk about the youth of America being soft. Daily, the newspapers relate statistics pointing to the growing rise in juvenile delinquency. Problems abound, of course, but one should never think that the youth of this Nation is soft and weak, and the slave of an overcreative television writer. They are young people, who realize their responsibilities and, given the chance, are willing and eager to participate in this war for freedom.

It is time many of us realized, as President Kennedy has, that the youth of this Nation has a great deal to contribute to our future, and the future of the world.

It is time we gave them the opportunity to participate in our domestic, as well as international, affairs.

Prior to the President's message, Thomas O'Brien, dean of the Graduate School, University of Nevada, outlined for me a proposal to train these young Peace Corps members—a plan created on the strength of President Kennedy's campaign speech alone.

I hope that the President, and those who will direct this bold new venture, will give full consideration to the University of Nevada when selecting the sites for training these young people. The university is well suited to handle such a program. Under the proposal submitted by Dean O'Brien, the university's outstanding faculty will be supplemented by personnel and aids from private industry. The university's small campus, and excellent facilities will give the trainees a better opportunity to know one another. The rugged terrain and open spaces will better suit those under training for the rigors of physical conditioning which will be so necessary in their assignments.

YOUTH CONSERVATION CORPS

Mr. HUMPHREY. Mr. President, this morning the New York Times published a front-page article reporting that a Department of Labor study group has completed recommendations for establishment of a Youth Conservation Corps which are expected soon to go to the President. I can only say that I am very much gratified by this announcement, because, as Senators know, I have been deeply interested in this program for some years.

As the Senate author of the Youth Conservation Corps bill, S. 404, I am naturally highly pleased that this proposal is being supported by the Department of Labor.

Senators will recall that in the last Congress the Senate passed my bill, S. 812, to establish a Youth Conservation Corps of 150,000 young men, ages 16 to 21, to work on Federal and State conservation projects. The bill which I have introduced in this Congress, S. 404, is identical with the measure we passed in 1959. I am proud to be able to state that joining as cosponsors of S. 404 are Senators RANDOLPH, BYRD of West Virginia, BURDICK, CANNON, CARROLL, CLARK, CHURCH, GRUENING, HART, JACKSON, LONG of Hawaii, LONG of Missouri, MAGNUSON, MCCARTHY, METCALF, MORSE, MOSS, NEUBERGER, PELL, WILLIAMS of New Jersey, and YARBOROUGH.

The purpose behind this Youth Conservation Corps proposal is to conserve both our human and natural resources. The bill represents a work-education program. It represents a genuine constructive effort.

A serious problem which we must face up to is the growing number of young men who are dropping out of school and finding it difficult, if not impossible, to find gainful employment. The highest level of unemployment is to be found in this group. And it is this group of young and idle men which is a natural breeding ground for juvenile delinquency.

In the next 10 years the number of men in this age bracket will boom by an estimated 30 percent as the "war babies" come of age. With this sharp rise in the number of young men and the growing difficulty of untrained youths to find steady employment, we are going to face a problem of ever growing magnitude.

What better way is there to put these idle young men, or at least some of them, to work on worthwhile, constructive work in the field of conservation—an area in which much more work should be done if we are to protect and preserve our God-given natural resources.

In fact, even today, as we drive through our great national forests, we see the living testimony of the splendid work of the CCC members and the fine public works created by young men who were idle until they were given the opportunity to obtain gainful employment.

Anyone who has talked with former members of the Civilian Conservation Corps of the 1930's knows how much that program did for millions of young men. When the Committee on Labor and Public Welfare held hearings on my YCC bill in 1959, it received testimony from scores of former CCC members attesting to how much that program did for them in equipping them for adult life. The training they received in learning to live with other people and to acquire disciplined work habits paid off in later life, and the work that these CCC members did in conservation and recreation work has served our country well.

Mr. President, I am confident that the President will be receptive to the recommendations being prepared by the Department of Labor for a Youth Conservation Corps. With the backing and

support of the President I am certain that we can obtain passage of the proposed legislation in this Congress.

It may be recalled that when the President of the United States was a Member of the Senate, he supported a similar measure. I am confident that the bill can be enacted and be a self-sustaining enterprise. In fact, the testimony before the Committee on Labor and Public Welfare 2 years ago demonstrated that the savings in dollars alone due to fire prevention and reforestation would more than pay for the cost of the program. This is, in other words, a sound investment.

Mr. President, I ask unanimous consent that the article entitled "President Plans New Youth Corps for Conservation," published in the New York Times of today, March 21, 1961, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRESIDENT PLANS NEW YOUTH CORPS FOR CONSERVATION—COMPANION TO PEACE GROUP WOULD RESEMBLE CCC OF DEPRESSION YEARS—FOR MALES OF 17 TO 19—PROGRAM IS AIMED TO HELP SCHOOL DROPOUTS, WHO FIND JOBS HARD TO GET

(By Peter Braestrup)

WASHINGTON, March 20.—The Kennedy administration will propose a Youth Conservation Corps of male teen-agers to work on conservation projects across the Nation.

A Department of Labor study group has completed recommendations, which are under review by Secretary of Labor Arthur J. Goldberg. Other Cabinet officials will also be consulted. The proposals are expected to go to President Kennedy later this week.

The departmental report calls for a combined education-work program for 150,000 boys aged 17 through 19. Applicants would volunteer for 1 year's service as laborers, technician's helpers and light construction workers.

The volunteers would draw token wages, live in special camps, and work under such conservation agencies as the National Park Service, the Forest Service and the Bureau of Reclamation.

WOULD RESEMBLE CCC

The Youth Corps would most closely resemble the Civilian Conservation Corps of the depression-ridden 1930's. It would have no connection with the Peace Corps, an overseas aid program largely involving college graduates, which was created by President Kennedy on March 1.

According to the Labor Department report the new group would have two principal goals.

It would furnish useful work for a large share of the 200,000 male youths who have dropped out of school and cannot get jobs. Some 7,500,000 school "dropouts" are expected in the 1960's.

It is this group that suffers the highest unemployment rate, 20 percent, of any age category and it is this group that is much involved in juvenile delinquency.

It would also provide needed low-cost labor for a massive program to catch up with a $3 billion backlog of forest, water, park and soil conservation projects.

"The program," the Department report said, "should not become something to lean on, but should rather be a stepping stone to normal participation in the labor force."

Initially, 80,000 volunteers would be recruited, with expansion over a 2-year period.

The total outlay would run about $2,700 a year for each volunteer, according to Labor Department estimates. Thus, a 150,000-member program would cost $405 million.

The Youth Corps idea has had considerable Democratic support in the recent past.

In a campaign speech at Scranton, Pa., on October 25, Mr. Kennedy urged creation of a Youth Conservation Corps, echoing the Democrat Party platform. Just before his inauguration, a Kennedy task force on natural resources recommended the corps establishment.

Senator HUBERT H. HUMPHREY started the ball rolling in January 1959, when he introduced a Youth Corps bill.

Opposed by the Eisenhower administration, the Minnesota Democrat's bill narrowly passed the Senate in a 47–45 vote last August 18. A companion measure submitted in the House of Representatives by Representative JOHN A. BLATNIK, another Minnesota Democrat, never came to a vote.

This year, Senator HUMPHREY has submitted a new Youth Corps bill and 10 similar measures have been introduced in the House. One of the House bills, sponsored by Representative CARL D. PERKINS, Democrat, of Kentucky, calls for an urban renewal youth work program in addition to conservation projects.

President Kennedy himself, in a television broadcast with Mrs. Franklin D. Roosevelt on March 6, said he hoped to use the Peace Corps concept in slum and depressed areas—another slightly different approach.

In its report, the Labor Department study group endorsed a separate public-service work program for both girls and boys in city areas.

This type of program is scheduled for discussion by the Department's Advisory Committee on Youth Employment, which meets here Thursday and Friday.

PROGRAM PONDERED

Although it made no hard recommendations on the city program, the Labor Department group suggested that this work-education effort should enlist volunteers who would live at home.

There might be part-time work for 16-year-olds still in school. The tasks assigned the volunteers would include furnishing unskilled help in hospitals, homes for the aged, and other nonprofit institutions.

"Care should be taken to avoid job placement which would be in competition with the regular labor force," the Labor Department report said.

Labor Department sources emphasized that in both types of program, the greatest care would be taken not to take jobs away from the building trades and other workers. These sources said the Youth Corps would necessarily involve added use of skilled craftsmen in a stepped-up conservation program.

The Youth Corps' educational program, the Labor Department study group recommended, would involve roughly 20 percent of the workday plus 4 hours on Saturday. Small classes on a staggered schedule would be the rule.

The curriculum would include, where applicable, remedial reading, arithmetic and more advanced academic and job training. No extensive vocational or technical training would be attempted. Counseling, citizenship training, and calisthenics would be included. Able youths would be promoted to head groups, with pay increases.

NINE-YEAR PROGRAM

The Youth Corps' ancestor, the Civilian Conservation Corps, was established by act of Congress in March 1933. It lasted until June 1942, 6 months after Pearl Harbor.

During its 9-year lifespan, the corps gave employment and work training to 3 million men, most of them joining up at the age of 17 or 18. But World War I veterans and Indians were admitted regardless of age.

Mr. HUMPHREY. Mr. President, I have discussed the bill with members of the Department of Labor, including technicians in the Department. My legislative counsel has collaborated on the details of the bill with members of the staff of the Wage and Hour Division. We are attempting to perfect proposed legislation which has already been introduced in line with some recommendations of the task force of the Department of Labor.

I am pleased to state that the distinguished Senator from Pennsylvania [Mr. CLARK], who is the chairman of the Subcommittee on Manpower Problems of the Committee on Labor and Public Welfare, has already indicated to me his desire to hold hearings. It is my understanding that the hearings will take place after the Easter recess.

I hope Senators will consider the bill with an understanding, yet favorable, eye, because it affords an opportunity for Congress to do something worthwhile for Americans. We talk about the great Peace Corps which is designed to help the people abroad. I suggest that the Youth Conservation Corps can help Americans at home and be a tremendous source of enrichment to our national economy.

UTILIZATION OF TELEVISION FACILITIES FOR EDUCATIONAL PURPOSES

Mr. MAGNUSON. Mr. President——

The PRESIDING OFFICER. The Senator from Washington has a request pending, so the Chair understands.

Is there objection to the request of the Senator from Washington?

Mr. DIRKSEN. Mr. President, we have pursued this matter, and I think I have ascertained the views of the distinguished Senator from South Dakota. We have no objection to having the Senate proceed with consideration of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Washington?

There being no objection, the Senate resumed the consideration of the bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

Mr. MAGNUSON. Mr. President, on January 6, 1961, Senate bill 205 was introduced. It is similar to a bill which was introduced last year and then passed by the Senate.

The pending bill was favorably reported by the members of the Committee on Interstate and Foreign Commerce who were present at the committee meeting and who have been associated for some time with this matter.

Hearings were held on March 1 and March 2. Printed copies of the hearings are on the desks of Senators. The hearings include testimony from some of the finest educators in the Nation, and also testimony from the Federal Communications Commission and its new Chairman, coupled with testimony submitted by other members of the Commission. It is interesting to note that the new FCC Chairman has had great experience in the educational TV field. All the testimony was strongly

in favor of the objectives and the provisions of the bill.

The president of Columbia Broadcasting System television network made a very fine statement in favor of the bill, and discussed the entire matter of educational television as did the president of Radio Corp. of America and other broadcasters. Statements were submitted not only by commercial broadcasters, but also by manufacturers, civic groups, and many other persons who for a long time have been much interested in this matter. Also the witnesses included representatives of local school groups.

S. 205 is intended to expedite and accelerate the use of television in our schools, colleges, and training programs in each of the several States and the District of Columbia.

The bill would authorize grants not in excess of $1 million to any State for establishing or improving educational television broadcasting facilities. Applicants would be required to provide assurance satisfactory to the Commissioner of Education that necessary funds would be available to operate and maintain such facilities.

Ten years ago, approximately 242 channels were set aside by the Federal Communications Commission for educational use. This number has been increased to 268. I believe that to date only 54 of those channels are in use. In other words, 214 very valuable educational channels in the spectrum have for 10 years been unused, and thus the Nation has lost the use of that large part of this brandnew medium of expression and communication—the greatest the world has ever known—in the field of education. In other words, two-thirds of a generation of schoolchildren could have had the advantage of educational programing if those educational television channels had been activated.

Applications for the assistance provided by this bill would be made to the U.S. Commissioner of Education and the applicants would be required to provide assurance that the operation of such facilities will be under the control of: First, the agency or officer primarily responsible for the State supervision of public elementary and secondary schools; second, a nonprofit foundation, corporation, or association organized primarily to engage in or encourage educational television broadcasting—which is the case in some of the great urban centers of the Nation; third, a duly constituted State educational television commission; fourth, a State-controlled college or university; and that such facility will be used for educational purposes.

Under the provisions of S. 205, the FCC is authorized to provide such assistance in carrying out the provisions of the bill as may be requested by the Commissioner of Education.

Of course, that will be in the field of engineering—to advise as to the channel to be used, and how it is to be used from an engineering point of view—advice which now is necessary in connection with the construction and use of all channels.

Furthermore, it is specifically provided that nothing in the bill shall be deemed to give the Commissioner of Education any control over television broadcasting.

I may say that when the educators appeared before the committee, the chairman of the committee was very particular to ask all of them to read the section of the bill which completely eliminates any Federal control of the program in education, and the chairman asked if that language was sufficiently strong. All of them said it was, and said it would accomplish our purpose.

Mr. HUMPHREY. Mr. President, will the Senator from Washington yield?

Mr. MAGNUSON. I yield.

Mr. HUMPHREY. Is this measure generally the same as the bill the Senate passed in the last Congress?

Mr. MAGNUSON. Yes.

Mr. HUMPHREY. So it has had not only the recent hearings, copies of which are on our desks at this time, in connection with Senate bill 205, but also the rather substantial and extended hearings which were held by the Senator's committee during the past 2 years; is that correct?

Mr. MAGNUSON. Yes. In fact, the Senate has twice passed the bill; this is the third go-around. Ample notice in advance was given in connection with the invitation for witnesses to attend the hearings. This year no witness who appeared at the hearing opposed the bill, in spite of the fact that witnesses from all over the Nation appeared to testify at the hearings.

Mr. HUMPHREY. The Senator from Washington is to be commended for his persistence in connection with this measure. As he knows, most of the great universities and schools are very much interested in programs of this type, in order to extend, expand, and improve our educational television.

I believe this program is long overdue; and I hope that instead of simply being a Senate bill, as the measure has been before, it will now become public law.

Mr. MAGNUSON. The Senator from Minnesota has always been a strong supporter of education. I say to him that we have found that, first, it should be clearly understood that television is not a substitute for classroom work.

Mr. HUMPHREY. Of course not.

Mr. MAGNUSON. It is merely a means of doing things that could not be done otherwise. The testimony received from witnesses from the smaller States, where the country schools have no chance to have all of the necessary teaching facilities—and even in the case of the one-room school, where some instruction by means of television could be given—was that they found that whenever television educational programs have been put into operation, there has been no suggestion from the State legislatures, the school board authorities, or civic leaders that they not be continued. Some way is always found to continue the service. The legislatures may provide for it and in others it was done on a community level. Some States have moved pretty well in this matter, but many others have not.

It was difficult to say how much should be provided. We proposed not in excess of $1 million. However, a plan, and a statement as to how it will operate, will have to be submitted, and the plan will have to be weighed.

Strangely enough, some of the States with smaller populations, but with wide expanses, such as Montana, are the States which need such a program the most. They have no educational TV. There is a closed circuit in one of the schools of the State of our distinguished majority leader.

Very few persons realize that in the Middle West and in the other parts of the West, including my own State, there are many one-room schoolhouses. It is difficult for one teacher to succeed in having 40 or 50 pupils learn subjects in the whole gamut of education.

Generally, where educational TV has been used, it has had marvelous results. In the State of Alabama, first-year college courses may be taken by means of educational TV. There has been enough experience in using the system to learn that certain students who come into college as sophomores may do better scholastically than do those who had been freshmen on the campus, because the former had the desire to do the hard work necessary.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. The Senator has made reference to Dr. Erling S. Jorgenson, director of the Montana educational television project at Missoula, Mont., who appeared before the committee of the Senator from Washington, along with my distinguished colleague [Mr. METCALF], and urged enactment of the legislation.

I note that Dr. Jorgenson made an excellent case in urging enactment of the legislation, and showed how many schools in Montana are isolated by rugged terrain and are located considerable distances from population centers.

I read from page 4 of the report:

> As an example, Missoula, Mont., a city of approximately 33,000 has a country high school with an enrollment of 2,000.

I think the RECORD should show that it is a county high school, and not a country high school. I trust that, as a result of the testimony of Dr. Jorgenson and others, and by reason of the activity of the distinguished chairman of the committee, the Senator from Washington [Mr. MAGNUSON], the bill will shortly be approved and sent to the House for action, because it is a worthwhile measure.

Mr. MAGNUSON. Dr. Jorgenson gave some excellent testimony on the problem as it affects a State like Montana, where there are great distances involved.

Paradoxically, States that are smaller in population, but which have the greatest number of square miles, need a measure such as is proposed more than do the States with larger population. In some States, cities have gone forward with such a program. The question is asked as to why the cities of the States cannot proceed with a program such as that proposed. In some cases they have, and in some cases they have not.

There was testimony that a very large city in this country is having difficulty in getting off the ground and on the air. It seems that perhaps, after a lot of work advantage will be taken of the channel available. It may take 15 years. Half a generation of schoolchildren will be involved in that time. We cannot afford to waste their talents.

I wish to say something about the networks. Senators ought to read the testimony they presented. I stated to them it was my hope that, if we can plant the seed corn, we shall have a fourth network in this country, an educational TV network, by means of which a school will be able to pick up a lecture by a great teacher, which would not be available to the school in any other way, and that a particular subject will be taught to pupils who otherwise would not have a teacher available.

The committee of which I am chairman has been in touch with representatives of the Federal Communications Commission about TV programs. It was the general consensus that progress in that direction had not been too good. I stated to the representatives of the networks that after the educational TV operators, the universities, and all concerned get together, the programs will have a tendency to be competitive with the commercial networks, and, being competitive, will have a tendency to raise the quality of network programs. The network officials agreed with me. They said they were in favor of it, because it would help them.

The new Chairman of the Federal Communications Commission has long been connected with a nonprofit group in this field in the State of the distinguished Senator from Illinois. Generally in that area, where there are country schools, the Ford Foundation has agreed to finance an experiment which would place an airplane 30,000 feet in the air, and have educational programs broadcast from the airplane under the auspices of Purdue University and a number of other educational groups. Two airplanes will be used. Two airplanes are going to broadcast educational TV programs during regular school hours, from 30,000 feet, which will cover 5,200,000 schoolchildren in that particular area, who otherwise would not have such facilities available.

People can take it or leave it, but the Ford Foundation was specific in having it understood that it could conduct such an operation only once, in order to test its operation. So far as I know, the program is proceeding very successfully.

In my hometown, the University of Washington has an educational TV station. It is the only one. It does not broadcast over the mountains to the eastern part of the State. It has been operating for 6 or 7 years. For 3 or 4 years, it could not get off the ground. The legislature meets only every 2 years. We lost 2 years in getting action from the legislature. It was a new idea. A very public spirited citizen, Mrs. A. Scott Bullitt, who owns a big TV station, and who was putting new equipment into her station KING, was told of the problem confronting the University of Washington, and she contributed the equipment. In this way the educational TV was given a boost to get off the ground.

That same slow process can happen in many places. I don't know whether it has happened in Montana or Illinois, but now the State legislature appropriates money for that program every year in my State. I suspect the program is off the ground by now, but we lost 4 or 5 years before it got underway.

The same thing is happening all over the United States. Two hundred and fourteen of the finest channels in the spectrum have been lying idle for 10 years. If we don't do something about it pretty soon, I ask my colleagues if they do not think the commercial TV interests will be looking for a possible use for those channels.

Mr. DIRKSEN. Mr. President, now that the Senator has got off the ground, I wonder if he can forebear me for a moment to make sure one observation gets into the RECORD?

Mr. MAGNUSON. I have no doubt the Senator from Illinois will get an observation into the RECORD, regardless, because he usually succeeds in doing so.

Mr. DIRKSEN. I have been very successful so far.

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Illinois?

Mr. MAGNUSON. I yield.

Mr. DIRKSEN. I have two observations. First, the distinguished Senator from Washington has referred to this proposal as seed corn. Believe me, $50 million is a lot of seed corn for States ranging all the way from Rhode Island to Texas or Alaska or Hawaii. Second, I fought a similar bill last year. The former Secretary of Health, Education, and Welfare was opposed to it; and, interestingly enough, the bill this year is identical with the bill of last year, and the Secretary of Health, Education, and Welfare is still opposing it, as appears on page 164 of the hearings.

Mr. MAGNUSON. I yielded to the Senator, but I was about to discuss that matter.

Mr. DIRKSEN. I thought I would put that statement into the RECORD, since I have had such difficulty getting the floor.

The Secretary discusses this in his letter written on St. Patrick's Day, March 17, 1961, to our illustrious and distinguished chairman of the committee, the Senator from the State of Washington.

Since these things always appear in the hearings in such small type that trifocal and bifocal men, like me, have difficulty reading the print, I ask unanimous consent that the letter to our distinguished chairman be printed in the body of the RECORD in the customary type as a part of my remarks, so that all who run may read.

Mr. MAGNUSON. I was going to read the letter to the Senate.

Mr. DIRKSEN. Good.

Mr. MAGNUSON. If I can proceed with my discussion.

Mr. DIRKSEN. If the Senator does not mind, I should like to have the letter printed as a part of my remarks.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Illinois?

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
March 17, 1961.

HON. WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your request of January 12, 1961, for a report on S. 205, a bill to expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs.

This bill would authorize the appropriation of such amounts as may be necessary to enable the Commissioner of Education during a 5-year period to make grants to State education agencies, nonprofit organizations, State educational television commissions, and State-controlled colleges and universities for acquisition and installation of transmission apparatus for educational television facilities. The aggregate of such grants could not exceed $1 million in any State.

S. 205 is identical to S. 12, 86th Congress, which passed the Senate on April 13, 1959. The purpose of the instant bill—to expedite the development of the educational uses of television—is one which this Department endorses. There is no necessity in this report to again review the progress in the development of educational television broadcasting. We recognize that, heartening as this progress has been, much more needs to be accomplished in order to take advantage of the enormous potential of television for the improvement and extension of educational opportunities in all parts of the country. We also recognize that a major obstacle to the accomplishment of this objective is the high initial cost of equipment and the shortage of funds for meeting such costs. Nevertheless, the Department feels that there needs to be additional consideration of the entire problem in order to determine the most effective methods of providing Federal assistance for this purpose.

As you know, President Kennedy has recommended legislation to provide additional Federal assistance in meeting the urgent needs of public elementary and secondary schools and of higher education. We believe that the enactment of this legislation should have priority in terms of new Federal programs in the field of education. Meanwhile, our Department will give thorough consideration to additional proposals of obvious merit, such as that embodied in the instant bill. In our judgment, a number of important matters need additional consideration with respect to accomplishing the objectives sought in S. 205.

First, the National Association of Educational Broadcasters is undertaking to design an allocation plan for a nationwide system of educational television for submission to the Federal Communications Commission for the Commission's consideration. It is expected that this plan will be completed shortly and we would like to have the benefit of this effort and the findings of the Commission on it in order to coordinate the recommendations of this Department with that work. Second, we believe that further attention should be given to the role of the State in formulating a plan for statewide development of educational television, and to the role of possible regional arrangements between States. For reasons of efficiency, economy, and effectiveness, we believe that the planning and activating of educational television installations at least should follow a State pattern, and may need to be regional in character. Third, we feel that more attention needs to be given to securing effective commitments for operating funds once an installation is completed. And, finally, the Department would like to consider

the Federal role in encouraging educational television in the broader context of measures designed to bring about more effective use of modern educational media and within the framework of more comprehensive Federal action to improve the quality of education.

This administration, under the leadership of President Kennedy, is deeply and forcefully committed to Federal action to help improve the quality of American education to the end of strengthening the whole fabric of our society. The administration's proposed Educational Assistance Act of 1961 provides for stimulating and facilitating new programs to meet special education problems. Such programs might include the use of new media such as television. In addition, the President has stated in his message to the Congress of February 20, 1961, that he will ask the Congress to amend and extend provisions of the National Defense Education Act. A portion of that act is designed to foster research and experimentation and to disseminate information in the development and evaluation of television and other educational media. This Department, which has the principal responsibility for carrying out the vital administration commitments in the field of education, will carefully consider an appropriate course of action to provide adequately for the development and stimulation of various types of modern educational media including educational television. For the reasons set forth, however, we are unable to recommend favorable consideration of the instant bill.

Accordingly, we recommend against enactment of S. 205.

We are advised by the Bureau of the Budget that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

ABRAHAM RIBICOFF,
Secretary.

Mr. MAGNUSON. I should like to say, as an aside——

Mr. DIRKSEN. I hope the Senator will permit me to conclude, in one sentence. The Secretary says:

Accordingly, we recommend against enactment of S. 205.

I find myself now holding up the hands of the new Secretary of the Department of Health, Education, and Welfare.

That is all I have to say.

Mr. MAGNUSON. I simply say, as an aside, I thoroughly agree with the Senator from Illinois concerning the fine print in all our reports. I think the fine print of letters from departments, in our reports which is always customary, and the telephone book have contributed more to forcing Senators to wear glasses than any other thing of which I know. I think the people who print them are in league with the optometrists.

I suggested at one time to the Joint Committee on Printing, that we should print the letters in even bolder type, but I was told it would cost too much. Again it was said, it would cost too much.

Mr. LAUSCHE and Mr. HUMPHREY addressed the Chair.

Mr. MAGNUSON. May I finish my opening statement?

Mr. LAUSCHE. I should like to pursue what the Senator from Illinois said.

Is the letter of the present Secretary of the Department of Health, Education, and Welfare included in the report?

Mr. DIRKSEN. It is on page 164.

Mr. LAUSCHE. Is it in the report?

Mr. DIRKSEN. No.

Mr. MAGNUSON. If the Senator from Ohio and the Senator from Illinois will bear with me a minute, I shall conclude my statement.

Mr. DIRKSEN. The letter is printed in the hearings.

Mr. MAGNUSON. The Secretary of the Department of Health, Education, and Welfare sent a letter on March 17, which was Friday.

Mr. LAUSCHE. Why was the letter not printed in the report?

Mr. MAGNUSON. Because the report was printed prior to that time.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. MAGNUSON. I have the letter, which I intend to read to the Senate, if I may proceed.

Mr. LAUSCHE. Did the committee report the bill without obtaining a recommendation from the Secretary of the Department of Health, Education, and Welfare?

Mr. MAGNUSON. We asked the Department, a long time ago, to appear. We asked the Department during the hearings to appear, and Department representatives did not appear because they had not formulated their position.

Mr. LAUSCHE. Then the bill was recommended favorably without the committee having had an opinion, before the recommendation was made, as to what was the judgment of the Secretary of the Department of Health, Education, and Welfare?

Mr. MAGNUSON. The bill was reported after the committee had written to the Secretary on two occasions. Apparently the Secretary did not wish to testify. He suggested to me that the Department would testify when the bill went to the House of Representatives. The letter was written March 17. I saw it only this morning, because it arrived this past weekend.

Mr. LAUSCHE. The report was filled March 14?

Mr. MAGNUSON. Yes.

Mr. LAUSCHE. The letter was written March 17?

Mr. MAGNUSON. Yes.

We asked the Department on January 12 to send us their position.

Mr. LAUSCHE. The point I am trying to make is that ordinarily we wait for the department of Government which is particularly concerned with a bill to express its opinion. In this case the committee recommended passage of the bill before it heard from the Secretary.

Mr. MAGNUSON. That is not an absolutely accurate statement of fact.

Mr. LAUSCHE. I thought the Senator said he received the letter on the 17th.

Mr. MAGNUSON. The committee ordinarily waits to get recommendations from the departments. We ask the department representatives to appear, and we ask for their comments. We wait a reasonable time, sometimes a long time.

On January 12 we asked the Department of Health, Education, and Welfare for an opinion. We waited almost 6 weeks. We assumed the Department representatives did not wish to appear.

The Department was later again asked to appear.

The committee often passes bills with respect to which executive departments have not made comments. When an executive department is asked to do so time and time again, and does not make comments, we assume that either the Department has no interest in the bill, or for some good reason does not wish to testify.

Any implication that the committee was trying to report the bill to the Senate because it had not heard from the Secretary of the Department of Health, Education, and Welfare is simply not the fact.

Mr. DIRKSEN. The Senator refers to the new Secretary of the Department of Health, Education, and Welfare.

Mr. LAUSCHE. Yes.

Mr. MAGNUSON. Yes.

Mr. DIRKSEN. Who had not answered by letter?

Mr. MAGNUSON. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. HUMPHREY. Mr. President——

Mr. LAUSCHE. Mr. President, will the Senator permit me to finish my colloquy?

Mr. MAGNUSON. I should like to finish my opening remarks.

Mr. LAUSCHE. I merely said it is rather abnormal for a committee to file a report without having in the report an opinion of the department of Government which is most vitally concerned. I do not think the Senator from Washington would challenge the correctness of that statement.

Mr. MAGNUSON. I can show the Senator hundreds of reports on bills, with respect to which there has been no communication.

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. MAGNUSON. I think it would be abnormal and unusual if the committee filed a report without asking the Department representatives to appear, and without allowing the Department a reasonable time.

Mr. LAUSCHE. The hearings were conducted on March 1 and 2?

Mr. MAGNUSON. The Senator is correct. That is almost 2 months after the request went to the Department.

Mr. LAUSCHE. The report was filed on the 14th of March, and the letter was written on the 17th of March?

Mr. MAGNUSON. The Senator is correct.

Mr. LAUSCHE. I think it is very vital, at least for the people of the country, to know that the Secretary of the Department of Health, Education, and Welfare of the Kennedy administration says the bill should not be passed.

Mr. MAGNUSON. That is not quite the fact. I will read the letter, and the letter will speak for itself.

Mr. HUMPHREY. Mr. President, will the Senator yield to me on a more tranquil subject?

Mr. MAGNUSON. I yield to the Senator from Minnesota.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the Housing Subcommittee of the Committee on Banking and Currency be permitted to sit during the session of the Senate today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, I also ask unanimous consent that the Internal Security Subcommittee of the Committee on the Judiciary be permitted to hold hearings away from the city of Washington, D.C., today.

The PRESIDING OFFICER. Without objection, it is so ordered.

UTILIZATION OF TELEVISION FACILITIES FOR EDUCATIONAL PURPOSES

The Senate resumed the consideration of the bill (S. 205) to expedite the utilization of television transmission facilities in our public schools and colleges and in adult training programs.

Mr. HUMPHREY. Mr. President, I thank the Senator from Washington for his courtesy. I assure the Senator that a degree of legislative independence on occasion is refreshing to the body and to the soul.

Mr. MAGNUSON. Yes. I hope we can maintain independence.

Mr. HUMPHREY. I compliment the Senator from Washington for his fine work in regard to the bill. It surely has my enthusiastic and wholehearted support.

When the letter is read I am sure it will be clear that the Secretary of the Department of Health, Education, and Welfare will be amenable to the many fine recommendations of the Senator from Washington, who is able to persuade even those who have deep doubts on most serious questions.

Mr. MAGNUSON. The Secretary says in his letter that this is a proposal with "obvious merit."

Mr. HUMPHREY. With "obvious merit"?

Mr. MAGNUSON. With "obvious merit," yes. On its face the proposal has obvious merit.

Mr. President, this is the same sort of letter which was sent to the Congress last year by the Department, in which the Department suggested it should study the proposal a little longer. It was said, in effect, "This is a good bill. Perhaps this ought to be done in some other way."

This is exactly what I am trying to do. Let us get started. We have now lost 10 years in regard to the proposal. The Department could study it for a long time. All the Department has to do is to read the testimony. There is not a single bit of testimony against the proposal by any witness who appeared in open hearing in three long hearings, after people were notified weeks in advance or months in advance of the hearings.

I do not know why Mr. Ribicoff sent the letter on St. Patrick's Day. [Laughter.] But that is what happened. The Secretary was invited to testify. We asked the Secretary to testify.

Frankly, it was my informal understanding with the Secretary, who was going to look into the proposal, since it was new to him, that the Department was going to look it over and perhaps testify before the committee of the House of Representatives. I suppose they are planning to do so. The House committee is starting hearings on the bill today.

Mr. LAUSCHE. Mr. President, I should like to hear what is in the letter. I have not seen the letter.

Mr. MAGNUSON. I shall put it in the RECORD in full. I was trying to finish my opening statement.

Mr. LAUSCHE. Will the Senator read the letter?

Mr. MAGNUSON. I have a very short statement.

The authority under this legislation will expire 5 years after the date of enactment of this bill.

Nine years have passed since the FCC originally set aside 242 TV channels—268 today—or approximately 12 percent of all TV channels in the United States for noncommercial educational use. In this period, only 54 educational stations have been constructed. These stations serve a wide area, but it is estimated that two-thirds of the population of the United States have no access to educational television. Yet, in the same period we have seen a rapid growth in the number of commercial television stations and in the number of homes that can be reached by it.

Of course, in 10 years the sale of television sets available to the people has increased. Not only would the educational programs be a great value to children, but also a great number of adults would benefit from them. We have no estimate of the number of such adults, and I suppose we never could get such an estimate.

It is apparent from the data supplied to the Senate Committee on Interstate and Foreign Commerce that the failure of the educators to utilize the unused educational reservations is not the result of a lack of interest, desire, planning, or zeal on their part. It is apparent that the largest problem facing the educators today in making use of television is the lack of funds to pay for the basic installation of the transmitting apparatus.

Experience demonstrates once a station has been built, State legislatures, local educational systems, and local communities raise the funds to produce the programing and operate the stations. It is indeed a credit to those people who have labored in this field to look back and view the remarkable progress that has been made in establishing the 54 stations that are now serving more than 50 million people.

This legislation would create, in a sense, a Federal-State cooperative matching fund program which would set a constructive tone in this most important field of education. At the time when the Nation's educational program is being severely taxed by a serious teacher shortage, rapidly rising enrollments, and inadequate facilities, it is imperative that every avenue and approach be tried in order to alleviate this problem.

The Federal Communications Commission, in furtherance of this educational program, should offer upon request assistance and advice to the State-approved agencies which receive these Federal funds. Such assistance and advice, it is felt, will enable the States to better utilize funds. However, it is to be understood the FCC is not to exercise any control of funds allotted under this program.

We all know that television is a powerful means of communications. This bill is intended to launch our country generally upon the path of bringing into our educational system the tremendous advantage and opportunity afforded by the television medium. Time is of the essence.

AMENDMENT

As a protection against waste or improper use of funds, the committee has adopted the amendment recommended by the General Accounting Office which requires recipients of the grants to keep records that would fully disclose the disposition of funds and authorize the Commissioner of Education and the Comptroller General or authorized representatives to have access to such records for the purpose of audit and examination. The amendment requires the grantees to establish proper accounting procedures and at the same time eliminates any doubt as to the authority of the GAO to audit the books.

No problem of whether the program would benefit private or public schools is involved. Anyone could take advantage of the program who wished to do so. Educational TV would go deeply into the education program of all types of schools, because children are children, and they need to be educated.

In urban centers, particularly in New York, Chicago, and other similar areas, adults would use the proposed facility for the study of languages and other subjects, and it is estimated that the number of such adult listeners would be greater than the number of listeners in schools, for obvious reasons. Some schools today have an enrollment of 6,000 or 7,000 adults. Adults have said, "We would like to receive this program and take the examination later."

Mr. COOPER. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. COOPER. I wish to join with the Senator from Washington in support of the bill. I am glad that I am a cosponsor. I think the Senator from Washington has brought out very clearly one of the strongest arguments in favor of the bill.

I have been very much interested in Federal aid to education. Sometimes in thinking of building needed schoolhouses and of the large sums of money needed if teachers' salaries are to be raised, we forget that the ultimate purpose of all the proposed expenditures is to raise the quality of education. Even if we pass a Federal aid to education bill, it may be years before the quality of teaching is raised.

As I see it, the great value of the bill which the Senator from Washington is so ably advocating today is that it would take an immediate and a giant step toward bringing quality of education into every classroom in the country which would take advantage of the proposed program.

In my own State there are 100 schoolhouses which have only 1 room, and 500 schoolhouses which have only 2 or 3 classrooms. Hundreds of teachers have not been adequately trained. Under the proposed program the best teachers in each State could teach the children in schools that do not now have the best teachers. Thus the quality of education in such schools would be immediately raised. Furthermore, the program would help us to raise the standards of teachers themselves. Beyond that, the program would reach many adults.

We owe a great debt to the Senator from Washington [Mr. MAGNUSON] and the Senator from Kansas [Mr. SCHOEPPEL] for advocating the bill. I am glad that I am a cosponsor, and I remind Senators that, even beyond the statements made, we must remember that the bill represents an actual advance toward a better quality of teaching and education.

Mr. MAGNUSON. What my friend from Kentucky [Mr. COOPER], who has always been a strong supporter in the passage of the last two bills, has said applies even in the big cities. In St. Paul educators have managed to get one of the channels into operation. They are trying to arrange a small network to the country schools. Here is the testimony of John Schwarzwalder, manager, station KTCA–TV, St. Paul, Minn.:

> I would like to illustrate what educational television can do by citing a program in my own station in which children at the fourth-grade level are taught Spanish by a highly capable instructor. Some 30,000 children in 1,000 different classrooms are being taught Spanish. They are being taught Spanish by a master teacher. And among other points that I wish to make on this is that the preceding year in those same fourth grade classrooms only 59 students had any instruction in any foreign language whatsoever.

Mr. COOPER. I do not know whether other cities in Kentucky would agree with my belief that Louisville probably has the best school system in Kentucky. It is our largest city, having a population of approximately 600,000. Even so, the Louisville school system has an educational television program. The school authorities recognize the value of such a program. If it is needed in a city like Louisville, in our best schools, certainly it would have great value in our less adequately financed schools.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. JAVITS. I, too, would like to congratulate the Senator from Washington and the Senator from Kansas for their espousal of the bill. I should like to make some legislative record on one or two subjects, if the Senator will bear with me. I do not think he will find any of these subjects trying for him.

First, though the distribution under the bill is not defined specifically as to what shall be its character or nature, is it not a fact that the Senator would intend that distribution under the bill should buttress areas which are not likely to be otherwise served by educational television?

Mr. MAGNUSON. The Senator is correct.

Mr. JAVITS. The program is a two-way street. In other words, there is proposed an effort to alleviate a classroom shortage through the modern means of extending the range of teaching and the locale of teaching; and there is also couped with that proposal the idea of extending to smaller, less accessible places, perhaps, a type of excellence of instruction which is now available only in the more congested areas. Is that statement correct?

Mr. MAGNUSON. The Senator is correct.

Mr. JAVITS. In other words, the Senator from Washington does not have in mind that every State would necessarily receive $1 million?

Mr. MAGNUSON. No. Each State would be required to submit a plan, and it would have to show that it would continue the program in operation. Each application would have to be passed upon.

There is another safeguard in the bill. We adopted an amendment by which the General Accounting Office would require the recipients of all grants to keep records, and the General Accounting Office would audit their books, so that there would not be any unnecessary waste.

I see the distinguished Senator from Rhode Island [Mr. PASTORE] in the Chamber. He may ask "Why should Rhode Island have $1 million, or no more than $1 million, and a large State such as New York have only the same amount?"

It is very difficult to establish a formula, because the development has been so piecemeal. But we have included also a provision for closed-circuit television. The Senator from Rhode Island knows that there are many schools in Rhode Island that would benefit greatly by a completely closed-circuit television operation in the area, and it could be provided very effectively. The State authorities would not necessarily be required to erect a tower to broadcast from the State of Rhode Island. Listeners could pick up broadcasts from Connecticut, Massachusetts, and New York.

The closed circuit is a very fundamental part of the bill, and it is being used in some school districts. Usually, once it is adopted, it is never discontinued.

Mr. JAVITS. I want to be sure that the Administrator will not help areas which are well able to help themselves, and should not seek an extension of television media where they can be better supplied through local and even nongovernmental sources.

Mr. MAGNUSON. That is correct.

Mr. JAVITS. I should like to give the Senator an example from my own State. A very distinguished group of New Yorkers is bidding now for station WNTA–TV in New York, entirely on the basis of public service, to make it an educational television station. In this connection I ask unanimous consent to have printed in the RECORD press reports dealing with this subject.

There being no objection, the press reports were ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 21, 1961]

FIVE MILLION AND FIVE HUNDRED THOUSAND DOLLAR OFFER IS MADE FOR WNTA—CITIZENS GROUP INCREASES PRICE FOR TV STATION WHILE SUSSKIND ENTERS BID

(By Val Adams)

A local group of citizens interested in providing New York with an educational television station has submitted a new and increased bid of $5.5 million to purchase station WNTA–TV (channel 13). The group's initial offer of $4 million had been declined last month by National Telefilm Associates, owner of the station.

In another bidding development yesterday, David Susskind, independent TV producer, said he and "certain associates" had submitted a bid higher than any made earlier. Mr. Susskind, who declined to identify his associates, said the cash bid was submitted in writing to NTA yesterday afternoon.

The new bid by the educational group was confirmed by Howard E. Stark, a broker dealing in the purchase and sale of television stations.

"The bid was for $5.5 million in cash," Mr. Stark declared.

The broker represents a group of prominent New Yorkers working in conjunction with the National Educational Television and Radio Center. The group is headed by Howard C. Sheperd, board chairman of the Greater New York Fund and retired chairman of the First National City Bank.

DUE BACK IN APRIL

Mr. Sheperd said last month he would devote as much time as he could to help establish an educational TV station here. Currently vacationing in Honolulu, he will return here early in April.

The National Educational Television and Radio Center is a nonprofit organization that provides programs to stations throughout the country.

Mr. Susskind said his bid was delivered to Justin M. Golenbock, general counsel for NTA, in his office at 60 East 42d Street. The producer declared that his associates and financial backers were not identified in the letter.

In addition to the two known bids for WNTA–TV, there have been reports of one other by an unidentified party. Yesterday Mr. Golenbock declined to discuss any bids.

Ely A. Landau resigned as chairman of NTA last month and said he planned to make an offer for the station. At the same time NTA announced its board of directors had decided to sell the station and would entertain bids. The company said it planned to concentrate its full efforts on developing and distributing film and tape programs to television stations.

[From the New York Herald Tribune, Mar. 21, 1961]

FIVE AND ONE-HALF MILLION DOLLARS FOR CHANNEL 13—BID RAISED BY $1.5 MILLION FOR EDUCATIONAL TV HERE

(By Terry Ferrer)

A group of prominent New York City citizens has offered $5,500,000 to purchase television station WNTA–TV, channel 13, for use as an educational television station for the metropolitan area, it was learned yesterday. The city does not now have such a station.

A previous bid of $4 million from the same group, headed by Howard E. Shepherd, former chairman of the First National City Bank of New York, was rejected last month by the station's owner, National Telefilm Associates, Inc., as insufficient.

The group it was learned, includes John D. Rockefeller 3d, chairman of Lincoln Center for the Performing Arts; Arthur A. Houghton, Jr., President of Steuben Glass; Devereux C. Josephs, former board chairman of the New York Life Insurance Co., and Dr. George D. Stoddard, chancellor and executive vice president of New York University. Mr. Josephs and Mr. Houghton are vice chairmen of the board of Lincoln Center, and Dr. Stoddard is on the board.

Another member is John F. White, president of the National Television and Radio Center, 10 Columbus Circle, a nonprofit corporation that serves as national spokesman and network programing agency for the 54 educational television stations in operation. Mr. White said yesterday that plans call for basing the New York educational television station adjacent to Lincoln Center. WNTA–TV is now in Newark, N.J.

Howard E. Stark, broker who specializes in the sale of television stations, confirmed last night that the $5,500,000 cash bid had been made. Others who are reported to be bidding for the station are David Susskind, producer, and Ely A. Landau, former chairman of National Telefilm Associates.

A spokesman for NTA refused last night to say what bids had been received or when the station's directors would consider whatever bids may have been made. Oliver A. Unger, president and chairman of NTA, was out of town yesterday and could not be reached.

Mr. Josephs, who is serving as spokesman for the citizens' group in the absence of Mr. Shepherd, said yesterday that, if the bid were accepted, funds would be raised from interested citizens foundations and corporations.

Mr. White said: "Don't worry about the money, we'll get the money. It's the station. We're completely prepared to fight for this channel. We've just got to have it."

National Television Associates announced in February that WNTA–TV was for sale and that bids would be considered. Whatever the purchase price, the station, which syndicates TV programs, would use the funds to retire indebtedness. Net station losses last year were about $7 million. The station has won critical acclaim for such programs as "Play of the Week" and Mr. Susskind's "Open End" discussions.

If the citizens' group is able to purchase the station, itw ould serve as a permanent home for educational television activities of the board of education and the State board of regents during daytime hours. In the evening, it was expected, the cultural activities of Lincoln Center would be telecast.

In the past, Lincoln Center has expressed an interest in a close relationship with educational television in order to present the center's activities to as wide an audience as possible.

Mr. JAVITS. It would be pointless to think of the pending bill as supplementing any such effort. It would not be pointless, however, with respect to depressed areas, which will be helped by the depressed-areas bill, where localities, even in my home State of New York, may not be able to help themselves, and the United States could help with very fine programs which will be going over station WNTA, if that station should become an educational television station or programs over WPIX, and could send those programs into some areas which could otherwise not be serviced. Is that what the Senator has in mind?

Mr. MAGNUSON. That is definitely my feeling. The purpose would be in some cases to expand the coverage in an area. I hope that a fine program from such a station in the Senator's State someday will be shown to the schoolchildren of the State of the Senator from Kansas for example.

Mr. JAVITS. It would not be the purpose under the bill to take up any local responsibility or any nongovernmental responsibility that could otherwise be carried on. Is that correct?

Mr. MAGNUSON. The Senator from New York is correct.

Mr. JAVITS. Is it fair to have the legislative record read that one of the tests to be applied by those who disburse the money on behalf of the Government will be that their action either stimulates or does what would not otherwise be done, but what in the national interest should be done or should be stimulated?

Mr. MAGNUSON. The Senator has made a very clear and concise statement. He has expressed exactly my feelings.

Mr. JAVITS. I am glad to hear the Senator say that. It only fills in those interstices in connection with which the Federal Government can help without replacing other services. I know that my colleague [Mr. KEATING] has much the same idea. He is offering his amendment, and, of course, will speak for himself.

Mr. MAGNUSON. I believe it adds to the bill and strengthens it.

Mr. JAVITS. We are often accused of being behind the times and lagging behind developments of a technical or policymaking character which are considered advanced and forward looking. Therefore, it is refreshing to me and indeed refreshing to the country, I am sure, to note that we are not stick-in-the-muds. I do not believe $50 million is a great deal of money when we consider the fact that we may survive or go down depending upon the quality of the education which we are able to give to our young people in the next few decades.

Mr. MAGNUSON. The Senator knows that this is an authorization bill. It provides for a ceiling on the authorization. The Appropriations Committees will have to look at the subject very carefully.

Mr. JAVITS. The Senator from Washington should be congratulated for his wise handling of the bill. He has been of great help in seeing to it that the bill has been handled wisely and economically, within the requirements of its purpose, by what he has agreed to with me as the proper standard of judgment for the Administrator.

Mr. MAGNUSON. The Senator from Kansas and the Senator from Rhode Island and I are members of the Committee on Appropriations. We have a little pride in this matter and will try to make certain that it is not used in the wrong way.

Mr. JAVITS. I am glad to express my support of the bill, and I appreciate the Senator's handling of it.

Mr. PASTORE. I do not wish to prolong the debate. It may be important to point out, lest someone raise the question later, that fundamentally, of course, the operational expenses must be borne by the community itself. That in and of itself, of course, is a large item in the operation of a station.

All that the bill does, actually, is encourage more or less a partnership relationship between the Federal Government and the local community. The real restraint to a callous use of money—if anyone should feel that there is a likelihood of it—lies in the fact that every community must assume a tremendous burden of its own to operate the station once it is established.

Right there I believe we find the real restraint that is necessary to make certain that none of the taxpayers' money will be injudiciously or unwisely used.

Mr. MAGNUSON. I thank the Senator for his contribution. I had not thought of that point. However, I am sure that every community will consider these facts, because it will obligate itself to perhaps 10 times the amount that is involved from the standpoint of the Federal Government, and they will certainly look carefully at the whole proposal before they tie themselves to a heavy burden.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. JAVITS. It seems to me that this again is a built-in stabilizer in the program, as well as the exercise of discretion under the definition which the Senator has already given.

Mr. MAGNUSON. The Senator from Illinois said $50 million is a lot of seed corn. I say that the crop will be $500 million in the first years. It will be helpful in the general program of aid to education. It will alleviate some of the very pressing problems which would have to be met whether we pass the bill or not.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. JAVITS. I had another point in mind, which the Senator is now helping me make, and we should place it in the RECORD at this time. It is the point that the Administrator of the program will coordinate it closely with the program of Federal aid to education, upon which it has a direct influence, and that we do not expect the various programs to be operating in separate compartments unrelated one to another.

Mr. MAGNUSON. I have before me a letter addressed to me by the Secretary of Health, Education, and Welfare. In effect the letter states that something must be done along that line. They suggest that all this might be worked into a broad Federal aid to education bill. They also suggest that it could be added to an extension of the National Defense Education Act. If necessary that may be acceptable to the Senator from Kansas and me. We are glad if it can be worked out in that way. However, we want to get it going now, not 5 years from now.

Mr. JAVITS. The Senator does not expect—I know he does not, and I say this only to have it clear on the record—to have these programs operated separately, but that they are to be coordinated as a unit program, with the Federal Government helping education. The Senator certainly does not expect

the Department of Health, Education, and Welfare to operate the three programs in different receptables, one unrelated to another.

Mr. MAGNUSON. No. I certainly hope that will not be done. I ask unanimous consent to have printed in the RECORD at this point the letter from the Secretary of Health, Education, and Welfare to which I have referred.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF
HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., March 17, 1961.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your request of January 12, 1961, for a report on S. 205, a bill "To expedite the utilization of television transmission facilities in our public schools and colleges, and in adult training programs."

This bill would authorize the appropriation of such amounts as may be necessary to enable the Commissioner of Education during a 5-year period to make grants to State education agencies, nonprofit organizations, State educational television commissions, and State-controlled colleges and universities, for acquisition and installation of transmission apparatus for educational television facilities. The aggregate of such grants could not exceed $1 million in any State.

S. 205 is identical to S. 12, 86th Congress, which passed the Senate on April 13, 1959.

The purpose of the instant bill—to expedite the development of the educational uses of television—is one which this Department endorses. There is no necessity in this report to again review the progress in the development of educational television broadcasting. We recognize that, heartening as this progress has been, much more needs to be accomplished in order to take advantage of the enormous potential of television for the improvement and extension of educational opportunities in all parts of the country. We also recognize that a major obstacle to the accomplishment of this objective is the high initial cost of equipment and the shortage of funds for meeting such costs. Nevertheless, the Department feels that there needs to be additional consideration of the entire problem in order to determine the most effective methods of providing Federal assistance for this purpose.

As you know, President Kennedy has recommended legislation to provide additional Federal assistance in meeting the urgent needs of public elementary and secondary schools and of higher education. We believe that the enactment of this legislation should have priority in terms of new Federal programs in the field of education. Meanwhile, our Department will give thorough consideration to additional proposals of obvious merit, such as that embodied in the instant bill. In our judgment, a number of important matters need additional consideration with respect to accomplishing the objectives sought in S. 205.

First, the National Association of Educational Broadcasters is undertaking to design an allocation plan for a nationwide system of educational television for submission to the Federal Communications Commission for the Commission's consideration. It is expected that this plan will be completed shortly and we would like to have the benefit of this effort and the findings of the Commission on it in order to coordinate the recommendations of this Department with that work. Second, we believe that further attention should be given to the role of the State in formulating a plan for statewide development of educational television, and to the role of possible regional arrangements between States. For reasons of efficiency, economy, and effectiveness, we believe that the planning and activating of educational television installations at least should follow a State pattern, and may need to be regional in character. Third, we feel that more attention needs to be given to securing effective commitments for operating funds once an installation is completed. And, finally, the Department would like to consider the Federal role in encouraging educational television in the broader context of measures designed to bring about more effective use of modern educational media and within the framework of more comprehensive Federal action to improve the quality of education.

This administration, under the leadership of President Kennedy, is deeply and forcefully committed to Federal action to help improve the quality of American education to the end of strengthening the whole fabric of our society. The Administration's proposed Educational Assistance Act of 1961 provides for stimulating and facilitating new programs to meet special education problems. Such programs might include the use of new media such as television. In addition, the President has stated in his message to the Congress of February 20, 1961, that he will ask the Congress to amend and extend provisions of the National Defense Education Act. A portion of that act is designed to foster research and experimentation and to disseminate information in the development and evaluation of television and other educational media. This Department, which has the principal responsibility for carrying out the vital administration commitments in the field of education, will carefully consider an appropriate course of action to provide adequately for the development and stimulation of various types of modern educational media including educational television. For the reasons set forth, however, we are unable to recommend favorable consideration of the instant bill.

Accordingly, we recommend against enactment of S. 205.

We are advised by the Bureau of the Budget that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

ABRAHAM RIBICOFF,
Secretary.

Mr. SCHOEPPEL. Mr. President, I appreciate the debate which has been had on the pending measure today. I am supporting it. It was a little over 2 years ago that I spoke on the floor in support of S. 12, in the 86th Congress, which was a bill almost identical to the educational TV bill now before us. I regret that S. 12 failed of passage in the House, as did S. 2119 in the 85th Congress.

I believe that 3 important years have been lost in putting into effect a program which is very vital to the American people and to my State of Kansas. The Senator from Washington, the chairman of the committee, has touched on this point.

The people of my State have been much interested in this subject. I said 2 years ago:

> The great tragedy in lost educational opportunity lies in the impossibility of retrievement.
>
> The hours and years doled out to each of us can be spent but once. If by inaction or inadequate plan, we give too thin a fare to those for whose learning we hold responsibility, we fail in a way that we cannot make up, for what is lost is learning time.

Of course, everything has not been lost by the delay, and I would not suggest that it has.

For example, my own State of Kansas has used the time profitably to work on a plan for a statewide educational television network.

You will find in the hearing on this bill a letter from Kansas State Senator Laurin W. Jones delineating the proposal for Kansas. In brief, these are its main points:

Six maximum power, high antenna transmitters would be erected, one each at Topeka, Hutchinson, Lincoln, Grainfield, Garden City, and Chanute.

With the exception of the one at Chanute, all would broadcast on VHF.

It is planned that major program production centers would be established at Wichita, Lawrence, and Manhattan. Minor program centers would be built at Emporia, Hays, Kansas City, Pittsburg, and Topeka.

The location of the transmitters would be such that 92 percent of the Kansas population could receive a good signal, and all of the transmitters would be linked together by microwave relay.

Any of the program centers could feed the entire network, or it could be broken into regional segments.

Much of the support for the Kansas plan has come from a Citizens Committee for Educational Television organized nearly 8 years ago.

The committee includes representatives of the various State and private colleges and universities, municipal universities, junior colleges, public school systems, and such existing organizations as the Kansas Congress of Parents and Teachers, the Kansas Medical Society, the American Association of University Women, the Kansas Council for Children and Youth, and major farm organizations. I mention this to show the interest which das developed in this important program.

In Kansas, as elsewhere, educational television is looked to as an attainable means of enriching and extending the school curriculum.

A great many of our smaller schools have found it impossible to develop a comprehensive curriculum.

Some of the subject areas found to be inadequately served throughout Kansas are these: Science, particularly chemistry and physics; elementary foreign langauges; elementary science; social studies; modern foreign languages in secondary schools; English and English literature; mathematics and biology.

The testimony before our committee, both in the hearings on S. 205 and its predecessor bills, makes abundantly clear that courses of this sort can be taught effectively through educational television. There is even a saving in money because of the joint use of materials and facilities.

I had the opportunity in my own State to observe what the Department of Defense did in cooperation with universities and other educational institutions in training men in the Military Establishment on technical subjects. The reception was marvelous, and the end results were excellent.

It is also felt that educational television would be most useful, not only in Kansas, but also in other States, particularly in the rural areas, in improving teaching training.

Additional benefits would flow through the availability of teaching to children who, for reasons of health, cannot leave their homes, and through courses for out-of-school youth and for adults.

The Kansas plan which I have here outlined is now pending in the Kansas Legislature.

It is being considered carefully because the program, once embarked upon, would take an annual capital appropriation of a million dollars for several years. I feel certain the people of my State would take the necessary financial interest in the program.

As against a Kansas outlay of about $7 million to get the network into operation, the Federal Government, under the terms of the bill before us, with certain specific requirements and in accordance with safeguards established by the Bureau of the Budget, would contribute $1 million, but it would come at a most helpful time and do much to get the Kansas network underway.

We who have been working on the bill in committee have had our minds particularly attuned to problems in educational TV.

For that reason, I noted with special attention the articles in the Washington newspapers which reported that the Superintendent of Schools in the District of Columbia is not at present willing to introduce educational TV into the District schools. I am sure many Senators read the same articles.

I urge them not to conclude that the Superintendent of the District Schools disapproves of educational TV as a teaching medium. As I understand, his position is simply that there are other things more important to do in the Washington schools at this time.

An example of what he has in mind is the experimental curriculum at Amidon school, which many of us have been happy to note returns in a large part to the fundamentals of the three R's which served so well in our own time.

Again, it must be recognized that the District of Columbia school system is a large one and rich in teaching resources that are not available in many of the schools in our home States.

It seems abundantly clear that postponement of introduction of educational TV into the District schools should not be taken as an argument against educational TV itself, especially when the program advanced by the Greater Washington Educational TV Association is being so eagerly embraced by school systems outside of the District proper.

A belated report on the bill submitted by the Secretary of Health, Education, and Welfare recommends against enactment of the proposed legislation.

I may say, in furtherance of the statement made by the chairman of the committee, the distinguished Senator from Washington [Mr. MAGNUSON], that the chairman of the committee gave the Secretary of Health, Education, and Welfare an ample, fair, and timely opportunity to report his views on the bill. A reading of the record of the hearings will disclose that at the late date it was made public, the Secretary did not represent that his statement related to a 100 percent investigation. The Department simply wishes to proceed in some other way. In fairness, I think an evaluation ought to be placed upon the Secretary's letter in that light, because I would hesitate to believe that a man of the character and ability which I know the Secretary to have would say "No" to this kind of program. That is not the case. To think otherwise would be unfair to the Secretary of that great Department.

The Department of Health, Education, and Welfare similarly recommended against S. 2119 of the 85th Congress and S. 12 of the 86th Congress, so I say frankly and kindly there is no surprise in finding that the political changes which took place at the top have not disturbed subterranean convictions within the Department.

I must note, however, that in addition to the old reasons for opposing educational TV, some new ones are advanced.

The old reasons basically were that more experience and more studies are needed before anyone can say that S. 205 is the best way in which the Federal Government can help expand educational TV.

It seems to me, however, that the language of Secretary Ribicoff's report on the bill conceals possibly a fear that if the Congress acts on an educational TV bill it would feel that it has done enough for education and so bypass the President's aid to education bill. I do not believe that would be the case. In my humble judgment, it is merely something which we should get underway, and it would be complementary in a practical way to what is now being done.

I for one—and I think other Senators will say the same—am ready to consider each of these bills on its own merits.

I can well understand why there might be apprehension about the impact on the budget of the total of $51 million that would be authorized by the bill.

However, not all of the authorized sum would be spent at one time, as has been brought out in the discussion and arguments presented by the distinguished Senator from New York [Mr. JAVITS] in his colloquy with the chairman of the committee.

There are many obstacles in the way that would make the actual spending a fairly long drawn-out process, even though applications for grants must be filed within 5 years after the effective date of the legislation.

The various types of applicants, as has been brought out earlier, and as I wish to state again, must first perfect their local plans and decisions and also satisfy the requirements to be enforced by the Commissioner of Education.

Then there will be additional delays in many instances in obtaining construction permits from the Federal Communications Commission for a reserved educational TV channel.

I hesitate to say when the greatest impact of the bill would be felt, but it will always be within the control of the appropriation process, as was indicated by the chairman of the committee this afternoon.

We have passed a similar bill twice before. The reasons for doing so are still valid.

We should pass it again and then do all possible to enlist the support of our colleagues across the Capitol.

I am glad to be one of the cosponsors of this measure and to support it.

Mr. COTTON. Mr. President, I do not desire to delay the action of the Senate on the bill, but I have been seeking recognition as one of the members of the committee and one of the sponsors of the bill.

I wish to make some brief remarks, and then I shall request the printing in the RECORD of a statement I have prepared on the bill.

Mr. President, I was a sponsor and a supporter of similar bills which were considered in previous Congresses. At that time I had a direct interest in those bills, because my own State was earnestly seeking means to avail itself of the channel reserved for educational television.

I am proud to say that during the period of delay which has occurred since the consideration of those bills, New Hampshire has, with its own resources and the resources of its citizens, established the facilities, and is now utilizing this channel.

The passage of this bill at this time can only indirectly and in small measure benefit my State. But my interest in the bill, as one which is of vital necessity to the future of education in our country, is still very real. Despite the fact that the motive of self-gain for my own State has been somewhat lessened, nonetheless I hope very earnestly that the bill will be passed, for reasons which have been thoroughly covered by previous speakers and for reasons which I touch on briefly in the statement I have prepared. I ask unanimous consent to have it printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR COTTON

EDUCATIONAL TELEVISION

There is no question that educational television can do for our schools what the power loom did for the weaver. It offers new opportunities for better teaching at a saving in both teachers and buildings. But much of this potential is going to waste today despite our urgent needs in education.

Twelve percent of the Nation's television channels have been reserved for noncommercial, educational use for the past 7 years. Only 54 of these 268 channels are now on the air, serving millions of people with a variety of education, information, and entertainment.

The bad side of the coin is that nearly 200 of these reserved channels are going begging. They have no takers. Two-thirds of the people of the Nation have no chance to see an educational TV station.

Not only is their potential being wasted, it is in danger of being lost because of the steady and increasing pressure to free these channels for regular commercial use. This is especially true of those in the VHF band

covering the keenly sought channels from 2 through 13. The Federal Communications Commission has steadfastly refused to throw open these channels for commercial TV, but they can't hold off indefinitely, allowing scarce channels to remain dark and vacant.

This bill offers a means of lighting up these channels and putting them to the best possible use. By making up to $1 million available to each State for the equipment and facilities needed for their ETV stations, it will be a galvanizing shock that can make the promise of ETV a down-to-earth reality.

It is one low-cost, high-yield, single-shot Federal spending program I can go for with enthusiasm.

Frankly, I haven't always felt this way about ETV. While I believed the channels should be used for the enlightenment of our people, young and old, and to relieve the monotony of the endless westerns on commercial TV, I had the mistaken idea that ETV was the frosting of education. I had the impression it provided the appetizer but not the main course—teaching current events, improving cultural backgrounds, and whetting the appetite of students and adults for the arts and sciences.

Hearings before our committee have left no doubts. The record is filled with specific examples of the benefits of educational TV. In Memphis 700 adults have learned to read and write; in Schenectady 4,000 are learning a foreign language at 6:30 in the morning; in Chicago 29,000 have enrolled and paid fees for a junior college course; in rural sections of Oklahoma science and mathematics are being brought to children in small schools who have never been taught them before; 1,200 classes in the Washington area have received a daily science lesson. The list is a long one.

The time has come to put ETV on a firm basis, and enactment of the pending bill will be a powerful and overdue move in that direction.

In my own State, the New Hampshire Educational Broadcasting Council, composed of representatives of 19 schools and colleges, the State Department of Education of the Catholic Diocese, and the Association of School Superintendents, has put an ETV station on the air.

New Hampshire's share of the funds provided by S. 205 will be available for such things as improving the facilities of WENH, increasing its power and range, and installing other devices to bring its benefits to a wider number of viewers, as well as for lighting the darkness of other channels in New Hampshire, and nearby States.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The committee amendment will now be stated.

The LEGISLATIVE CLERK. On page 4, after line 5, it is proposed to insert a new section, as follows:

SEC. 8. (a) Each recipient of assistance under section 3 of this Act shall keep such records as the Commissioner shall prescribe including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Commissioner and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 3 of this Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby authorized to be appropriated such amounts as may be necessary to assist the States and certain organizations therein to establish or improve television broadcasting for educational purposes, in accordance with the provisions of this Act, by providing for the establishment and improvement of television broadcasting facilities.

SEC. 2. Any agency or officer, or organization in a State, described in clause (b)(2) of this section, which is establishing or improving television broadcasting facilities, may receive a grant as authorized in this Act to cover the cost of such establishment or improvement by—

(a) making application therefor in such form as is prescribed by the United States Commissioner of Education; and

(b) providing assurance satisfactory to the Commissioner of Education—

(1) that the necessary funds to operate and maintain such facilities will be available;

(2) that the operation of such facilities will be under the control of (a) the agency or officer primarily responsible for the State supervision of public elementary and secondary schools, (b) a nonprofit foundation, corporation, or association organized primarily to engage in or encourage educational television broadcasting, (c) a duly constituted State educational television commission, or (d) a State controlled college or university; and

(3) that such facilities will be used only for educational purposes.

SEC. 3. Upon determining that an agency or officer of an organization has satisfied the requirements of section 2 of this Act, the Commissioner of Education is authorized to make a grant to such agency, officer, or organization in such amount as is determined by the Commissioner to be reasonable and necessary to cover the cost of such establishment or improvement of facilities. An agency or officer or an organization may receive one or more grants under the provisions of this Act, but the total amount of such grants for television broadcasting facilities in any State shall not exceed $1,000,000. Such grants shall be made out of funds appropriated for the purposes of this Act, and may be made in such installments as the Commissioner deems appropriate.

SEC. 4. As used in this Act the term "establishing or improving television broadcasting facilities" means the acquisition and installation of transmission apparatus necessary for television (including closed-circuit television) broadcasting, and does not include the construction or repair of structures to house such apparatus, and the term "State" means the several States and the District of Columbia.

SEC. 5. The Federal Communications Commission is authorized to provide such assistance in carrying out the provisions of this Act as may be requested by the Commissioner of Education.

SEC. 6. Nothing in this Act shall be deemed (a) to give the Commissioner of Education any control over television broadcasting, or (b) to amend any provision of, or requirement under, the Federal Communications Act.

SEC. 7. No application for any grant under this Act may be accepted by the Commissioner of Education after the day which is 5 years after the date of enactment of this Act.

SEC. 8. (a) Each recipient of assistance under section 3 of this Act shall keep such records as the Commissioner shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Commissioner and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 3 of this Act.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. KEATING. Mr. President, I call up an amendment which I have at the desk, and ask that it be stated.

The LEGISLATIVE CLERK. On page 2, line 16, beginning with "(b)" it is proposed to strike out all through "(c)" in line 19 and insert in lieu thereof "(b)."

On page 2, line 21, strike out "(d)" and insert in lieu thereof "(c)."

On page 2, line 21, before the semicolon insert the following:

except that any such agency, officer, commission, college or university may for the purposes of this Act distribute funds received under this Act to nonprofit foundations, corporations, or associations in the same State which are organized primarily to engage in or encourage educational television broadcasting if the operation of the facilities which such funds are used to establish or improve will be under the control of such nonprofit organization.

Mr. KEATING. Mr. President, in the letter from the Secretary of Health, Education, and Welfare, the second objection he makes to this measure reads as follows:

We believe that further attention should be given to the role of the State in formulating a plan for statewide development of educational television, and to the role of possible regional arrangements between States. For reasons of efficiency, economy, and effectiveness, we believe that the planning and activating of educational television installations should follow a State pattern, and may need to be regional in character.

Mr. President, the purpose of this amendment is to answer at least that objection, as raised by the Secretary of Health, Education, and Welfare, and to make the bill follow a State pattern.

As we know, the bill will permit each State to receive grants of up to $1 million for the development of educational television. That is a worthy objective. The bill will help improve and expand educational television facilities throughout the country. However, it seems to me that the bill as now worded would set up a procedure which has worried many here and which may possibly be in violation of the entire educational principle which we have come to know and to appreciate in this country.

STATE CONTROL SHOULD BE MAINTAINED

Mr. President, the bill S. 205, to permit each State grants up to $1 million apiece for the development of educational TV has a worthy objective. It

will help to improve and expand educational television facilities throughout the country. But it has come to my attention that in providing for this assistance the bill S. 205 sets up a procedure that seems to me to violate the whole principle of education in the United States.

What I mean is this: The U.S. Commission of Education has the full power and discretion to award funds either to State agencies applying or to nonprofit private groups primarily engaged in educational TV broadcasting.

This means the State agencies which have been set up and have operated for years in the area of education are competing on more or less equal terms with private groups for the right to get Federal funds for educational programs which will be broadcast in homes and schools throughout the State.

Do not mistake me. I know that private organizations can, and do, do a fine job along these lines. In the Buffalo-Niagara area of New York, for instance, educational television has been on the air for a little over a year. Although handicapped by financial needs, the Western New York Educational TV Association is steadily improving its performance. It was chartered by the board of regents of the University of the State of New York, and thus properly comes under the jurisdiction of the New York State Department of Education. Under the amendment I have proposed, there would be no danger of these organizations competing with State agencies. They would have to cooperate with and work through the State organizations, as is indeed the case with most private educational television associations today. Furthermore, the several States could still cooperate among themselves, where such cooperation is useful, by seeking the grants through State agencies.

What I do very strongly object to under the present legislation is the fact that the U.S. Commissioner of Education has the power to decide whether the duly constituted State agency shall handle this programing or whether a private group shall do so.

This amounts to Federal control, with the potentiality of completely bypassing legally constituted State and local bodies. The power to dispense funds should not be in the hands of an appointed commissioner of the Federal Government, most particularly when it concerns the programing of television projects.

The administration has already called for a massive aid to education program. Section 103 of this proposed legislation provides that "In the administration of this title no department, agency, officer, or employee of the United States shall exercise any direction, supervision, or control over the policy determination, personnel, curriculum, program of instruction, or the administration or operation of any school or school system."

Yet at the very same time, this bill would in effect hand all control of educational TV, which may ultimately become one of the principal media of education, over to the U.S. Commissioner of Education. I am sure that this is not the intent of the Committee on Interstate and Foreign Commerce. Even though section 6 provides that the Commissioner of Education shall not have any control over television broadcasting, in fact, he could not avoid exercising control if he has to choose between competing applicants.

Mr. President, I should like therefore to propose an amendment to this bill to the effect that only State agencies or officials may apply to the Commissioner of Education for funds, but that these State officials may, if they choose, delegate the operation of the facilities to the same kinds of nonprofit foundations, corporations, or associations organized primarily to engage in or encourage educational TV broadcasting as are mentioned in the present bill. My purpose, let me make it very clear, is not to discriminate against such organizations, but rather to insure that the power of selection stay, where it belongs, on the local level.

It is most important, in considering the field of education, to make sure that the Federal Government does not, one way or another, through the back door, if not through the front door, get control of educational policies and practices throughout the Nation. Although I realize that this is not the intent of the bill, I think that my amendment is necessary to prevent an ultimate Federal takeover in this area. I believe that my amendment might also improve the chances for House passage of the measure, which has been approved twice by the Senate but never been taken up on the floor of the other body.

Mr. PASTORE. Mr. President, will the Senator from New York yield?

Mr. KEATING. I am happy to yield to my friend, the Senator from Rhode Island.

Mr. PASTORE. In the absence of the Senator from Washington [Mr. MAGNUSON], the chairman of the committee, who is in charge of the bill here on the floor, and acting in his behalf, I am willing to assure the Senator from New York that the committee is willing to accept his amendment and to take it to conference.

Mr. KEATING. I appreciate that very much. I hope the other body will see the merit of the amendment.

Perhaps I should take my seat at this time, because one well trained in the law, as is the Senator from Rhode Island, does not proceed after he has won his case.

However, the minority leader has been required to leave the floor, and he had asked that there be a quorum call at this time, unless other Senators wish to speak.

Mr. PASTORE. Other Senators will speak on the bill, and a group of Senators who are interested in textiles are ready to proceed immediately thereafter.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. LAUSCHE. Mr. President, I cannot support Senate bill 205. The first reason for my opposing the bill is that it is rooted in the old proposition that, unless the U.S. Government provides the money, neither the local governments nor the States are in a financial position to establish and construct the television equipment needed to broadcast educational programs.

The objectives of the bill are good; to the extent television can be utilized for educational purposes, the Nation will be served. Educational television has been developed, I believe, through 55 facilities that have been adopted out of 268 available. In Ohio we have four of them. The city of Cleveland was in the process of constructing one, but deviated from the path on the ground that it needed the money for other purposes in the schools; $500,000 was made available. The Ford Foundation agreed to put up that amount of money, but then the $500,000 was utilized for an increase of teachers' salaries.

Primarily, the presentation of the bill before the Senate to the Congress is rooted in the claim that the local and State governments are too poor to finance this service. I do not believe, during my presence in the Senate, there has been a single time when I have ever heard from the proponents of Federal spending that a local government or a State government was in the financial position to perform the services contemplated by the particular bill then pending before the Senate.

The argument is also made that, unless the Federal Treasury does it, the local and State governments will not be able to render the service.

With regard to the bill and its laudable objective of providing educational television, I submit to my colleagues they cannot disregard the fact that the Secretary of Health, Education, and Welfare in the Eisenhower administration and the Secretary of Health, Education, and Welfare in the Kennedy administration both have written opposing the bill. That is the status under which the proposal comes to us.

I am a member of the committee that heard the testimony on the bill, and I heard at least a part of it. There were supporters of the program. A lady from Cleveland and interested manufacturers of television equipment testified in favor of it; but the fact remains that the persons most highly responsible for the development of education in our country both say that the bill should not be passed.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question?

Mr. LAUSCHE. I yield.

Mr. SALTONSTALL. The Senator has made a very emphatic statement that the two Secretaries are opposed to passage of the bill. Do the Secretaries make any reference to the amendment which has been agreed to, offered by the Senator from New York? In other words, the amendment would change the complexion of the bill quite materially.

Mr. LAUSCHE. I do not know that they did. In his letter, the present Secretary of the Department of Health, Education, and Welfare, Mr. Ribicoff stated that the President recommended a very large school-aid program and

that it would not be prudent to supplement the proposal at this time with educational television, because the entire program should be worked out.

I do not know whether the former Secretary of the Department of Health, Education, and Welfare, Mr. Fleming, dealt with the proposal offered by the Senator from New York.

Mr. SALTONSTALL. Mr. President, will the Senator yield for another question?

Mr. LAUSCHE. I yield.

Mr. SALTONSTALL. How does the Senator feel with respect to an act in which control is to be left completely in the State?

Mr. LAUSCHE. When I read the bill I had some misgivings about allowing a private nonprofit organization to be the direct recipient of Federal aid. My recollection is that the bill provides governmental units may receive the money, and private nonprofit corporations formed for the purpose of giving television education may receive the money. I had some misgivings about the funds being channelized to the private nonprofit organizations. Am I correct in saying that is what the amendment would cure?

Mr. SALTONSTALL. They are to be channeled through the State educational agencies.

Mr. LAUSCHE. Yes. I think that is the proper way to do it.

If this is a bill contemplated to help meet needs, let us consider the situation, to see if the purpose will be achieved.

The bill provides that there shall be given to each State a million dollars, and to the District of Columbia a million dollars. In effect that will mean the Congress declares conditions to be equal in the States, and that $1 million for each State will solve the problem.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. LAUSCHE. I will yield in a moment.

The District of Columbia has a square mileage of 61, I think, and the population is approximately 1 million people. The District of Columbia will receive a million dollars.

Mississippi has a square mileage of 41,000. I think the per capita income is $1,100 in Mississippi, yet that State will receive $1 million.

Delaware, New Jersey, and Rhode Island have populations of approximately a million and square mileages of perhaps 1,000 to 2,000, yet those States will receive $1 million.

I believe North Dakota has 50,000 square miles of territory, and the per capita income of the State is $1,500. That State will likewise get a million dollars.

I cannot bring my reasoning to the conclusion that the District of Columbia is worthy of a million dollars, with 61 square miles, whereas Mississippi, let us say, with 41,000 square miles and a per capita income of $1,100, should also receive only $1 million.

I now yield to the Senator from Maine.

Mr. MUSKIE. I have listened to the Senator's argument with interest. I should like to ask a question for the purpose of clarification.

Under section 3 of the bill, on page 3, the language reads:

> The total amount of such grants for television broadcasting facilities in any State shall not exceed $1,000,000.

Mr. LAUSCHE. That is correct. The total shall not exceed $1 million.

That does not vary the soundness of my argument, when I say that the formula for distribution cannot be labeled as "reasonable" or "equitable."

In my opinion, there are three factors one would have to consider in fixing a formula for distribution. First is the population. Second is the square mileage of the area to receive the benefit. Third is the per capita income of the area.

If the bill is intended to help meet the needs of State and local governments, then I humbly submit the per capita income of the State becomes a most important factor.

Mr. MUSKIE. Mr. President, will the Senator yield further?

Mr. LAUSCHE. I yield.

Mr. MUSKIE. I am interested in the Senator's line of reasoning. I am not a sponsor of the bill and not a member of the committee. It strikes me, however, that the amount involved is geared not to the needs of the larger States but rather to the needs of the smaller and less wealthy States. It strikes me the basic assumption of the bill must be that the need exists primarily in the States in which the expenditure of up to $1 million would be important but that the need does not exist so much in the larger States, in which a much greater sum would be required.

In other words, the bill would, in effect, impose a greater portion of the responsibility upon other sources in the larger and more wealthy States, but the provision for up to $1 million could be of very real assistance to the smaller and more needy States. This strikes me as possibly a basic assumption in the bill.

Mr. LAUSCHE. I agree that the smaller and needy States would be served if there were a small and needy State. I point out, in regard to the small States, that Connecticut has an area of 4,899 square miles. The per capita income of Connecticut is $2,817. Delaware has a square mileage of 1,978. The per capita income of Delaware is $2,946. These small States would get the $1 million, though they are not in what one would call the low per capita income bracket.

Let us go a step further. The District of Columbia has 61 square miles and a per capita income of $2,943. On what grounds could we give the District of Columbia a million dollars, and yet give to Arkansas, which has 52,000 square miles and a per capita income of $1,322, the same amount? We simply cannot justify it.

Mr. MUSKIE. I again suggest to the Senator that the $1 million figure——

Mr. LAUSCHE. Will the Senator please ask me a question.

Mr. MUSKIE. Yes. Is it not true that the $1 million figure is not to be a flat amount, that the grant to any particular State may be something less?

Mr. LAUSCHE. That is true. If the testimony is read, however, Senators will find that the $1 million will be absorbed in each State, including Rhode Island.

I point out that Rhode Island has a square mileage of 1,058, according to the report from which I read. The per capita income of Rhode Island is $2,156.

Ohio, on the other hand, has a square mileage of 41,000 and a per capita income of $2,328.

I respectfully submit that though one may argue about the justification of the Federal Government getting into the program, one cannot argue that the formula of distribution chosen by the bill is sound.

I repeat, there are three factors which should be considered. First is the square mileage within the area. Second is the per capita income in the area. Third is the population.

Of the three, the square mileage and per capita income would be more important.

Texas, with 250,000 square miles, is put in the same category as the District of Columbia, with 61 square miles.

I should like to ask the committee chairman whether an effort has been made through an intensive study to work out a program that might give consideration to the square mileage, the per capita income, and the population of a State. Has any effort been made to devise a formula that would be related to those factors?

Mr. MAGNUSON. Yes; we discussed the possibility of a formula. As I said, there were three sessions of hearings on this subject. A formula based upon need would be almost impossible to administer in this area, because the proposal is not a permanent grant-in-aid. It is not a continuing grant, like the aid-to-education bill, for which appropriations would be made every year.

The bill is designed merely to get the program started and off the ground. We found that if we tried to supply actual need, the bill would have to provide 10 times as much in funds. Even then we would never have covered the subject.

In this particular case the square mileage would not mean a great deal because in a small State like Rhode Island much of the funds might be used for closed-circuit TV. For closed-circuit TV a tower would not necessarily have to be erected. The program in Rhode Island might be obtained from Connecticut or Massachusetts or a group of schools wired up for closed-circuit TV. This feature would be a part of the entire program.

In a State such as Montana, having large square mileage, the educational authorities might desire to use the funds for over-the-air TV. They would not have the problem of erecting towers. In some States, there would be problems because of terrain. A square mileage criterion would not work in such State. It would be a little different story.

We provided that a plan should be submitted in most cases. I do not mean that the State of Rhode Island has no plan. Rhode Island may have a plan

under which it would request only $200,000. We had to leave that provision flexible because this is a new field, with criteria undetermined.

Mr. LAUSCHE. Everything being equal from the standpoint of terrain and otherwise, and there being a difference only in square mileage, the fact is that the larger the square mileage the greater the problem of the State. Is that not correct?

Mr. MAGNUSON. Perhaps not with closed-circuit TV. However, there may be greater problems with towers.

Mr. LAUSCHE. Then does the Senator from Washington take the position that a difference in square mileage would not vary the need of a State?

Mr. MAGNUSON. Not necessarily, in this particular case.

Mr. LAUSCHE. If we accept as a fact that the District of Columbia, which contains 91 square miles of terrain, would be on an equality with Texas, which embraces 250,000 square miles, would the amount of money needed to supply services in those two areas be the same?

Mr. MAGNUSON. Such a result is possible, because the outlets in Texas might not be any more numerous than those in the District of Columbia. The question involved is the number of outlets in classrooms and type of system used.

Mr. LAUSCHE. Is the Senator serious in that statement?

Mr. MAGNUSON. Yes.

Mr. LAUSCHE. The Senator from Washington believes that a State containing 91 square miles would require——

Mr. MAGNUSON. A system might be provided in Texas which would cover 100, 150, or 200 square miles and have perhaps 20 outlets to 20 consolidated schools, and yet the cost would be approximately the same as a system in the District of Columbia that might cover a radius of half a mile with 100 outlets into 100 classrooms through closed circuit.

Mr. LAUSCHE. Perhaps the Senator will recall that a witness from Montana, whose testimony has been discussed today, testified that in the large State of Montana, with uneven terrain and the necessity of installing boosters or stations in the mountains, the cost would be greater. Does the Senator recall such testimony?

Mr. MAGNUSON. Yes. I listened to every page of the testimony. I was present every day. I listened to every witness. What the witness said was that the need for educational TV in a barren State with great square mileage was greater because in that State there were many one-room schoolhouses, and the problem of boosting signals over the terrain, much of which is mountainous, and carrying them on to the next station would be great.

For example, three booster translators to carry educational TV 500 miles in Montana need not cost any more than the cost to the State of Rhode Island, which might wish to install closed circuit TV with outlets to 300 classrooms.

What I am endeavoring to say is that every case is different. The question is relative. It is true that States with the largest areas probably need this facility more than do States of dense population that now have installations of this type. Some of the 54 stations are in the populated centers.

Mr. LAUSCHE. I understand that the State of Rhode Island has a population of approximately 800,000.

Mr. MAGNUSON. Montana has a population of about 500,000.

Mr. LAUSCHE. Rhode Island is a very thickly populated State.

Mr. PASTORE. It is the most thickly populated State in the Nation per square mile.

Are there any further questions?

Mr. LAUSCHE. In a State having a compact population distribution, does square mileage mean anything?

Mr. MAGNUSON. Mileage, of course, is a factor. But whether educational TV would reach certain areas would depend on the way the equipment is proposed to be used, whether transmission will be through tower or closed circuit, whether programs would be picked up on a closed circuit and transmitted into a classroom, and whether in the wide-open spaces of the West a station would be placed at each end of Montana, with boosters to cover the entire State.

Sometimes square mileage does not mean anything, or no more than would be required to pick up a broadcast on a closed circuit and transmit it to every classroom in the State of Rhode Island.

Mr. LAUSCHE. Let us try to compare identicals with identicals.

Mr. MAGNUSON. A comparison of identicals with identicals is no comparison.

Mr. LAUSCHE. By so doing I believe we will understand each other. If terrain and population density are equal, would square mileage mean anything?

Mr. MAGNUSON. It would mean something. It would depend on the method proposed to use the educational TV.

Mr. LAUSCHE. I am assuming that the use is identical.

Mr. MAGNUSON. Then the square mileage would mean something.

Mr. LAUSCHE. I am glad the Senator from Washington recognizes that square mileage would mean something.

Mr. President, I am opposed to the bill for the further reason that it is obvious to me that the program is a mere beginning. It will cost $51 million in the first 3 or 5 years. However, such expenditure is a mere beginning—$51 million will not begin to do the job. I recognize that local and State governments will be required to operate the stations. From that standpoint the Federal Government will be relieved of the responsibility. But $51 million will not do the job and we might as well face that fact at this time. If $1 million would be required to do the job in the District of Columbia, I submit that $51 million would not do the job in the entire country.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. LAUSCHE. I yield.

Mr. BUSH. In looking at the statement of the Secretary of Health, Education, and Welfare, Secretary Ribicoff, he states three points of objection to the bill.

The Senator has been discussing two of them. The third one reads:

> We feel that more attention needs to be given to securing effective commitments for operating funds once an installation is completed.

In other words, the Secretary does not feel—and I assume he is speaking for the President of the United States as well as for himself and the Department of Health, Education, and Welfare—that the bill is not definite enough concerning the fulfillment of the obligation on the part of the States. Would the Senator comment on that point?

Mr. LAUSCHE. Yes, very gladly. I discussed the subject yesterday with the staff adviser, and he said an understanding will be made with the States that they will operate these stations. That, of course, is a declaration that they will do so. There is nothing to prevent the States from later coming to Congress and saying, "We need help in the operation."

I do not recall that Mr. Ribicoff's letter contained the statement that the matter ought to be worked out from the standpoint of assuring that the States and local governments will subsequently be performing their duty of operating the stations.

The general objectives of the bill are good. The purpose of utilizing television for giving education must be admired. I have no question that service will be rendered to the youth and probably to the adults of the country if the plan is carried into effect.

However, I submit that it can be carried into effect through the 50 States and the District of Columbia and the various municipalities of the country. They have lagged behind. My judgment is that in part they have lagged behind because they have been led to believe that if they wait the Federal Government will take the ladle and dip it into the Treasury and benignly pour back money into the local communities.

That is the attitude which has been adopted in many places. This is not an argument on whether television education is good or bad. The argument is whether the Federal Government should enter the field.

Within my State, the city of Cleveland did not install a station. Cincinnati, Toledo, and two other cities did. Without boasting, I submit that the city of Cleveland is in better position financially to install a station than is the Federal Government.

That, in a substantial degree, is true practically everywhere in the country. It may not be true in some States like Mississippi and in the $1,300 or $1,400 per year income States. However, if they are to be helped, they ought to be helped directly, not by helping also those who can help themselves, and do it without any pain or discomfort at all.

On these grounds I respectfully submit that the bill ought to be defeated. I commend the Senator from Rhode Island [Mr. PASTORE] and the Senator from Washington [Mr. MAGNUSON] for their efforts in the matter. I know their

sincerity. I cannot agree with them, however.

Mr. YARBOROUGH. Mr. President, I speak in support of Senate bill 205, the so-called educational television bill. It is my firm belief that this bill has exceptional merit at this time for two reasons:

First, rapid advances in other nations in various fields of education make it mandatory that we improve our educational programs in every possible way.

Second, if we do not break the bottleneck choking off educational television station construction, mounting pressure to turn these channels to commercial use may be successful.

These two points, I believe, far more than justify the maximum apportionment of $1 million for each State contemplated under this proposal.

We must meet the growing need for 135,000 additional teachers and 140,000 more classrooms in the United States. Educational television can be a valuable supplement to present instructional procedures and of great benefit to adult education in the home. It offers the wonderfully clear feature of visual aid with direct discussion that may reach thousands of students at the same second. This is one place where, because of our technological advances, we are far ahead of any other nation, and we should seize this important advantage immediately.

The educational institutions of Texas are indeed fortunate that the Federal Communications Commission reserved 18 educational television channels in our State. That is more than the number reserved in any other State. With our large area and population of 9½ million, we need them.

As Senators know, one of these channels was put in use by the University of Houston on May 25, 1953. It was the Nation's first noncommercial television station. Its operation has been a marked success. It is making a real contribution to educational progress in the gulf coast area. Lubbock, Dallas, and San Antonio have also been granted educational applications.

Channel 13 is operated by the Area Educational Television Foundation in Dallas.

This leaves 14 educational television channel open for new education outlets. These are designated at Amarillo, Austin, Beaumont-Port Arthur, College Station, Corpus Christi, Denton, El Paso, Fort Worth, Galveston, Laredo, San Angelo, Texarkana, Wichita Falls, and Waco. All are needed.

TV will do for education what the automobile did for transportation. It broadens horizons, and calls millions of persons to intellectual travel who would otherwise have remained in one intellectual blind spot all their lives. In addition to being an invaluable adjunct to our present graded system of education, it will stimulate millions of adults to study, and will result in the greatest adult back-to-school movement in American history.

A number of Texas education leaders are very desirous of putting these channels to use, but thus far lobbyists representing commercial interests have managed to stop appropriations of State funds for this purpose. As more commercial television stations are put in operation, the pressure will mount upon the FCC and college officials to release these channels to private use. This is a race for time between the need for education and the desire for dollars.

Senate bill 205 would serve as a timely breakthrough to let at least some additional educational groups begin television operation.

Mr. PASTORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUSCHE. Mr. President, I ask for the yeas and nays on the passage of the bill.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill is open to further amendment. If there are no further amendments to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The question is on the passage of the bill.

Mr. DIRKSEN. Mr. President, I will take only a minute to reaffirm what I said earlier in the day. An identical bill was before the 86th Congress. I opposed it at that time; so did the then Secretary of Health, Education, and Welfare. The bill before the Senate this afternoon is identical in text with that bill. Anyone who wishes to look at the record will see that at page 164 of the hearings the Secretary of Health, Education, and Welfare, in a letter to the chairman of the committee, expresses his opposition to the bill for quite a number of reasons.

I do not believe that a case has been made for the bill, and I therefore express my opposition to it. I do not believe it is necessary for me to labor the verities or equities of the bill, because the Secretary's letter speaks for itself.

The distinguished chairman of the committee used a rather intriguing phrase in the debate when he said, "This is only seed corn." I remarked that $50 million is a lot of seed corn. Once we start down that road, we simply do not come back.

I know of no good reason why the States on their own cannot undertake this kind of responsibility in the educational field.

With that, Mr. President, I have done, and I am ready to record myself in opposition to the bill.

Mr. BUSH. Mr. President, I have listened with interest to the debate on the bill this afternoon. Like the senior Senator from Illinois, the minority leader [Mr. DIRKSEN], I find that a good case is lacking. I am indeed impressed with the letter, dated March 17, signed by the Secretary of Health, Education, and Welfare, in which he states the administration's opposition to the bill. I do not believe that the administration is opposed to Federal assistance or aid to education in some form. However, they say they are not ready for this bill. The Department of Education does not want the bill.

Nevertheless, we are about to vote on a $51 million proposal, without endorsement by the Department of Health, Education, and Welfare and the Secretary of that Department and the President of the United States. The bill should be voted down.

Mr. SALTONSTALL. Mr. President, I, too, shall vote against the bill. While I am aware of the benefits of television and of education through television, I do not think that at this time the money would be used as efficiently as it might be in the interest of television education. The bill provides $50 million for a period of 5 years, and the expenditures would be spread in such a way that they could not be used as efficiently as we would want to see the money used at this time for the purpose of education.

For the reasons stated by the distinguished Senator from Illinois [Mr. DIRKSEN] and the distinguished Senator from Connecticut [Mr. BUSH], I shall vote against the bill.

Mr. THURMOND. Mr. President, no one believes in education more than I, but I expect to vote against the bill for three reasons.

First, I know of no authority for the National Government to enter the field of education, even though it be in the form of financial grants to television education. In my opinion, one of the best ways to teach is through television, and many States, including my own State of South Carolina, are making tremendous progress along that line. There is no interstate commerce involved in the bill.

Second, I shall vote against the bill because I feel that the States are more financially able to perform the functions proposed by the bill than is the Federal Government. I think that is the responsibility of the States, and that they should fulfill this responsibility.

Third, the bill proposes a new Federal program. Because of the country's fiscal condition, due to the tremendous amount of money which we owe today, it is my feeling that we should not begin a new Federal program such as television education unless it is required by some emergency, which it is not.

Mr. RANDOLPH. Mr. President, we have reason to be grateful that the majority of the television facilities of our country are administered by citizens with a sense of civic responsibility. The control of broadcasting is not a right granted to all who desire it, but a privilege accorded only to those who, according to the Communications Act of 1934, can justify the claim that the public interest, convenience, and necessity would be served thereby.

Former President Herbert Hoover said that the grantee must prove that there is something more than naked commercial selfishness in his purpose. This, most assuredly, has been done. Management generally is to be commended for having gone well beyond the mini-

mal requirements of the law in the strong emphasis it is placing upon educational television. In West Virginia, through WJPB–TV, our colleges under the guidance of a committee of distinguished educators and the chairmanship of Dr. Perry Gresham, president of Bethany College and Dr. Duane Hurley, president of Salem College, real progress has been made.

Within our State, television and radio owners have been most cooperative with our public schools and institutions of higher learning.

This program, as embraced in S. 205, is being established at a unique moment in the history of the American television industry—at a time when the industry has been under widespread and critical examination. In the past there have been occasional sharp and pungent criticisms—from some members of the clergy, from academicians, from professional critics, and from individuals of taste and discrimination.

But following the congressional disclosures of rigged quiz shows, payola, and deceptive advertising, these voices have finally found the support of the general public. And there has been induced a healthy, and I hope, permanent process of self-examination within large segments of the television industry.

In essence, the events of the recent years have served to reassert the principle that power and privilege must be constantly attended by a sense of public responsibility. Those who occupy the airwaves and the television spectrum do not hold this space in fee simple. They keep it in trust for all the people. And they must justify this trust by serving the public interest, convenience, and necessity.

According to industry sources, as of March 1959, 44,462,000 of 51,500,000 households in the United States contained at least 1 television set, leaving only 7,038,000 households, or 13.7 percent without a set. It is maintained, further, that in the average home television is tuned in 5 hours a day, 7 days a week. Accepting the fact that no one can state with precision how much of that time the set is actually being viewed—or by how many members of the family—5 hours a day is certainly much more than the average family spends in combined reading time—exclusive of the children's schoolwork.

Thus, within less than two decades, the technology of communication has been revolutionized. And as a result of this revolution, an infinitesimally small segment of our population has acquired control of an instrument of tremendous power. As with any technological achievement, the instrument itself is neither good nor evil—it has neither mind nor will. But it can be used by men and women to accomplish either very great good or very great evil.

Though I, like some others, have occasionally looked upon the television programing with some misgivings, I believe educational TV can hold vast promise for the quality of American culture. The wider utilization of television will help to elevate the level of American educational progress. Passage of the bill, sponsored by Senator MAGNUSON and other Members of this forum, is worthwhile.

Mr. President, I embrace this opportunity to state that the best of television continues to be better. John Gielgud's production of "Hamlet," the NBC production of W. Somerset Maugham's "The Moon and Sixpence" with Sir Laurence Olivier, and the sensitive interpretation of Hemingway's masterpiece, "For Whom the Bell Tolls"—to name a few of the outstanding—these reached moments of high artistic excellence.

While, in the area of public information programs, the Friendly-Murrow production on missiles offered the average citizen insight into one of the most critical areas of modern American technology.

In these and other programs television has served well the aims and interests of a democratic society. But for each of the shows I have just mentioned there have been too many others which are tuned to the glorification of violence and sadism and debasement of the public weal.

The sanction invoked by the producers of such programs is that they are giving the public what it wants. But this is a violation of the public trust, not only because much of the public has not been consulted, but also because large groups of the people can become addicted to the stimulus of such false versions of life and lose their own sense of discrimination and judgment. We do not prescribe alcohol and narcotics for those who suffer from their addiction. Nor should we prescribe an almost unremitting diet of violence on TV.

The responsibility of those who control the programing of television is not fulfilled by pandering to the lowest common denominator of public taste and intelligence. They have an obligation to lead and to instruct—to use this powerful force to elevate rather than to downgrade our standards of value. Under the plan envisaged in the measure passed today this will result.

Norman Cousins, the editor of the Saturday Review, stated:

> The men who govern TV cannot have it both ways. They cannot lay claim to fabulous powers in affecting the sale of merchandise yet disclaim responsibility for affecting easy attitudes toward violence.

The Communications Act of 1934 sets forth the paramount concern of the public interest. All of us can recognize that certain practices of the television industry in matters of taste and propriety have not always served the public interest. To quote again from Cousins:

> No one expects television to become a ponderous, bloated, around-the-clock Sunday sermon. But neither do we expect it to be a mammoth school for sadists.

I have hope and confidence that events and disclosures have set in motion the development of a higher sense of social responsibility among those who govern television. And a proper emphasis on educational television can be of real benefit.

The PRESIDING OFFICER. The question is on the passage of the bill. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. HUMPHREY. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Connecticut [Mr. DODD], the Senator from Mississippi [Mr. EASTLAND], the Senator from Florida [Mr. SMATHERS], the Senator from Oklahoma [Mr. MONRONEY], and the Senator from Virginia [Mr. BYRD], are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ] is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY], the Senator from Michigan [Mr. MCNAMARA], and the Senator from West Virginia [Mr. RANDOLPH], are necessarily absent.

I further announce that, if present and voting, the Senator from Texas [Mr. BLAKLEY], the Senator from North Dakota [Mr. BURDICK], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Connecticut [Mr. DODD], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oklahoma [Mr. MONRONEY], the Senator from West Virginia [Mr. RANDOLPH], and the Senator from Florida [Mr. SMATHERS], would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Vermont [Mr. AIKEN] is absent by leave of the Senate.

The Senator from Colorado [Mr. ALLOTT] is absent because of death in the family.

The Senator from New Hampshire [Mr. BRIDGES], the Senators from South Dakota [Mr. CASE and Mr. MUNDT], and the Senators from Nebraska [Mr. CURTIS and Mr. HRUSKA] are absent on official business.

The Senator from Kentucky [Mr. MORTON] is necessarily absent.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

The Senator from Arizona [Mr. GOLDWATER] is detained on official business. If present and voting, the Senator from South Dakota [Mr. MUNDT] would vote "yea."

The Senator from Arizona [Mr. GOLDWATER] is paired with the Senator from Kentucky [Mr. MORTON]. If present and voting the Senator from Arizona [Mr. GOLDWATER] would vote "nay," and the Senator from Kentucky [Mr. MORTON] would vote "yea."

The result was announced—yeas 67, nays 13, as follows:

[No. 20]

YEAS—67

Anderson	Ervin	Long, Mo.
Bartlett	Fong	Long, Hawaii
Beall	Fulbright	Long, La.
Bible	Gore	Magnuson
Boggs	Gruening	Mansfield
Byrd, W. Va.	Hart	McCarthy
Cannon	Hartke	McGee
Capehart	Hayden	Metcalf
Carlson	Hickenlooper	Miller
Carroll	Hickey	Morse
Case, N.J.	Hill	Moss
Church	Humphrey	Muskie
Clark	Jackson	Neuberger
Cooper	Javits	Pastore
Cotton	Johnston	Pell
Douglas	Jordan	Proxmire
Dworshak	Keating	Schoeppel
Ellender	Kefauver	Scott
Engle	Kuchel	Smith, Mass.

Smith, Maine	Talmadge	Young, N. Dak.
Sparkman	Wiley	Young, Ohio
Stennis	Williams, N.J.	
Symington	Yarborough	

NAYS—13

Bennett	Kerr	Saltonstall
Bush	Lausche	Thurmond
Butler	McClellan	Williams, Del.
Dirksen	Robertson	
Holland	Russell	

NOT VOTING—20

Aiken	Chavez	Monroney
Allott	Curtis	Morton
Blakley	Dodd	Mundt
Bridges	Eastland	Prouty
Burdick	Goldwater	Randolph
Byrd, Va.	Hruska	Smathers
Case, S. Dak.	McNamara	

So the bill (S. 205) was passed.

Mr. MANSFIELD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MAGNUSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEED GRAINS PROGRAM, 1961—CONFERENCE REPORT

Mr. ELLENDER. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special program for feed grains for 1961. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, pp. 4405–4406, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

ORDER OF BUSINESS

Mr. PASTORE. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

Mr. DIRKSEN. Mr. President, will the Senator from Rhode Island yield for an inquiry?

Mr. PASTORE. I yield.

Mr. DIRKSEN. The conference report on the feed grains bill was just laid before the Senate. I am under the impression that the distinguished Senator from Rhode Island is to discuss another subject matter besides the feed grains conference report. Am I correct?

Mr. PASTORE. The Senator is correct. The Senator from Rhode Island is willing to yield in the event there is no opposition to the report, but I have been waiting since 1:30 to make this speech.

Mr. DIRKSEN. I am afraid there will be some opposition, and I have been marshaling Senators who are interested in the conference report to be on hand. It was only for the purpose of having time to bring them here that I spoke.

Mr. PASTORE. I realize that. I thank the Senator.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. ELLENDER. How long will the Senator take?

Mr. PASTORE. I do not suppose it will take more than half an hour, but I understand other Senators intend to speak on the substance of the subject matter. The subject is textiles.

Mr. ELLENDER. I would like to get the conference report acted on as soon as possible. The House has acted on the feed grains conference report, and I am very anxious to get the bill on the President's desk today, if I can.

Mr. PASTORE. I should not think we would take more than an hour or an hour and a half, all told, because in this particular case it is not the quantity, it is the quality, that will count. [Laughter.]

Mr. DIRKSEN. Mr. President, will the Senator yield for one other inquiry?

Mr. PASTORE. I yield.

Mr. DIRKSEN. I wonder if the Senator from Louisiana [Mr. ELLENDER] wishes to have the yeas and nays on the conference report.

Mr. ELLENDER. I do not ask for the yeas and nays.

Mr. DIRKSEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. PELL in the chair). Does the Senator from Rhode Island yield for that purpose?

Mr. PASTORE. Yes; without losing my rights to the floor.

The PRESIDING OFFICER. The yeas and nays have been requested.

The yeas and nays were ordered.

SUPPLEMENTARY REPORT CONCERNING PROBLEMS OF THE DOMESTIC TEXTILE INDUSTRY

Mr. PASTORE. Mr. President, 2 years ago I rose in this body to discuss the findings of our first investigation of the problems of the domestic textile industry. At that time I pointed out that the domestic textile industry had been declining for a decade. While the impact on different segments of the industry was uneven, only one—that producing the newer manmade fiber fabrics—had registered a gain in production.

There had been a sharp drop in equipment in place, and a very substantial decline of 24 percent in textile employment. Hundreds of mills had been liquidated. And many thousands of textile workers were prematurely displaced from the labor force. Some of the displaced textile workers, to be sure, found new jobs. But a distressingly large percentage were unable to find continuous employment again.

Textile wages had been lagging behind other earnings in this country. And this was not due to failure of the textile industry to increase its productivity. Indeed, productivity in the textile industry had increased much more rapidly than in manufacturing industry generally.

I also noted then that, while the domestic textile industry was declining, imports had been rising during the 10-year period covering our survey.

We noted in our first report that rising imports could not be singled out as the sole cause of the contraction of the textile industry.

Many jobs in this industry were eliminated by technological change. But it was our conclusion, after review of all trends, that rising imports pose a threat to the future stability of the domestic textile industry, and that unless the rate at which imports entered the country was controlled there would be a further damage to the industry.

In February of this year the textile subcommittee held another set of hearings to bring the record up to date. Briefly stated, we found that the trends of the past decade have been continuing and in some cases have been accelerated.

Textile sales have continued to rise more slowly than the sale of manufactured products in general. Consumers continue to spend a declining share of their total consumption expenditures on clothing.

We also found that textile production rose modestly in 1959—a year of cyclical revival. But there was a sharp drop in 1960. Imports, however, increased substantially in both years.

There has been a further decline in textile machinery in place since 1957, and despite this contraction of machinery in place, that which remains is not utilized to full capacity.

Employment in the textile industry has continued to drop. Since 1957, there has been an additional decline of about 7.5 percent in the number of textile jobs in this country. The loss of jobs has varied from region to region, but all regions where textile-mill products are made have experienced some decline in employment.

As conditions worsened, more and more textile mills closed their doors. From 1947 through 1957, a total of 710 textile mills were liquidated in this country. These mills had formerly employed about 196,000 workers. From 1957 through 1960, an additional 128 mills closed their doors, displacing approximately 33,000 more workers.

Although the cost of living, as measured by the Bureau of Labor Statistics, has gone up about 28 percent since the base period 1947–49 textile prices have dropped almost 10 percent. As a consequence, mill margins—that is, the difference between the price of raw material and that of its approximate cost equivalent—have narrowed, and profit rates have remained very low.

In our first report we pointed out the anomaly of the two-price cotton system. Because of our agricultural price-support program, the price of domestically grown cotton is higher in this country than in the world at large. This adds to the competitive disadvantage of American mills which would be unable, under the best conditions, to meet the cost of production of foreign competitors given the wide spread in wages between underprivileged countries and the United States.

Unfortunately, the situation has not been altered since then. Indeed, the latest development has been an increase

in cotton price support. Unless some offsetting action is taken, this will place American mills at a further competitive disadvantage.

In spite of contraction in the industry, the downward pressure on textile prices, and shrinking profit margins, the domestic textile industry has made an effort to improve its efficiency by spending large sums on new equipment.

The textile industries of other nations have not been standing still, however. Indeed, since many textile mills in other countries have been built since the end of World War II, their machinery, on the average, is newer than ours. Ten years ago the U.S. textile industry enjoyed a considerable advantage in productivity over competing foreign nations. But the productivity gap has been narrowing steadily.

We cannot assume, as many evidently do, that higher production costs in this country are offset by greater productivity. This was partly true at one time, but it is no longer so. The textile industries of other nations have rapidly increased their productivity, and their costs—especially labor costs—continue to lag far behind those in this country. I wish to emphasize that this is not because textile wages in the United States have increased too fast. In our first investigation we found the textile earnings lagged behind those of other manufacturing workers.

And the gap has been widened even more since then. Three years ago textile earnings, on the average, were 15 percent below those of manufacturing workers in general. By the end of last year, this gap had widened to 30 percent.

I repeat, Mr. President: The gap today between earnings of textile workers and earnings of workers in other manufacturing industries is 30 percent. While textile wages in the United States are high, relative to those of other countries, they are low—quite low, indeed—relative to the wages earned by other manufacturing workers in the United States.

The major change in the textile situation since our first report was issued has been in the international market. Textile exports have continued to decline, while imports have gone up substantially. In 1954, for example, textile imports amounted to about 73 percent of textile exports. By the end of last year, however, textile imports amounted to 170 percent of textile exports.

While there has been a fairly uniform drop in textile exports, we find that there have been substantial increases in imports of virtually all categories of textile-mill products. Since 1958, imports of cotton cloth and madeup goods have gone up more than 130 percent. Wool imports have gone up 107 percent, and manmade fiber fabric imports have increased more than a hundred percent.

There have been somewhat smaller, but still substantial, percentage increases in imports of Wilton and velvet carpets, up 60 percent; and silk goods, in respect to which imports have gone up 35 percent. In brief, there has been an across-the-board increase in textile imports, but imports of some categories of fabrics have increased more rapidly than others.

There has also been a substantial shift in the source of imports in recent years.

Five years ago Japan was the principal exporter of many kinds of textile products to the United States. But in 1956 the Japanese textile industry agreed to limit its shipments to this country under a voluntary arrangement.

The limitation was originally 235 million square yards of cloth. Only a year or so ago, by negotiation, it was increased to 246 million square yards. It was thought at that time that this would ease the impact of textile imports on the domestic industry. Unfortunately, as the figures I have just given clearly reveal that this hope was not realized. All that has happened is a shift in the source of imports.

When Japan announced that it would voluntarily limit its shipments of cotton cloth to the United States, other nations which had formerly exported only modest quantities of this product stepped up their production for export purposes. As a consequence, Japan's share of our market has been cut at a time when total imports were rising strongly. In 1958, for example, Japan accounted for 60 percent of our cotton goods imports. By the end of last year, its share had dropped to 28 percent.

The point I wish to make—and I make it emphatically at this juncture—is that Japan is not sending less to the United States. Japan is sending as much and perhaps more, but Japan's percentage of the U.S. market has dropped from 60 percent to 28 percent. If Senators analyze those two percentage figures, they will come to the conclusion that other countries have increased production and are sending much more to the United States.

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. PASTORE. I yield.

Mr. BUSH. I presume it is a fact that the arrangement made with Japan was on a voluntary unilateral basis, and other countries were not included in the arrangement at all. Is that correct?

Mr. PASTORE. That is correct. I am accentuating the fact that U.S. imports have been increasing since the unilateral agreement with Japan. Japan had 60 percent of the U.S. market, and in fact limited her own exports to the United States. However, today, even though Japan is shipping the same amount and quantity of cloth to the U.S. market, the percentage is quite different. Japan now controls only 28 percent of the U.S. market, instead of 60 percent, because other countries have entered the market.

Mr. BUSH. If the Senator will yield further, this would indicate that U.S. imports have really doubled, compared to 5 years ago, measured by the Japanese shipments to the United States.

Mr. PASTORE. They have gone up 250 percent.

Mr. JAVITS. Mr. President, will the Senator yield for another question?

Mr. PASTORE. I yield.

Mr. JAVITS. I hope the Senator, in the course of his important talk, will also develop the situation of textile exports, because the classic problem which assails people in New York, such as myself, is that we have both kinds of business, and that the opportunities for exports today are probably greater than ever. Various factors, such as the balance of international payments, and so forth, lead to the need for an export drive. Therefore, I think we ought to have—and the Senator from Rhode Island has performed a great amount of work on the subject—not only a general picture, but also a composite picture, which the rest of us can discuss. From the Senator's specialized knowledge, perhaps as he goes along he might tell us what has happened to textile exports.

Mr. PASTORE. I cannot give the figure as of today, but when we investigated the subject in 1959 we found that whereas prior to the last 10-year period about which we are talking our exports were 15 percent of our total production, the figure had dropped from 15 percent to 5 percent, and it is dropping every day.

The notion that as a result of our technology and productivity we can compete with our friends abroad is a fallacy in the textile industry, for the simple reason that their technology is as good as ours and their machinery is newer than ours. It is as simple as that.

If we compare wages, for example, of 30 cents an hour in France, 20 cents an hour in Italy, and 10 or 15 cents an hour in Japan or Hong Kong against $1.50 to $2 in the United States for the same type and quality of goods made by the same kind of machine and by 10 fingers of 2 hands, we find that we cannot compete. The situation is as simple as that.

Mr. JAVITS. Before the Senator concludes perhaps he can develop some facts and figures on the export-import picture. I shall not interrupt the Senator further at this time.

Mr. PASTORE. I refer the Senator to the committee report in which certain tables are printed. I will come to that subject in a short while.

Meanwhile, imports from Hong Kong, which had amounted to 14 percent in 1958, jumped to 27 percent by 1960. And there were even larger percentage increases in the case of other nations such as Portugal, Spain, Egypt, and France. These four countries combined accounted for only 1 percent of our cotton goods imports in 1958. By 1960, their shipments amounted to 23 percent of the total, which presents another glaring example of the astronomical rise in the imports of textile goods.

Other countries stepped up their shipments to us when Japan voluntarily curtailed her exports of cotton cloth. In 1958, Formosa, Pakistan, Korea, and India collectively accounted for only 2 percent of our imports. But this share increased to 11 percent by 1960.

Japan has increased her shipments of woolen cloth to the United States. Since 1958, imports of wool manufactures from Japan have gone up 68 percent. There has been an even sharper increase—of 371 percent—in wool imports from Italy.

Our first investigation was largely limited to that segment of the textile making broad-woven cloth. But in our hearings this year we also heard testimony from representatives of the carpet and rug industries. In 1958, imports of these textile-mill products, while rising, were not excessive. But there has been a phenomenal increase since then. Imports of carpets now amount to about one-fourth of our domestic production. While more than half of our carpet imports still come from Belgium, imports from Japan have been increasing.

Imports of manmade fiber fabrics have likewise been rising. Much of the increase has come in the form of made-up goods, mostly apparel. This raises another problem about which we heard relatively little in our first investigation.

Much of the increase in textile-mill product imports since 1958 has been in the form of made-up goods. Let me cite a few examples. In 1958, we imported about 3 million dozen cotton blouses.

By 1960 this figure had climbed to 5.9 million—a gain of 91 percent. In the same 2-year period, imports of cotton trousers rose from 1.7 million dozen to 4.4 million dozen, a rise of 159 percent. There has been a shift in the source of imports of cotton garments also. For example, in 1958 about 62 percent of all cotton garments shipped to the United States came from Japan, and in that year Hong Kong accounted for 38 percent. Last year, however, these percentages were almost reversed. Japan's share of cotton clothing imports had dropped to 34 percent while Hong Kong's share increased to 66 percent. As a result of this sharp jump in imports, it has been estimated that about 31,000 jobs in the garment industry, and related activities, have been lost.

Many of us have been disturbed by the news that leaders of the garment and apparel unions are contemplating boycotts of foreign fabrics in an effort to stem the rising tide of imports.

We must, of course, try to understand their motives. There are jobs involved. The garment industry is heavily concentrated in a relatively small number of cities where there are few alternative job opportunities for displaced garment workers. Or they are located in small and relatively isolated rural communities, where there are virtually no alternative job opportunities. The workers involved find it difficult to understand why they should sacrifice their employment as part of our broad international economic policy. They react instinctively to defend themselves. And the only solution which seems available to them is that of refusing to work on foreign-made fabrics.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. SALTONSTALL. The Senator has spoken about wool cloth imports and their effect on the industry. I have before me the report of the National Association of Wool Manufacturers, which shows that wool cloth imports in 1946 were 3 million square yards, and that in 1960 they were 60 million square yards. Those figures indicate the importance of the effect of wool cloth imports on what the Senator from Rhode Island has just spoken about.

Mr. PASTORE. I thank the Senator. This is one point we must bear in mind. If the trend continues, the domestic wool industry in this country will become extinct. There is no question about that result in my mind. I believe the wool situation is much more serious than the cotton problem, which is bad enough. The textile industry has been characterized as second in importance only to steel in our national defense program.

Let us assume that we do away completely with the wool industry in this country, and that we do away completely with the woolen textile mills. God forbid that we do it. In an emergency or a war what would we put on the backs of our soldiers? What would we do about blankets? That is how important this matter has become.

As the Senator from Massachusetts has already mentioned, the increase in the imports of woolen goods and cloth has been phenomenal. I do not say that we must make this an impossible situation. However, if we allow this situation to persist, we may reach a point of no return, and that is one thing we must avoid. There is no question at all about the fact that the textile industry has been declared only second to steel in national defense importance.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. BUSH. The Senator is making a very eloquent address, and he is very convincing. I should like to ask him this question: Does he not feel that the recommendations contained in the report which the Senator's special subcommittee has filed, for quotas in the manner outlined, could bring the situation under control?

Mr. PASTORE. Absolutely, and without doing anyone lasting injury. That is what we are up against, Mr. President. Let us face it. The first thing that a nonindustrial nation does when it industrializes is to go into the textile industry. That is the natural thing to do. That is the industry that a nation which industrializes goes into first. That is quite understandable. No one finds any fault with it. Unfortunately, the situation has been that these countries who are manufacturing cloth and textile fabrics have not been manufacturing them to put on the backs of their own people, but, rather, to export them to the United States.

As I have pointed out, Japan was exporting to the United States about 60 percent of the cotton goods, as against 28 percent out of Hong Kong. Then the figures reversed. While the quantity remains the same from Japan, percentagewise, Hong Kong has been sending in more than Japan. In the meantime, what has happened?

Japan is expanding her textile industry, in the hope of catching the American market. Hong Kong is doing the same thing. Then Portugal will do the same thing. Spain will do the same thing. Pakistan and India will do the same thing. One day they will find that they have overexpanded. Then they will find that the goose which laid the golden egg in the United States has died. Therefore, they cannot sell the cloth to the American consumers, because they are no longer consumers—they have lost their jobs. What happens? Well, instead of making a great many friends, we wind up with a lot of people who dislike us, and only because they overexpanded their industry, in the hope that they would sell their product to the United States.

They find they cannot sell it in the United States. They close down their mills. Their people are put out of work. Whom do they blame? Uncle Sam, of course. In that way we wind up making more enemies.

Now is the time to say to these people in a very nice, calm, judicious tone, in a reasonable fashion, "We can only afford to consume so much of your goods, because we make so much of it ourselves. We do not want to invoke any restrictions which are prohibitive. There is nothing protectionist in this approach. It is being done by other countries of the world."

We cannot do it by tariffs, because we are faced with a problem when we try to do it by tariffs. When we negotiate at GATT, we negotiate on the favored-nation philosophy, which means that when we set a tariff on velveteen or cotton or wool, we set that tariff to apply to all countries.

The tariff that we invoke when we consider the cloth which comes from England, where the wages are almost comparable with our own, as against the wages paid in France or Italy or Japan or India, as we go down in the wage scale, results in our shutting off some of the nations, and opening a door wide for other nations.

We cannot do it with tariff adjustments. The only reasonable answer is to impose a flexible quota. That is the recommendation we have made. We must use a quota that will be based upon American demand and American consumption and American production.

We are willing to share our markets with other countries, but in sharing them, we do not want to destroy them. In the past 10 years we have lost more than 400,000 jobs in the textile industry. Many of those jobs were lost because of the increase in productivity, due to technological improvements, but it has been estimated that approximately 225,000 of those jobs were lost because the mills had to close down because they could not compete with foreign imports.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. SALTONSTALL. The Senator has made a very important contribution. Of the five recommendations which the Senator has made and which his committee has made in the report, the first recommendation, the recommendation he has just referred to, the flexible quotas, is very much the most important recommendation; is it not? Is not that the backbone of the committee's report?

Mr. PASTORE. That is correct.

Mr. SALTONSTALL. I should like to bring out one more point. The Senator has mentioned Hong Kong and Japan. I attended a luncheon last year given by the Senator from New York [Mr. KEATING], in which it was pointed out that even Japan was worried about the imports from Hong Kong of finished cloth, because those goods were coming not only into Japan, but also into the United States at reduced prices, much below anything at which Japan could produce its goods. Of course Japan had a voluntary quota system.

Mr. PASTORE. That voluntary agreement on the part of Japan expires this year. It was only a voluntary agreement. It was instituted for 5 years approximately 5 years ago. The sad situation is that it expires this year, because Japan knows Hong Kong is increasing its volume. Japan, in its turn, is going to increase its volume. In that way it becomes a race among our friends as to who can send in more to clog the American market. The minute that is achieved, we close down American mills. We have closed down more than 800 mills in the United States, at a time when we are experiencing a phenomenal growth in our national product. We closed down more than 800 mills in the United States when our national income was soaring. That is how real the situation is.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. SALTONSTALL. The Senator refers to a flexible quota. It seems to me it is very important to distinguish between a flexible quota and a fixed quota. While many of us who are in favor of reciprocal trade and all it stands for in its broad sense, it is not going to increase trade if we put 196,000 people out of work because an industry has closed down for lack of a quota. Is that correct?

Mr. PASTORE. The Senator is absolutely correct. In our committee we were very careful on that point. We suggested flexible quotas because we think they should vary. I have heard the argument made, "How are you going to execute the program?"

It can be done. Other countries have done it. We have done it with Japan. Japan has made a voluntary quota work. If foreign countries can make it work against us or for us, why can we not get a good old-fashioned American quota to work for us?

Mr. BUSH. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. BUSH. I see no reason why we should not be able effectively to enforce a flexible quota system, just as we are able to enforce a tariff system. Actually, this must be done at the gate, at the port. I can see no reason why the Government cannot effectively administer a flexible quota system. I should like to ask the Senator one more question. I have been absorbed in this problem for many years, as the Senator has also. The Randall Commission devoted almost a year to this problem. The Senator from Rhode Island remembers that report, I am sure. One of the things that is not clear, it seems to me, is this. A tariff—and I would appreciate if the Senator would tell me if I am wrong—is designed to give some protection against imports, let us say, but if a tariff is high enough to give that protection, it will also forbid imports, because if it is high enough to protect, it is high enough also to keep out goods. Is that correct?

Mr. PASTORE. That is true, provided the costs were the same in every country of the world.

Mr. BUSH. I understand that. My point is that this is very different from a flexible quota, because a flexible quota is not designed to keep out goods or forbid trade, or even to curtail trade. It is designed to keep trade in pace with an agreed amount of imports from all the countries involved in the trade in that particular item. Is not that so?

Mr. PASTORE. That is correct. The Senator will remember when there was a great outcry in this country because Russia had unloaded a large amount of aluminum on the world market. That is precisely what has happened to the textile industry. What can be done with aluminum can be done with textiles. The reason for the destruction of the aluminum market was that with intent to beat the world price some years ago, the Soviet Union unloaded a large amount of aluminum on the world market. That action destroyed the stability of aluminum prices. That is precisely what will happen in the textile industry if something is not done to regulate the flow of imports.

Mr. BUSH. I acknowledge the leadership of the Senator from Rhode Island in the area of economic thought, and have for a good many years. I compliment him very highly on the report which he has submitted to the Senate today under the title "Problems of the Domestic Textile Industry." Similar problems involve other industries, some of which are located in the State of Connecticut. I am very much concerned about the whole problem. I am grateful to the Senator for his presentation today.

Mr. PASTORE. I thank the Senator from Connecticut.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. PASTORE. I yield to the Senator from Alabama.

Mr. SPARKMAN. First, I commend the Senator from Rhode Island and the Senators associated with him on the subcommittee for the excellent work they have done and for the very fine report they have made. Particularly, I commend the Senator from Rhode Island for the excellent presentation he has made today.

I have given much thought to this problem. The Senator may remember that this question was before the Committee on Foreign Relations about 6 years ago, when an amendment was offered to the mutual security program and the foreign aid program to impose quotas. It first carried in the committee, but later the action was reversed by a single vote, after representatives of the Department of State, the Department of Commerce, and the Department of Defense had appeared before us and assured us that they would establish a voluntary quota system.

Even then, the Senator may remember, the late Senator George offered an amendment on the floor of the Senate, and it failed of adoption by a single vote.

Then it was that Japan imposed upon herself the system of voluntary quotas, to which the Senator from Rhode Island has referred; and Japan has lived up to that system of quotas quite well.

During the past summer, I was in Japan. There I talked with the Prime Minister and the Foreign Minister. We discussed very carefully the question of textile shipments to the United States. That is a subject in which Japan is greatly interested; and the two Ministers, knowing that I myself come from a textile State, seemed to be eager to discuss the question. They indicated to me their willingness to continue the voluntary quotas, but pointed out the problem, which has been so well presented here, of the Hong Kong transshipments which threaten to break down any quota imposed simply by one country by its voluntary action.

I think the Senator from Rhode Island and his committee have reached the right solution in their recommendations. For a long time there was talk about raising the tariffs; but, as the Senator from Rhode Island has pointed out, the tariffs simply cannot be raised high enough to protect the American markets against the wage rates which are paid in many of the countries of the world. The Senator has touched upon the question of flexible quotas, quotas which will, I presume, be developed by agreements between the governments, or quotas which may be imposed voluntarily, as Japan has done.

I note with interest the statement at the end of the report that the President has agreed to appoint a Cabinet committee. I believe that Committee has already been created, has it not?

Mr. PASTORE. That is correct.

Mr. SPARKMAN. Secretary of Commerce Hodges is the Chairman of the Committee. Is that not correct?

Mr. PASTORE. That is true. As a matter of fact, the day after our subcommittee concluded its hearings, I asked for an invitation to the White House in order to talk the problem over with the President. I suggested to him a Cabinet-level committee. He was pleased to accept the suggestion. That Cabinet Committee has been appointed. It is comprised of Mr. Ball, of the Department of State; Secretary of Commerce Hodges, Secretary of the Treasury Dillon, and Secretary of Labor Goldberg. They, in turn, have appointed a subcommittee which is headed by Mr. Price, of the Department of Commerce. That subcommittee has held extensive hearings and, I understand, has already made a report to the Cabinet-level Committee. The Cabinet-level Committee is in the process of recommending to the President, who has the ultimate authority, to do something about the situation.

Mr. SPARKMAN. Mr. President, I believe the committee headed by the distinguished Senator from Rhode Island has done a wonderful job. I think we are on the right road, with the Cabinet Committee set up and functioning, as the Senator has stated on the floor and outlined in the report.

Mr. PASTORE. A question was raised about the Randall committee. I read from page 13 of the report:

> Industry spokesmen noted that even among advocates of more liberal trade, there is growing recognition that selective controls might be required to prevent undue damage to certain sectors of the economy. Dr. Alfred C. Neal, president of the Committee for Economic Development, and formerly research director of the Randall Commission on Foreign Economic Policy, was quoted as follows:
>
> This is very important:
>
> The explosive effects of advanced technology in a country with extremely low wages can be damaging to all—to the exporting country because it overexpands, and to importing countries because they cannot move people and resources out of damaged industries fast enough. Controlling the most serious of these cases by means of agreed quotas, which are temporary and expandible, may be the only reasonable alternative to the disruption of the whole trading system of the West.

That comes from a man whose ideas are not protectionist. It goes to prove how people are beginning to recognize more and more that we must start to review the whole subject of international trade, and what it is doing to domestic industry. We must not follow the policies of the dead hand of the past, but the new philosophy of the New Frontier.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. CLARK. First, I express my appreciation to the distinguished Senator from Rhode Island and his colleagues for the very real contribution they have made in the supplemental report to the trade problems involving the domestic textile industry. It is a problem which is of the greatest concern to my State. Pennsylvania has had a dwindling textile industry for a number of years. Pennsylvania used to be the center of the carpet industry, so far as the United States, and probably the world, is concerned. That industry has now shrunk until very few firms making carpets are left in Pennsylvania. However, I am glad to say that several still remain in business.

There has been a diminution in the production of men's clothing and women's clothing. The knit goods industry has been particularly hit, not only by foreign competition, but also by lower costs of production in other parts of the country. So this is a problem in which we are very deeply interested.

Again, I congratulate the chairman upon the contribution which his special subcommittee has made. I associate myself very clearly with his second, third, fourth, and fifth recommendations. I have no strong views in opposition at all to his first and most important recommendation. It may well be that the only feasible way to solve the problem is through a flexible quota system. I would, however, like to have further time in which to make up my mind in that regard.

I should like the Senator from Rhode Island to tell me whether he anticipates, as a result of the studies by the President's Committee, that there will be submitted to Congress at this session recommendations from the executive branch as to how the problem of adequately protecting the domestic textile industry can be handled.

Mr. PASTORE. I would hope so. If the President of the United States sought the assistance of Congress, I think it would be readily given to him. I think the President has the power at present under the Trade Agreements Act of 1958. I think he has authority under the national security amendment to institute quotas if he deems that proper. Certainly he has enough authority under his directive powers to establish an agency to determine what the flexible quotas should be.

I repeat: If the President of the United States seeks the assistance of Congress, I think it will be given to him readily. Speaking for myself, and only for myself, I pledge this afternoon to give all the help I can in that regard.

Mr. CLARK. Mr. President, will the Senator further yield?

Mr. PASTORE. I yield.

Mr. CLARK. It is my understanding, then, that in the judgment of the senior Senator from Rhode Island there is at present no need for legislation in this field.

Mr. PASTORE. I would say there is not.

Mr. CLARK. I thank the Senator.

Mr. GOLDWATER. Mr. President, will the Senator from Rhode Island yield?

Mr. PASTORE. I yield.

Mr. GOLDWATER. I am sorry I was not able to be in the Chamber to hear the entire presentation which my friend, the Senator from Rhode Island, has made. I shall read it with great interest in the RECORD.

I believe the Senator from Rhode Island is doing a very great service by calling this competition to the attention of the Senate, and therefore to the attention of the people.

If I may do so, with the permission of the Senator from Rhode Island, I should like to point out some of the other areas of problems in this country, as regards foreign competition.

I may say that I know a little about the retailing end of the textile business; and from a quick glance at the report, I can substantiate the statements about the low prices at which manufactured and also yardage textile goods can be purchased abroad. Certainly that situation is affording ruinous competition to our industry.

I do not know whether my friend, the Senator from Rhode Island, has brought out the following facts:

First of all, that 2 million Americans—or 1 out of every 8 employed in manufacturing—owe their livelihood to the textile and apparel industries. Our imports of textile products have increased nearly 30 percent since 1956, while exports have remained static. In 1959, imports exceeded exports by over $200 million.

Imports of cotton textile products advanced by more than 30 percent in the period 1956–59.

In the same period, imports of woven wool cloth climbed by one-third to an alltime high level. But a new record was set in 1960, for imports of woolen cloth in the first 4 months of 1960 showed an increase of 104 percent over the comparable period of 1959. In fact, our imports of woolen cloth before the end of 1960 had already surpassed those during any full year on record prior to 1959.

At this point, perhaps I may touch on a few other areas to which I think the philosophy of the Senator from Rhode Island might also well be applied.

Mr. PASTORE. Mr. President, I am glad the Senator from Arizona is bringing up these points, because they bear precisely on a question which was asked of me by the Senator from New York. So I trust the Senator from New York has been listening to what the distinguished Senator from Arizona has been stating, because I believe his statements answer very concisely, clearly, and succinctly the question asked by the Senator from New York.

Mr. GOLDWATER. Let me say that even though this business has been the cne in which I have engaged all my adult life, it was a surprise to me to find that 2 million Americans—or 1 out of every 8 employed in manufacturing in our country—owe their livelihood to the textile and the apparel industries.

I was equally surprised to find that more than one-quarter of a million Americans produce metalworking machinery. Imports now claim 17 percent of the total domestic market for machine tools. Even worse, this market was cut in half—from $520 million to less than $250 million—in the period 1954–58. Exports of American machine tools, meanwhile, have dropped 50 percent in the last 4 years.

Over 1,300,000 Americans are employed in the electrical machinery industry. In 1959, imports of electrical equipment reached $246 million, against slightly less than $100 million 5 years ago.

Over 850,000 Americans are employed by iron and steel mills and foundries. Imports of iron and steel products—not counting machinery, and firearms, and other manufactures—advanced by 140 percent from 1956 to 1959, while exports declined by 80 percent.

Nearly 140,000 Americans are working in the cutlery, handtools, and hardware industry. Imports of hardware in 1956 amounted to $15 million; in 1959, $25 million. Imports of steel cutlery were $8 million in 1956, and $14 million in 1959; and exports last year amounted to $800,000, only one-third of their value 3 years earlier.

Nearly 900,000 Americans are employed in the chemical industry. Imports of chemicals have risen 27 percent since 1956.

Some 250,000 Americans are employed in the leather footwear industry. In

1956, the United States imported 5.3 million pairs of leather shoes, boots and slippers; in 1959, imports reached 13.8 million.

Some 23,000 Americans manufacture rubber footwear. In 1957, the United States imported from Japan alone, 6 million pairs of rubber footwear. By 1959, the figure had jumped to 53 million, still from Japan alone. And other foreign suppliers, particularly in Hong Kong, where wages in this industry range from 6 to 14 cents an hour, are stepping up their shipments to the United States.

The brass mill industry has been hard hit by mounting imports from low-cost countries. For some brass mill products, imports have captured over one-half of the domestic markets. In 1954, 34,000 workers were employed in brass mills. Employment is now somewhat above 32,000.

Lead and zinc mining is particularly vulnerable to imports from low-cost areas. I may say that those of us from the lead-producing and the zinc-producing areas of the United States tried, over a period of some 7 years, to have the import quotas changed; but in only 1 year were we successful. All other attempts in this area have failed. In fact, the situation was so acute at the time that Congress was considering the enactment of legislation to curb imports.

Mr. President, I think the Senator from Rhode Island and his committee have made a very important contribution. But I believe there are some others of which we can think; and, if I may do so, I should like to state briefly what some of them are, because I am sure that in the committee the Senator from Rhode Island can consider these, although they involve a problem under the jurisdiction of the Finance Committee.

According to a survey made by the McGraw-Hill Co., there is now in the United States approximately $90 billion worth of obsolete machinery—not old machinery, but obsolete machinery. I may state that in a southern city there is a wirepulling division of one of our large steel mills, and the machinery in that division was installed in 1892. It is no wonder that foreign competition is now supplying much of the wire used in the United States, particularly the barbed wire, which is used for fences in my part of the country.

I suggest to my friends on the other side of the aisle that they give very serious consideration to an immediate proposal by the President to the Congress to liberalize the depreciation allowances under our tax code to such an extent that a businessman will be able to buy or to place orders for new automated machinery. I believe that only by automation are we really going to be able to accomplish the cure of our economic ills of today.

I realize that there are important questions in regard to what to do about the men who are laid off as a result of the situation; but I believe that if all of us begin together—labor, management, and Government, but with a minimum of Government—we can solve the problem of the displaced persons.

I merely wished to add this suggestion to the excellent ones the Senator from Rhode Island has made, because this is a real problem. There are now more than 300,000 persons who have been laid off of work in the textile industry; and if the Senator's suggestions are not followed, the situation will get worse before it gets better.

I believe that the suggestions I have made—which I have heard the President has had some interest in—would, if followed, provide the real spark, as we might say, which would set the whole economy going and would answer these questions and other questions.

Mr. PASTORE. I thank the Senator from Arizona. I assure him that it has always been my feeling that we should approve accelerated depreciation. I suggest it now, although I shall give a reason which may not be the orthodox one. I say now that a particular rule should be made for textile machinery, because if it is to be productive, that machinery must be used around the clock, and thus it is really used three times as much as other industrial machinery is used. That fact should be taken into account in calculating the depreciation.

However, generally speaking, I agree with what the Senator from Arizona has said, because today our country is competing with countries that are highly industrialized and have keen minds, speedy and skillful workers, excellent equipment, and modern industrial methods and plants. The idea that by means of our ingenuity we can overcome all that is being rapidly revealed as a fallacy.

I do not say we should not improve our technology, our marketing techniques, our inventory techniques, and our salesmanship. We must do all these and all the other things that are necessary in order to sell abroad more of our American-made goods; and I believe we should do much more to more or less persuade these countries to remedy some of the limitations and restrictions they have imposed against our products. All these things need to be done; but in the meantime I do not believe we should allow ourselves to die on the vine.

Mr. McCLELLAN. Mr. President, will the Senator from Rhode Island yield to me?

Mr. PASTORE. I yield.

Mr. McCLELLAN. Mr. President, the Special Subcommittee to Study the Textile Industry, under the leadership of the distinguished senior Senator from Rhode Island [Mr. PASTORE], has done a very fine job in bringing up to date its earlier report on "Problems of the Domestic Textile Industry." The subcommittee's most recent findings and the remarks made here this afternoon by the able Senator from Rhode Island reveal a disturbing acceleration in imports of foreign-made goods and a depressing contraction in the domestic textile industry, resulting in the loss of jobs for thousands of our citizens.

Mr. President, something has to be done to regulate the flow of cloth and made-up goods into this country. I am pleased that President Kennedy has appointed a Cabinet Committee on Textiles to study the problem, and I am hopeful that the recommendations of the Senate special subcommittee—that flexible import quotas be established—will receive thorough consideration. If a system of quotas can be instituted, without endangering and disrupting our foreign relations, it may prove the means of preserving sources of livelihood for a large segment of our population and affording urgently needed protection for the tremendous investment in our domestic textile industries.

Apropos what has been said by the Senator from Arizona [Mr. GOLDWATER], I should like to point out that in the field of restricting imports, we can move only with the utmost caution. We can invite destructive retaliation. I would suggest that restriction of imports to any appreciable extent is not the full and final answer. There are factors that tremendously influence this problem that are not primarily within the scope of Government. I am persuaded that production cost is the decisive element; and that issue addresses itself to labor and management. We cannot in this or any other industry, price ourselves out of world markets, including our own, and expect our industries to survive. In such circumstances, import restrictions will not provide all of the answer, and such a remedy will not be adequate to wholly solve this problem.

Mr. PASTORE. Does the Senator feel we can price ourselves into the Hong Kong market?

Mr. McCLELLAN. No. I think the step we are moving toward is absolutely essential at this time. The thought I have is that the problem is not altogether a Government problem. We have been talking about automation. The problem involves more than would be met by any law Congress can enact, or any restrictions or tariffs we can impose. The problem is related to the contest in which we are engaged. We are involved in a contest for world markets, for competitive markets, and that fact is going ultimately to dominate and influence us, because if we place in effect too many restrictions, we shall be faced with restrictions in some other area.

I think the suggested approach is imperative at the present time. We have got to do it, but we also have to do it with a degree of caution. I hope the suggested approach gives some relief, and that in the meantime appropriate and diligent studies will be made in all areas by competent sources, in an effort to deal with the problem and to find an answer.

It is not only the textile industry that faces a problem. We have heard reports from representatives of other commodities and goods. They also are involved in the overall problem of exports and imports and bear on the question of sustaining a high level of economy in this country.

I thank the Senator for yielding to me.

Mr. PASTORE. I thank the Senator for his comments. I merely wish to reiterate what the report states, namely, that not all the ills of the textile industry are attributable to imports. Insofar as the comparison of wages is concerned, I have already pointed out that

wages in the textile industry are 30 percent lower than they are in other industries. The textile industry has made as great a contribution as it could to investing in new machinery. The margin of profit in the textile industry is smaller than in other industries. So the textile industry is in trouble.

I know other things must be done. I recognize, and the committee recognizes, that many other remedies have to be invoked. They may have to be along the lines the Senator from Arkansas has enumerated. The new committee is made up of 21 members, 5 members being from the public, and including the Secretary of Labor, the Secretary of Commerce, 6 representatives from industry, and 6 representatives from labor. I hope it will study the overall situation, so we will not price ourselves out of the market. However, I think actually it would be dreaming if we thought for 1 minute we could do something about our wages and productivity so that we could compete with Hong Kong. I think that would be going back to the Dark Ages, and we are not ready for it.

When it comes to other industrialized countries, there are many things we can do. This afternoon I am trying to point out that the bulk of imports of textiles is coming from countries like Japan. I have no bone to pick with Japan. Japan has a right to rehabilitate itself and compete with American markets. We must also consider Hong Kong. We must consider India, to which country we are constantly sending CARE packages and other commodities. We must consider Pakistan, Thailand, the Philippines, Portugal, Spain, and Egypt.

How can we price ourselves into that kind of market? It cannot be done. If we stay around waiting for that day, we shall perish in the meantime. It is one thing we must avoid. The time to act is now.

As I have pointed out, the increase in imports between 1955 and 1960 has become cataclysmic. There has been an increase in imports of two and a half times in that period. In the last 10 years we have lost 800 mills. In that period our gross national product has increased from two hundred to five hundred billion dollars. There has been an astronomical growth in our gross national product, while at the same time the production of the domestic textile industry has been going down.

It is true the textile industry is cyclical; but when something is going down, we should not give it a boot to make sure it goes down faster. This is the time to stop.

We are saying the restriction should not be complete. We should not make it a constant. We suggest it be flexible. It should be predicated upon American production and what is coming into this country from abroad. We should sit down with our friends and say, "Unless you limit yourself now, you will expand yourself out of existence, because the day will come when you will not be able to send us your products in excess any more, and then you will have to close down, as many American factories have closed down."

When that day comes, it will be a sad day for American friendship and security. Now is the time when these steps should be taken.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. PASTORE. I yield to the Senator from Georgia.

Mr. TALMADGE. I desire to commend the able senior Senator from Rhode Island and his colleagues on the subcommittee for the excellent report they have submitted. I wish to commend the Senator for his able presentation today.

I know how he and the junior Senator from South Carolina [Mr. THURMOND] and also the junior Senator from New Hampshire [Mr. COTTON] have worked with the senior Senator from Rhode Island in this endeavor for more than 2 years. They are rendering a great and outstanding service to the country in this particular matter.

The textile industry is of vital importance to my State. The industry employs some 95,000 people. It is the largest industrial employer in the State of Georgia.

During this session of Congress, Mr. President, we have been giving priority to consideration of measures to relieve the recession in the United States. That is as it should be. I have supported such measures when I thought they were in the public interest, when it was clearly demonstrated they were needed, and when they came within all constitutional requirements in our country.

I regret that to date we have had no sense of urgency with respect to the textile industry, which has been partially liquidated and is being rapidly liquidated at the present time. Of all our basic industries, no other has been depressed as long or has suffered as widespread geographic dislocation as the textile industry. Anyone who doubts that fact should read the report of the able Senator and his able colleagues which is the basis of the discussion this afternoon in the Senate.

The American textile industry has been in the throes of a depression since 1949, since the first impact of our foreign aid billions began to come home in the form of cheap-labor goods manufactured in plants established and modernized by American tax dollars.

According to the figures in the report the able Senator has submitted—and I have no reason to believe they are not accurate—there have been liquidated 800 mills in the United States of America, and there have been liquidated 400,000 jobs. There are only 900,000 jobs remaining in the textile industry in this country.

The problem now is not conservation of our world markets, which have already been virtually lost. The problem now is conservation of the American market, which other countries are rapidly taking away from us.

Five years ago the situation became so desperate that this country worked with Japan and arranged a voluntary agreement to limit imports of Japanese textiles into this country by a quota. Only a few days ago, as I am sure the Senator is aware, the Japanese textile industry petitioned the Japanese Government to increase the quota in this country from 20 to 30 percent.

As the able Senator pointed out, the Japanese quota is now being seriously interfered with by other countries which are outproducing Japan and are producing cheaper than Japan can produce.

One thing which I do not think has been mentioned this afternoon in the discussion is the fact that in the United States of America the age limitations, the wages, and the hours of labor of all textile employees are rigidly enforced by law. This is not done in many of the countries which are shipping cheap textile goods to America. If the American textile manufacturer worked his employee at an age, for the same wage, and for the hours, that the laborers of the foreign competitor work to produce the goods coming to America, he would be put in the penitentiary for violating the law of this land. It seems to me that our Government, under such conditions, certainly ought to give protection to the industry and to the employees, since our laws make it mandatory that an employee be paid minimum wages, our laws make it mandatory that child labor be not employed, and our laws make it mandatory that laborers not work more than 40 hours a week without extra pay, and things of that nature.

I compliment and commend the President of the United States, who has appointed a Cabinet-level committee to study the problem and to recommend a solution. I hope the committee will approach its task with the same sense of urgency and realistic concern to put American interest first which characterized the deliberations of the committee of the able Senator from Rhode Island.

I think time is running out for the textile industry and for those employed in that industry. It is obvious that an effective solution must embrace at least two steps. First, I think we must have a mandatory system of quotas, as the Senator and the other Senators have pointed out. Second, I think we must give some thought to the fact that a bale of cotton produced in Georgia, in North Carolina, or in South Carolina can be purchased by a textile mill in Hong Kong, in the Philippines, in Portugal, in India, or anywhere else in the world at $42.50 cheaper than it can be purchased in the county which produced the cotton.

Those factors, Mr. President, make a problem which cannot be solved by automation, by improved industrial equipment, or by anything else of a reasonable nature. There is a comparison of 10 to 1 in the wage level. Raw material sells for a difference of 8½ cents a pound in a foreign country compared to the price in the county in which it was produced. It is an impossible competitive situation.

Again I commend the able Senator from Rhode Island and the members of the subcommittee. I pledge to them my wholehearted effort to help remedy a very bad situation.

Mr. PASTORE. I thank the Senator from Georgia.

Mr. HICKEY. Mr. President, will the Senator yield?

Mr. PASTORE. I yield to the Senator from Wyoming.

Mr. HICKEY. Mr. President, I commend the Senator from Rhode Island and the members of the subcommittee for the able report which has so clearly focused attention on this national problem. Those of us who come from the great public lands States of the West recognize clearly that the squeeze which is affecting the eastern seaboard States, the Southern States, and all the States east of the Mississippi River, likewise affects the western public lands States.

Since 1949 I have observed the sheep-growing or raising industry in the West die on the vine. Not only has the industry gone into the doldrums during that time, but suppliers of that industry in my part of the country have done the same. I have seen general stores close because people who have been in business for 60, for 70—yes, for 80 years—have been forced to go out of business. So many have gone out of business that the general store which supplied them closed its doors.

As I have read the report I have observed the conclusions succinctly stated by the Senator from Rhode Island and the other Senators. The report clearly indicates that imports of wool manufactures increased 67 percent between 1958 and 1959, and the problem is further emphasized in the paragraphs with which the Senator is so familiar.

The greatest market in the world is employed Americans. Employed Americans will continue to be the greatest market in the world.

We have a nation which, without doubt is a world leader. Our Nation, as a world leader, is certainly able to examine a national problem of this kind—which is so vital to many areas of the country, and which, in and of itself, affects so many people—and come forth with the correct solution.

At one time there existed what was called the Smoot-Hawley Tariff Act. That was in the days when our country was much less powerful and when our country lacked much of the technology it today possesses. When the act was seen to be archaic, by virtue of keeping in mind an expanded economy and by establishing what can be succinctly said to be a market of employed Americans, we found a way to solve the problem.

I am sure the suggestions made by the subcommittee, under the leadership of the able Senator from Rhode Island will aid us in our efforts toward the solution of this grave and, I reiterate, national problem.

I thank the Senator.

Mr. PASTORE. I thank the Senator from Wyoming. I am happy now to yield to the Senator from South Carolina.

Mr. JOHNSTON. Mr. President, first, I wish to thank the Senator from Rhode Island and his committee for their study of the problem about which we are now speaking.

I should like to state a little of the historical background of the problem for the benefit of many Senators who are present now but who were not present when the trouble first began.

I remember well that some 12 or 13 years ago the Manufacturers Association got together and sent a man from South Carolina to Japan to study the rehabilitation of the textile industry in Japan. He returned and spoke to Senators in the room which our Vice President is using at the present time. A recommendation was made at that time that Japan be given $250 million to rehabilitate its textile industry, because, it was claimed, something had to be done to rehabilitate the industry of Japan.

At that time I started to speak in opposition. I warned at that time of the threat of cheap labor in Japan and the problems which would arise through buying cotton on the world market at a cheaper price than our manufacturers could buy it. I warned that a Frankenstein monster was being erected which would return to haunt us in the future. I am sorry to say that my fears and predictions have come true.

I dislike at any time to suggest a quota, but viewing what has occurred to the present time, I believe that a quota is the only measure we can take which could relieve the situation a little.

Most of the products of our textile industry are used in the United States, for which we are thankful. We do not want the cheap goods that are coming into the United States to compete with our own textiles. About the only way in which we can protect our industry is by establishing quotas.

At this point I wish to thank the President of the United States for recently establishing a committee at the Cabinet level. Why am I happy to learn of the establishment of that committee? I am glad because heretofore only the Office of the Secretary of State has been advising the President, and if the President obtains his advice from the Office of the Secretary of State only, we know the kind of advice the President will receive. He will receive advice to take such action as is designed not to make any other country angry with the United States.

When the President appointed a committee composed of representatives of the Department of Labor, the Department of Commerce, and the Treasury Department, in addition to one appointed from the Office of the Secretary of State, he established a well-balanced committee.

Why is this committee important? I point out that the goods that are being imported into the United States are throwing many people out of employment. Many of the mills of the Nation are closing. Labor is affected, because there is more unemployment. When people are unemployed, they do not pay taxes, which affects the Treasury Department. When cotton mills are closed, commerce is affected. The Department of Commerce is charged with the responsibility of looking after the commerce of the United States and seeing to it that it keeps rolling.

The importance of this new committee, looking at the problem from the point of view of doing justice to the United States, is apparent.

Another reason why I am interested in the problem is that, although I have not examined recent figures, South Carolina manufactures approximately 28 percent of textiles in the United States, and North Carolina and South Carolina together have more than 50 percent of the production. Naturally, therefore, I am interested in the problem. One hundred and seventy-five thousand people are unemployed as a result of the competition that is going on. In a great many mills in South Carolina some men and women are working only 3 or 4 days a week. I venture to say that a good many of the mills of North Carolina are in the same condition as are those in South Carolina. In the last 7 years 74 mills in North Carolina and South Carolina have closed. Some of those mills have been operating with three shifts. The effect has been reduced production by the textile industry of this Nation.

Let us examine the problem for a minute from the standpoint of national defense. No one knows much better than I do what effect this problem has on our defense posture, because I have worked in the textile industry. I worked in the spinning room and in the weaving shop of cotton mills for 10 years. If a war should break out tomorrow, a great many of the mills would be immediately notified by the Government to start conversion to the kind of goods that are required in war. For example, a cotton mill is located within one-half mile of my home. When the Second World War broke out, the mill was requested to manufacture duck cloth for tents for the soldiers to sleep under.

We also know that other mills were immediately asked to manufacture cloth out of which suits could be made. Still other mills were immediately asked to make cloth out of which shirts, sheets, and underclothes for the soldier boys could be manufactured.

If we do not have such textile mills in America, we shall not have any place to go to obtain these necessities for our defense.

Therefore, from the standpoint of employment, taxes, and other important standpoints, the proposed program is far reaching.

During the past months we have talked a great deal in the Congress about Federal assistance to depressed areas. We just recently passed a bill appropriating millions of dollars to give assistance to unemployed persons in depressed areas of our land. This is something we must do to help unfortunate people who live under our flag. It is the humanitarian and only just thing under the circumstances.

However, there is much more that we can do in regard to these depressed areas than just appropriate money to help people who are out of work. We can, of course, give special effort and attention to finding these people a way of earning a living. Relief rolls are like some medicines: good for the moment as a cure, but dangerous in the long run because they could be habit forming.

We must find a preventive for these depressed areas. I rise today to speak in regard to one depressed area of our Nation which knows no individual State

particularly, but which stretches across the entire eastern part of our Nation and primarily in the New England area and in my own southeastern area.

What I speak of are the textile industries of the United States, and particularly the cotton textile industry. I know of no other single industry in America which is in a more depressed state, productionwise, profitwise, or employmentwise, than the cotton textile industries of America.

This was the first industry to feel depression, and the tragic thing about it is that this industry could have been helped long before relief rolls formed, and before the soup kitchens organized, by the simple stroke of a pen by the former President of our United States at any time during the 8 years the Republicans held the reins of the executive branch of Government.

This matter of concern over unfair foreign competition threatening to drive our textile mills out of business is nothing new to me. It was roughly 12 years ago that I rose to oppose at home, in the U.S. Senate, and elsewhere, proposals by Government people and business people to support a rejuvenation of the Japanese textile industry and the construction of textile plants in other nations around the world.

Of course, I was labeled a reactionist and an obstructionist by many. The fact is, I was almost a lone wolf on this matter 12 years ago.

I warned that a Japanese industry, manned by cheap labor, would drive Americans out of business and be capturing markets abroad. Little did I realize that not only would they be put into this type of competitive position abroad, but that our former administration at home would drop the barriers of protection to our domestic employees and mills, and allow these goods to come into the United States and put our people out of work and our mills out of business.

Prior to and during the Eisenhower administration I took the floor of the U.S. Senate to argue for relief for our cotton textile industries. I have written statements to committees, I have spoken before committees, I have appeared before the former President of the United States, I have written the former President of the United States; I have sent representatives to the State Department, to the Tariff Commission, and to the Agriculture Department; I have appealed to every known source in the U.S. Government under the past administrations for assistance—and all to no avail.

Every means of relief possible was placed before responsible officials in our Government under the Eisenhower administration, but without success. The only action that has ever come forth during the past 12 years to protect our industries has been the arrangement of voluntary quotas with one country, which has absolutely no effect because we have no such voluntary system with other countries.

Besides, I place little faith in voluntary quotas because they are always set by the other country, with the United States having nothing to do with the arrangement of the quotas. The only genuine relief that can be given our cotton textile industries and to those unemployed souls in this field is mandatory import quotas.

It is not so much the unfair import of material goods that places the United States at a disadvantage in this situation; it is the import of coolie labor—yes, near-slave labor.

What we are calling for, and what I am calling for is an import quota against the importation of the products of slave labor to the United States. What I am calling for is protection for the textile employees of this country. What I want to see is the unemployed put back to work. Certainly I am interested in the millowner, because he is a part and parcel of this great land of ours, and because labor and management need each other. But we are not importing cheap cotton; we are not importing cheap cloth; the cheapness of the foreign products lies in the slave labor which manufactures it.

As we all know, not long ago President Kennedy appointed a Cabinet-level advisory committee headed by Secretary of Commerce Luther Hodges to study the textile import situation. This committee is scheduled to file a report with the President upon which we anticipate he will act to help the textile industry.

In this connection I have been in touch with various members of this Advisory Committee, and even with the President. I sincerely hope that the efforts of those who have been engaged in this business will be climaxed by a recommendation from this Committee which will result in affirmative action by our President to give solid and lasting relief to the domestic textile industry.

Certainly there is no more fertile field in which our President can take a hand to bring relief to depressed people than in our textile industries. I shall not go into a great volume of statistics at this time because they have been on file, mounting, for the past 10 years in the Tariff Commission, the Agriculture Department, the White House, the Labor Department, and the Commerce Department, and especially in the State Department.

However, I think it is sufficient to mention at this time that during the past 9 years in North and South Carolina alone, 74 textile plants have closed down and 15,000 employees have been thrown out of work.

Is this not reason enough for action? Should this depressed area of our economy not get priority treatment? Does this not sound a warning that unless mandatory import quotas are invoked, the jobs of 350,000 more textile workers in North and South Carolina alone will be in jeopardy and the great textile mills in which they work stand under threat of being closed down?

I have cited figures concerning only North and South Carolina, because South Carolina is my native State, but I have included North Carolina because North and South Carolina, textilly speaking, are wedded today as one. We are sister States, and in textiles our economies are tied together. But there are areas of our Nation engaged in cotton textile manufacturing who stand under the same threats of unemployment and bankruptcy, as do the textile workers and the mills of North and South Carolina.

I earnestly and prayerfully hope that the words we are setting forth in the U.S. Senate today will not be heard in a moment of interest and lost in the rush of other business by those in responsible places where decisions are made on such matters. I hope that men in places of decision will concentrate and think hard about the thousands of unemployed men who distastefully step forward each week to pick up an unemployment check and a bag of surplus food.

Give us mandatory import quotas so that these men may go back to work, with their heads held high, and the great mills can once again hum at capacity.

This, in my opinion, will give our economy a great thrust, and will help a great part of America to move forward.

While I should like to speak at length on this subject, I realize that many other Senators wish to speak also. However, I point out that I am vitally interested in the problem, mostly for the welfare of the laboring people of my State.

Mr. PASTORE. I thank the Senator from South Carolina. I am happy now to yield to the Senator from Maine.

Mr. MUSKIE. Mr. President, I thank the distinguished Senator from Rhode Island for yielding to me. I compliment him and his subcommittee upon the excellence of the report. I particularly compliment him on his handling of the matter on the floor this afternoon. I think he has dealt with the domestic problem realistically, and has indicated its true dimension and depth. At the same time, he has discussed it in the context of our international trade requirements.

I think at the outset of my remarks this afternoon I ought to indicate my interest in the problem in terms of its impact upon my own State. In 1957 Maine was down to 16,500 workers in this key industry.

This represented a drop from 26,000 workers in 1949. In January of this year Maine's textile employment had dipped to 12,200. Many workers are employed part time.

According to estimates by the Federal Reserve Bank of Boston, a realistic projection of employment trends in the textile industry would result in a 40 percent decline in textile employment in Maine between 1957 and 1970. By 1970 we would have only 9,900 workers employed in our textile mills. This is not a pleasant prospect for those communities where textile plants are the backbone of the industrial economy.

To those not immediately concerned with the textile industry, the import figures may not seem too critical. When we read that total imports represented only 7.2 percent of domestic consumption in 1960, it is easy to say that this, after all, is a modest share of the market.

Unfortunately, this figure does not carry the full impact of the increase in imports. It is the rapid invasion of the domestic market which has demoralized a highly competitive and volatile industry.

In 1948, for example, imports of cotton cloth and made-up cotton goods amounted to less than 1 percent of domestic production. By 1958 this figure had reached 3.5 percent, and by 1960 it stood at 8 percent. The increase in total imports of textiles, from 131 million square yards in 1948 to 1.3 billion square yards in 1960, represents an increase of 905 percent. This is a figure which cannot be ignored.

In the mid-1950's we were primarily concerned with the imports of cotton goods from Japan. In the 10-year period between 1948 and 1958, annual cotton textile imports from that country increased from 14 million square yards to 260 million square yards. In 1957, our Government negotiated a voluntary import program with the Japanese which slowed down the rate of Japanese exports to the United States. As a result of this agreement, imports from Japan slowed to a rate of 282 million square yards in 1960. This represented an increase of 22 million square yards, or 8 percent, between 1958 and 1960.

Unfortunately, this program was undermined by increases in imports from other nations. In 1948, countries other than Japan exported 50 million square yards of cotton goods to the United States. In 1958, when Japan exported 260 million square yards to our country, other countries exported 171 million square yards. In 1960, imports from Japan totaled 282 million square yards, while imports from other nations had reached 797 million square yards. In other words, our agreement with Japan had served to restrict Japanese opportunities without solving our domestic problem.

I was pleased to note in the subcommittee's report a recommendation for a flexible and expandable import quota program for textiles and textile products. This recommendation parallels a suggestion I made in an address to the board of directors of the National Shoe Manufacturers Association, March 3, 1961.

I ask unanimous consent that the text of the speech be inserted in the RECORD as a part of my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR MUSKIE AT A MEETING OF THE BOARD OF DIRECTORS, NATIONAL SHOE MANUFACTURERS ASSOCIATION, INC., BILTMORE HOTEL, PALM BEACH, FLA., MARCH 3, 1961

No one who has spent even a brief sojourn in the Capitol can escape the truism that a program cannot be written on a clean slate. This is the most acute dilemma of the New Frontier, as it is the most vexing problem for any Senator or Representative. In preparing for my meeting with you I have been struck again and again by the complexity of the import problem, its interrelationship with a whole range of domestic and international policies, and the conflicting interests which surround any policy proposal. In short, the quest for a sensible trade policy is fraught with as many obstacles and hidden dangers as a voyage into space.

James Reston, the perceptive Washington observer for the New York Times, put the problem very neatly in a recent column:

"The more the Kennedy administration studies its new responsibilities the more conscious it becomes of the complexity and interconnection of its domestic and foreign problems.

"It cannot even think of balancing the budget without the cooperation of the industrial nations of Western Europe, whose defense policies and programs for the underdeveloped nations affect the level of expenditure in Washington.

"It cannot increase its sales of American goods abroad without thinking about the competitive cost of those goods. And this in turn brings it to the hard political question of restraining the wage demands of organized labor, which helped bring it to power in the first place.

"It cannot survey the challenges of the cold war without talking about the need for greater sacrifices. Yet, the slackness of the domestic economy forces it to concentrate for the time being not on sacrifices but on raising the minimum wage for workers, increasing medical assistance to the aged, pouring more money into the economically distressed areas, adding to the long-term unemployment benefits, adding to the profits of the construction industry, adding to the social security benefits, and increasing subsidies to the farmers."

Reston did not mention, although he might well have done so, the critical problem of imports in certain segments of our economy. To one who represents a State suffering from production losses in the textile and shoe industries, this is one of the supreme dilemmas. In my remarks to you I hope to suggest some ways in which we may resolve the question.

My comments are, of necessity, exploratory. I am not an expert on international trade, and I would not be helping you if I pretended to be one. I am not going to promise the ultimate panacea for your problem; this would not be honest or realistic. One of the most gratifying aspects of my discussions with representatives of this association has been the realistic and constructive attitude toward a problem which affects the economic survival of many of your members.

The dilemma of trade policy is one which confronts not only public officials; it is a perplexing problem with which every businessman must wrestle. He must recognize that in asking for action, or inaction, on this issue, he is asking the Federal Government to take a hand in determining economic and business policy. That policy will effect our domestic as well as our international economic structure.

Around the turn of the present century, when the trust problem loomed large, H. O. Havemeyer, the sugar magnate, said: "The tariff is the mother of trusts." If this were true today, and if the tariff were a stimulus to monopoly, the solution to the problem of protecting small business in its fight for survival would be simple, for then the easiest way to break the grip of monopoly and free the domestic economy for competition by smaller industry would be to allow imports to enter the country freely. Free trade would then be a logical policy for the United States to follow.

Import competition today is far from being the prime foe of monopoly. Indeed, the facts point to just the opposite conclusion. Most large businesses today are on the liberal side of the foreign trade issue. The annoying fact is that the incidence of import competition rests primarily on small business. The paradox of our economy is that import restrictions may be necessary to insure domestic competition.

The principle on which free trade arguments rest is that of comparative advantage. In the absence of governmental interference, countries export those goods in which they are relatively most efficient and import those goods which they cannot produce except at costs higher than those abroad. In the United States our traditional export advantage is in large industries such as office machinery, business machinery, various kinds of machine tools and other items produced on a mass basis.

At the other end of the scale are products that do not enjoy such advantage but which, usually because of their high labor content, can be produced more cheaply abroad in countries where unit labor costs are considerably lower than in the United States. Usually these are in our smaller industries. Previously, even in this area, our manufacturers enjoyed the advantages of more efficient plants and machinery, but in recent years economic recovery in these countries has included the installation of modern machinery.

Even a cursory examination of the list of applicants for relief under the escape clause of the present Tariff Act reveals that the problem is one of small business. Among the industries appealing for relief have not been the large mass-production industries. They have been, rather, the small producers of such products as handmade blown glassware, spring clothespins, wood screws, fluorspar, women's fur-felt hats and hat bodies, garlic, tobacco pipes and bowls, velveteen fabrics, and violins and violas. I do not need to remind you of the difficulties confronting the footwear industry.

The American public is rightly concerned over the problems of the small businessman. Even if there were no competition from abroad, competitive pressures from large-scale industries at home are making it ever more difficult for the little fellow to keep his head above water.

The trade problem, then, can be expressed as follows: We realize that imports are necessary in the light of the international political picture. It is necessary, for example that Japan maintain her exports at a high level even to maintain her present level of living. This means that she must export her goods somewhere. The products that she can export most effectively are the products that compete with the products of our own small businessman. The same story can be repeated in other comparable low-wage countries.

The problem is to find a formula that will make it possible for these nations to expand their trade in an orderly fashion, but not at the expense of the survival of our own small businessmen. The question is, "How?"

Imports, and hence exports (since exports and imports are two sides of the same coin) make our lives more abundant. If it were not for the importation of coffee, tin, tea, cocoa, and a number of other raw materials, our economy would be less efficient than it is, and our lives would be duller.

Obviously, as far as the products just named are concerned (they are on the free list and consequently may enter the country without restriction) there is no problem. Problems arise in connection with the importation of goods that are produced abroad more cheaply than in the United States but which can be produced in the United States at costs that are not unreasonably high.

The issue is not whether noncompetitive imports are necessary, because they obviously are. It is whether imports that are competitive with the products of American producers are necessary. The problem is particularly acute with respect to countries where the conditions of labor are vastly inferior to those in the United States.

Japan is an obvious illustration, because here is a country that is only a little larger than Montana in area, deficient in resources,

and with a population of over 92 million. Yet, with their modern machinery and with their outstanding managerial skills the Japanese are able to produce many manufactured goods far below the costs of producing similar goods in the United States, such as cotton textiles, footwear, hardwood plywood, silver-plated flatware, china tableware and, more recently, components for the electronics industry. Are such imports necessary? If not, a case might be made for restricting them for the sake of preserving wage standards in the United States.

However, the problem is not this simple. An independent, free Japan is strategically and militarily essential to the United States. Japan is at the very center of the arc of our defenses in the Far East. In a real sense Japan is one of the most critical outposts of the free world facing the Communist bloc. If she should ever be alienated from the free world alliance and become totalitarian, the result would be a major catastrophe for the United States.

The same point can be made for practically every one of the other nations providing the major sources of competition for our domestic footwear industry. They cannot maintain and expand their standards of living without adequate export markets. They cannot help pay the cost of protecting the free world without exports. Restrictive trade actions on our part must be considered in the light of these problems.

Does this mean that we shall have to open our doors wide to imports? I think not. We need to find a formula which will regularize such trade so that it will not have a disruptive effect on the American small businessman. The need is for a formula which will regularize imports and which, while allowing these nations to expand exports, will do so without putting the entire displacement cost on our small businesses. Again, the question is "how"?

There are several proposals pending before Congress to deal with the problem of competitive imports. Some involve restrictions on concessions under the General Agreement on Tariffs and Trade, some would curtail the power of the President on tariff determinations, some would transfer the President's powers to the Tariff Commission, and some would give relief to specific industries. These proposals are the least likely to gain approval, although present economic conditions have given proponents more strength than usual for strong protectionist recommendations.

Those proposals more likely to gain strong support are the "trade adjustment assistance" approach, the equalization of labor standards approach, and a possible voluntary quota system.

The trade adjustment assistance proposal would provide that when imports are deemed to be necessary in the national interest, domestic producers should be assisted in adjusting to such imports. "Adjustment" is at the very center of the philosophy of the individual enterprise system. It is because rigid protectionism interferes with economic adjustment that it can be so harmful to a free economy.

But, should the cost of economic adjustment be borne by those who are in the immediate line of impact? One of the saddest episodes in the industrial history of Great Britain was the failure of the Government to assist the hand-loom weavers who were thrown out of work in the latter part of the 18th century by the new power looms and other automatic textile machinery. Hundreds of workers whose livelihood depended on the old hand methods were allowed to starve to death in London and other British cities.

The trade adjustment proposals (one of which was introduced several years ago by President, then Senator, Kennedy) would provide that if it can be shown that domestic producers cannot adjust to import competition over a reasonable period of time the Government should assist them to adjust by such devices as stepped-up employment compensation, retraining of younger workers, early retirement of older workers, expanded services of the U.S. Employment Service to bring jobs and workers closer together, payment of moving costs of workers from one part of the country to another, and adjustment loans to employers at low interest rates, together with technical assistance to enable them to shift to new lines of products.

In the pending bill for aiding depressed areas there is a provision giving special attention to the problem of import competition.

Such assistance can be defended so long as the emphasis is on adjustment and not on mere relief. Mere relief does not get to the heart of the problem. Like the payment of subsidies, it would only aggravate the problem. Such an approach should not be considered as a complete answer, in any event, since it does not provide for an orderly transition within a given product line or group.

There are bills which would provide for the imposition of supplemental tariffs to equalize the differences between unit labor costs in the United States and in countries where they are considerably lower. Most proposals along this line are dangerous because they can easily incorporate the fallacy of equalizing unit costs of production here and abroad. If all costs were equalized trade would be shut off entirely, for it is differences in costs of production that make all trade possible.

It seems clear to most objective observers, however, that competition from a country where wage costs are a small fraction of what they are in the United States (allowing for differences in productivity) differs from competition from countries where wage costs are closer to costs in the United States.

At the present time a Committee on Market Disruption is wrestling with this problem in Geneva under the auspices of the General Agreement on Tariffs and Trade (GATT). What is sought here is not complete equalization of labor standards among countries, but rather some manner of dealing with the problem of the temporary demoralization of markets.

The major obstacle in the legislative field on this proposal is in determining comparable statistics and information on labor and production costs in the countries affected. Without accurate and comparable statistics, the fair labor trade standards approach tends to be meaningless.

An approach which has appealed to me is the voluntary export quota system, tied in with those areas where there is a wide differential in labor standards. We now have agreements with Japan, in connection with cotton textiles, plywood, and a few other products, whereby the Japanese have voluntarily imposed quotas on their shipments to the United States. This system has had a limited success which indicates a possible expansion into other fields on a mutually beneficial basis.

I am considering the introduction of legislation which would provide for a sliding-scale import quota system, through negotiated agreements, to solve troublesome problems of import competition. Under such a program, when it had been determined that a wide differential in wage costs was causing great difficulty to an American industry, the United States would enter into negotiations with foreign countries to establish voluntary quotas which would allow a base quota equal to the average level of imports for a given period, plus a proportion of any increase in the domestic market.

A fixed import quota is open to the criticism that it would place imports in a straitjacket. A sliding-scale arrangement, such as I have suggested, would have the advantage of sharing an expanding market with foreign producers on an orderly basis.

Such a sliding-scale arrangement could be based on either import quotas, or tariffs, or a combination of the two. It might also be possible to ease restrictions wherever it can be demonstrated that the foreign country with substandard labor conditions has succeeded in improving its wages and other working conditions.

The key to this proposal is its recognition of the opportunity of other manufacturers, foreign as well as domestic, to compete in our market on roughly equal terms. It would protect our own businesses from unfair competition, open the door for orderly competition from abroad, and exercise minimum interference with a free market.

We cannot turn the clock back to the Smoot-Hawley tariff, unless we are willing to say that the American economic system cannot compete under any circumstances. But this does not mean that we should turn our back on the critical trade problems which confront our own businessmen, particularly in the small business segment of our economy.

Our business community must take every opportunity to compete at home, and to compete abroad for growing markets in other countries. They must not assume that competition stops at the water's edge. At the same time, our Government must recognize the problems and take appropriate steps to insure a fair contest.

Mr. MUSKIE. Mr. President, that represents, I believe, a sound approach to our import problem. As the subcommittee states in its report, import quotas "should not be fixed for all time. They should be flexible. As the market in this country grows, imports should be allowed to increase. We are not proposing that the status quo be maintained."

In recent years there has been a tendency for positions on trade policy to become frozen. Those who support free trade have argued on an all or nothing basis. Protectionists have taken a similarly rigid position. I submit that neither extreme will meet the interests of this Nation or of the free world. The economies of nations are interrelated and independent. Trade between nations can no longer be left to chance. We must plan our trade policies. This, to me, is the great virtue of the Organization for Economic Cooperation and Development. It carries with it the recognition that expanded opportunities for all countries in the free world depend on sensible and sensitive attention to the needs of all economies, and that planning in this area may well result in greater free trade.

In my speech on March 3, I recommended a sliding-scale import quota system, provided through negotiated agreements, to solve troublesome problems of import competition. This recommendation was tied to our problems with low wage countries. As you know, this is a critical problem in the textile industry.

Under such a program, when it had been determined that a wide differential in wage costs was causing great difficulty to an American industry, the United States would enter into negotiations with foreign countries to establish voluntary quotas which would allow a base quota equal to the average level of

imports for a given period, plus a proportion of any increase in the domestic market.

The key to this proposal is its recognition of the opportunity for other manufacturers, foreign as well as domestic, to compete in our market on roughly equal terms. It would protect our own businesses from unfair competition, open the door for orderly competition from abroad, and exercise minimum interference with a free market.

I am encouraged, Mr. President, to see that others share my feelings on this question. The Subcommittee on Textiles has made a similar recommendation, and Dr. Alfred C. Neal, president of the Committee for Economic Development, has suggested a parallel approach. Dr. Neal's comments are worth quoting here:

> The explosive effects of advanced technology in a country with extremely low wages can be damaging to all—to the exporting country because it overexpands, and to importing countries because they cannot move people and resources out of damaged industries fast enough. Controlling the most serious of these cases by means of agreed quotas, which are temporary and expandable, may be the only reasonable alternate to the disruption of the whole trading system of the West.

These are encouraging signs of a more realistic approach to our trade problems which offer hope to the textile industry in dealing with its import problems. It encourages me as I continue my efforts to develop sound legislative language to implement my proposal and that of others who are concerned with this problem.

In closing, Mr. President, I wish to pay particular attention to one other important facet of the subcommittee report. The subcommittee has recommended that "appropriate Government agencies, including the Business and Defense Services Administration, expand, and initiate where necessary, textile research. This should include basic research to develop new industrial and consumer uses for fibers and fabrics, and an expansion of economic research on the textile industry as well."

In my remarks, this afternoon, I have stressed import control. I would not want to imply, by this, that we can solve our problems by reducing the problems of competition. An important part of the long-term solution to the problems of the textile industry is an aggressive research program. The industry has not done enough. The only major effort in this direction has been in the field of synthetic fibers and fabrics, where large corporations have been able to devote their considerable resources to the task. The textile industry is primarily a small business industry. Its profit margins have been narrow and erratic. Under the circumstances, and in view of the long delay in meeting conditions beyond the control of the industry, we have a responsibility as a nation to stimulate research.

Such research would have benefits reaching beyond the manufacturing operations to the producers of raw materials, including cotton and wool. Such a program would be important to agriculture as well as to industry. We have a precedent in the research now conducted by the Forest Products Laboratory under the U.S. Forest Service. This is a program which benefits the manufacturer and the raw material producer. I urge that strong efforts be made to provide a similar approach for the textile industry.

I wish to commend the chairman of the subcommittee, Senator PASTORE, his colleagues, and the staff for the well-balanced and substantial report they have produced. They have given us a sound list of recommendations, including flexible import controls, increased research, a more realistic depreciation allowance to encourage investment in new plant and equipment, and an end to the two-price cotton support program. I endorse these recommendations wholeheartedly, and I hope that they will receive the attention they deserve, in Congress, in the administration, and in the textile industry.

Mr. ERVIN. I commend the able and distinguished senior Senator from Rhode Island for a masterly presentation on the serious problem which affects the textile industry, and assure him that I share in full measure his views as to the remedies which should be prescribed to cure the lamentable condition in which the textile industry now finds itself.

Some months ago, the Business and Defense Services Administration of the Department of Commerce published a booklet entitled "Textile Outlook for the Sixties." In this booklet they made two very significant observations about the danger of judging the plight of the textile industry solely upon the basis of comparison of the imports of textiles and the exports of textiles.

I read from page 50. The first point is this:

> It can be commented, however, that in judging the importance of textile imports, pound for pound, or dollar for dollar, comparison between imported and domestically produced items tends to give a false picture. In many cases, the imported item is equal in value to domestically produced items selling at a higher price, and allowance should be made for this fact in any value comparisons. Import statistics show foreign value, which is much lower than value in the United States.

Then they point out the second effect of imports upon prices in the domestic market:

> In any given market, a relatively small percentage of an imported item priced well below the domestic price has a major effect in upsetting the price structure and the normal competitive relationships.

I should like to ask the distinguished senior Senator from Rhode Island if he agrees with those two observations made in this study by the Commerce Department.

Mr. PASTORE. I agree with them implicitly. This is one point we must bear in mind, and I am very happy the Senator from North Carolina has brought it out.

If we are dealing with a glass, such as I am holding in my hand, and the glass is made in a foreign country, but the same kind of glass is made in the United States, then if the one made in the United States costs twice as much as the one made abroad, it means, if we are measuring it in terms of dollars, the manufacturer abroad is sending in two glasses for every one that is made in the United States.

Therefore, the number of people who would be displaced in the United States would be twice as many as ordinarily, for the simple reason that the quantity would be greater, inasmuch as the price is lower. That is the first point that is being made.

The second point is also true, for the simple reason that if we measure this item in terms of what the imports are, percentagewise, with the total American production—and that happens to be 8 percent—the argument is made, "Why should it deflate the American market if what is coming in is only 8 percent of our total production?" It has a very depressing effect. When they are trying to job this glass to the American retailer they point out that the glass would be made abroad for one-half the cost in the United States. That has a tendency psychologically and otherwise to depress the American market. I agree with the examples which have been cited by the Senator from North Carolina.

Mr. ERVIN. I thank the Senator. I believe that the unfortunate situation in which the textile industry finds itself is due to a maladministration of the Reciprocal Trade Agreements Act. When Cordell Hull recommended that the United States enter into a reciprocal trade agreement with other nations, he said it was not contemplated by this concept that the United States would encourage the importation into the United States of articles which were produced in the United States in surplus quantities. He said to have true reciprocity the United States should make agreements with other nations whereby the United States would export to those other nations the goods which we produced in surplus quantity, and whereby the United States would import from those other nations the goods which the United States either did not manufacture or could not manufacture effectively.

The United States has been for many decades producing surplus quantities of textile products. When we encourage the importation into this country of products which we are producing in surplus quantities, we necessarily create a situation which deprives domestic industry of its domestic markets, or impairs domestic markets; it deprives investors in that industry of a fair return upon their investments; and deprives the workers in that industry of their jobs.

An article came to my desk a few weeks ago which shows the danger which the textile industry is suffering in attempting to meet the Japanese competition. The article relates that there were two boys, one a Japanese named Togo, and one an American named Smith, both of whom attended the same textile school approximately 50 years ago. The illustration continues:

> FIFTY YEARS HAVE NOW PASSED
>
> Togo who came from a wealthy Japanese family is now head of a textile mill in

Japan. This mill is using 30,000 bales of cotton a year and employs 1,000 Japanese workers. Strange as it may seem, Smith is manager of an American mill of the same size also using 30,000 bales of cotton a year and employing 1,000 American workers.

TOGO HAS THE ADVANTAGE

Last year the administration in Washington, D.C., sold Togo 30,000 bales of cotton at a price of 6 cents a pound less than the price Smith had to pay for his 30,000 bales in the U.S. market. This meant a saving for Togo's mill of $30 a bale or a total saving of $900,000 for the year as compared with what the U.S. mill paid.

There was another advantage even greater than this which Togo had over his American classmate and competitor. Togo pays each of his workers on the average $2,500 a year less than the American textile worker is paid. In other words wages paid workers by Togo was $2,500,000 less than Smith paid. Add these two items together, and it shows that the American mill paid out $3,400,000 more in 1 year than the Japanese mill.

There are other items such as supplies which cost the American mill much more than the Japanese mill paid which greatly increased the above figure.

Mr. President, North Carolina is deeply interested in this problem because approximately 230,000 North Carolina families earn their livelihood in textile plants. I think the subcommittee headed by the distinguished senior Senator from Rhode Island made a most significant contribution to the preservation of one of the basic American industries in the report which it has brought before the Senate and in the recommendations which it has made.

Under a system of flexible quotas by countries and by categories, we can deal with the situation in such a way as to give our friends in the foreign countries such reasonable proportion of our domestic market as they need to have, and at the same time preserve the investments of our local manufacturers in the domestic market, and also the jobs of our textile workers.

To my mind, from the figures pointed out in the subcommittee report and so ably expounded by the distinguished Senator from Rhode Island, showing the loss of more than 240,000 textile jobs since 1947, and the liquidation of approximately 839 textile plants in the same period, it is absolutely essential that action the special committee has recommended be taken at the earliest practical moment.

I thank the Senator from Rhode Island.

Mr. PASTORE. I thank the Senator from North Carolina.

Mr. President, I yield to the distinguished junior Senator from North Carolina.

Mr. JORDAN. Mr. President, first, I commend the distinguished senior Senator from Rhode Island for the fine report which he and his special subcommittee have made and brought before the Senate today. I commend him for his clear explanation of the report this afternoon.

Two years ago, when a similar report was before the Senate, I had the privilege of attending some of the hearings. At that time most useful work was performed. Two years have elapsed, and further studies have been made. I commend the Senator from Rhode Island for submitting the report today and making recommendations which are now up to date.

I commend the President, also, for appointing a top level, Cabinet-level committee to study the problem carefully and recommend what can be done to solve it. Furthermore, I commend the President for appointing former Governor Hodges, of North Carolina, to be chairman of the committee. I do not know of anyone in government today who knows more about the textile industry than Secretary Hodges. He has spent the major portion of his life in the textile industry. He is an able businessman in many other ways. I feel certain that he will be able to compile a report in a satisfactory manner and supply the President with the kind of information he wants.

I further commend the President for appointing Mr. Price as the head of the subcommittee, because he has done most able work in securing testimony to present to the full committee, in order that it may be transmitted to the President in the way it should be presented.

Mr. President, this is the first time I have seen any ray of hope since the beginning of our work on this problem. I think the Senator from Rhode Island will agree with me.

This problem is not new. We have been working on it ever since I have been a Member of the Senate. We have gotten nowhere whatsoever with it. We have made recommendations and all sorts of efforts to accomplish results. However, I believe President Kennedy and his associates are really serious about wanting to do something to help the textile industry, so perhaps something will be done about it now.

I have talked to a number of my friends in the Senate on this subject on numerous occasions. There seems to be a sort of widespread feeling that this problem is one which affects only the Southern States and the New England States. That is not true. The textile industry embraces practically all of the States in the Union, some in greater degree than others. Recently, at Atlantic City, at the largest textile machinery exposition ever held in the United States, 42 States were represented in which there was active participation in the textile business.

Not long ago it was said that California industry is not in the textile business. But in Los Angeles and in all the other parts of that area some of the finest garments ever made in this country are being produced. Furthermore, New York, Pennsylvania, and all the other States, right down the line, are also engaged to some extent in the textile business.

As my colleague the Senator from North Carolina [Mr. ERVIN] pointed out, the largest payrolls in North Carolina come from the textile industry; and the same is true in South Carolina and in other Southern States. But the large garment manufacturers and the clothing industry generally are not located in the South. Millions of persons in other States are engaged in the same business.

So the present most difficult situation applies to more than the textile industry itself; it has a great bearing on many other industries. For instance, the chemical industry is largely dependent on the textile industry. The manufacturers of rayon are today the largest consumers of textiles in the United States. Every yard of cloth that goes into the clothing I wear and into the clothing that other Senators wear is finished and dyed by means of the use of chemicals. That industry is a very large segment of the textile industry.

So there is no end to the ways in which the textile industry affects the entire Nation. In prior years, approximately half a billion dollars has gone into textile machinery. The textile machinery manufacturing industry in the United States employs thousands and thousands of persons, even though they are not directly connected with the textile industry. However, they certainly are dependent on the textile industry.

So I wish to associate myself with the remarks my colleagues have made. All of them have brought out very pertinent points which have a most important bearing on this situation; and I desire to commend all of them for what they have stated.

It has been brought out that the textile industry is second only to the steel industry as regards employment in the United States; and we have heard statements about the number of textile plants that have been liquidated. There is no use in repeating those statements.

However, in closing I wish to say that the American textile manufacturing industry is capable of providing by normal, full-time operation, every yard and every pound of textiles needed in the United States.

What really has happened to the textile industry is that the very great volume of imports has been imposed on top of the production in this country. Not only has that situation resulted in a very large surplus; it has also depressed the prices of the goods made in the United States. The American manufacturers have done everything within their power to meet the low prices of the imported goods, but they have not possibly been able to meet them; and that situation has depressed the American textile industry to a point where it must obtain some relief, or else soon there will not be any textile industry in the United States.

As was well brought out, regardless of how much advance our manufacturers make in technology or regardless of how much new machinery they use, they cannot compete with imports produced by 7-cent-an-hour labor or 15-cent-an-hour labor or 20-cent-an-hour labor or with the wages paid for the production of cotton cloth in other countries.

Until about 2 years ago, our textile industry was depressed largely by the imported yardage goods. But today, in addition to those imports, the very finest garments are being imported; and those imports include dresses, sweaters, underwear, socks—almost every conceivable item manufactured in our textile plants today. For instance, in 1950, $35 mil-

lion worth of apparel was imported; but last year $250 million worth of apparel was imported. That is an extremely large increase, and it is putting our garment manufacturers completely out of business. If that development is not curbed, soon the very finest garments will be imported, in addition to the imports of cloth.

Mr. PASTORE. On that point let me state that it is constantly said that the percentage of the imports is very small, when compared to the American production in the garment industry. But the fact is that this type of import is a new development; and if it continues, the apparel industry will experience exactly what has already been experienced by the broadcloth industry. In other words, if this development goes unchecked, it will grow and grow, and the gap will become narrower and narrower, and the situation will become much more serious.

So now is the time for this matter to be given the utmost attention, in order to make sure that only what can be absorbed without entirely disrupting our industry is imported.

It is true that in the apparel industry the percentage of imports now is small. But if it is permitted to go on, unchecked, it will grow and grow until the situation becomes disastrous.

Mr. JORDAN. Mr. President, I thoroughly agree with the Senator's statements. Furthermore, in the report he has also approached the matter in the proper way, because, as he has pointed out, in each country there are different wage scales, different hours, different manufacturing methods, and so forth.

I wish to commend the Senator from Rhode Island and his committee for their fine report. I thoroughly agree with the position they take.

Mr. PASTORE. Mr. President, in conclusion, in regard to the statements to the effect that the situation will be disastrous unless something is done in regard to the imports of apparel from Japan, let me state that I understand there has been an agreement reached by which Japan agrees to limit the amount of her imports of apparel into the United States. That arrangement bears on quotas, which is precisely what we are talking about.

I say that if that can be done on that score, similar steps can be taken by those in the United States, by completely analyzing this market and doing what is right under the circumstances. Such action is most important, because I am afraid that the threats not to cut foreign-made cloth and the threats to boycott foreign-made goods will cause much more injury than flexible quotas would.

Mr. JORDAN. Mr. President, I thank the Senator from Rhode Island for his remarks.

Mr. RUSSELL. Mr. President, will the Senator from Rhode Island yield to me?

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Does the Senator from Rhode Island yield to the Senator from Georgia?

Mr. PASTORE. I am happy to yield to the Senator from Georgia.

Mr. RUSSELL. Mr. President, the debate this afternoon, so ably led by the distinguished Senator from Rhode Island, has most graphically illustrated the very grave situation which faces a basic and an essential industry—the textile industry. The present situation is most important, because this threat is posed not only to the mills that spin and weave the fabrics—whether the gray goods, the rough fabrics, or the finer products. In addition, this threat is posed to every segment of the textile industry—to every needle plant in the Nation, whether it is working on the finished fabrics and the most expensive dresses or whether it is working on overalls. I do not believe that any one of the 50 States does not have some industry and some workers who are living under the threat of losing their jobs and losing their plants, due to the mounting flood of imports.

I assert without the slightest fear of contradiction, Mr. President, that no fairminded man from any place on the globe could examine all the facts which affect this situation and fail to reach the conclusion that some immediate and drastic action must be taken if we are to preserve this industry.

I commend the Senator from Rhode Island and the Senator from South Carolina for their diligent services in ascertaining the facts and in providing them in concrete form to the Senate and to the country, so that any person who is able to read can understand the seriousness of this situation.

Mr. PASTORE. Mr. President, will the Senator from Georgia be so gracious—and I know he will be—as to include the Senator from New Hampshire [Mr. COTTON]?

Mr. RUSSELL. Of course I include him, too. I would not willingly omit his name from the list, because he is outstanding in his ability to convey in a few words the seriousness of the threat to any industry, including the textile industry. In that respect he has never completely recovered from the experience of his service in the House of Representatives. He uses few words to express his thoughts in a very clear way.

As a matter of fact, one of my great pleasures has been to read his statements. Two or three years ago I went to him and asked him to put my name on his mailing list, so that his statements would be sent to me; and ever since then they have been part of my "must" reading.

Mr. COTTON. Mr. President, I thank the Senator from Georgia and the Senator from Rhode Island for their glowing tributes.

Mr. RUSSELL. Mr. President, it is unnecessary for me to go further into this matter. The facts are set forth in the report made by the subcommittee headed by the Senator from Rhode Island, and they have been garnished and repeated today on the floor of the Senate.

I merely wish to state that it is high time that some action be taken. We cannot afford to leave the fate of this industry to the sense of fair play of foreign governments whose people are looking for employment and who are seeking means to export their goods, because if we do, we shall be exporting the remains of our industry. We must take some action.

Mr. President, I have been greatly heartened by the fact that the distinguished President of the United States, who has been so recently transplanted from this body to the most powerful and important office under the canopy of heaven, has a very keen awareness of the critical nature of this problem, and that he will proceed to take some steps that will preserve the industry.

There is nothing I can add to the facts which have been stated. I do wish to state that any movement which looks to preserving the remains of this all-important industry in these United States will have my wholehearted support.

I thank the Senator from Rhode Island for yielding to me.

Mr. PASTORE. I am glad now to yield to my colleague from Rhode Island.

Mr. PELL. Mr. President, as I read the report prepared by the Special Subcommittee To Study the Textile Industry under the chairmanship of my distinguished senior colleague from Rhode Island, I express publicly what I have expressed privately to him and that is my pride at being his junior colleague. I congratulate the Senator and the committee for it.

I notice the committee sought to emphasize the national aspects of the problem; but each of us is from a State, and the States involved are particularly hard hit. I think I am correct in stating that our State has been more hard hit than any other State. Does not my senior colleague agree?

Mr. PASTORE. Yes. As a matter of fact, I think that, as between the North and the South, if I may use that expression to delineate the regions of the country, the impact has been much more severe in New England, and particularly severe in the State of Rhode Island. When I was Governor of the State, between 1945 and 1950, practically 45 percent of our entire income came through the textile industry. Now it is down to about 15 percent, or even less. We have seen many mills close their doors. It is true that some of them have migrated to the South, but the fact of the matter is that, even with the migration, which has come to a halt to a large extent, the importation of foreign-made goods has had a disastrous effect. Only during the last recess of the Congress I was approached by members of the Rhode Island Textile Association, which gave impetus to the renewal of the investigation.

I may say to my colleague from Rhode Island it is true that in Rhode Island we have felt the impact much more so than practically any other State of the Union, with the possible exception of Massachusetts, or perhaps equally with Massachusetts.

Mr. PELL. Actually, to be more specific, and to pinpoint it to our city of Providence, there has been a decline of 500 percent, from 10,000 to 2,000, in jobs in the last 10 years.

Worry has been expressed that the suggested steps will interfere with our foreign relations, but I think this point

has also been covered by my senior colleague; namely, that the effect of boycotts in America upon the world as a whole will be more harmful than the effect of quotas. Quotas may have a short-term effect in individual foreign countries; but if the present calamitous conditions in our textile industry continue, so that labor and industrial organizations carry out their present threats of boycotts, I think we shall suffer more in the world as a whole.

This is an immediate problem, and the solution of flexible quotas is offered as an immediate short term solution. For the long term, the report covers the idea of enlarging the programs of Business and Defense Services, quicker depreciation of machinery, greater emphasis on research and development, and elimination of the two-price cotton system. These can, one believes, solve the problem in the future. What we have to do is face up to the problem now.

Mr. President, finally, I ask unanimous consent to insert in the RECORD an editorial from the Providence Journal of last Sunday.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BRIGHTER PROSPECTS FOR AID FOR THE TEXTILE MILLS

Prospects that the Washington administration finally may do something to remove some of the weight of foreign competition from the already depressed textile industry appear brighter than they ever have been.

Senator PASTORE's Senate Textile Subcommittee has recommended action in tones more urgent than in the last report of this study group in 1959. Commerce Secretary Hodges has said that a Cabinet subgroup has been working night and day to turn out recommended action for the executive branch. The feeling in Washington is that these recommendations will be forthcoming soon, perhaps in a matter of days.

The Pastore committee's recommendations go straight to the heart of the textile problem. It recommended more spending by the industry on research and product development; a more liberal depreciation rate on machinery and equipment, permitting faster tax writeoff than at present; study and possible elimination of the two-price cotton system which favors foreign textile mills; and continued collection of research data by the Commerce Department.

All these steps are necessary, particularly elimination of the double price system, which makes no economic sense and is burdensome to domestic textiles, and the faster depreciation writeoff.

Another problem is foreign competition. Probably no one in the industry would say that this is the only problem. Textiles are suffering from internal ills that are the outgrowth of fiber technology and have nothing to do with foreign-made goods. Yet, the industry is depressed; it is fighting a rugged battle with costs as it tries at the same time to move into newer fibers and their products. The added weight of foreign competition has been enough to tip the scales for many a mill toward going out of business.

To cope with this problem, the Pastore committee urged that quotas be applied to foreign textiles, country by country and by specific category of goods all the way from yarns through woven fabrics to finished goods. The objective would be to prevent foreign competitors from concentrating on particular kinds of goods and demoralizing the market for those goods.

Perhaps such drastic action is needed to give the textile industry time to improve its competitive position along the lines suggested by the committee. But we would hope that such quotas, if now applied will not have to become permanent Government policy, and that they could be reduced or abolished once our textile plants in this country are in a better competitive position. For it should not be overlooked that quotas can be a two-edged sword. Once the United States begins applying them to aid domestic industries, no matter how hard pressed, other nations are likely to slap quotas on our own exports, and the net effect on the American economy as a whole might be very bad.

If the domestic textile industry can produce and sell in the domestic market without fear of reckless price cutting as a result of foreign imports; and if, also, machinery can be depreciated, as it is operated, on a three-shift instead of a one-shift basis, there need be little concern about the plowback of earnings into efficient plants and equipment. Although all mills will not do this, perhaps most will because the technology of textile competition today is such that modernization has become basic to competitive survival.

Rhode Island, with a heavy stake in the yarn as well as the woven fabric ends of the textile industry, hopes that the Cabinet subgroup will move quickly to recommend some more effective kind of at least temporary protection from cutthroat foreign competition, and to endorse the other constructive proposals of the Pastore committee. Then it will be up to the executive branch to move equally fast to implement the recommendations.

Mr. PASTORE. I thank my colleague.

Now I am happy to yield to my colleague from the adjoining State of Massachusetts, the junior Senator from Massachusetts.

Mr. SMITH of Massachusetts. Mr. President, I have listened with great interest to the discussion on the future of the textile industry. No subject is more important to New England. The first textile mill in America was built in my State in 1813. Massachusetts owes much of its growth to the textile industry. Even today it is one of our largest employers.

I was extremely impressed with the presentation of the Senator from Rhode Island [Mr. PASTORE] this afternoon. I commend him and the entire subcommittee on the fine work they have put into the report.

The facts show without a doubt that imports of certain textiles pose a definite threat to our domestic industry. These imports no longer come primarily from poor and undeveloped nations. In the last 2 years, the greatest percentage increase has come from nations of Western Europe.

I am sympathetic to the requirements of trade that are imposed by our foreign policy. I realize that to export, we must import, and that trade barriers provoke retaliation. However, it is not fair that the burden of such a policy be borne by a few industries or by one or two regions. Some additional protection is essential, until the fair labor standards we have in the United States are extended to other nations of the world. The textile industry deserves protection equal to its importance to our national security and to our region's economy.

I am confident that the administration will exercise its authority in this field wisely. The special committee the President has set up is a fine one, and indicates his interest in the problem.

But Congress also has a responsibility in this field, and there is no better way for us to exercise it than through the process of informed discussion, such as we have seen on this floor this afternoon. I am sure it will bear fruit.

Mr. PASTORE. I thank the Senator.

I yield now to the Senator from New Hampshire [Mr. COTTON].

Mr. COTTON. Mr. President, 3 years ago I submitted in the Senate the resolution which resulted in the creation of the special subcommittee whose report we are discussing today.

What I said in the Senate then, on April 14, 1958, is still true today:

The textile industry is a major segment of our national economy. It employs more than a million persons. Directly and indirectly, it provides the bread and butter for an estimated 15 million Americans. It is also important to our national defense. During World War II the Armed Forces required more than 10,000 different types of textile items.

However, despite its size, its essential nature, and its importance to our economy, the textile industry has long been in a depressed and declining state.

A great many of us have been deeply concerned about the developments in the textile industry for a number of years. We have seen employment drop sharply and steadily. Since the end of World War II, 345,000 textile jobs have disappeared, including more than 12,000 in my own State of New Hampshire. Since 1947, 717 textile mills have been liquidated in this country.

We have watched earnings drop.

We have watched exports drop.

We have watched imports rise.

As a Nation, we simply cannot afford to let this basic industry continue to decline.

The Senate unanimously approved my resolution, and the Textile Subcommittee got right to work under the leadership of the Senator from Rhode Island [Mr. PASTORE] and the Senator from South Carolina [Mr. THURMOND].

I take this opportunity to say to Senators: After listening to the able and analytic presentation by the distinguished Senator from Rhode Island, the chairman of the subcommittee, the Senate surely has some idea of the thoroughness, the efficiency, the zeal, and the dedication with which the Senator undertook the leadership of the subcommittee over the period of its work. It was a privilege and a pleasure to work under his leadership. He was fair; he was thorough; he has done a magnificent job. The report which is presented to the Senate is very largely the handiwork of the Senator from Rhode Island.

I cannot be too emphatic in expressing my appreciation of the work of the distinguished Senator from South Carolina [Mr. THURMOND], who has a thorough grasp of this problem because of its connection with his own State. The Senator from South Carolina has contributed greatly to the work of the subcommittee, and he will speak shortly.

I know all Senators will appreciate, after the Senator's remarks, what I have had the privilege of appreciating all the

time in respect to the work of these two men.

We held extensive hearings in Washington both in 1958 and in 1961. We held hearings in many of the important textile centers of the Nation. We have produced two unanimous reports on the problems of the industry.

But these detailed, fact-filled reports serve only as funeral orations for the textile industry unless prompt steps are taken by the executive branch of the Government.

The heart and soul of our reports has been an urgent recommendation for the establishment of quotas on the importation of textile and apparel products.

In no other way can the flood of imports be brought within the bounds of equity and safety.

Let me make it clear, as a member of the committee, that we are not trying to use quotas to build an insurmountable wall against imports. The quotas must recognize the vital role of the international trade in our national well-being, and its importance to other nations. At the same time, they must prevent the American market from being used as an international dumping ground for goods produced in countries where the wage rates are one-tenth of what they are here.

The facts are available for the development of country-by-country quotas for each category—I repeat, and emphasize—each category of textile products with the kind of flexibility that will do justice to all.

I hope, and I have faith to believe, that the President will establish import quotas before it is too late.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. SCOTT. Mr. President, I would like to join my colleagues in endorsing the findings and recommendations of this special subcommittee report on the "Problems of the Domestic Textile Industry." As you know, Mr. President, this subcommittee was set up initially as the result of a resolution introduced by the junior Senator from New Hampshire [Mr. COTTON].

Although not a member of the subcommittee, I read with interest its report of March 14 and with this in view, I would like to comment briefly.

In the past 2 weeks this House has passed two major pieces of legislation. One, the area redevelopment program, and the other, the extended unemployment compensation proposal. Both of these bills I supported on final passage, although I had personally sponsored or cosponsored alternate proposals. These programs are necessary for not only the relief of our unemployed and their families, the firming up of our national economy—but the economic health of our Nation as well. These programs will cost our taxpayers and our business community a great deal, so it was with interest that I noted that in 1954 imports of major textile manufacturing amounted to about 73 percent of our exports. By 1960, I understand that our trading position in the international textile market had been reversed—that is—imports amounted to 170 percent of exports. This downward trend would have to have an adverse effect on our employment situation, and we find that industry representatives estimate that in the garment industry alone that imports have resulted in a direct loss of more than 23,000 jobs and an additional loss of more than 8,000 workers who were indirectly affected. Over the past decade textile mill employment in the Middle Atlantic States alone has declined 47 percent.

Mr. President, I feel that it is contradictory for the Congress to be passing legislation to alleviate the unemployment problem on one hand and on the other to allow a system to exist that creates or worsens the problem.

We surely must not attempt to solve this increasing problem with steps that would have an adverse effect on our relations with friendly nations, but we can and should take a course of action that is at once equitable to our foreign friends and that will avoid further losses to our domestic textile industry.

It is because of these reasons, Mr. President, that I wholeheartedly endorse the recommendations of the subcommittee in the hope that some immediate action in this field will be taken.

Mr. STENNIS. Mr. President will the Senator yield?

Mr. PASTORE. I yield.

Mr. STENNIS. Mr. President, I commend the Textile Subcommittee of the Senate Interstate and Foreign Commerce Committee for its recent splendid report on the problems of the domestic textile industry.

I have the privilege of representing one of the largest cotton-producing States in the Nation. Cotton production and the domestic textile industry are of the utmost importance, not only to my own State, but to the entire Nation. Imports which compete with our own domestic industries must be carefully watched and constantly reviewed and considered.

The report emphasizes the serious import problem facing the textile industry and points out the necessity for prompt action. Total textile-apparel imports into the United States increased rapidly to an all-time high in 1960. All divisions of the industry and all stages of manufacture from yarn through apparel are heavily involved. For example, in 1960, cotton yarn imports jumped to over 14 million pounds, having been over 1 million pounds as recently as 1958. Cotton cloth imports had an all-time high in 1959, but doubled that record in 1960. Total imports of textile manufactures were valued at nearly $1 billion in 1960.

For the most part, textile-apparel imports are simply low-wage-produced replacements for U.S.-made products. Such imports serve only to displace American jobs and aggravate the dollar drain.

The report of the Pastore committee sets forth its findings relating to these postwar trends in the textile industry. It reviews the scope of the international textile market with particular reference to the garment apparel industry and to the carpet and rug industry. It points out, for instance, that until 1951 imports of wilton velvet carpet amounted to about 5 percent or less of domestic production. This was true despite the fact that the 60 percent ad valorem duty on carpets, which had prevailed before World War II, had been reduced to 50 percent. The duty was further reduced to 25 percent in 1951 and imports began to increase. By 1956, these imports rose to more than 10 percent of domestic production. Further reductions in duty to the present level of 21 percent brought substantial increases in imports. By 1960 they amounted to more than 25 percent of textile production.

My particular concern over this arises from the fact, as I mentioned before, that Mississippi is one of the largest cotton producing States in the Nation. The welfare of the majority of its people is dependent on cotton. The astounding increase in importation of cotton in the form of yarn, cloth, apparel, carpets, and the like from about 80,000 bales in 1952, to approximately 600,000 bales in 1960, presents a most serious problem in our country. To the cotton farmers the elimination of 600,000 bales of cotton consumption, as a result of textile imports, means a reduction of 750,000 cotton acres, equivalent to the acreage of 45,000 family-size cotton farms, involving a quarter of a million people.

This means the loss of 42 million man-hours of work and the loss of $110 million in farm income.

Acreage reductions by our cotton farmers have brought the supply and demand for raw cotton roughly in balance here and abroad. The constantly increasing importation of textiles, unchecked, present a major problem for our cotton farmers.

The market here at home is the major outlet for U.S. cotton. With imports expanding, the U.S. textile industry will make a weak recovery for the current recession. With an effective textile imports control applied promptly, a vigorous recovery would be probable.

Mr. President, the need in the United States for prompt, effective import restrictions appears to have approached a level of world understanding that should make possible the use of such controls without serious worldwide implications. And the effective way to do this, of course, is to impose quotas on each country for each category. The time has come when we must meet this serious problem, and I sincerely hope that the administration will use existing authority to bring imports under control.

Mr. THURMOND and Mr. JAVITS addressed the Chair.

Mr. PASTORE. Mr. President, I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, as a member of the subcommittee which studied the problems of the domestic textile industry, I should like to express my appreciation to the able chairman, the Senator from Rhode Island [Mr. PASTORE], for his leadership and for the splendid way in which the hearings were conducted.

I should like also to express my appreciation to the distinguished Senator from New Hampshire [Mr. COTTON], the original author of the resolution, on

which a number of us had the pleasure to join as cosponsors to establish the Textile Subcommittee. The Senator has done magnificent work on the subcommittee.

Mr. President, despite the efforts of many of us to bring to the attention of the National Government the drastic plight of the U.S. domestic textile industry, I fear that many still do not appreciate the plight of this segment of our economy, which is so essential to our military mobilization base.

I would recommend to each Member of Congress, and particularly to the members of the President's Cabinet Committee on Textiles, a study not only of the report of the special Senate Textile Subcommittee issued on March 14 but also the testimony taken by that committee in February. The evidence is conclusive that our domestic textile industry continues to contract at an alarming rate.

Between the period 1947–57, while sales of manufactured products were up 112 percent, the sales of textile mill products were up only 44 percent. Even this gain in sales of textile mill products somewhat surprising, for the per capita consumption of such products in the United States dropped from 30.9 pounds in 1950 to 23.8 pounds in 1960.

The continuing contraction of the domestic textile industry is apparent by whatever yardstick may be used, whether it be equipment in place, employment, mill liquidation, prices or profit.

In 1957 there were over 21 million cotton spindles in place in the United States; but by 1960 cotton spindles in place had declined to less than 20 million. In the short period between 1957 and 1959, woolen spindles in place declined 4.3 percent; worsted spinning spindles, not including those in carpet mills, declined 11.1 percent; and worsted spinning spindles in carpet mills was down 16 percent. The decline was even worse with regard to looms in place. Cotton looms in place decreased between 1957 and 1959 from 350,000 to 324,000, a decline of 7.4 percent; and woolen and worsted looms in place decreased in the same period by 12 percent.

The employment picture is the blackest of all. Between 1947 and 1957, 325,000 jobs in the textile industry disappeared—a loss of 24 percent. The employment decline continues at a drastic rate as shown by the fact that in the short interval between January 1957 and November 1960, another 75,000 jobs disappeared, which represented a further decline of 7.5 percent.

While there is no positive way to record all textile mill liquidations, 710 mill closings between 1947 and 1957, involving the loss of 196,000 textile jobs, were reported; and in the subsequent period between 1958 and 1960, there were an additional 128 mills which closed their doors and dissolved the jobs of 33,000 additional workers.

Since the base period of 1947–49, through January 1961, the cost of living in the United States has gone up 28 percent, while during the same period, the average price of textile products is down 10 percent; the average price of cotton products is down 8 percent, and the average price of manmade fiber products is down 20 percent. For the third quarter of 1960, textile profits, as a percentage of wages, were 2.4 percent, as contrasted to manufacturing generally, which was 4.3 percent. In December 1960, mill margins had narrowed for 5 consecutive months.

Although the narrow margins, low profits and declining prices, combined with the archaic and unrealistic equipment and machinery depreciation rates, have prevented the conversion to new equipment and the desired level of expenditures for research and development by the textile industry, the difficulties of the industry are in no measure due to failure of the industry to keep up a fast rate of increase in productivity. Between 1947 and 1957, although employment was down 40 percent, the production of broadwoven fabrics increased 2 percent. In 1947, 9 square yards of broadwoven fabrics were produced per man-hour, but by 1957, production had increased to 14.1 square yards per man-hour, an increase in productivity of 57 percent. Even in the short period since 1957, there has been a further increase in the productivity of broadwoven fabrics of 8.5 percent. Productivity in the basic textile industry has increased 70 percent since 1947, far more than the average increase for manufacturing generally.

While a number of factors—such as the decrease in per capita consumption of textiles, unrealistic depreciation rates and the decrease in exports because of the growth in productivity capacity and the trade barriers against American exports accompanying this increase—have played a part in the decline of the domestic textile industry, the basic difficulty lies in the astronomical upsurge of low-wage imports. The picture may be seen in a nutshell by considering the proportion of imports to exports of textile products. In 1954, imports expressed as a percentage of exports, were 73.5 percent; in 1956, 111.3 percent; in 1958, 118 percent; and in 1960, 170.3 percent.

Between 1950 and 1959, exports of cotton cloth were down 13.6 percent, while imports of cotton cloth were up 400 percent. Since 1948, total imports of textile manufactures are up more than 900 percent, there having been an increase of 100 percent since 1958.

Only a few years ago, the proportion of the quantity of imports as a percentage of domestic production stood at an insignificantly low percentage. Such is not the case today. In 1948, imports of cotton cloth were less than 1 percent of domestic products, but by 1958 were 3.5 percent of domestic production, and in 1960 were 8 percent.

Imports of wool cloth were only 1.7 percent of domestic production in 1948, but in 1960 were 16 percent of domestic production. Imports of manmade fibers in 1948 were only 1.2 percent of domestic production, but in 1960 were 5.4 percent. Imports of wilton and velvet carpets in 1948 were 3 percent of domestic production, but in 1960 were almost 26 percent.

At this point in my remarks, Mr. President, I ask unanimous consent to have inserted in the RECORD Special Report No. 17 of the United States-Japan Trade Council, dated March 6, 1961, on the subject of the "Tariff Commission Escape-Clause Investigation on Carpets and Rugs."

There being no objection, the report was ordered to be printed in the RECORD, as follows:

UNITED STATES-JAPAN TRADE COUNCIL
SPECIAL REPORT NO. 17

Subject: Escape-clause investigation; carpets and rugs.

The American Carpet Institute, Inc., on February 3, 1961, filed a new application for an investigation under the escape clause of carpets and rugs. The Commission on February 13 announced an investigation. Public hearings will be held on May 23.

In 1958 the Carpet Institute filed its first application, and on January 12, 1959, the Commission found by a 3-to-2 vote that imports were not causing or threatening serious injury. In June 1960, the Carpet Institute requested that article 28 of the GATT be invoked to modify previous concessions, but in December 1960 the request was denied since, "the industry's request for relief was basically a claim from injury resulting from increasing imports and that application for such relief could be made to the Tariff Commission under section 7 of the Trade Agreements Act as amended."

The basic claim of the domestic industry is that since the escape-clause proceedings in 1958 imports have increased dramatically and that domestic shipments have declined as shown in the following table taken from the application for relief:

[Thousands of square yards]

	Imports	Domestic shipments	Percentage of imports to domestic shipments
1957	4,686	34,180	13.7
1958	4,638	32,847	14.1
1959	7,011	39,351	17.8
1960	8,300	32,300	25.7
1960 (11 months)	7,540	29,658	25.5

The industry also alleged that Japanese imports as opposed to imports from Belgium and other countries have increased as shown by the following table taken from the application for relief:

Country of origin of current imports

	Belgium	Japan	Other	Japanese as percent of total imports
1955	3,377	109	521	2.7
1956	3,664	181	575	4.1
1957	3,627	355	704	7.6
1958	3,550	548	540	11.8
1959	4,948	1,459	604	20.8
1960 (11 months)	4,064	2,695	789	35.7

Upon these facts, it would appear that the domestic industry has a strong case for relief under the escape clause.

Mr. THURMOND. Mr. President, what this report shows is that the United States-Japan Trade Council, which would quite naturally be opposed to this escape-clause investigation, feels that our domestic wilton and velvet carpet industry has a strong case for relief under the escape clause.

As high as are the quantities of imports in proportion to domestic production, the rate of increase is even more alarming. Between 1948 and 1960, there was an increase in imports of cotton

manufactures of 1,477 percent, with an increase of 134 percent between 1958 and 1960. Between 1948 and 1960, there was an increase in imports of wool manufactures of 315 percent, with an increase of 107 percent between 1958 and 1960. Between 1948 and 1960, there was an increase in imports of Wilton and velvet carpets of 700 percent, with an increase of 60 percent between 1958 and 1960. Between 1948 and 1960, there was an increase in imports of manmade fibers of 1,150 percent, with an increase of 104 percent between 1958 and 1960.

The story with regard to garments and apparel paints the same woeful picture. In 1958, imports of various categories of apparel stood at 8.3 million dozen, and 2 years later in 1960, stood at 14.8 million dozen, an increase of 79 percent.

In view of these statistics, when viewed not as cold and impersonal economic statistics, but in terms of ever-increasing unemployment and as loss of essential war mobilization base—this vital industry being ranked second only to steel by the Defense Department—the recommendations of the special Textile Subcommittee are by no means drastic. Indeed, they are the bare necessities for implementation in order to correct this disastrous and distressing situation.

Briefly, the recommendations are as follows:

First. Flexible import quotas on textile mill products, and on garments and apparel, and on manmade fiber staple, filaments and filament yarn, by country and by category of product.

Second. Continuation and expansion where necessary, of the program of data collection and research by the Business and Defense Services Administration to shed increasing light on the problems of the domestic textile industry.

Third. Increased research by the textile industry itself and appropriate Government agencies.

Fourth. More realistic depreciation rates on equipment and machinery to permit more rapid writeoff for tax purposes in order to promote modernization.

Fifth. Elimination of the two-price cotton system, and if this be done gradually, then tariffs or fees should be imposed on cotton imports to make it possible for our domestic manufacturers to be more competitive with foreign manufacturers who can buy our own cotton under the present system at an 8-cent per pound advantage.

Mr. President, it is my hope, therefore, that no one, and particularly the President and his Cabinet Committee on Textiles, will underestimate the essentiality of implementing the recommendations of the Textile Subcommittee as a minimum for the corrective action that is demanded by the serious plight of the domestic textile industry.

Mr. PASTORE. I thank the Senator from South Carolina. I am happy to yield to my friend from New York.

Mr. KEATING. Mr. President, I wish to add my word of commendation to the distinguished Senator from Rhode Island and his fine committee for the hard work that they have put into this problem and for the excellent report that they have produced.

I believe also that the President of the United States should be commended for making one of his first decisions the creation of a Cabinet level committee to look into the problems of the textile and apparel industries. The problems now faced by a number of American industries due to low-wage imports are becoming more serious every single month. This is particularly true of the textile and apparel industries. Many of us have referred to our own States. The figures in my own State of New York are rather startling. In January of this year employment in the apparel industry was 303,000. In the same month Department of Labor figures showed that 81,568 apparel workers were drawing unemployment compensation checks.

That is a rate of unemployment for the industry of around 25 percent. Unemployment problems within the apparel industry have certainly become acute.

We all recognize that this is a complex issue and will not be resolved by resorting to extremes either one way or the other. However, I am afraid that if something is not done to provide needed and justified relief from excessive low-wage imports, an upsurge of protectionism will result which will not be good, in my judgment, with regard to the economy of the United States, our position in the world and with regard to all of the free world nations.

I have been very much interested in the work of the Pastore subcommittee. I have been following it closely. I note that the report which has been issued, and which has been so ably presented here today by the Senator from Rhode Island, covers the broad range of textile and apparel products, including for the first time manmade fibers, which are now facing low-wage import problems.

My study of this problem convinced me some time ago that something must be done to protect particularly hard-hit American businesses, their employees, their families and their communities. Last year, in cooperation with several of my colleagues, I introduced the Fair Labor Standards Trade Act. This bill has been refined and reintroduced this year as S. 675.

The bill is cosponsored by the Senator from Rhode Island [Mr. PASTORE], the Senator from Maryland [Mr. BEALL], the Senator from New Hampshire [Mr. BRIDGES], the Senator from Connecticut [Mr. BUSH], the Senator from New Hampshire [Mr. COTTON], the Senator from Connecticut [Mr. DODD], the Senator from Vermont [Mr. PROUTY], and the Senator from Wisconsin [Mr. WILEY].

This bill may not be the perfect instrument to achieve the desired ends—and I do not claim it is the perfect instrument—but it is my earnest conviction that it could go far to give relief to industries actually suffering from imports, while at the same time permitting us to maintain the policies and objectives encompassed in the Trade Agreements Act. It provides for a flexible import quota system, among other remedies, which can be put into effect in any given instance, always with the approval, of course, of the President.

Mr. President, this entire trade problem is becoming increasingly more widespread all of the time. Above, I referred to the new problems of the manmade fiber industry. But, there are many other industries involved, beyond textiles and apparel. In New York State, I have been in close touch with affected employers and workers from such industries as: kitchen utensils and various kinds of hand tools, small appliances, novelty items and toys, rugs, bicycles, umbrellas, light machinery, footwear, tile, china and ceramic products, athletic equipment, plumbing fixtures, steel, copper and brass, and optical equipment.

Unions too have expressed concern for the welfare and job security of their members. This is not a limited issue anymore.

I will not detain the Senate. Let me just call attention to several statements by labor leaders on the subject which appeared in the December 1960 issue of the New York State Department of Labor Industrial Bulletin. The views of these several key New York labor leaders warrant our serious attention.

Mr. President, I ask unanimous consent that there appear in the RECORD at this point the remarks of Mr. Jacob S. Potofsky, president of the Amalgamated Clothing Workers of America; Mr. Alex Rose, president of the United Hat, Cap and Millinery Workers Union; Mr. Paul Jennings, executive secretary, district 4, International Union of Electrical, Radio & Machine Workers; Mr. David Dubinsky, president of the International Ladies' Garment Workers Union; and Mr. Solomon Barkin of the Textile Workers of America.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY JACOB S. POTOFSKY

The effort to achieve fair labor standards on an international level is a natural outgrowth of the traditional opposition of the labor movement to competition based on the exploitation of labor. We strongly support this effort as a long range approach to assuring workers everywhere of a just share of their national product and of full participation in the fruits of industrial progress.

We do not view the international fair labor standards program as a method of dealing with the complex and pressing problems of market disruption and industrial dislocation resulting from the recent increase in international competition based on low labor costs. If the reciprocal trade program is to be preserved, more immediate and comprehensive action will have to be taken to meet these problems.

The apparel industry of the United States, for example, is threatened by a mounting tide of low labor cost imports from the Orient.

To forestall the destructive political, economic and social consequences of an intensification of unfair competition in this industry, prompt action is required, preferably on a multilateral basis, to safeguard historic levels of apparel production. At the same time, underdeveloped nations seeking to expand their garment industries to meet the apparel needs of their people should receive the necessary economic and technical assistance.

STATEMENT BY ALEX ROSE

The doctrine of free trade, like that of laissez-faire upon which it is based, dies hard. Sooner or later, though, our policymakers must recognize that we no longer live in a laissez-faire world, that the concept of the free market is as outdated as mercantilism.

No matter where hats are manufactured—in Italy, France or the United States—workers must use the same machinery, must get their raw materials from the same sources. The one constant, crucial variable is wages. Today, no nation can expect to keep its workforce going and its economy thriving by paying sweat shop wages. As the world of nations emerges from colonialism, competition becomes fiercer and fiercer; Japan is now bitterly moaning over the pressure from India, and India moans over the pressure from Hong Kong and Pakistan. Before long, the newly independent nations of Africa, armed with their Singer sewing machines, and paying even less wages, will be striving to sell men's suits, caps, and dresses to the American market.

Let us imagine for the moment that the free trade doctrine were extended to the outermost limits of logic and that all textile and apparel tariffs were eliminated. According to the figures of Howard Piquet, in "Aid, Trade and the Tariff," this would sacrifice the jobs of some 200,000 American workers. But India, with a population of more than 400 million people and a workforce of between 130 and 150 million would gain nothing by this drastic expedient, nor would any of the other newly emerging powers; the only ones to profit would be foreign sweatshop owners and operators.

If we were to rely solely upon the slow, natural evolution of free trade, the underdeveloped nations would have to wait some three centuries before their economies reached the point long since reached by Western Europe and the United States. In terms of simple humanity, in face of the Communist economic drive, the free world cannot, dare not permit them to wait so long.

Not trade, but substantial and sustained doses of aid are needed and needed now.

With technologies of the highest order, Western Europe and Japan can no longer justify low wages by citing the need to industrialize. Here are some 400 million potential customers for refrigerators, automobiles, television sets—and even hats. Our prime task is to increase their earning power. To that end, we should be lowering our tariffs where and when European manufacturers raise wages. We might well adopt the Federal Government's technique in 1936, when it stipulated, via the Walsh-Healy Act, that contractors and suppliers wishing to do business with the Government must pay a set minimum wage—40 cents an hour, at a time when the prevailing industry wage fell between 20 and 25 cents an hour.

This will not and need not happen overnight. Back in 1953, for example, Puerto Rico's minimum wage for our industry was 22 cents an hour; today it has climbed to 75 cents an hour. We might apply the same "escalator" scale to European and Japanese manufacturers seeking business with the United States. They could set up two basic minimum wage standards—one paid to those workers producing for the American market, the second to those who produce for other markets. Our high standard could serve as an incentive, spurring Europe and Japan to raise itself in the same "bootstrap" fashion as did Puerto Rico.

STATEMENT BY PAUL JENNINGS

Before commenting on the ICFTU economists' recommendations, we must consider these facts: (a) Relative industrial growth abroad has been growing at a faster rate than our own; (b) American corporations are investing heavily in new plants abroad. Products formerly made here for sale here and abroad are manufactured elsewhere—which means jobs are exported; (c) unemployment in some areas of the United States is substantial. Competitor countries, like Germany, Great Britain, and Switzerland, have serious labor shortages and import workers; (d) we must export more to reverse our negative balance of payments, yet quotas on American-made goods are still tight.

Specifically, with respect to the ICFTU economists' suggestions, I find them unsatisfactory because technologically, we no longer have an edge. In many industries, labor costs are now a major, if not decisive, factor in competition. Such costs range from 10 to 15 percent of ours to one-third as in Japan.

The proposed criteria, based on wage relationships in exporting countries, will prove complicated and, ultimately, ineffective. Wage rates should be brought at least to our national minimums within definite time limits.

As of now, there are too few consumers to absorb the world's output. Planned, long-range loan and investment programs on governmental and international bank levels can help to create them. Electrification of Latin America, Asia, and Africa, for example, would stimulate demand for electrical goods. And the same would be true for other basic programs.

STATEMENT BY DAVID DUBINSKY

The American labor movement has long recognized that international trade is a positive tool which can be of assistance in raising living standards of workers throughout the world. This is why it continues to support the reciprocal trade agreements.

Nonetheless, many unions are disturbed by the scramble for American markets which emanates from some countries where wages (even when combined with fringe benefits) are but a fraction of our own.

The development of sound trade relationships between nations does not mean that domestic labor standards and employment need to be jeopardized. Hence international trade while fostered and liberalized cannot remain unregulated.

This can be attained, in part, by safeguarding the levels of historical output of domestic industries while permitting imports, either under existing tariff rates or under lower tariffs negotiated under GATT (General Agreement on Tariffs and Trade), to satisfy domestic demand above the safeguarded levels. Such action should, of course, be supplemented by long range measures designed to foster a better climate for international trade relations—including the extension of fair labor standards throughout the world with due recognition of the state of economic development of the different countries and the productivity of their industries.

STATEMENT BY SOLOMON BARKIN

Advancing foreign labor standards through control of imports is desirable but not practical on a large international scale. Restrictions on imports made under substandard conditions in the exporting countries appear possible but such limitations will affect only a narrow range of goods. It is possible to prescribe minimum labor standards for the production of goods governed by international commodity agreements.

The problems of foreign competition for American industry, both at home and abroad, are intense because the most modern technology and advanced managerial methods have been adopted by foreign countries enjoying lower labor costs.

While higher costs of transportation and capital and lower efficiency and smaller total output handicap these countries in some instances, there are many foreign industries where the volume is sufficient to permit them to enjoy all the benefits of mass production and to achieve high efficiency. This is true of textiles and apparel.

The maintenance of the latter industries in this country in the face of growing foreign competition can be achieved only by safeguarding a basic level of domestic output and placing upon these industries the obligation of instituting the most modern and efficient procedures. Moreover, these industries need constantly to seek new uses and expanded domestic markets for their products. A program of safeguarding the physical volume of domestic production will help achieve these goals.

Mr. KEATING. Mr. President, I have always been a supporter of the Reciprocal Trade Agreements Act. I do not intend to depart from that position. I wish to continue to support it, and I shall continue to support it.

As has been pointed out by the distinguished Senator from Rhode Island, the move which is being made here is not a protectionist move. It is to avoid extremes. It envisions a moderate course of action. It provides flexibility to permit changes as conditions change. However unless we take some moderate and reasonable steps in this direction, I fear that we will be faced with extremes, either in the way of protectionism or in the way of a disruption of our economy and the world economy, the like of which we have not seen in a long time.

I again commend the Senator from Rhode Island and thank him for focusing our attention today on this problem. I take great heart in the support which he has received on the floor of the Senate in what he is seeking to accomplish.

Mr. PASTORE. I am now glad to yield to the Senator from New York.

Mr. JAVITS. Mr. President, I would prefer to speak on my own time, so the Senator from Rhode Island will not have to yield to me before he concludes his own remarks.

Mr. PASTORE. Very well.

When the Textile Subcommittee proposed in 1959 that an effort be made to control the rate of textile imports there was a considerable outcry. This would disrupt our relations with friendly nations, we were told. It would go against our basic policy of liberalizing trade.

And the American economy could absorb the workers displaced by imports in the declining industries. If these things were indeed true there would be no need for concern about rising imports. But observation shows that they are not.

And what could be more disruptive of friendly relations with other nations than effective boycotts? In terms of international economic policy, this is a form of anarchy. It is something which we in Government could not control. But we should not be too hasty in condemning the motives of those who suggest this solution to the problems which are very real and very urgent to them. In our first report the Textile Subcommittee recommended what we thought to be a reasonable and workable solution to this problem, namely, regulation of the rate at which imports enter the country. We did not propose that the level of imports be frozen. Indeed, we

recommended further study before the final determination of quotas should be made.

We recommended the establishment of a textile interagency committee, and suggested that perhaps this was the appropriate agency to administer a program of quotas.

A textile interagency committee was established, but its performance—to put it quite mildly—was disappointing. We recognize now that this form of organization will accomplish little, and are pleased to see that President Kennedy has seen fit to abolish this committee together with a number of others which appeared to be serving no useful purpose.

At the time we thought that flexible quotas would be a reasonable approach to this difficult problem. But, while there was a good deal of lipservice paid to this recommendation, nothing came of it.

After carefully reviewing the events of the past 3 years, the Textile Subcommittee reached the conclusion that positive action must be taken. To us it appears that the more orderly procedure of instituting quotas on textile mill products, by category, and by country, is far more desirable and in the long run better for all concerned, than the action of individual unions or others who might impose boycotts. Let us be clear on one thing, however. If our Government does not take reasonable steps to insure an orderly solution to this problem, others will take it into their own hands, and the consequences of this could be unfortunate indeed.

We have not spelled out in detail how we think these quotas should be determined, nor have we gone into the question of who should administer them. We have ideas on these things, of course, and these will be advanced at the appropriate time. Our first step has been to present the facts.

This has been done in our supplementary report, and some of them I have summarized today. To us it appears that we are rapidly approaching a turning point—a decision must be made.

Opponents of any form of regulation point out that we still import something less than 8 percent of total domestic production. But these are the same persons who a little more than 2 years ago were pointing out that imports amounted to less than 3 percent of domestic production. How high does this percentage have to go before there is recognition that imports are cutting down on employment in this country?

What we would like to stress is that the rate of imports is accelerating. The increase of the past 2 or 3 years has been more rapid than that of the 10 preceding years. It is this long-term trend which concerns us. It is not so much the present volume of imports.

If there were to be no further increase, the domestic textile and apparel industries could adjust to the present situation. All the evidence indicates that there will be further rapid increases unless we are willing to take action and take it now.

I would like to stress that we are not proposing to maintain the status quo. We recognize the economic interdependence of nations, and we accept the view that international trade must expand, not contract. We do feel, however, that the rate of expansion is important, and that we will be doing no one a favor if we permit imports to increase more rapidly than we are able to absorb them through the natural growth of our markets.

It is our sincere hope that the President's Cabinet Committee on Textiles, which was set up on the informal recommendation of our subcommittee, will agree with our view that flexible quotas will provide an orderly solution to the textile import problem. We see no other approach which can achieve this end.

We did not, of course, limit our investigation to the import problem. We recognize that there are other problems facing the domestic textile industry. We have repeated our recommendation made in the first report that the Internal Revenue Service revise its depreciation schedules as rapidly as possible. We urge again that the anomaly of a two-price system for cotton be eliminated as quickly as possible. We strongly support a program of textile research, and have recommended that an annual appropriation be made to the Textile and Clothing Division of the U.S. Department of Commerce to expand its program of data collection and research. All of these recommendations are important. But the key recommendation is the one dealing with the imposition of flexible quotas on textile mill products. If this is not done, if the industry continues to shrink, then the supporting recommendations will lose some of their force.

We feel that it is time for a careful reexamination of our entire approach to international economic policy. Many of us have been strong supporters of the reciprocal trade program. But things have not worked out exactly as many thought they would when this program was initiated. Our policy has been one of across-the-board liberalization of trade. But we also have the "no damage" rule. The question which concerns some of us is, Can we have both?

We recognize that our recommendation for quotas will not be well received in many quarters. But I would urge all members of the Senate to give it careful consideration. We cannot continue to debate this issue indefinitely while the affected industries continue to shrink, or until the workers in these industries decide to take matters into their own hands and to solve the import problem by boycotts. We feel that a reasonable and workable solution exists, and that an orderly approach to the problem of rising imports is both necessary and urgent.

Mr. President, the discussion today has been refreshing, indeed. It has been full satisfaction and compensation for the long hours that were spent by the members of the subcommittee and the members of its staff who have been making an exhaustive study of the textile industry, not only up to our report of February 4, 1959, but, indeed, to our most recent report of a few weeks ago.

We were particularly pleased when the President of the United States recognized the problem in the textile industry and created a high-level committee to make a further study.

It is my hope—I say this as a patriot, as an American, and as an internationalist—that we who are dependent upon one another in world affairs will preserve stability and world peace. I recognize all this, but I say that the best guarantee we have for peace is to keep strong our American economy, not in any foolhardy way, not in any frivolous fashion. It must be done in a sensible, reasonable, rational manner.

As I have pointed out this afternoon, many of the countries in the world are devoting themselves aggressively to the production of textile goods to be exported to the United States. The big question is, How far can we absorb imports before we render ourselves prostrate? I think flexible quotas are the reasonable answer. I hope the President of the United States will accept this recommendation and, in very orderly fashion, impress upon our allies the fact that we are engaged in this survey to see if we cannot, in a very sensible, judicious, calm and considered way, solve a very serious problem for them as well as for American textile workers and American millowners.

Mr. JAVITS. Mr. President, I should like to have the attention of the Senator from Rhode Island, because I wish to address myself for a few minutes to the fundamental thesis which he has espoused today. I am sorry that in the course of his discourse he did not find it possible to yield a little sooner, because I have been on the floor practically all afternoon. I think that illustrates, perhaps, the validity of the Senate rule that questions shall be the order of the day in terms of yielding to other Senators. However, I love the Senator from Rhode Island, so I shall make no point of that. I simply wish to make some observations on what he has said.

In my opinion, the one thing which has been missing from the whole discussion—and I would be derelict after 15 years of service in Congress if I did not speak of it precisely at this time, because there is nothing like speaking to a subject when it is an issue—is the idea that competitive factors must have an impact upon the American economy.

I yield to no one in my concern for the workers and businessmen who are affected, as I shall demonstrate in a moment. I have every desire to make certain that they shall be safeguarded as Americans and as the trustees of our valuable resources. At the same time, I think we must all realize that we are not living in a vacuum, and that what is done here will have a profound effect not only upon our foreign policy and our own prospects for business, but also, and very importantly, upon our pocketbooks, because right now we are showing an enormous surplus in trade, with exports accounting for something like $3.5 billion of income to the United States in excess of our imports. The looks of our international imbalance of payments will be much worse if we suffer any serious diminution of exports. In addition, the exports are on an upward curve right now, whereas our imports are holding relatively stable.

The reason for that, of course, is the renewed stimulation of the economic systems in many parts of the world, attributable to common markets, to trade associations, and to other similar activities of integration. In addition, there are many new countries starting, and they also are seeking opportunities to expand their trade.

Quotas have been fought against in all international affairs. In the main, in the negotiations with respect to the so-called reciprocal trade concessions, quotas probably have been the leading objectives, so far as the United States is concerned. They are fought against all over the world in terms of liberalizing trade.

Nonetheless, even I, notwithstanding my deep feelings about international trade, do not rule out the possibilities which the Senator from Rhode Island has suggested to us in his very interesting and very important presentation.

What I do point out—and I come now to my main point—is that there is a point at which two things will happen. First, at some point, factually, certain parts of American industry will be obsolescent. There are branches of the textile industry, as well as branches of every other industry in the United States, which at some particular point, due to the competitive factor, due to the overriding right of the consumer to have the highest efficiency in terms of production, may become obsolescent by the sheer force of competition or by the sheer force of the growth of technology. We cannot give an overriding guarantee to everyone that he will stay in business forever; otherwise there will not be a private economic system.

The second point, which I think is very important, and which was also not referred to by the Senator from Rhode Island, is the difficulty which lurks in the whole international trade picture. It may very well be that the overriding national interest will dictate to us a certain course in respect of international trade, perhaps under the reciprocal trade agreements program, which could be harmful. The Senator from Rhode Island has pointed out many areas which he feels very strongly are harmful. Certain sections of our domestic industry suffer in my own State of New York. As the Senator so properly said, imports have affected us. By imports, we are talking now about the concentration of imports of a particular kind at a particular time. Such imports have affected us adversely.

One type of textile imports in particular which has affected us, and about which the Senator from Rhode Island spoke, is in the carpet field. New York State has real problems in a number of areas. The imports of many other commodities have affected us, whether in the field of utensils, flatware, bicycles, or many other articles.

The important point is that where we find, as an absolute, urgent, national problem, that we cannot give protection—and I do not use that word as a word of art in the tariff field, but strictly as a word of common usage—to a particular industry in the United States, nonetheless there remains an obligation on the part of our Government to make certain that the workers are not harmed, but that the overriding national interest can permit us to safeguard them as we desire to safeguard them.

This is a grave problem, and I am delighted that the Senator from Rhode Island has discussed it. There are few Senators who can speak so eloquently and so well as does the Senator from Rhode Island. I have the deepest affection and regard for him, and those feelings, incidentally, are not in any way affected by the fact that this afternoon we had a little problem about yielding.

Mr. PASTORE. If the Senator from New York will yield on that point, I was presented with a most delicate and very difficult problem. Fifteen or 20 Senators were in a hurry to make their statements for the RECORD and then leave the Chamber. Frankly, I did not have to wait until they made their statements. I could have made my remarks first, and that would have taken only 20 minutes or so. Instead, I have been here for 3 hours or more, listening to their remarks, although I knew fairly well what they would say, because, in view of the investigation we have made, nothing new about this subject could possibly reach my ears.

So from time to time I looked toward the other side; but some Senators had gone to the cloakroom, and some had left the Chamber because it was necessary for them to meet some of their constituents in the reception room, or some Senators had to go to the telephone. But I did not wish to be discourteous. I was doing the best I could. If I injured the sensitivity of any Senator, I am very sorry, and I apologize. But certainly I did not do so deliberately.

Mr. JAVITS. The Senator from Rhode Island did not offend me. I merely was pointing out why I had to wait until now to make my statement. The Senator realizes that situation; and both he and I welcome the debate.

Mr. PASTORE. Certainly.

Mr. JAVITS. That was my point.

There are cases in which it will be necessary for our Government to do something other than proceed merely by way of quotas or higher tariffs. Other techniques, if some can be devised, may have to be used in order to deal with these problems. There are cases in which industries and, primarily the workers in them, may suffer adversely unless our Government in some way can enable them to be retrained or, if necessary, to be relocated, and perhaps to be financed, if possible, while they obtain technological training for other employment, until they can return to the mainstream of our economy.

It seems to me that unless we have some such program, to be a part of our total, overall approach to the grave problem of serious import competition, we shall not bring the situation into focus, because unless we have some such Federal Government program, I believe we shall be inclined to hold an umbrella over all—both the weak and the strong, both the efficient and the inefficient; and in that event we may encounter a grave problem of windfalls, which has developed in similar situations, with the result that those who do not deserve protection do receive it, nevertheless, because when an umbrella is held up, it is held over both the weak and the strong.

Therefore, in summary, I wish to say that as a part of whatever approach we make to this problem—and I could not agree more with the Senator from Rhode Island in regard to the urgent need to discuss the question and to come to firm solutions—and much as I know that the mainstream of all our postwar policy has been against the quota idea, nevertheless, we may even have to come to it; I do not rule it out, at all. I have too much respect for Senators who serve on the subcommittee to say categorically that we could not do that.

But in order to get the problem into focus—although perhaps this is not precisely the situation with which the subcommittee headed by the Senator from Rhode Island had to deal—I say we also must have some means by which, if we cannot satisfy a particular economic situation through quotas and through the tariff route or some other route which does not completely jeopardize our relationships with the rest of the world, when we are compelled to deal with a situation in a trade field in which some people will be put out of work by imports, we must have a Federal Government policy which will see them through in terms of Federal assistance. If we do not, and if we do not have a platform of that kind that will help an industry or a set of industries when faced with a situation similar to the one to which the Senator from Rhode Island has referred, an extremely grave situation will develop.

Mr. PASTORE. Mr. President, will the Senator from New York yield?

The PRESIDING OFFICER (Mr. PELL in the chair). Does the Senator from New York yield to the Senator from Rhode Island?

Mr. JAVITS. I yield.

Mr. PASTORE. Of course, I can agree generally with the cliches uttered and the academic observations made by my good friend, the Senator from New York. But he must take into account the fact that our subcommittee made a very specific investigation of a very specific situation in a very specific industry.

The fact is that in our investigation we found that the average worker in the textile industry is 50 years of age or older. It is not for us to say that those workers should be trained for other jobs. On the contrary, when a man 50 years of age is out of work, we must realize that he finds it very difficult to obtain another job; and thus we begin to realize how impossible it is to carry to fruition the retraining idea.

For instance, in some cities in Maine where the mills have been completely closed, we have found that those who had been unemployed were beginning to work in certain fly-by-night industries where advantage was taken of them, because after they had been out of work for so long a time and after they had exhausted their compensation payments, they finally reached a point where they

would work for $1 an hour, just to stay off the streets. That is precisely one of the situations we faced.

We made a very thorough investigation of the textile industry. We found that over a period of 10 years, while the gross national product of the Nation was zooming upward, and perhaps doubled in that period, the textile industry lost more than 800 mills. We were confronted with numerous problems of that sort.

I agree with the Senator from New York that we must consider the balance. But he will remember that in 1959 when the financial ministers met in Washington, D.C., we then first heard about the terrific imbalance in payments. Subsequently we heard, of course, a great deal about reciprocal trade.

The only reason why the President of the United States has recommended that we decrease from $500 to $100 the allowance for duty-free imports by Americans who travel abroad is that now he is beginning to realize that the situation has changed. I am not attempting to deal this afternoon with the entire international trade policy of our country. All I am talking about is the textile industry. It is the only industry our subcommittee investigated and on which our subcommittee reported.

I state that we found that in that industry, prices have declined 10 percent in the last 10 years, at the same time that prices generally in the United States have risen almost 30 percent. We found that there is a disparity of 30 percent, on the average, between wages in the textile industry and wages in other American industries. We found that more than 800 textile mills have closed, and we found that 225,000 jobs have been lost in this country, directly because of the import situation. We found that although in 1948 the imports of wilton and other carpets amounted to only 3 percent of the U.S. production, today the imports amount to more than 25 percent of the U.S. total production.

So we reached the conclusion that something must be done, not only to protect U.S. industry, but also to protect our friends abroad for we also found that mills in Japan were closing because they were overexpanded and because they did not think that Hong Kong production would enter the field. Next, mills in Hong Kong were closing because they had not thought that production in Portugal would enter the field; and mills in Portugal were closing because they had not thought that production in Spain would enter the field; and mills in Spain were closing because they had not thought that production in Egypt would enter the field; and mills in Egypt were closing because they had not thought that production in the Philippines would come into the field.

These developments are very real, not academic, and we have been talking about actual situations, not fiction.

Of course, we must meet the foreign competition, and, of course, we must consider the world situation, and, of course, we cannot raise a tariff or protection wall so high that it will crush us. I completely understand all that. But I say we must watch this situation very closely. The President understands it, or else he would not have appointed his Cabinet-level Committee.

I do not know what the President will recommend. But certainly the world market in textiles is overproduced. Unless all the nations of the world sit down around the same table we may begin to realize that we may soon encounter a situation of killing the goose that laid the golden egg. Unless all of us consider the import situation sensibly and practically, without regard to cliches and philosophic utterances, and unless we consider the impact on the textile industry and the recommendations made in regard to it by our subcommittee, we shall face a very sad situation.

The Senator from New York knows that he and I see eye to eye on the question of international problems, and our votes so indicate. I would not stand here and say he is in error when he says we sell $3 billion more worth of goods than we buy. But what do we sell and what do we buy? Why do we have an imbalance of payments? One reason why our exports are up, for example, is that we are selling jet motors to a greater extent than we did in the past. The whole prospect must be analyzed. That is what the committee did.

I am not recommending that we become protectionists. That is not my philosophy, and never will be. But the textile industry, which is considered important to national defense second only to steel, is wavering. I am not saying imports are the whole problem. I am saying imports are a part of the problem. I am not saying, "Shut out imports completely." I am not saying we should maintain the status quo. I am not saying we should have fixed quotas. All I am saying is that, as we move forward economically, with all the velocity and all the vicissitudes of our times, and the evolution of our day, we should watch the picture closely. Let us protect our friends abroad and ourselves, but let us do it by way of flexible quotas, because tariffs in this particular case will not do it.

Mr. JAVITS. I am sorry, but I do not think the Senator listened to me at all.

Mr. PASTORE. I heard every single word the Senator spoke.

Mr. JAVITS. Wait a minute, please. I was not talking in cliches and generalizations about foreign trade. I was talking about men and women who cannot hope to have decent futures, in terms of wages and security, in an industry which is having vicissitudes such as this one is. The complete solution of their problem will not come about by some kind of propping, with which I might go along. I have said I might go along with it.

I cannot accept the characterization as cliches or generalized philosophy. The American Government must put up its hard money, and the American taxpayer must back up some of the underwriting for support of industries that have been hurt by an overriding policy of American foreign trade, so they will stop being second to every other industry.

This is a problem faced by people who are 50 and older, and who have no better prospects than is the case in younger industries, which can shift for themselves.

If we are to accept the responsibility for a solution of the problem, I say we are accepting only a quarter or a third of the responsibility when we talk about what we are going to do about imports. We must establish a concrete base under every workingman, so that if he is hurt by our trade policy, he may be made whole. It will take money. I have introduced a bill on the subject. The President of the United States, who comes from a textile-producing area, when he was a Senator from Massachusetts, introduced a bill, along with other Senators, along the same lines.

I say there cannot be a complete approach to the problem, which has been so eloquently put before us today, unless the Federal Government provides some kind of Federal assistance for people adversely affected by the policy. Notwithstanding all the good will in the world, and notwithstanding how we may act on the proposal, in which I may join, as I have said, I do not think it is the full answer for the difficulties of the people who work in this industry or in any business similarly affected. That is the point I wanted to make concretely.

Mr. PASTORE. Mr. President——

Mr. JAVITS. Mr. President, I have not yielded the floor.

Mr. PASTORE. I am sorry.

Mr. JAVITS. I am glad to yield to the Senator.

Mr. PASTORE. No; I will take the floor in my own right.

Mr. RANDOLPH. Mr. President——

Mr. JAVITS. I yield to the Senator.

Mr. SALTONSTALL. Mr. President, will the Senator from West Virginia permit some remarks on this particular subject, since he is about to address himself to another subject?

Mr. RANDOLPH. I am going to address myself to this subject.

Mr. SALTONSTALL. Very well.

Mr. RANDOLPH. Mr. President, on several occasions I have had the privilege and responsibility of sharing with the Senator from New York extensive hearings, through our Select Committee on Small Business, mainly on the subject of imports and exports as they affect the independent business segment of our economy.

My colleague will recall, of course, that these hearings covered not only the impact of imports on business from the standpoint of smaller units of industry, but, also, we attempted to find if there were areas, as has been indicated by the Senator from Rhode Island, in which we might recommend balancing this program without doing violence to the program of world trade to which America is committed, regardless of the party in power.

As the Senator from New York also will recall, the hearings in his city were most productive of information which was helpful to the committee. Hearings also were conducted in New Orleans, Los Angeles, San Francisco, and Washington, D.C.

I should like to commend those Senators who, at this late hour, have been discussing the subject—the Senator from Rhode Island, the Senator from New York, the Senator from South Carolina, the Senator from Massachusetts—because, although there may be certain differences as we approach the problem as it affects our respective States, there is certainly on the part of all of us, a realization that we must face up to this problem to a greater degree than we have in the past months or years.

What the Senator from Rhode Island [Mr. PASTORE] has said with respect to the textile industry is repeated in the glass and pottery industries in the State of West Virginia. The figures of unemployment which he has set forth are the figures, percentagewise, which frankly, we understand and duplicate in a State like West Virginia. And so, I must repeat, the problem is not confined to one industry. It is a very real and vexing problem on many fronts.

I hope I have not spoken in too much generality. I sincerely compliment those Senators who are realistically discussing the problem.

I would invite the Senate's attention to the fact that in August 1960, from the Select Committee on Small Business, there was filed a report on the impact of imports on small business, and I trust those Senators who may not have had, as of this date, the opportunity of reading it will study the findings as set forth in that document.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JAVITS. If the Senator from Rhode Island will let me keep the floor, I will yield. I still have the floor.

Mr. PASTORE. The Senator still has the floor?

Mr. JAVITS. I yield to the Senator.

Mr. PASTORE. Will the Senator yield to me so that I may make an observation to the distinguished Senator from West Virginia?

Mr. JAVITS. Of course.

Mr. PASTORE. If the Senator from Rhode Island has said it once, he has said a hundred times on the public platform and in this Chamber that, in his humble opinion, one of the most challenging problems of today is the question of international trade, it cannot be separated from the premises stated by the Senator from New York. We all want more trade, but everywhere we look, we find pockets of difficulty. We find people talking about boycotts. I think we cannot let the days long past guide our future. We must look at the problem from the standpoint of today, because, in my opinion, this is one of the challenges of the New Frontier. Nations all over the world are becoming industrialized. The idea that we in America have all the talent, technology, and means of mass production is fast being dissipated. It simply is not the fact.

I believe the Senator from North Carolina [Mr. JORDAN] visited a textile mill in Japan. It was a modern mill, all on one floor. The mill was air conditioned. Girls were dashing around on roller skates, so that they could get to the looms faster. The American industry is competing with that kind of operation.

There has been an idea that we make everything the best in the United States. I salute our high level of technology and productivity, but the fact is that we are competing in a very determined world. We must look around to buy the things we do not make. We have to sell things our friends need. We both can be a little more selective.

What happens? People get together at meetings of GATT. First, all the negotiators for the foreign countries have the leading businessmen standing right behind them to advise them. Up to now, we have forbidden our business leaders to advise our negotiators at such meetings. This, of course, is our first mistake. We have diplomats making economic decisions.

I am not saying that all such decisions are incorrect, but when we observe an industry like the textile industry dying on the vine it is time to do something. That is all I am saying. I do not say we should operate by a formula so fixed and so constant that we cannot move it. It must move. It must be flexible.

I say to the Senate today what I have said a hundred times before. This is the challenge of the 1960's. The challenge of the 1960's is, How shall we promote the leadership we possess? How shall we advance our economic well-being? How shall we promote progress in America? How can we keep our friends and still be economically stable?

These are big questions. I do not think we can settle them in one afternoon. I have never pretended we could. This is only the beginning. This is a way to start.

I say to the Senate, as respectfully as I can, if there is any Member of the Senate, or any other human being in the United States, who can make a better suggestion than we have made in the report, then I shall accept it, and I will raise my hat to him and salute him as a great American.

Mr. JAVITS. Mr. President, I now yield to my colleague from Massachusetts.

Mr. SALTONSTALL. Mr. President, I should like to ask the Senator from Rhode Island [Mr. PASTORE] a question.

Would it not be helpful, since the Senator has made a very eloquent, able, and thoughtfully prepared address on the subject, to have it all in the RECORD at one spot? The Senator has been very helpful this afternoon in yielding to other Senators.

Mr. President, I ask unanimous consent, with the Senator's approval—which I believe I have—to have the address by the Senator from Rhode Island printed in one spot prior to the close of this discussion, even though it means repeating something the Senator has said before.

Mr. PASTORE. I thank the Senator from Massachusetts.

The PRESIDING OFFICER. (Mr. PELL in the chair). Is there objection to the request of the Senator from Massachusetts?

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR JOHN O. PASTORE ON THE SUPPLEMENTARY REPORT CONCERNING PROBLEMS OF THE DOMESTIC TEXTILE INDUSTRY

Two years ago I rose in this body to discuss the findings of our first investigation of the problems of the domestic textile industry. At that time I pointed out that the domestic textile industry had been declining for a decade. While the impact on different segments of the industry was uneven, only one—that producing the newer man-made fiber fabrics—had registered a gain in production.

There had been a sharp drop in equipment in place, and a very substantial decline of 24 percent in textile employment. Hundreds of mills had been liquidated. And many thousands of textile workers were prematurely displaced from the labor force. Some of the displaced textile workers, to be sure, found new jobs. But a distressingly large percentage were unable to find continuous employment again.

Textile wages had been lagging behind other earnings in this country. And this was not due to failure of the textile industry to increase its productivity. Indeed, productivity in the textile industry has increased much more rapidly than in manufacturing industry generally.

I also noted then that while the domestic textile industry was declining imports had been rising during the 10-year period covering our survey.

We noted in our first report that rising imports could not be singled out as the sole cause of the contraction of the textile industry. Many jobs in this industry were eliminated by technological change. But it was our conclusion, after review of all trends, that rising imports pose a threat to the future stability of the domestic textile industry, and that unless the rate at which imports entered the country was controlled there would be a further damage to the industry.

In February of this year the textile subcommittee held another set of hearings to bring the record up to date. Briefly stated, we found that the trends of the past decade have been continuing and in some cases have been accelerated.

The textile sales have continued to rise more slowly than the sale of manufactured products in general. Consumers continue to spend a declining share of their total consumption expenditures on clothing.

We also found that textile production rose modestly in 1959—a year of cyclical revival. But there was a sharp drop in 1960. Imports, however, increased substantially in both years.

There has been a further decline in textile machinery in place since 1957, and despite this contraction of machinery in place, that which remains is not utilized to full capacity.

Employment in the textile industry has continued to drop. Since 1957, there has been an additional decline of about 7.5 percent in the number of textile jobs in this country. The loss of jobs has varied from region to region, but all regions where textile-mill products are made have experienced some decline in employment.

As conditions worsened, more and more textile mills closed their doors. From 1947 through 1957, a total of 710 textile mills were liquidated in this country. These mills had formerly employed about 196,000 workers. From 1957 through 1960, an additional 128 mills closed their doors displacing approximately 33,000 workers.

Although the cost of living, as measured by the Bureau of Labor Statistics, has gone up 28 percent since the base period 1947–

49, textile prices have dropped almost 10 percent. As a consequence, mill margins, that is, the difference between the price of raw material and that of its approximate cost equivalent, have narrowed, and profit rates have remained very low.

In our first report we pointed out the anomaly of the two-price cotton system. Because of our agricultural price support program, the price of domestically grown cotton is higher in this country than in the world at large. This adds to the competitive disadvantage of American mills which would be unable, under the best conditions, to meet the cost of production of foreign competitors given the wide spread in wages between underprivileged countries and the United States.

Unfortunately, the situation has not been altered since then. Indeed the latest development has been an increase in cotton price support. Unless some offsetting action is taken, this will place American mills at a further competitive disadvantage.

In spite of contraction in the industry, the downward pressure on textile prices, and shrinking profit margins, the domestic textile industry has made an effort to improve its efficiency by spending large sums on new equipment.

The textile industries of other nations have not been standing still, however. Indeed, since many textile mills in other countries have been built since the end of World War II, their machinery, on the average, is newer than ours. Ten years ago the U.S. textile industry enjoyed a considerable advantage in productivity over competing foreign nations. But the productivity gap has been narrowing steadily.

We cannot assume, as many evidently do, that higher production costs in this country are offset by greater productivity. This was partly true at one time, but it is no longer so. The textile industries of other nations have rapidly increased their productivity, and their costs, especially labor cost, continue to lag far behind those in this country. I wish to emphasize that this is not because textile wages in the United States have increased too fast. In our first investigation we found the textile earnings lagged behind those of other manufacturing workers.

And the gap has been widened even more since then. Three years ago textile earnings, on the average, were 15 percent below those of manufacturing workers in general. By the end of last year, this gap had widened 30 percent. While textile wages in the United States are high, relative to those of other countries, they are low—quite low indeed—relative to the wages earned by other manufacturing workers in the United States.

The major change in the textile situation since our first report was issued has been in the international market. Textile exports have continued to decline, while imports have gone up substantially. In 1954, for example, textile imports amounted to about 73 percent of textile exports. By the end of last year, however, textile imports amounted to 170 percent of textile exports.

While there has been a fairly uniform drop in textile exports, we find that there have been substantial increases in imports of virtually all categories of textile-mill products. Since 1958, imports of cotton cloth and made-up goods have gone up more than 130 percent. Wool imports have gone up 107 percent, and manmade fiber fabric imports have increased more than 100 percent.

There have been somewhat smaller, but still substantial, percentage increases in imports of wilton and velvet carpets—up 60 percent—and silk goods where imports have gone up 35 percent. In brief, there has been an across-the-board increase in textile imports, but imports of some categories of fabrics have increased more rapidly than others.

There has also been a substantial shift in the source of imports in recent years.

Five years ago Japan was the principal exporter of many kinds of textile products to the United States. But in 1956 the Japanese textile industry agreed to limit its shipments to this country under a voluntary arrangement. It was thought at that time that this would ease the impact of textile imports on the domestic industry. Unfortunately—as the figures I have just given clearly reveal—this hope was not realized. All that has happened is a shift in the source of imports.

When Japan announced that it would voluntarily limit its shipments of cotton cloth to the United States, other nations, which had formerly exported only modest quantities of this product, stepped up their production for export purposes. As a consequence, Japan's share of our market has been cut at a time when total imports were rising strongly. In 1958, for example, Japan accounted for 60 percent of our cotton goods imports. By the end of last year, its share had dropped to 28 percent.

Meanwhile, imports from Hong Kong, which had amounted to 14 percent in 1958, jumped to 27 percent by 1960. And there were even larger percentage increases in the case of other nations such as Portugal, Spain, Egypt, and France. These four countries combined accounted for only 1 percent of our cotton-goods imports in 1958. By 1960, their shipments amounted to 23 percent of the total.

Other countries stepped up their shipments to us when Japan voluntarily curtailed her exports of cotton cloth. In 1958, Formosa, Pakistan, Korea, and India collectively accounted for only 2 percent of our imports. But this share increased to 11 percent by 1960.

Japan has increased her shipments of woolen cloth to the United States. Since 1958, imports of wool manufactures from Japan have gone up 68 percent. There has been an even sharper increase—of 371 percent—in wool imports from Italy.

Our first investigation was largely limited to that segment of the textile industry making broadwoven cloth. But in our hearings this year we also heard testimony from representatives of the carpet and rug industries. In 1958, imports of these textile-mill products, while rising, were not excessive. But there has been a phenomenal increase since then. Imports of carpets now amount to about one-fourth of our domestic production. While more than half of our carpet imports still come from Belgium, imports from Japan have been increasing.

Imports of manmade fiber fabrics have likewise been rising. Much of the increase has come in the form of made-up goods, mostly apparel. This raises another problem about which we heard relatively little in our first investigation.

Much of the increase in textile-mill products imports since 1958 has been in the form of made-up goods. Let me cite a few examples. In 1958, we imported about 3 million dozen cotton blouses.

By 1960 this figure had climbed to 5.9 million—a gain of 91 percent. In the same 2-year period, imports of cotton trousers rose from 1.7 million dozen to 4.4 million dozen, a rise of 159 percent. There has been a shift in the source of imports of cotton garments also. For example, in 1958 about 62 percent of all cotton garments shipped to the United States came from Japan, and in that year Hong Kong accounted for 38 percent. Last year, however, these percentages were almost reversed. Japan's share of cotton imports had dropped to 34 percent while Hong Kong's share increased to 66 percent.

As a result of this sharp jump in imports, it has been estimated that about 31,000 jobs in the garment industry, and related activities, have been lost.

Many of us have been disturbed by the news that leaders of the garment and apparel unions are contemplating boycotts of foreign fabrics in an effort to stem the rising tide of imports.

We must, of course, try to understand their motives. There are jobs involved. The garment industry is heavily concentrated in a relatively small number of cities where there are few alternative job opportunities for displaced garment workers. Or they are located in small and relatively isolated rural communities, where there are virtually no alternative job opportunities. The workers involved find it difficult to understand why they should sacrifice their employment as part of our broad international economic policy. They react instinctively to defend themselves. And the only solution which seems available to them is that of refusing to work on foreign-made fabrics.

When the Textile Subcommittee proposed in 1959 that an effort be made to control the rate of textile imports there was a considerable outcry. This would disrupt our relations with friendly nations, we were told. It would go against our basic policy of liberalizing trade.

And the American economy could absorb the workers displaced by imports in the declining industries. If these things were indeed true there would be no need for concern about rising imports. But observation shows that they are not.

And what could be more disruptive of friendly relations with other nations than effective boycotts? In terms of international economic policy, this is a form of anarchy. It is something which we in Government could not control. But we should not be too hasty in condemning the motives of those who suggest this solution to the problems which are very real and very urgent. In our first report the Textile Subcommittee recommended what we thought to be a reasonable and workable solution to this problem; namely, regulation of the rate at which imports enter the country. We did not propose that the level of imports be frozen. Indeed, we recommended further study before the final determination of quotas should be made.

We recommended the establishment of a textile interagency committee, and suggested that perhaps this was the appropriate agency to administer a program of quotas.

A textile interagency committee was established, but its performance—to put it quite mildly—was disappointing. We recognize now that this form of organization will accomplish little, and are pleased to see that President Kennedy has seen fit to abolish this committee together with a number of others which appeared to be serving no useful purpose.

At the time we thought that flexible quotas would be a reasonable approach to this difficult problem. But while there was a good deal of lipservice paid to this recommendation, nothing came of it.

After carefully reviewing the events of the past 3 years, the Textile Subcommittee reached the conclusion that positive action must be taken. To us it appears that the more orderly procedure of instituting quotas on textile mill products, by category, and by country, is far more desirable and in the long run better for all concerned, than the action of individual unions or others who might impose boycotts. Let us be clear on one thing, however, if our Government does not take reasonable steps to insure an orderly solution to this problem others will take it into their own hands, and the consequences of this could be unfortunate, indeed.

We have not spelled out in detail how we think these quotas should be determined, nor have we gone into the question of who should administer them. We have ideas on these things, of course, and these will be advanced at the appropriate time. Our first step has been to present the facts.

This has been done in our supplementary report, and some of them I have summarized today. To us it appears that we are rapidly approaching a turning point—a decision must be made.

Opponents of any form of regulation point out that we still import something less than 8 percent of total domestic production. But these are the same persons who a little more than 2 years ago were pointing out that imports amounted to less than 3 percent of domestic production. How high does this percentage have to go before there is recognition that imports are cutting down on employment in this country?

What we would like to stress is that the rate of imports is accelerating. The increase of the past 2 or 3 years has been more rapid than that of the 10 preceding years. It is this long-term trend which concerns us. It is not so much the present volume of imports.

If there is to be no further increase, the domestic textile and apparel industries could adjust to the present situation. All the evidence indicates that there will be further rapid increases unless we are willing to take action.

I would like to stress that we are not proposing to maintain the status quo. We recognize the economic interdependence of nations, and we accept the view that international trade must expand, not contract. We do feel, however, that the rate of expansion is important, and that we will be doing no one a favor if we permit imports to increase more rapidly than we are able to absorb them through the natural growth of our markets.

It is our sincere hope that the President's Cabinet Committee on Textiles, which was set up on the informal recommendation of our subcommittee, will agree with our view that flexible quotas will provide an orderly solution to the textile import problem. We see no other approach which can achieve this end.

We did not, of course, limit our investigation to the import problem. We recognize that there are other problems facing the domestic textile industry. We have repeated our recommendation made in the first report that the Internal Revenue Service revise its depreciation schedules as rapidly as possible. We urge again that the anomaly of a two-price system for cotton be eliminated as quickly as possible. We strongly support a program of textile research, and have recommended that an annual appropriation be made to the Textile and Clothing Division of the U.S. Department of Commerce to expand its program of data collection and research. All of these recommendations are important. But the key recommendation is the one dealing with the imposition of flexible quotas on textile-mill products. If this is not done, if the industry continues to shrink, then the supporting recommendations will lose some of their force.

We feel that it is time for a careful reexamination of our entire approach to international economic policy. Many of us have been strong supporters of the reciprocal trade program. But things have not worked out exactly as many thought they would when this program was initiated. Our policy has been one of across-the-board liberalization of trade. But we also have the no-damage rule. The question which concerns some of us is: Can we have both?

We recognize that our recommendation for quotas will not be well received in all quarters. But I would urge all members of the Senate to give it careful consideration. We cannot continue to debate this issue indefinitely while the affected industries continue to shrink, or until the workers in these industries decide to take matters in their own hands and to solve the import problem by boycotts. We feel that a reasonable and workable solution exists, and that an orderly approach to the problem of rising imports is both necessary and urgent.

Mr. SALTONSTALL and Mr. THURMOND addressed the Chair.

Mr. JAVITS. I yield further to my colleague from Massachusetts.

Mr. SALTONSTALL. Mr. President, I join many other Senators in commending the Senator from Rhode Island for the great effort he has made as chairman of the subcommittee in dealing with this subject. As one who has worked with respect to the textile problems in New England for all the years he has been in the Senate, I know that we must take action on the national level and on the international level in order to straighten out the problems.

In New England today, as the Senator has very well stated, the industry is reinvesting its money in the business, to obtain new machines and to modernize. Profits are being rolled back into business in this effort, and as a result there is a lack of money or resources to do the necessary research to work out the new problems which are constantly arising.

I agree with the Senator from New York [Mr. JAVITS], the Senator from Rhode Island [Mr. PASTORE], and the Senator from West Virginia [Mr. RANDOLPH] in respect to the international aspects of trade. As one who has always supported reciprocal trade, even before service in this body, I believe in reciprocal trade, but I also believe we can have reciprocal trade only if we make an effort to maintain our own industries, which we need in the United States for our own welfare and for our constant daily living. We must make it possible for industry to continue in its efforts. That can be done only if there can be operation at a profit, with modern machinery, and wages to employees comparable to wages in other industries in this country.

This is the great problem which faces us, as the Senator from Rhode Island has said. We must solve our problems in the 1960's, in a manner to maintain our trade and build up our international relations, while at the same time making it possible for our citizens to receive good wages and for our industries to earn reasonable profits.

Mr. JAVITS. Mr. President, I wish to make one observation, in fairness to the very fine discussion which has taken place.

I say to my colleague from Rhode Island [Mr. PASTORE] that, as always, he is at his best when we get into the actual give and take of debate. One point, however, should be made. The Senator from Rhode Island spoke of international action. International action, I think, is a very fruitful area to explore. I hope very much, considering the great prestige of the subcommittee, such action may be taken.

In the heat of debate the Senator spoke of all the nations producing textiles for export sitting down together to do something about the problem. This approach has been followed with respect to other commodities. It has been followed with respect to tin, for example. It is not at all beyond the realm of possibility in this field.

There is another thing we could do, which is to bring some pressure to bear, which I think is more than justified, through the International Labor Organization and through other means, to do something about the substandard wages which are paid in many competing countries, even with respect to the standards of those countries themselves, to say nothing of any international standards.

A third thing which could be done is to moderate somewhat the flow of imports into our country by voluntary agreements. We have had a voluntary agreement with the Japanese. There is no reason why we could not obtain voluntary agreements with other countries.

Each of these items is important. The Senator from Arizona [Mr. GOLDWATER] and the Senator from Massachusetts [Mr. SALTONSTALL] both made suggestions with respect to the need for urgently, and on a high priority basis, considering a better depreciation policy, to enable industry to mechanize faster.

Mr. PASTORE. We recommend that in our committee report.

Mr. JAVITS. Yes. I am simply pointing out the different areas of activity.

I also recommended today something I strongly urge upon my colleagues for consideration, with respect to the problem of the bedrock situation which cannot be assisted in any other way. In fairness to the consumers, who are bound to be affected by any quota or tariff, there should be recourse to some governmental program and some adjustment assistance, to take care of the bedrock cases without causing distress. In that way we give ourselves a better opportunity to deal with the problem, in my opinion, more equitably.

That is the range of suggestions which I hope very much may be of assistance in our thinking upon this problem, which is one of the vexing problems in international trade.

Mr. THURMOND rose.

Mr. JAVITS. Mr. President, I now yield to my colleague from South Carolina.

Mr. THURMOND. Mr. President, I thank the Senator from New York. I invite the attention of Senators to the fact that import quotas constitute only one of the five recommendations which were made. We think it is the most important.

The second recommendation was with respect to the continuation and expansion of the program of data collection and research.

The third recommendation was the one mentioned a moment ago, a more realistic depreciation rate on equipment and machinery.

The fourth recommendation was to increase research.

The fifth recommendation is the elimination of the two-price cotton system.

All these suggestions, I believe, have been discussed during the afternoon. There is no use in our going into further detail. The point is that the report does not hinge on any one of the recommendations, but recommends all five of the items, which we feel are important. We think the greater emphasis should be placed on the first; that is, the flexible import quotas.

If the Senator has time to read the testimony which was taken in February, I believe he will concur, and that his conclusion will probably be the same as ours after that.

Mr. JAVITS. I thank my colleague. Of course, I have seen the other recommendations. They are entitled to the greatest of respect. It seems to me at the very least those recommendations ought to be implemented.

In the debate my colleague now understands the point, I believe, I wished to get over, which is, first, that we cannot insulate this problem from the general trade problem; and, second, that there are many forms of action possible to be taken, some of which have not been dealt with in the report, which are well worthy of our consideration, in a sense to take the heat off us, in terms of what might prove to be really inimical to our total trade position.

Mr. President, I yield the floor.

LEGISLATIVE PROGRAM

During the delivery of Mr. PASTORE's speech:

Mr. MANSFIELD. Mr. President, after consultation with the distinguished minority leader and other interested Senators, I submit a proposed unanimous-consent agreement and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will read the proposed unanimous-consent agreement.

The legislative clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on March 22, 1961, at the conclusion of routine morning business, during the further consideration of the conference report on the bill (H.R. 4510) to provide a special program for feed grains for 1961, debate thereon be limited to 1½ hours, to be equally divided and controlled by the majority and minority leaders.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the agreement is entered.

Mr. MANSFIELD. Mr. President, I submit a further proposed unanimous-consent agreement, this one dealing with the conference report on unemployment benefits, and ask that it be read.

The PRESIDING OFFICER. The proposed unanimous-consent agreement will be read.

The legislative clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered further, That, effective after the disposition of the conference report on H.R. 4510, the Senate proceed to consider the conference report on the bill (H.R. 4806) the Temporary Extended Unemployment Compensation Act of 1961, if, in the meantime, the conference report has been approved by the House and received in the Senate, and that debate thereon be limited to 1 hour, to be equally divided and controlled by the majority and minority leaders.

The PRESIDING OFFICER. Is there objection?

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object, and I shall not object, I shall want some time to speak in connection with the conference report. I recognize the futility of trying to defeat the conference report; nevertheless, I desire an opportunity to call the attention of the Senate to the fact that if the Senate adopts the conference report it will be authorizing the expenditure of $1 billion in benefits to the unemployed covered by the bill, yet under the bill there is no provision whatever to finance any of the costs. There is a delayed tax increase supposedly to pay for the $1 billion in benefits; however, this tax increase will not become effective until 60 days after the 1962 elections whereas the $1 billion in benefits will all have been disbursed by June 30, 1962, or 4 months before the election.

It is the height of fiscal irresponsibility for the new administration, as they launch the New Frontier, to say to the unemployed, "We shall give you $1 billion in benefits, but we will not tax anybody anything until after the 1962 elections." This seems to be the pattern of many of the bills which are being sent to Congress by the White House.

I simply wish to have sufficient time to call the attention of the Senate to this fact. If I can be assured that I will have such time during the discussion, I shall have no objection to the proposed unanimous-consent agreement.

Mr. MANSFIELD. Mr. President, I shall be most happy to yield as much time to the Senator from Delaware as I possibly can from this side of the aisle.

Mr. DIRKSEN. And I shall be more than generous to my friend from Delaware.

Mr. WILLIAMS of Delaware. All right. With that understanding I have no objection.

The PRESIDING OFFICER. Is there objection to the unanimous-consent agreement? The Chair hears none, and the agreement is entered.

Mr. PASTORE. Mr. President, I ask unanimous consent that this colloquy come at the end of the discussion on the textile industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, the distinguished Senator from Rhode Island anticipated me, because I would not want the most interesting colloquy which is taking place this afternoon on a very vital subject interrupted by two unanimous-consent requests.

I thank the Senator from Rhode Island and other Senators for their generosity, and I am grateful to the distinguished minority leader for his understanding of the difficulty which confronts us.

I announce to the Senate that there will be no more votes today; but be on hand tomorrow.

ADJOURNMENT

Mr. RANDOLPH. Mr. President, I move that the Senate adjourn until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 6 o'clock and 35 minutes p.m.) the Senate adjourned until tomorrow, Wednesday, March 22, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 21, 1961:

DEPARTMENT OF STATE

Walter P. McConaughy, of Alabama, a Foreign Service officer of the class of career minister, to be an Assistant Secretary of State.

DIPLOMATIC AND FOREIGN SERVICE

William Attwood, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Guinea.

Walworth Barbour, of Massachusetts, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Israel.

Anthony J. Drexel Biddle, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Spain.

William McCormick Blair, Jr., of Illinois, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Denmark.

Aaron S. Brown, of New Hampshire, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Nicaragua.

J. Kenneth Galbraith, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India.

G. Frederick Reinhardt, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Italy.

Edwin O. Reischauer, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Japan.

John S. Rice, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of the Netherlands.

Edward G. Stockdale, of Florida, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Ireland.

Raymond Telles, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Costa Rica.

Robert F. Woodward, of Minnesota, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Chile.

Kenneth Todd Young, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Thailand.

The following-named persons to the offices indicated:

DEPARTMENT OF THE INTERIOR

John M. Kelly, of New Mexico, to be an Assistant Secretary of the Interior.

PATENT OFFICE

David Lowell Ladd, of Illinois, to be Commissioner of Patents.

DEPARTMENT OF AGRICULTURE

John C. Bagwell, of South Carolina, to be General Counsel of the Department of Agriculture.

FEDERAL POWER COMMISSION

Joseph C. Swidler, of Tennessee, to be a member of the Federal Power Commission for the remainder of the term expiring June 22, 1965.

Howard Morgan, of Oregon, to be a member of the Federal Power Commission for the remainder of the term expiring June 22, 1963, vice Paul A. Sweeney.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 21, 1961:

U.S. ATTORNEY

Joseph D. Tydings, of Maryland, to be U.S. attorney for the district of Maryland for a term of 4 years.

POST OFFICE DEPARTMENT

Richard James Murphy, of Maryland, to be an Assistant Postmaster General.

Ralph W. Nicholson, of New York, to be an Assistant Postmaster General.

WITHDRAWALS

Executive nominations withdrawn from the Senate March 21, 1961:

FEDERAL POWER COMMISSION

Paul A. Sweeney, of Maryland, to be a member of the Federal Power Commission for the remainder of the term expiring June 22, 1963, which was sent to the Senate on January 13, 1961.

DEPARTMENT OF THE INTERIOR

George W. Abbott, of Nebraska, to be an Assistant Secretary of the Interior, which was sent to the Senate on January 10, 1961.

HOUSE OF REPRESENTATIVES

TUESDAY, MARCH 21, 1961

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Psalm 34: 4: *I sought the Lord, and He heard me and He delivered me from all my fears.*

Almighty God, as we turn to Thee in prayer, that ancient habit and adoring attitude of our human race, may Thy holy spirit enlarge our hearts with the warmth of Thy love and our minds with the wonder of Thy wisdom.

We are not asking Thee for escape from heavy responsibilities but for inspiration to meet them; and neither are we beseeching Thee to lift our burdens but for strength to bear them.

Grant that we may see clearly and interpret rightly the meaning of the events and experiences of each new day and always follow Thy divine leading.

Inspire us with a vision of Thy gracious purposes, working in ways that seem strange and mysterious, but which, however, assure us that Thy kingdom is being established with its larger and more abundant life for all mankind.

Hear us in Christ's name, Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 1822. An act to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended.

The message also announced that the Senate had passed the following resolution:

S. RES. 112

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. B. CARROLL REECE, late a Representative from the State of Tennessee.

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased, the Senate do now adjourn.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1028. An act to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959."

MEMBERS OF THE U.S. CITIZENS COMMISSION ON NATO

The SPEAKER. Pursuant to the provisions of section 1, Public Law 86–719, the Chair appoints on the part of the House as members of the U.S. Citizens Commission on NATO the following members from private life: Mr. W. L. Clayton, Texas; Mr. George J. Feldman, New York; Mr. Hugh Moore, Pennsylvania; Mr. Ralph D. Pittman, District of Columbia; Mr. Donald G. Agger, Maryland; Mr. Eric Johnston, District of Columbia; Mr. Adolph W. Schmidt, Pennsylvania; Mr. Oliver C. Schroeder, Jr., Ohio; Mr. Burr S. Swezey, Sr., Indiana; and Mr. Morris Forgash, New York.

MEETING OF THE AMERICAN GROUP, INTERPARLIAMENTARY UNION

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, I desire to announce that the American group of the Interparliamentary Union will hold a meeting on Tuesday, March 28, in room F–39 of the Capitol at 9 o'clock in the morning. All Members interested are urged to attend this meeting.

Mr. Speaker, I ask unanimous consent to insert in the RECORD the report which I prepared as president of the American group, and which I now submit to the House.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The matter referred to follows:

REPORT OF THE PRESIDENT, HON. HAROLD D. COOLEY, REPRESENTATIVE FROM NORTH CAROLINA, AND CHAIRMAN OF THE HOUSE COMMITTEE ON AGRICULTURE

The Interparliamentary Union is one of the most active and vigorous organizations existing in the world today as an instrument for international peace. It was formed in 1889 at a Paris conclave attended by official delegates from France, Great Britain, Belgium, Denmark, Hungary, Liberia, Spain, and the United States of America. These eight nations banded together under a compact which declared: "The conduct of governments, tending more and more to no longer be the expression of the ideas and feelings of the whole body of citizens, it is the responsibility of the electors, by exercising their choice, to direct the policies of their countries toward justice, war, and the brotherhood of nations." This high ideal, later to be expressed by Woodrow Wilson, in his formulation of the League of Nations and now expressed in the charter of the United Nations, was to be the guiding influence of the Interparliamentary Union during its entire history of 72 years. While its actions are not binding upon the countries represented in its membership, it has proved to be a moral force of tremendous benefit to peace and understanding in the world today.

Now numbering 59 nations, including the Soviet and those of its power orbit in Europe, it has never admitted the People's Republic of China nor any of the adjoining puppet states that constitute a constant threat to "the peace and tranquillity of order" as laid down by St. Augustine in the sixth century A.D. as a basis for international law. Through the years, it was the prime mover in the First and Second World Peace Conferences and has, through its influence, been instrumental in helping to organize and support both the League of Nations and the United Nations. It has been an instrument of foreign policy and in many countries, as well, since it has discussed every great issue presented to the world in the period of its existence. It has seen the climate change from the creation of a balance of power to open covenants openly arrived at and all the international problems discussed in free parliaments, by the responsible press, radio and television, and by the people themselves.

In my report to the Congress in 1959, I cited the history of the participation of the United States, through its appointed delegations, to the various conferences of the Interparliamentary Union through the years, and cited the distinguished Members of both Houses of Congress who represented our country at these successive meetings. In my present report I shall limit myself to the incidents and details of the past year, 1960, which now appear for current review.

The annual meeting of the U.S. group was held in the old Supreme Court Chamber in the Capitol of the United States on February 9, 1960, with the President in the chair. A complete report of the 48th Conference of the Interparliamentary Union held in Warsaw, August 27–September 4, 1959, was made by the President. A report was likewise made by the Permanent Executive Secretary, Dr. Franklin Dunham, on current Interparliamentary Union affairs. The

official Interparliamentary Bulletin was distributed and a review of the questions to be placed on the agenda of the 49th Conference of the Union to be held in Tokyo, September 29–October 7, 1960, was made. The delegates to the spring meeting of the standing committees and Council of the Union were selected as follows: Members of the Council—the Honorable HAROLD D. COOLEY and the Honorable A. S. MIKE MONRONEY; standing committees—the Honorable KATHARINE ST. GEORGE and the Honorable W. ROBERT POAGE. Inasmuch as all the officers and the Executive Committee of the U.S. group serve for an entire session of Congress, no elections were held nor called for until after the convening of the 87th Congress in 1961.

During the year, the U.S. group received delegations from Brazil, Peru, Finland, and Thailand. The Chairmen of these groups were introduced on the floor of the U.S. Senate and were also guests of the House of Representatives, during their stay in Washington. At the NATO Parliamentary Conference held in Washington the previous November, the U.S. group likewise received many members of the NATO groups who were also duly constituted members of the Interparliamentary Union.

At the spring meeting of the Council and standing committees held in Athens, April 19–24, 1960, the agenda of the forthcoming 49th Conference to be held in Tokyo was prepared. This meeting was attended by the Honorable Harold D. Cooley, president of the group and member of the IPU Executive Committee, Hon. A. S. Mike Monroney, member of the IPU Council, Congresswoman Katharine St. George, Congressman W. Robert Poage, Dr. Charles J. Zinn and Dr. Franklin Dunham, Permanent Executive Secretary of the U.S. group.

The subjects decided upon were: (1) "Methods of Improving the International Distribution System for Primary Products and Relation of Their Prices With Those of Manufactured Goods," (2) "Present Problems and Prospects of Disarmament," (3) "The Future of Parliamentary Democracy in Asia." The program of increasing the number of members of the IPU Executive Committee from 9 to 11 was approved and recommended by the Council. It was also decided to reduce the number of standing committees from eight to five. These committees are now organized as follows: (1) political, including international security and disarmament; (2) juridical, including parliamentary questions; (3) economic, including social questions; (4) cultural, including information and education; (5) non-self-governing territories, including ethnic questions.

The U.S. delegation returned on April 25, 1960, having served both in the capacity of delegates to the Council and members of the above-mentioned committees.

The 49th Interparliamentary Conference was called for Tokyo in September 1960. The House and Senate delegations left by plane for Japan in ample time to arrive for the opening of the sessions. The Honorable HAROLD D. COOLEY represented the United States at the Executive Committee sessions and the Honorable A. S. MIKE MONRONEY joined him as representative on the Council.

Inasmuch as the special session of Congress was in progress, the United States was represented by little more than half the usual number of delegates. Those in attendance, however, were in active participation on all committees and by doubling up on duty assignments, presented to the Conference the same strong leadership which has been characteristic of former years.

Japan, fast-moving leader of the Far East, was host to the 49th Conference of the Interparliamentary Union from September 29 to October 7, 1960. Tokyo was the setting for one of the most productive meetings of the Union held in its 71 years of existence. It was also the largest meeting ever held, with 50 nations represented from every part of the civilized world. Tokyo, completely rebuilt and still building, represents today the complete common meeting ground of East and West; a city of 10 million people, modernized and ready to assume its obligation as a mighty force for peace in the world.

It is only 4 years since the Union held its 45th Conference in Bangkok. Since then, it has met in London, Rio de Janeiro and Warsaw, and is now scheduled to meet in Brussels (1961), Buenos Aires (1962), and will probably return to the North American Continent in 1963 to meet in Ottawa.

The Union was founded in Paris in 1889 through the persistence and work of two great leaders, Sir William Cremer and Frederic Passy, who called together a meeting of seven European countries and the United States, after encouragement had been given them by President Cleveland. Cremer had headed a group of British trade unionists the previous year who importuned President Cleveland to apply arbitration to an old-time dispute between the United States and Britain. Although it took nearly a year to bring it about, Cleveland did it and thus strengthened the belief that members of parliaments could effectively work in the field of foreign affairs. On this belief, and with the ideal of permanent peace in their minds, the delegates to the first Conference organized. The Union grew rapidly. It was responsible for the First and Second Hague Conferences. It gained the unfailing support of Andrew Carnegie, then vice president of the American Peace Society, and was itself a supporter of the League of Nations, and today is a class A member of the United Nations, reporting through the Economic and Social Council.

However, a persistent effort is now being made to bring it in even closer harmony with the U.N. At the spring meeting of 1960 held in Athens, a resolution now known as the Monroney resolution was passed unanimously for the purpose of carrying on new negotiations with the U.N. to establish a relationship resembling in many ways, that of a specialized agency, yet maintaining an autonomy of action, respectful of parliamentary rights and privileges. Today, its position in the U.N. is that of a nongovernmental agency, which puts it in an anomalous position, in respect to the countries now represented within Union membership. The report on this new type of affiliation will be made at the spring meeting (1961) in Geneva.

The philosophy of the Union is based upon that of St. Robert Bellarmine and Suarez of the 16th century, government by consent of the governed, as opposed to the divine right of kings or the assumed power of a dictator. Up until 1955, any duly constituted parliament could, on its own choosing, become a member. Now, however, a parliament must operate on its own soil, represent a country recognized under international law and must be subject to the scrutiny of the Executive Committee as to its ability to meet these conditions and to carry out its obligations before it can be admitted to the Union. Applications from North Korea and Canada were thus acted upon at Tokyo. North Korea did not receive approval but Canada was admitted (or rather readmitted) by a unanimous vote of the Council. Canada actually returned to the Union after an absence of 20 years, having left the Union at the outbreak of World War II. Although the Union has not followed the U.N. in the wholesale admission of the 16 new African countries, it did invite Nigeria to join the Union in an official radiogram sent out on the first day of that country's independence, which day occurred during the deliberations in Tokyo. Ghana is already a member and Tunisia, too, is a vociferous proponent of the rights of people to govern themselves, a Wilsonian principle in our own foreign policy.

Those participating at Tokyo in 1960 included: Argentina, Austria, Belgium, Brazil, Bulgaria, Burma, Canada, Ceylon, Chile, Czechoslovakia, Denmark, Finland, France, Germany, Ghana, Great Britain, Greece, Hungary, India, Indonesia, Iran, Iceland, Israel, Italy, Japan, Laos, Lebanon, Libya, Luxembourg, Netherlands, New Zealand, Norway, Panama, Peru, Philippines, Poland, Rumania, Spain, Sweden, Switzerland, Thailand, Tunisia, United Arab Republic, U.S.S.R., Venezuela, Vietnam, and Yugoslavia. Thus 50 countries throughout the world, numbering over 500 delegates, many including members of families and secretariats, brought the total to more than 800 in attendance.

These countries presented a colorful spectacle, when the Conference opened in the Senate Chamber of the Diet Building. Emperor Hirohito and his lovely Empress officially welcomed the delegates, who, after the opening ceremonies, moved over to the house of representatives, where commodious arrangements had been made for seating the delegates by country on Thursday, September 29. The delegates from the United States had come in two planes, one which had crossed Europe, the Middle East and Asia, visiting delegate countries en route, and another, which had come by way of Alaska, the previous day. The delegation was headed by the Honorable HAROLD D. COOLEY, president of the U.S. group and member of the Union's Executive Committee. Congressman COOLEY from North Carolina is also chairman of the House Agricultural Committee. With Congressman COOLEY was the Honorable A. S. MIKE MONRONEY, Senator from Oklahoma, and member of the Council of the Union and the following Senators: The Honorable FRANCIS CASE, of South Dakota; the Honorable J. WILLIAM FULBRIGHT, of Arkansas; chairman of the Foreign Relations Committee of the Senate; the Honorable THOMAS H. KUCHEL, of California; the Honorable MIKE MANSFIELD, of Montana, also a member of the Foreign Relations Committee of the Senate; and the Honorable STROM THURMOND, of South Carolina. Representing the House were: The Honorable Hale Boggs, of Louisiana; the Honorable Henry A. Dixon, of Utah; the Honorable Michael A. Feighan, of Ohio; the Honorable Daniel K. Inouye, of Hawaii; the Honorable Paul C. Jones, of Missouri; the Honorable John L. McMillan, of South Carolina; and the Honorable W. Robert Poage, of Texas. Former Senator Homer Ferguson of Michigan also acted as delegate, being a former president of the group and honorary member of the Union. The delegation was accompanied by Dr. Franklin Dunham, Permanent Executive Secretary of the group, who acted as liaison with the Union Secretariat and with the American Ambassador, Douglas MacArthur II, during the Conference. Dr. Charles J. Zinn, counsel to the House Judiciary Committee, represented the Clerk of the House of Representatives at the meetings of the Autonomous Secretariat of Parliaments.

On recommendation of the Executive Committee, approval of the Council and action of the Conference the Executive Committee was increased to 11 members, ostensibly to recognize all the areas of the world now represented in the Union. The Chief Executive Office of the Union is the President of the Council. He is Dr. Giuseppi Codacci-Pisanelli, a leader of the Christian Democratic Party of Italy and member of the Italian Cabinet, as well as deputy. Dr. Pisanelli is also professor of international law at the University of Rome and a world

figure in international affairs. He was reelected to serve an additional 2 years beyond his normal term of 4 years which expired at the Tokyo Conference. Dr. Saturnino Braga of Brazil and David Hacohen of Israel retired from the Committee this year. Their places were taken by N. K. Fukunaga of Japan and M. A. Matine-Daftary of Iran. The two new places created on the Committee were filled by the election of Senator F. E. Tolbert of Liberia and R. A. Weidmann of Argentina; the Executive Committee is therefore now representative of all areas except Oceania, which will probably be recognized by election of either an Australian or New Zealander at the next Conference in Brussels.

The Tokyo Conference, opening on the morning of Thursday, September 29, proceeded immediately to the general debate on the Secretary General's report. Two speakers represented the United States in the proceeding. The Honorable DANIEL K. INOUYE, Congressman from Hawaii, himself of Japanese descent, opened the debate with a glowing speech on the position of the United States and closed his remarks, addressing his fellow compatriots in Japanese. The Honorable J. WILLIAM FULBRIGHT was the second speaker for the United States. Senator FULBRIGHT, chief foreign policymaker for the U.S. Senate, received an ovation from the delegates as he cautioned those present to indulge in no recriminations or attacks on the policies of other countries but the maintenance of arrival at peaceful solutions of the problems of the world. The climate suggested by the Senator set the stage for one of the most successful conferences ever in the history of the Union.

The first draft resolution was presented by the Economic and Social Committee on "Methods of Improving the International Distribution of Primary Products and the Relation of Their Prices to Those of Manufactured Goods." This question, analagous to our own farm problem, was responded to by the Honorable PAUL C. JONES and the Honorable W. ROBERT POAGE for the United States. Congressman POAGE is vice chairman of the House Agricultural Committee and Congressman JONES is a veteran member, so both were well equipped to represent the U.S. point of view on the subject. They both advocated and supported the draft resolution and agreed to the idea of holding an International Economic Conference under U.N. auspices as soon as it is possible to organize such a worldwide meeting.

The second draft resolution was on the perennial question of disarmament titled "Present Problems and Prospects of Disarmament." The Union has legislated on the subject for many years and the Committee on the Reduction of Armaments has a vast knowledge of the subject. In addition to the first resolution on the subject, an additional one was submitted by Dr. A. Matine-Daftary of Iran. The final resolution contained the major ideas of both versions and was passed unanimously. It stood for complete and thorough inspection, an important element of allied agreement, and represents the approval of the Soviet delegation and the satellite countries as well as the parliamentary representatives of the free world. Speaking on this question were the Honorable FRANCIS CASE, Senator from South Dakota, and Senator STROM THURMOND, of South Carolina. Both Senators have made lifetime studies of disarmament and became instrumental in bringing about the compromises which resulted in the final resolution. Evidently, where nations fail in disarmament conferences, parliamentarians can reach agreement, satisfactory to both captive nations and the free world. This resolution may easily become a model for international agreement.

The third resolution was on the subject, "The Future of Parliamentary Democracy in Asia." Supported by the Asian nations represented at Tokyo, the Honorable MICHAEL A. FEIGHAN, of Ohio, and the Honorable THOMAS H. KUCHEL, Senator for California, spoke on this question. The resolution as finally passed represents the unanimous voice of the assembled delegates and bespeaks the cause of self-government unaffected by foreign influence, through strong parliamentary controls.

A fourth resolution sponsored by the Tunisian group was introduced which would have condemned France, by name, in its broad solution of the Algerian problem, the burden of Premier de Gaulle in the present crises in Africa. Taken up in the Committee on Non-Self-Governing Territories, its claws were clipped to make it include all nations who commit injustices to former colonials and its strong language condemns acts of aggression upon any autonomous peoples who show a legitimate desire for self-government. This resolution passed, with the sole objection of the Tunisians and the United Arab Republic who supported the Tunisians in their efforts to condemn the conciliatory moves of the French community to give Algeria its independence while still remaining in the French sphere of influence. A similar effort was made by the United Arab Republic to condemn Israel's independent actions in the Middle East but this, too, failed of passage completely.

After the elections, which have been detailed in the opening paragraphs, the conference voted to meet in Brussels, September 10–18, 1961, to meet in Buenos Aires in 1962 and to meet possibly in Ottawa in 1963 or 1964. The Council meeting is scheduled for Geneva, Switzerland, from April 4–10, 1961, since conditions make it more desirable to meet in Geneva, headquarters city of the Union, at that time.

The Japanese group, acting as hosts, had been honored by having one of their number, Dr. K. Fukunaga, elected to the Executive Committee. They had demonstrated both efficiency and extraordinary hospitality in the arrangements of both the official and brilliant social programs. The American Embassy, headed by Ambassador Douglas McArthur II, had furnished the most solicitous aid and cooperation, both before and during the meeting. It was voted the best Conference ever held by the Union.

Following are the resolutions passed by the Conference:

"I. METHODS OF IMPROVING THE INTERNATIONAL DISTRIBUTION SYSTEM FOR PRIMARY PRODUCTS AND THE RELATION OF THEIR PRICES WITH THOSE OF MANUFACTURED GOODS

"The 49th Interparliamentarly Conference,

"Considering that, despite repeated initiatives taken by different international economic organizations, the economies of the less developed countries are seriously hampered by the continuing decrease of primary product prices in relation to those of manufactured goods and their excessive fluctuation, by the unwieldy distribution of agricultural products, and by uneven allocation leading to surpluses in some countries and shortages in others,

"Proposes

"1. Study of an indexing system, in the largest possible number of countries, for prices of primary products, so as to relate them to those of manufactured goods as far as practicable, with a view to increasing the standard of living of workers and the national income of less industrialized countries whose economies depend on the export of primary products;

"2. Cooperation by increased technical assistance, as given under United Nations programmes, and through financial aid from appropriate institutions—for example, an international fund for the stabilization of raw material prices—with a view to assisting those States which rely mainly on one or more primary products to ensure price equalization from one year to another, as well as to diversify and industrialize their economies as an effective means of improving regional employment and national income in the underdeveloped countries, thus increasing the general world demand for consumer and capital goods;

"3. Simplification of distributive processes by encouraging rapprochement between producers and consumers, through the elimination of as many intermediaries as possible; development of markets for primary products by increasing the potential demand for them, in particular by exploring the possibilities of markets for byproducts; expansion of trade among all countries of the world without any restrictions; and extension of such trade to a greater variety of goods and conclusion of long-term bilateral and multilateral trade agreements, designed to stabilize markets and prices of primary products;

"4. Adoption of measures, by those countries having large surpluses, to reduce these progressively, at the same time guarding against any resulting upset of world trade by consulting with all countries likely to be affected by such measures and taking into consideration the penury of undernourished peoples;

"5. Urgent accomplishment of tasks of solidarity vis-a-vis the underdeveloped countries, account being taken at the same time of each nation's sovereignty and of its full right to self-determination, in order that these nations may expand their capacity to consume, thus attaining effective international democracy not only in the political field but also in the economic field and in the distribution of creative opportunities;

"6. Increase of economic aid to underdeveloped countries in order to diminish the one-sided dependence of such countries on the export of certain primary products, by diversification of their production, promotion of industrial development and development of an expanding internal market for their products;

"Recommends, as a matter of urgency, the convocation, under the auspices of the United Nations, of a world economic conference with a composition including members of the major primary product producing countries which would be charged with promoting solutions of these and other problems, more particularly on the basis of the foregoing principles."

"II. PRESENT PROBLEMS AND PROSPECTS OF DISARMAMENT

"A

"The 49th Interparliamentary Conference,

"Believing that an immediate solution of the disarmament problem is a matter of vital interest to all peoples and that this will be a priceless contribution toward maintaining peace and security throughout the world,

"Believing also that peaceful uses of all productive capacity, including atomic energy, and multinational and bilateral assistance to the economically underdeveloped countries would improve considerably the social and economic standard of living of all mankind,

"Approving the resolution adopted by the XIVth General Assembly of the United Nations on universal and complete disarmament (1378/XIV),

"Considering that the continuance of nuclear weapons tests has had harmful effects upon the lives of mankind who long for peace and happiness on earth,

"Realizing that the development of good-neighborly relations among the nations on the basis of mutual understanding, mutual respect for sovereignty, equality of rights and territorial integrity, as well as nonintervention in one another's internal affairs, is the prerequisite for a relaxation of inter-

national tension and the maintenance and strengthening of international peace and security,

"Urgently calls upon the United Nations General Assembly to bring about the resumption of disarmament negotiations by representatives of great powers and of other States, the latter to be selected according to an equitable geographical and political distribution, and to request these States to seek an agreement leading to universal and complete disarmament under effective international control, and in particular:

"1. To enter into a treaty whereby it is agreed to ban permanently nuclear tests within and beyond the atmosphere, in the oceans, and underground, to the utmost extent to which control is now possible; and to establish joint research into methods of controlling small underground tests—the parties agreeing meanwhile to a moratorium upon such tests;

"2. To enter into a further treaty establishing a permanent international control organ for the inspection and supervision of disarmament which would function under a special status forming an integral part of the general disarmament treaty; this control organ would supervise the universal and complete disarmament of armed forces and of nuclear and conventional weapons by controlled stages agreed before and on each phase of disarmament;

"3. To establish immediately joint study of:

"(a) measures to insure that, after military bases have been abolished and armed forces withdrawn from foreign territory, no nation shall use outer space for war purposes;

"(b) measures to give protection against surprise attack; and

"(c) measures to control the manufacture and use of fissionable material;

"4. To invite all other nations to become parties to both these treaties.

"B

"The 49th Interparliamentary Conference,

"Considering that the crux of the disarmament problem is the organization of international security as provided for in the Charter of the United Nations,

"Considering that the section of the Charter concerning collective security has in practice not been applied by reason of the political climate brought into existence after the Second World War as a result of dissensions between the great powers.

"Believing that the establishment of an atmosphere of mutual respect, confidence and security, in accordance with the ideals that inspired the drafting of the Charter of the United Nations, and, above all, the cessation of the cold war, would promote agreement on disarmament,

"Addresses an earnest appeal to all nations to bring about a rebirth of the San Francisco spirit."

"III. THE FUTURE OF PARLIAMENTARY DEMOCRACY IN ASIA

"The 49th Interparliamentary Conference,

"Welcoming the progress already made by the independent nations in Asia and their contribution to the strengthening of democracy,

"Recognizing that full realization of self-government depends on the growth of democratic institutions according to the traditions and the economic and social environment of the people concerned, and also on the success attained in overcoming such obstacles to national unity as illiteracy, poverty, and differences of race, religion, and language,

"Trusting that political and constitutional development in Asia will be firmly based on social justice, the rule of law and the practice of tolerance, thus safeguarding human rights, both individual and minority, freedom of religion and freedom of expression,

"Proposes

"1. All possible technical and economic aid should be forthcoming from the more prosperous nations through the United Nations and other international agencies, thereby securing a stable and sound social and economic basis for democratic societies and democratic parliaments;

"2. International aid and regional cooperation should be made available on a larger scale for the training of personnel skilled in the administrative techniques required for solving the new social and economic problems arising in Asia, and that individual Governments and agencies be requested to increase training facilities;

"Invites members of the Union and interested international organizations to give due attention to these proposals for the maintenance and strengthening of parliamentary democracy."

"IV. THE PROBLEMS OF COLONIALISM AND RACIAL DISCRIMINATION

"The 49th Interparliamentary Conference,

"Considering the fundamental principles laid down in the United Nations Charter, namely, respect for equal rights of peoples and for their right to self-determination; respect for human rights and fundamental freedoms, without distinction of race, sex, language or religion; respect for the principles of justice and international law; as well as maintenance of international peace and security,

"Considering that colonialism continues to exist in different parts of the world—in Africa, Asia and elsewhere; that this system, by its very nature, deprives peoples of the right to self-determination and prevents them from exercising their right of sovereignty over their territories, which is one of the natural rights of peoples; that it is also an obstacle to the maintenance of stability in the world and increases the gravity of international conflicts, thereby constituting a permanent threat to international peace and security,

"Deeply concerned by the disregard for some of the main principles of the Universal Declaration of Human Rights,

"1. Condemns all forms of racial discrimination and colonialism, all forms of political and religious intolerance, all inhuman methods used in prisons and internment camps or against prisoners of war in whatever country they may be;

"2. Trusts that the governments and all other parties concerned will do everything in their power to observe the principles of the Universal Declaration of Human Rights and of international law;

"3. Calls on all national groups of the Interparliamentary Union—

"(a) To use their influence to insure the respect and observance of the Universal Declaration of Human Rights all over the world;

"(b) To urge governments which persist in their desire to perpetuate any form of colonialist regime that they cease to maintain a system which is inhuman and incompatible with the degree of evolution reached by mankind at present, so as to abolish colonialism by granting all peoples without delay the right to free self-determination without any pressure, restraint or maneuvering, which falsify the real will of the peoples;

"(c) To take joint action with a view to stopping colonialist wars, through recourse to referendums controlled by the United Nations, insuring that the decision of the people is being taken freely, especially when there is reason to fear that the prolongation of an armed struggle may lead to a general war;

"(d) To take all steps required for putting an end to racial discrimination of all kinds—political, economic and social—and for establishing absolute equality between all men in accordance with the principles of the Universal Declaration of Human Rights;

"4. Requests governments to limit intervention in internal disputes of those peoples who have newly acquired freedom from colonial rule to joint action through the United Nations or other recognized neutral international bodies in order to bring about a regime of political order and security, and to promote economic, social and political development;

"5. Expresses the utmost concern with regard to the denial of freedom and sovereignty to many peoples;

"6. Asks the representatives of all countries to promote laws or constitutional amendments with the object of reinforcing the severe repression of every form of racial, political or religious discrimination, so that in the educational institutions of every country, the principles of spiritual peace, human fraternity and respect for all racial groups in the world may be advocated in special lectures;

"7. Affirms the right of every country to full emancipation and control of its own destiny with the object of putting an end to every form of domination of countries through the use of force and of eliminating all kinds of imperialistic penetration."

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961

Mr. MILLS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

Mr. UTT. Mr. Speaker, reserving the right to object, and I assure the gentleman from Arkansas I will not object, I take this moment to state that yesterday I inserted in the CONGRESSIONAL RECORD at page 4310, a statement together with a table, which were not available before the Ways and Means Committee when that committee considered the unemployment compensation matter.

I urge the Members to examine that statement and that table which shows how much their contribution will exceed their benefits, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The SPEAKER. The Chair appoints the following conferees: Messrs. MILLS, KING of California, O'BRIEN of Illinois, MASON, and BYRNES of Wisconsin.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the conferees may have until midnight tonight to file a conference report on the bill H.R. 4806.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may have until midnight tonight to file a report on the bill, S. 1.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

CONSENT CALENDAR

The SPEAKER. This is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

EFFECTIVE DATE OF CERTAIN STATUTORY AWARDS

The Clerk called the bill (H.R. 861) to provide that no application shall be required for the payment of statutory awards for certain conditions which, prior to August 1, 1952, have been determined by the Veterans' Administration to be service connected.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, I should like to ask the chairman of the Committee on Veterans' Affairs whether or not the opposition to this legislation by the Veterans' Administration is a new letter or is one of the previous administration.

Mr. TEAGUE of Texas. Mr. Speaker, I would say to the gentleman from Michigan that it is a letter from the new administration. I do not believe it is correct to say that it is an objection. It is a partial objection, one which could possibly set a precedent.

Mr. FORD. Mr. Speaker, I withdraw my reservation of objection. I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

U.S. MERCHANT VESSEL AND WATERFRONT SECURITY ACT OF 1960

The Clerk called the bill (H.R. 4469) to amend the Subversive Activities Control Act of 1950 so as to provide that no individual who willfully fails or refuses to answer, or falsely answers, certain questions relating to subversive activities, when summoned to appear before certain Federal agencies, shall be employed on any merchant vessel of the United States or within certain waterfront facilities in the United States.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LINDSAY. Mr. Speaker, reserving the right to object, I would like to ask the author of the bill, the distinguished chairman of the Committee on Un-American Activities, if he has had a chance to consider the suggestion I made the last time I objected to the bill, that the subject matter was of sufficient importance as well as the constitutional questions that are raised by it, so that the matter really ought to be subjected to the scrutiny of full floor debate.

Mr. WALTER. Mr. Speaker, were it not for the fact that the Supreme Court of the United States passed on the constitutional questions the gentleman is talking about, I would agree with him. But the statute of the State of California which we followed exactly in drafting the bill under consideration went to the Supreme Court and the Supreme Court held that it was constitutional. I see no need to debate the question. I would be very glad to answer any questions the gentleman may ask, but as to constitutionality of the statute, that has already been passed on by the Supreme Court.

Mr. LINDSAY. As I read the cases in the courts, including the Supreme Court case of Green against McElroy, and the ninth circuit case of Parker against Lester, questions are raised by this bill that have not been passed on by the Supreme Court, to my satisfaction, at least. I should like the opportunity to examine the bill and debate it on the floor. I would be disposed to vote against this as it now stands. For that reason, and with all due deference to the distinguished chairman of the committee, Mr. Speaker, I object.

The SPEAKER. It requires three objectors. Is there further objection to the consideration of the bill?

Mr. RYAN. Mr. Speaker, reserving the right to object, I would like to say that I agree with the distinguished gentleman from New York [Mr. LINDSAY]. I think there are serious constitutional questions involved here which should be debated fully. Calling this bill on the Consent Calendar prevents thorough and deliberate consideration. Therefore, I also object.

The SPEAKER. Is there further objection?

There being no further objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "United States Merchant Vessel and Waterfront Security Act of 1960".

SEC. 2. The Subversive Activities Control Act of 1950 (64 Stat. 987) is amended by inserting, immediately preceding section 4 thereof, the following new section:

"EMPLOYMENT OF CERTAIN INDIVIDUALS AT WATERFRONT FACILITIES AND ABOARD MERCHANT VESSELS OF UNITED STATES

"SEC. 3B. (a) No individual who willfully fails or refuses to appear before any Federal agency, when subpenaed or ordered to appear, or to answer under oath before such Federal agency any question concerning—

"(1) the membership of such individual, or any other individual, in the Communist Party, Fascist Party, or other subversive party,

"(2) the activities of such individual, or any other individual, as a member of the Communist Party, Fascist Party, or other subversive party, or

"(3) the participation of such individual, or any other individual, in activities conducted by or under the direction of the Communist Party, Fascist Party, or other subversive party, or any member thereof,

shall be employed in any capacity aboard any merchant vessel of the United States or within any waterfront facility in the United States, nor shall any such individual be entitled to hold, or to be issued, any certificate, license, or other document (including any endorsement thereon) identifying him as an individual eligible to be employed in any capacity aboard any such merchant vessel or within any such waterfront facility. The prohibition against employment, and against the possession and issuance of any certificate, license, or other document (including any endorsement thereon), contained in the first sentence of this subsection shall also apply with respect to any individual who commits perjury in answering any question referred to in such first sentence.

"(b) The President of the United States shall institute such measures and issue such rules and regulations as he may deem necessary to carry out the provisions of this section and, for such purpose, he may utilize such departments, agencies, officers, and instrumentalities of the United States as he may deem appropriate. For the purpose of any investigation which, in the opinion of the department, agency, officer, or instrumentality utilized by the President to carry out the provisions of this section, is necessary and proper in carrying out the provisions of this section, such department, agency, officer, or instrumentality is empowered to subpena witnesses, administer oaths and affirmations, take evidence, and require the production of any books, papers, or other documents which are relevant or material to the matter under investigation. Such attendance of witnesses and the production of such books, papers, or other documents may be required from any place in the United States or any district, Commonwealth, or possession thereof, at any designated place of hearing. Witnesses summoned under authority of this subsection shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. Upon failure of any person to obey a subpena issued under the subsection, the United States district court for the judicial district wherein such person resides or carries on business may, upon the petition of the department, agency, officer, or instrumentality of the United States utilized by the President to carry out the provisions of this section, issue an order requiring such person to appear and to produce books, papers, or other documents, if so ordered, or to give testimony touching the matter under investigation or in question. Any failure to obey such order of the court may be punished by such court as a contempt thereof. Any process in any such case may be served in the judicial district wherein such person resides or wherever he may be found.

"(c) As used in this section—

"(1) the term 'waterfront facility' means all piers, wharves, docks, and similar structures to which vessels may be secured, buildings on such structures or contiguous to such structures, and equipment and materials on such structures or in such buildings;

"(2) the term 'United States', when used in a territorial sense, includes all places and waters, continental or insular, subject to the jurisdiction of the United States;

"(3) the term 'Communist Party' means the Communist Party of the United States, or any successors of such party regardless of the assumed name, whose object or purpose is to overthrow the Government of the United States, or the government of any State, district, Commonwealth, or possession thereof, or the government of any political subdivision therein by force and violence, and includes subsidiary organizations of such party;

"(4) the phrase 'Fascist Party, or other subversive party' means any party, other than the Communist Party, regardless of the assumed name, whose object or purpose is to overthrow the Government of the United States, or the government of any State, district, Commonwealth, or possession thereof, or the government of any political subdivision therein by force and violence, and includes subsidiary organizations of such party; and

"(5) the term 'Federal agency' means any department, independent establishment, or other agency or instrumentality of the executive branch of the Government of the United States, and any congressional committee or subcommittee."

Mr. WALTER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALTER of Pennsylvania: On page 1, line 4, after "Act of" strike out "1960" and insert "1961".

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OUTDOOR RECREATION RESOURCES REVIEW COMMISSION

The Clerk called the bill (H.R. 2204) to extend the time in which the Outdoor Recreation Resources Review Commission shall submit its final report.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WEAVER. Reserving the right to object, Mr. Speaker, may I ask the gentleman from Colorado [Mr. ASPINALL] how much money was originally budgeted for this item and what the financial status is of this Commission?

Mr. ASPINALL. As I recall, it was authorized an appropriation of $2,500,000. The money has not been completely used. No other money has been requested in this legislation. All this bill now under discussion does is permit the extension by a few months of the time in which to file a report. That is all that is involved.

Mr. WEAVER. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that an identical Senate bill, S. 449, be considered in lieu of the House bill.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 6(c) of the Act entitled "An Act for the establishment of a National Outdoor Recreation Resources Review Commission to study the outdoor recreation resources of the public lands and other land and water areas of the United States, and for other purposes," approved June 28, 1958 (72 Stat. 238), is amended to read as follows: "The Commission shall present not later than January 31, 1962, a report of its review, a compilation of its data, and its recommendations on a State by State, region by region, and national basis to the President and to the Congress, and shall cease to exist not later than September 1, 1962."

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 2204) was laid on the table.

AMENDMENT OF FEDERAL INSECTICIDE ACT

The Clerk called the bill (H.R. 4662) to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, Desiccant Amendment of 1959."

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. COOLEY. Mr. Speaker, I ask unanimous consent that a similar Senate bill, S. 1028, be considered in lieu of the House bill.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (a) of section 3 of the Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959 (Public Law 86-139, 73 Stat. 286, 287) is amended by deleting the comma and the word "or" appearing at the end of clause (1) and adding at the end of such clause a colon and the following: *"Provided,* That with respect to any nematocide, plant regulator, defoliant, or desiccant whose use results in residue remaining in or on a food at the time of introduction into interstate commerce and which use had commercial application prior to January 1, 1958, the Secretary may prescribe a date beyond March 5, 1961, on the basis of a determination that such action will not be unduly detrimental to the public interest and is necessary to avoid hardships: *Provided further,* That such date shall not be extended beyond (i) the date on which an order with respect to the use of such product under section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) becomes effective or (ii) the date on which any extension granted under paragraph (b) of this section is terminated, or".

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 4662) was laid on the table.

MUSTERING-OUT PAYMENTS

The Clerk called the bill (H.R. 859) to repeal chapter 43 of title 38, United States Code.

Mr. PELLY. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

SPECIAL DIVIDENDS FOR CERTAIN NSLI POLICYHOLDERS

The Clerk called the bill (H.R. 4539) to amend section 723 of title 38 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes.

Mr. GROSS. Mr. Speaker, due to the fact this bill will come up later today under suspension of the rules, I ask unanimous consent that it be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

SALE OF CERTAIN CALCINES AND MATTE

The Clerk called the bill (H.R. 4435) to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. ICHORD of Missouri. Mr. Speaker, I ask unanimous consent that a similar Senate bill, S. 1116, be considered in lieu of the House bill.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. GROSS. Reserving the right to object, may I ask the gentleman to explain briefly for the record the reason for this speedup? It is my understanding that notice has already been published in the Federal Register providing for the action set forth under this bill. Will the gentleman explain the reason for this legislation?

Mr. ICHORD of Missouri. Mr. Speaker, in reply to the gentleman from Iowa, notice has not been posted in the Register in reference to these materials. Briefly, this is the story behind the bill. The National Lead Co. closed down its lead mine mining operation in the small community of Fredericktown in the area of Flat River, Mo., about 6 weeks ago. Since it closed down the lead mining operation, it will also have to close down the refinery operations because the refinery runs on the waste materials remaining after the lead is extracted. These materials were accumulated by the Federal Government during the war when the Federal Government ran the refinery. They are waste materials remaining after the refining process. They are of no value to the Federal Government, but if the refinery can obtain these materials, it will be able to continue in operation and save the jobs of 140 men. If these calcines cannot be obtained, the refinery will have to be closed down because it is not economically feasible to mine materials for the refinery alone.

Mr. GROSS. This will in nowise disturb market conditions?

Mr. ICHORD of Missouri. It in nowise disturbs the market conditions. As a matter of fact, these are just waste materials piled outside of the refinery.

Mr. GROSS. I thank the gentleman. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the Senate bill?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Administrator of General Services is hereby authorized to dispose of, by negotiated sale or otherwise, approximately three thousand four hundred and thirty-one short tons of nickel-cobalt-copper calcines and approximately eighty-seven tons of nickel-cobalt-copper matte now held in the national stockpile. Such disposition may be made without regard to the provisions of section 3 of the Strategic and Critical Materials Stock Piling Act, relating to dispositions on the basis of a revised determination pursuant to section 2 of said Act, to the effect that no such disposition shall be made until six months after publication in the Federal Register and transmission to the Congress and to the Armed Services Committees thereof of a notice of the proposed disposition.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill, H.R. 4435, was laid on the table.

AMENDING SECTION 3 OF THE PUERTO RICAN FEDERAL RELATIONS ACT

The Clerk called the joint resolution (H.J. Res. 124) to provide for amending section 3 of the Puerto Rican Federal Relations Act (64 Stat. 319), as amended (64 Stat. 458).

The SPEAKER. Is there objection to the present consideration of the joint resolution?

Mr. GROSS. Mr. Speaker, reserving the right to object, I should like to ask if there has been a vote by the people of Puerto Rico with respect to the proposed legislation.

Mr. ASPINALL. Mr Speaker, if the gentleman will yield to me, the resolution provides that the people of Puerto Rico must hold a plebiscite and a majority must vote for this legislation before the act would become enforceable.

Mr. GROSS. They must vote before the act can become effective?

Mr. ASPINALL. That is correct.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the joint resolution?

There was no objection.

The Clerk read the joint resolution as follows:

Whereas the Commonwealth of Puerto Rico by joint resolution of its legislative assembly (Joint Resolution Numbered 1, approved June 23, 1958) has requested the Congress of the United States to take such action as may be appropriate to amend section 3 of the Puerto Rican Federal Relations Act to the end that certain provisions thereof be deleted therefrom, said deletion to take effect upon the qualified electors of Puerto Rico having voted in a referendum, pursuant to section 1 of article VII of the constitution of the Commonwealth, to include provisions in the Commonwealth constitution in lieu of the pertinent provisions of section 3 of the Puerto Rican Federal Relations Act limiting the debt incurring capacity of the Commonwealth and of its municipalities; and

Whereas the Commonwealth of Puerto Rico is a self-governing body politic, created under a constitution adopted by the people of Puerto Rico, themselves, in accordance with the terms of compact embodied in Public Law 600, Eighty-first Congress, and it is appropriate that the debt incurring capacity of the Commonwealth of Puerto Rico and its municipalities be determined by the constitution of the Commonwealth of Puerto Rico, instead of the Puerto Rico Federal Relations Act: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Puerto Rican Federal Relations Act (64 Stat. 319), as amended (64 Stat. 458), is amended by deleting therefrom the following language: *"Provided, however,* That no public indebtedness of Puerto Rico and the municipalities of San Juan, Ponce, Arecibo, Rio Piedras and Mayaguez shall be allowed in excess of 10 per centum of the aggregate tax valuation of its property, and no public indebtedness of any other subdivision or municipality of Puerto Rico shall hereafter be allowed in excess of 5 per centum of the aggregate tax valuation of the property in any such subdivision or municipality," and "In computing the indebtedness of the people of Puerto Rico, municipal bonds for the payment of interest and principal of which the good faith of the people of Puerto Rico has heretofore been pledged and bonds issued by the people of Puerto Rico secured by bonds to an equivalent amount of bonds of municipal corporations or school boards of Puerto Rico shall not be counted but all bonds hereafter issued by any municipality or subdivision within the 5 per centum hereby authorized for which the good faith of the people of Puerto Rico is pledged shall be counted."

SEC. 2. Section 1 of this Act shall take effect upon the majority of the qualified electors of Puerto Rico having voted in a referendum pursuant to section 1 of article VII of the constitution of the Commonwealth of Puerto Rico, to include provisions in the Commonwealth constitution, in lieu of the provisions of section 3 of the Puerto Rican Federal Relations Act specified herein, limiting the debt-incurring capacity of the Commonwealth and of its municipalities (as proposed in the concurrent resolution of the legislative assembly of the Commonwealth).

The joint resolution was ordered to be engrossed.

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: Strike out all of the preamble.

The committee amendment was agreed to.

The joint resolution was read a third time and passed.

A motion to reconsider was laid on the table.

Mr. ASPINALL. Mr. Speaker, I ask unanimous consent that the Resident Commissioner from Puerto Rico [Mr. FERNÓS-ISERN], the gentleman from Pennsylvania [Mr. SAYLOR], the gentleman from New York [Mr. O'BRIEN], and I may be permitted to extend our remarks at this point in the RECORD.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. FERNÓS-ISERN. Mr. Speaker, the Legislative Assembly of Puerto Rico by Joint Resolution No. 1, approved June 23, 1958, requested the Congress of the United States to take appropriate action to amend section 3 of the Puerto Rican Federal Relation Act by deleting therefrom certain provisions relative to the debt limitations of the Commonwealth and its municipalities, such deletion to take effect upon the qualified electors of Puerto Rico having voted in a referendum, pursuant to section 1, of article VII of the constitution of the Commonwealth of Puerto Rico, to approve an amendment to the constitution to limit the debt-incurring capacity of the Commonwealth and its municipalities.

On August 12, 1958, and on January 19, 1959, I introduced resolutions to accomplish the sense of the resolution referred to above, and on January 12, 1961, I again introduced House Joint Resolution 124 for the same purpose. House Joint Resolution 124 has received favorable reports from the Department of the Interior and the Bureau of the Budget, and finally, on March 14, 1961, was favorably reported by the Committee on Interior and Insular Affairs.

I think we can all agree that the matter of debt limitation is evidently a local matter, and it is more appropriate that it be provided for in the constitution of the Commonwealth rather than in the Puerto Rican Federal Relations Act. So that they can be included in the constitution of the Commonwealth of Puerto Rico it is necessary that provisions dealing with this matter be deleted from the Puerto Rican Relations Act.

The Federal Relations Act consists of certain sections of the old organic act for Puerto Rico which were not repealed upon the adoption of a constitutional government for Puerto Rico and the proclamation of the existence of the Commonwealth of Puerto Rico. It is the framework within which the Commonwealth exercises powers of self-government and the U.S. Government exercises its reserved powers with respect of Puerto Rico.

The Puerto Rican Federal Relations Act is an old document serving a new purpose. It is to be naturally expected that some amendments and modifications may be proposed by Puerto Rico to better adjust existing relationships to the needs and realities of the political life of Puerto Rico.

The placing of the responsibility for public debt in the Commonwealth of Puerto Rico is consistent with the self-governing nature of the Commonwealth, as conceived and created by the joint effort and mutual agreement of the people of Puerto Rico and the people of the United States.

Mr. SAYLOR. Mr. Speaker, House Joint Resolution 124 is a commendable piece of legislation and I give it my hearty support. It is in keeping with the congressional belief that the Puerto Ricans are competent and capable of managing their own affairs. For the past 9 years, since the Commonwealth was created, Puerto Rico has made strides in many fields of development, particularly in encouraging economic stability.

Interior and Insular Affairs Committee hearings in Puerto Rico during the

86th Congress gave evidence of the need for additional capital to keep pace with the growing population and new industries that are enabling the Commonwealth to enjoy a stable economy.

This resolution will assist the Governor and legislature to improve the educational program and highway system of the island through the increased sale of bonds in the mainland markets. House Joint Resolution 124 will remove the debt limitation restriction from the Puerto Rican Federal Relations Act providing the Commonwealth constitution is amended to add the delegated language. In the event that amended language is not forthcoming the restriction on debt limitation will remain in the Federal Relations Act. The citizens of Puerto Rico are protected because they must ratify the amendment before it becomes effective. There is little danger of saddling the Puerto Ricans with an unbearable debt burden. I am certain that the proposed amendment will be carefully analyzed before it is voted upon.

Mr. Speaker, I endorse this legislation and hope its enactment will be expedited.

Mr. ASPINALL. Mr. Speaker, as we all know, the Commonwealth of Puerto Rico has a unique relationship with the United States. Public Law 600, 80th Congress, also known as the Puerto Rican Federal Relations Act, created the Commonwealth status for the island. The terms of the act describe it as being "in the nature of a compact between Congress and the people of Puerto Rico." The terms also provide they—the people—"may organize a government pursuant to a constitution of their own adoption." This constitution was duly drafted and accepted by the people of Puerto Rico in 1951 and by the Congress of the United States in 1952.

Since its creation the Commonwealth has progressed rapidly under the competent guidance of Gov. Luis Munóz-Marín and our colleague, Resident Commissioner Fernós-Isern.

House Joint Resolution 124 is in keeping with the policy enunciated in 1952 for self-government for the Commonwealth. Congress anticipated that the Commonwealth would be progressive and dynamic and that from time to time amendments would be desirable to keep the Puerto Ricans in step with the changing times. Congress likewise set certain restrictions on the Commonwealth with the understanding that they could be lifted when occasion demanded.

Among the restraints imposed on the Puerto Rican government and citizens was a limitation on the amount of bonded indebtedness which might be incurred by the Commonwealth and its municipalities. Presently there is a statutory restriction which provides:

> That no public indebtedness of Puerto Rico and five named municipalities * * * shall be allowed in excess of 10 per centum of the aggregate tax valuation of its property, and no public indebtedness of any other municipality—than these five—shall be allowed in excess of 5 per centum of the aggregate tax valuation.

Under House Joint Resolution 124 this restriction will be removed from section 3 of the Federal Relations Act, effective upon the inclusion of debt limitations in the Commonwealth constitution, and after approval by qualified electors voting in a referendum pursuant to procedures established by the constitution.

Commonwealth officials plan to increase the debt limitations as a step toward securing funds to construct and improve educational facilities and a modern highway system on the island.

Mr. Speaker, I know of no objections to the resolution. It has the endorsement of the Commonwealth government and the approval of the Interior Department and the Bureau of the Budget.

INCREASED COMPENSATION FOR CERTAIN SERVICE-CONNECTED DISABLED VETERANS

The Clerk called the bill (H.R. 873) to amend section 314(k), title 38, United States Code, to provide an increased statutory rate of compensation for veterans suffering the loss or loss of use of an eye in combination with the loss or loss of use of a limb.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FORD. Mr. Speaker, reserving the right to object, I note in the committee report a letter dated March 13, 1961, from the Administrator of Veterans' Affairs that the Veterans' Administration is in process of conducting a study on this and related problems. The Bureau of the Budget and the Veterans' Administration state in their opinion a deferral of such legislation is advisable pending the completion of this study. I wonder if the distinguished chairman of the Committee on Veterans' Affairs would care to comment on the views of Mr. Gleason, Administrator of the Veterans' Administration.

Mr. TEAGUE of Texas. I would say to the gentleman that my recollection is that this study may take 2 or 3 years. That is the reason for trying to pass the bill at this time.

Mr. FORD. If this study, which may take that long, comes to the conclusion that this kind of legislation is objectionable from the viewpoint of the executive branch, have we not taken a step which we cannot justify legislatively?

Mr. TEAGUE of Texas. I would say to the gentleman that this bill was reported unanimously from the committee and I do not think the conclusions by the executive branch would have any effect on what our committee would do in the future.

Mr. FORD. It is hard for me to understand why the Veterans' Administration would take 2 or 3 years to study a problem which, according to their own letter, involves only 450 veterans. Can the gentleman give me any answer to that question?

Mr. TEAGUE of Texas. I think it is more far reaching; that the committee is doing the same type of investigation. We hope later to bring a compensation bill before the House which will consider many of these matters, but which will involve more than 450 veterans.

Mr. FORD. In their report they say this legislation would involve 450 veterans. At the same time there is the forecast, that the additional cost per annum involving these veterans is about $200,000 for the first and each of the subsequent 4 years. They make no comment about any additional cost thereafter, but I presume the cost in some degree would continue beyond the first 4 years, once it became law. Does the chairman have any comment to make about that fact?

Mr. TEAGUE of Texas. I think what they are talking about is this particular phase of compensation, but this is nothing like what we will have to ask for. The compensation of these 450 veterans refers to this particular bill, but the whole compensation problem is much broader than that.

Mr. FORD. Well, if that is true, why do we go about it piecemeal if both the committee and the Veterans' Administration are making a comprehensive study of the entire problem of disability payments?

Mr. TEAGUE of Texas. Because we believe that any man who has a combination of an arm off or a leg off or an eye out is entitled to the additional $47 a month, and we would like to have him start drawing it as soon as possible.

This bill seeks to authorize the payment of a statutory award of $47 monthly for each anatomical loss, or loss of use of, in addition to the basic compensation, but in no event to exceed $309 monthly. Existing law does not permit each such loss to receive the $47 rate.

Specifically the bill would provide the rate of $47 monthly to be paid to veterans suffering the loss or loss of the use of an eye in combination with loss of the use of a limb.

The Veterans' Administration estimates that there are 450 veterans involved at an annual cost of approximately $200,000.

This bill was reported in the 83d Congress; in the 84th, 85th, and 86th Congress it was reported and passed by the House, but failed of approval in the other body.

It was introduced at the request of the Disabled American Veterans and other veterans' organizations support its enactment.

Mr. FORD. Mr. Speaker, I withdraw my reservation of objection, and I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PROVIDING ADDITIONAL COMPENSATION FOR VETERANS HAVING SERVICE-CONNECTED DISABILITY OF DEAFNESS OF BOTH EARS

The Clerk called the bill (H.R. 846) to amend title 38 of the United States Code to provide additional compensation for veterans having the service-connected disability of deafness of both ears.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. TEAGUE of Texas. Mr. Speaker, the purpose of this bill is to provide a

statutory award of $47 per month for veterans who are suffering from total deafness. This would be in addition to their basic rate for total deafness in both ears, which is generally an 80 percent rating and amounts to $160 monthly.

Thus the veteran today who is totally deaf in both ears receives $160 monthly. If this bill were enacted it would mean he would receive $207 per month. A few years ago a person who suffered from this disability was rated at 100 percent, and would have received $225 monthly. This amount was reduced administratively.

The Veterans' Administration estimates that there are approximately 900 cases involved and this would mean an additional cost of $506,000 the first fiscal year.

Identical legislation passed the House in the 85th and 86th Congresses but did not receive approval of the other body.

Mr. Speaker, in regard to the two bills which the House has just considered, H.R. 846 and H.R. 873, I think it should be called to the attention of the House that recommendation No. 10 of the Commission on Veterans' Pensions, established by President Eisenhower and usually referred to as the Bradley Commission, is involved in this general picture.

That recommendation is a part of the report which was filed on April 23, 1956, and printed as Committee Print No. 236 of the Committee on Veterans' Affairs of the 84th Congress.

The text of that recommendation is as follows:

RECOMMENDATION NO. 10

(a) The Veterans' Administration schedule for rating disabilities should be revised thoroughly so that it will reflect up-to-date medical, economic, and social thinking with respect to rating and compensation of disability. This revision should be based on thorough factual studies by a broadly representative group of experts, including physicians, economists, sociologists, psychologists, and lawyers.

(b) The revised schedule should serve in the future as the guide for compensation in all cases. It should combine in a comprehensive scale with appropriate rates all the factors—economic, social, physical, and mental—which should be considered in determining compensation for various disabilities.

(1) The basic purpose of disability compensation is economic maintenance. The loss of earning capacity as the result of disability should therefore continue to be the primary factor in the determination of rating criteria.

(2) Human life, however, has values beyond the economic sphere. A loss of physical integrity which is not reflected in loss of earning capacity may still constitute a serious handicap. The rating schedule should, therefore, make allowance for purely physical impairment even though it is not manifested in economic impairment. Also, appropriate consideration should be given to factors resulting in social inadaptability. These factors, however, should be given much less weight than the economic element.

(3) Shortened life expectancy due to disability or impairment of physical vitality may result in loss of earning capacity. It is appropriate, therefore, to reflect in the compensation scale some allowance for reduced longevity among disabled veterans providing it is held to modest weight and account is taken of the fact that liberal benefits for survivors are provided by the Government.

(c) The schedule recommended above would recognize loss of physical integrity in all cases where it would merit consideration. The objective should be to accord equal treatment to all individuals with disabilities of different kinds, but of equal severity. The present statutory awards, however, result in uneven treatment of individuals with disabilities of equal severity. Under the proposed comprehensive schedule, special awards would no longer be necessary for selected conditions since the loss of physical integrity would be one of the factors considered in the basic percentage rating scale.

(d) Intensive research on all phases of disability rating and compensation should be carried out on a continuing basis by the various agencies so that disability rating procedures and criteria would be kept up to date.

It will be noted that the basic point of this recommendation is that the rating schedule should be thoroughly revised and, among other things, new weight should be given to shortened life expectancy. In this connection I may say parenthetically that the Committee on Veterans' Affairs has pending before it three bills (H.R. 863, H.R. 864, and H.R. 865) along this line and I hope to have action on them some time before the Congress finally adjourns.

The Bureau of the Budget in its report to the chairman of the Senate Finance Committee, on June 27, 1957, on the bill H.R. 52—which later became Public Law 85–168 and was the last general compensation increase—stated, among other things:

In 1955 the Veterans' Administration began a revision of the schedule for rating disabilities to assure that it would reflect the current level of medical, economic, and other scientific knowledge. This revision, based on the existing statutory standard of average impairment of earning capacity, is now proceeding with the President's approval. He is also directing the Administrator of Veterans' Affairs to develop, for submission to the Congress, a schedule of supplementary awards which will make equitable provision for such noneconomic factors as loss of physical integrity, social inadaptability, and shortened life expectancy.

The reports of the Veterans' Administration on identical bills in the 86th Congress and 87th Congress should be read in connection with the reports on the bills in this Congress:

H.R. 268, 86TH CONGRESS

The Veterans' Administration is in accord with the principle that basically the amount of compensation payable should be proportionate to the extent of average economic impairment. Any consideration of supplementary awards of compensation based on noneconomic factors should be approached on a uniform and equitable basis. Statutory awards on a piecemeal basis have discriminatory effects.

H.R. 283, 86TH CONGRESS

The Veterans' Administration is in accord with the principle that basically the amount of compensation payable should be proportionate to the extent of average economic impairment. Any consideration of supplementary awards of compensation based on noneconomic factors should be approached on a uniform and equitable basis. Statutory awards on a piecemeal basis have discriminatory effects. The Veterans' Administration is now making an extensive study to develop for submission to the Congress a schedule of supplemental awards which will make equitable provision for such noneconomic factors as loss of physical integrity, social inadaptability, and shortened life expectancy.

It is recommended, therefore, that favorable action not be taken at this time on bills such as H.R. 283 which by reason of their piecemeal nature may well create further inequities and distortions in the compensation structure.

H.R. 846, 87TH CONGRESS

The compensation authorized by subsection (k) is in the nature of a supplemental award which recognizes factors other than the economic loss involved. For some time the Veterans' Administration has been making an extensive study to develop for submission to the Congress a schedule of supplemental awards which will make equitable provision for such noneconomic factors as loss of physical integrity, social inadaptability and shortened life expectancy. Our Department of Veterans' Benefits has been concentrating on the shortened life expectancy phase of the project. Since completion of the entire study will require a considerable period of time, and since the immediate impact of this bill is limited, the Congress may wish to consider it notwithstanding the incompleteness of the data available.

H.R. 873, 87TH CONGRESS

The compensation authorized by subsection (k) is in the nature of a supplemental award which recognizes factors other than the economic loss involved. For some time the Veterans' Administration has been making an extensive study to develop for submission to the Congress a schedule of supplemental awards which will make equitable provision for such noneconomic factors as loss of physical integrity, social inadaptability, and shortened life expectancy. Our Department of Veterans' Benefits has been concentrating on the shortened life expectancy phase of the project. Since completion of the entire study will require a considerable period of time, and since the immediate impact of this bill is limited, the Congress may wish to consider it notwithstanding the incompleteness of the data available.

Members will readily note the difference in emphasis of the Veterans' Administration report. In effect, it seems to me the Veterans' Administration is saying it has no objection to the enactment of this proposal at this time and that the completed study on shortened life expectancy, for which the Bureau of the Budget suggests that we wait, may not be ready for some time, perhaps years. The same is true of the report of the Veterans' Administration on the bill of last year and the subject bill relating to each such anatomical loss.

I believe, in view of the history of these proposals and the limited application,

that it is wise to pass these measures at this time and enact them into law as soon as possible.

The situation is not without its amusing side. The Bureau of the Budget was very much, and still is, interested in the recommendation and findings of the President's Commission on Veterans' Pensions. Now that the Veterans' Administration has moved in the field of conducting a study of the rating schedule and other items mentioned in recommendation No. 10 above, it is finding that there is no reason why some of the bills that it has opposed in the past should not be favorably considered and enacted into law—this is my interpretation and might not be shared by the Veterans' Administration. In other words, the Bureau of the Budget is happy to have a study made but at the present time is rather unhappy with some of the findings and results of the study which the Veterans' Administration is in the process of completing.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AUTHORIZING CERTAIN BEACH EROSION CONTROL OF THE SHORE IN SAN DIEGO COUNTY, CALIF.

The Clerk called the bill (S. 307) to authorize certain beach erosion control of the shore in San Diego County, Calif.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WEAVER. Mr. Speaker, it is my understanding that the first year's cost of this bill is in excess of a million dollars and it violates the rules of the Consent Calendar, and therefore I object.

DESIGNATING THE FIRST DAY OF MAY OF EACH YEAR AS LAW DAY, U.S.A.

The Clerk called the resolution (H.J. Res. 32) to designate the first day of May of each year as Law Day, U.S.A.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the present consideration of the House joint resolution?

Mr. HOFFMAN of Michigan. Mr. Speaker, reserving the right to object, will the gentleman tell us how many days have been set apart as special days to observe some particular event.

Mr. CELLER. Many days have been adopted in the other body, and we members of the Judiciary Committee of the House have been endeavoring to hold down the number of those days. We have been striving with might and main to keep the number of those commemorative days at a minimum. Sometimes we have wounded the sensibilities of some of the Members who have sponsored those bills by not reporting them favorably. The problem of selection is difficult. I can assure the gentleman that we only accept those which have widespread approval, and which satisfy cultural, patriotic or industrial needs.

Mr. HOFFMAN of Michigan. I do not understand the gentleman's answer. This bill and the one to follow set aside days; in fact, one sets aside a week to be known as Transportation Week. Have you set aside for special observance more days than there are in the year?

Mr. CELLER. With reference to Law Day——

Mr. HOFFMAN of Michigan. No; my question is, Have you set aside more days for special observance than there are days in the year so there would have to be duplication of observance on some of them?

Mr. CELLER. We do not do that. I do not think the gentleman's characterization is very sound. We have been very careful not to have too many days. You do not find many of these bills coming to the floor. I can assure the gentleman that we have pending in the committee probably 70 or 80 bills for a like number of days for specific purposes. We are holding them down to a minimum and come here with only a few of them. It is rather difficult to do that. The House gets very few of these bills, due to the efforts of the Judiciary Committee to hold them down to discourage them as much as possible.

Mr. HOFFMAN of Michigan. The reason I am asking is that I have two or three similar requests, and I just wondered whether to send them over to the gentleman's committee and please those who made the requests, or just what kind of reply to send to some organization or individual asking some day or week be designated to hold a celebration.

Mr. CELLER. All the days have not been assigned. If the gentleman has a real cause embodied in his bill setting forth a particular day, let us have it and we will consider it on its merits.

Mr. HOFFMAN of Michigan. On its merits. But suppose it does not have any merit, that they just want a day.

Mr. CELLER. Then I am afraid we would have to reject it.

Mr. HOFFMAN of Michigan. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. JONES of Missouri. Mr. Speaker, I object.

DESIGNATION OF NATIONAL TRANSPORTATION WEEK

The Clerk called the resolution (H.J. Res. 143) authorizing the President of the United States to proclaim the week in May of each year in which falls the third Friday of that month as National Transportation Week.

The SPEAKER. Is there any objection to the present consideration of the resolution?

Mr. JONES of Missouri. Mr. Speaker, I object.

STUDY OF STATE TAXATION OF INTERSTATE COMMERCE

The Clerk called the bill (H.R. 4363) to amend Public Law 86–272 relating to State taxation of interstate commerce.

There being no objection the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201 of Public Law 86–272 (73 Stat. 556) is amended to read as follows:

"SEC. 201. The Committee on the Judiciary of the House of Representatives and the Committee on Finance of the United States Senate, acting separately or jointly, or both, or any duly authorized subcommittees thereof, shall make full and complete studies of all matters pertaining to the taxation of interstate commerce by the States, territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico, or any political or taxing subdivision of the foregoing."

Mr. WILLIS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. WILLIS. Mr. Speaker, I should like to offer a brief background explanation of the bill which is now before the House, H.R. 4363. This bill would expand the scope of the study required by Public Law 86–272. In that statute, Congress required the Committee on the Judiciary of the House and the Committee on Finance of the Senate to—

make full and complete studies of all matters pertaining to the taxation by the States of income derived within the States from the conduct of business activities which are exclusively in furtherance of interstate commerce, or which are a part of interstate commerce.

The general problem of State taxation of interstate commerce, of which income taxation is but a part, is not a new one. It has been with us for as long as we have been a Nation. However, during recent years it has become particularly acute. Rightly or wrongly, people have come to expect more from their Government—Federal, State, or local—too much, in my opinion. In addition, the cost of those things which local government has traditionally supplied—roads, schools, various eleemosynary institutions—has increased enormously. It has been estimated that State expenditures today are 400 percent more than they were some 15 years ago. The result has been that in their quest to keep up with expenses, States and local governments have, during recent years, turned to new forms of taxation and have begun to enforce already existing forms with a new diligence and inspired ingenuity.

In 1959, the issue came to a head when the Supreme Court handed down its decision in Northwestern States Portland Cement Company against Minnesota and its companion case, Williams against Stockham Valves and Fittings. In those cases the Court upheld the constitutionality of a State tax on the net income of an out-of-State corporation even though the income was derived from activities exclusively in furtherance of interstate commerce.

Whether the Northwestern and Stockham decisions actually enlarged the authority of the States to tax out-of-State business has been and remains a matter of controversy. There were many who

felt that the broad language in the opinion created new uncertainties. These apprehensions were strengthened by the refusal of the Supreme Court to review the decision of a State court in Brown-Forman against Collector of Revenue.

In that case, the out-of-State business—the taxpayer—had no office, warehouse, or other place of business in the taxing State. Income was derived solely from the activities of representatives within the taxing State. Nevertheless, the company was held subject to a tax on income apportioned to the State.

If businessmen were concerned with the meaning of the Northwestern case, where the company actually operated at least a sales office within the taxing State, they were seriously disturbed by Brown-Forman. At least 35 States, the District of Columbia and at least 8 cities tax business income derived from interstate commerce. How many of them would now seek to exploit an area into which they had previously ventured with varying degrees of diligence? How many of them would now seek to collect taxes, penalties and interests which had accrued over a period of many years, as Minnesota did in the Northwestern case? Although States could probably tax an out-of-State business which did no more than solicit within the State, how many would seek to do so? How many would expect those who did a negligible amount of business in the State to file returns and pay taxes even though compliance would cost almost as much or more than the tax itself?

Thousands of letters flowed into congressional offices and in the summer of 1959 Congress enacted Public Law 86–272. That act sought to relieve the apprehensions of the business community while at the same time preserving for the States a broad area for taxation. The act provided that a State could not impose a tax on the net income derived within that State by an out-of-State business, if the only activity within the State was the solicitation of orders. In effect, Public Law 86–272 drew the line about where the majority in Northwestern had drawn it but short of the implications of the Brown-Forman case. While Congress tried to enact a fair and reasonable statute, it recognized that in this most complex area it would have been presumptuous to consider Public Law 86–272 a permanent or comprehensive solution to the problem. Indeed, the House bill would have limited the effectiveness of the statute to 2 years. And although the Senate version had no time limitation, the Senate report recognized the temporary or stopgap nature of the measure. In addition, both Houses called for studies of the entire problem of State taxation of income deprived from interstate commerce and this provision was enacted into law.

In the House the task of conducting the studies required by statute was given to the House Judiciary Committee and I had the great honor of being selected chairman of the special subcommittee charged with this responsibility. I might add that subsequently Senator BYRD proposed to defer to the House in this matter and, therefore, the study is now entirely the responsibility of my subcommittee.

If, after the enactment of Public Law 86–272, we were not all perfectly satisfied with our temporary solution to the problem, we at least felt that we had a breathing spell in which to think and study. But in the midst of our meditations the fire broke out again, this time in another area.

As you know, during recent years an increasingly large number of States and municipalities have turned to the sales tax as a source of revenue. To prevent evasion as well as to protect local businessmen from untaxed competition, they have also enacted use taxes. However, it is one thing to enact the use tax and another to collect it. A bright young man, some place, therefore, came up with the idea that since sellers are less numerous and easier to find than buyers, why not require out-of-State businesses selling within the State to collect use taxes from their customers and pay them over to the State. As you might expect, this was not received with universal joy unbounded by the public community.

The upshot was, of course, another battle in the courts and a decision by the Supreme Court of the United States. In 1960, in Scripto against Carson, the Court held that a State may require an out-of-State business to collect a use tax for it on sales within the State even though the company maintained no facilities there. The reaction was much the same as that which followed the Northwestern decision and once again Congress was importuned to preserve the country from alleged Balkanization by tax collection.

It appeared to many of us that this was another aspect of the same economic and general legal problem as that raised by the income tax in Northwestern. The conflict between our historic demand for an unobstructed flow of commerce among all the States was once again at loggerheads with the need of the States for revenue and their desire to protect local businesses from competitive disadvantage. This would be the basic framework of the problem regardless of the type of tax involved. This is a unitary problem—one which cannot be neatly compartmented into an income tax problem, a sales tax problem, a use tax problem, a franchise tax problem. It appeared that there could be neither a meaningful study nor a meaningful solution unless we looked at the entire picture. Accordingly, I introduced H.R. 4363, the bill which is now before the House. This bill would enlarge the scope of our study to cover "State taxation of interstate commerce," rather than just "income derived from interstate commerce." In this, I have the support of Senator BYRD, chairman of the Senate Committee on Finance. I hope that the bill will be favorably acted upon by both Houses.

The problems with which our special subcommittee will have to deal are numerous, complex, and large. We are faced with determining such questions as:

What is the extent of the Federal power in this area and, conversely, what is the extent of State power?

What is the validity of a minimum activities approach?

What is the validity of a solution based upon a uniform allocation and apportionment formula?

If such a solution is valid, what factors are to be used in the formula?

What are the economic effects of any proposed solution? Does it protect the unity of the Common Market while at the same time preserve an adequate source for State revenue?

Should intangibles as well as tangibles be included in any Federal statute?

Should provision be made for the problems of the interstate transportation business?

These are but a few of the serious and difficult issues which confront us. The problems are great but the opportunities are also great. For over 150 years we have wrestled with this dilemma. Up to now it has been the courts which have had to draw the lines. We have had to this date some 300 full-scale decisions in this general area by the Supreme Court of the United States alone, yet the problem remains with us. We have only now come to the realization that these are questions which are not susceptible of solution in the ad hoc manner in which cases are decided dependent as they are both on variations in fact and in changes in the personnel of the Court.

The need for congressional action was pointed out most clearly by Mr. Justice Frankfurter in his dissenting opinion in the Northwestern case when he stated that "Congress alone can formulate policies founded upon economic realities," and that "congressional committees can make studies and give the claims of the individual States adequate hearing before the ultimate legislative formulation of policy is made by the representatives of all the States."

This is the task we now have before us. It is a milestone in our economic and legal history.

Mr. DADDARIO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. DADDARIO. Mr. Speaker, I want to compliment the Committee on the Judiciary for taking note of the burgeoning problems relating to State taxation. Like all of the members, I recognize the increasing demand at State levels for revenues to carry on vital programs, but I am concerned deeply with the effect that some actions are having or may have on interstate commerce.

Two years ago I supported the recommendations of the Committee on the Judiciary with respect to the right of the States to collect income tax on revenues collected within each State. Sub-

sequently, following the Scripto decision, I introduced legislation which would add to the study of the committee the question of whether States may require companies to collect and forward use taxes when sales of such products are made in other States.

It was too late to hold hearings on that legislation a year ago, I was advised, and I reintroduced such legislation in the form of H.R. 1148 in this session. I believe it should be made the subject of hearing at the earliest possible date, because we are seeing an increase in the problem that will make a future decision very hard on any State.

I may point out that the constitutional questions which arose concerning the collection of income tax do not arise in the case of H.R. 1148. It says nothing about the right of a State to collect a tax from a resident who makes a purchase within that State. It does seek to limit the power of the States to go roving throughout the other States to make business concerns pay levy to them.

This, I think, is a serious question. If we are to have a common market in this country—if we are to encourage full economic activity—if we are not to have taxes laid on articles exported from any State, as is directly forbidden in the Constitution—then I believe we ought to check this growth of Scripto-type taxes immediately until the Judiciary Committee completes the study it is now undertaking.

I may point out this fact. The present situation requires companies to maintain books and records on sales activities in 50 States, even though they have no sales offices in those States. Two years ago, only one or two States interpreted the law in the way upheld in the Scripto case. Today, more than five have, and others have such an application under consideration. If we delay in suspending this application of use tax laws until the question is studied and ironed out, more States will have begun to tap that revenue and incorporate it in their revenue base. Then a correction will prove a definite hardship.

I trust the Committee on the Judiciary, which, as I understood it from previous correspondence, already is given under the rules the right to handle measures affecting interstate taxation, will see fit to recommend shortly the suspension of collection of use taxes as it is described in H.R. 1148, before the situation is entirely out of hand.

All our States depend heavily on the growth of economic activity. They need a free and unfettered economy in which manufacturers and businessmen may develop markets across the country. The insistence that companies which may have no other connection with a State serve as a collection agent for such a State is an unnecessary harassment at a time when we should be encouraging business activity.

I hope, therefore, that this bill will not be regarded as a solution to the problem, and that we can have assurances from the distinguished chairman that steps will be taken to suspend taxation of interstate commerce until the studies which are herein authorized may be completed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. McCULLOCH. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. McCULLOCH. Mr. Speaker, the passage of H.R. 4363 to expand the scope of the tax study authorized by Public Law 86–272 so as to include all aspects of State taxation of interstate commerce could easily become one of the most important legislative accomplishments of the 87th Congress.

After the Supreme Court decision in *Northwestern Cement Company* v. *Minnesota* (358 U.S. 450 (1959)), it became evident to many Members on both sides of the aisle that it would be necessary for Congress to establish a minimum standard to be followed in the State taxation of income derived from interstate commerce and that a comprehensive and objective study of the problems involved in this area of Federal-State relationship should be undertaken.

The result, as is now well known, was to include a study provision in the bill which became Public Law 86–272.

Since the enactment of Public Law 86–272 the Supreme Court rendered a decision in *Scripto, Inc.* v. *Dale Carson* (362 U.S. 207 (1960)), involving the imposition of a Florida State use tax on a commodity sold and shipped from Georgia. From this and from other recent decisions it has become evident that a study limited to State taxation of income derived from interstate commerce without at the same time considering the other aspects of State taxation of interstate commerce, such as sales and use taxes, would be of very limited value. In short, the problems in this entire area of State taxation are related and it is of the utmost importance that a practical, unified, and workable solution instead of a piecemeal solution be determined and enacted into law once the proposed study has been completed.

I might add that the problems presented are grave, that they touch on Federal-State relationships, and that I am particularly gratified that the study is going to be broadened.

FEED GRAIN PROGRAM, 1961

Mr. COOLEY. Mr. Speaker, I call up the conference report on the bill (H.R. 4510) to provide a special program for feed grains for 1961, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 170)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special program for feed grains for 1961 having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "That section 105 of the Agricultural Act of 1949, as amended, is amended by adding the following new subsection:

"'(c) Notwithstanding any other provision of law—

"'(1) The level of price support for the 1961 crop of corn shall be established by the Secretary at such level not less than 65 per centum of the parity price therefor as the Secretary may determine. Price support for corn and grain sorghums shall be made available on not to exceed the normal production of the 1961 acreage of corn and grain sorghums of each eligible farm based on its average yield per acre for the 1959 and 1960 crop acreage.

"'(2) The Secretary shall require as a condition of eligibility for price support on the 1961 crop of corn, grain sorghums, and any other feed grain which he may designate that the producer shall participate in the special agricultural conservation program for 1961 for corn and grain sorghums to the extent prescribed by the Secretary.'

"SEC. 2. Section 16 of the Soil Conservation and Domestic Allotment Act, as amended, is amended by adding the following new subsection:

"'(c) Notwithstanding any other provision of law—

"'(1) The Secretary shall formulate and carry out a special agricultural conservation program for 1961, without regard to provisions which would be applicable to the regular agricultural conservation program, under which, subject to such terms and conditions as the Secretary determines, conservation payments in amounts determined by the Secretary to be fair and reasonable shall be made to producers who divert acreage from the production of corn and grain sorghums to an approved conservation use and increase their average acreage devoted in 1959 and 1960 to designated soil conserving crops or practices by an equal amount: *Provided, however,* That any producer may elect in lieu of such payment to devote such diverted acreage to castor beans, safflower, sunflower, or sesame, if designated by the Secretary. Such special agricultural conservation program shall require the producer to take such measures as the Secretary may deem appropriate to keep such diverted acreage free from insects, weeds, and rodents. The acreage eligible for payments in cash or in an equivalent amount in kind under such conservation program shall be an acreage equivalent to 20 per centum of the average acreage on the farm planted to corn and grain sorghums in the crop years 1959 and 1960 or up to twenty acres, whichever is greater. Such payments in cash or in kind at the basic county support rate may be made on an amount of corn and grain sorghums not in excess of 50 per centum of the normal production of the acreage diverted from corn and grain sorghums on the farm based on its average yield per acre for the 1959 and 1960 crop acreage. Payments in kind only may be made by the Secretary for the diversion of up to an additional 20

per centum of such corn and grain sorghum acreage. Payments in kind on such additional acreage may be made at the basic county support rate on an amount of corn and grain sorghums not in excess of 60 per centum of the normal production of the acreage diverted from corn and grain sorghums on the farm based on its average yield per acre for the 1959 and 1960 crop acreage. The Secretary may make such adjustments in acreage and yields for the 1959 and 1960 crop years as he determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop rotation practices, type of soil, and topography. The Secretary may make not to exceed 50 per centum of any payments to producers in advance of determination of performance.

"'(2) There are hereby authorized to be appropriated such amounts as may be necessary to enable the Secretary to carry out this section 16(c). Obligations may be incurred in advance of appropriations therefor and the Commodity Credit Corporation is authorized to advance from its capital funds such sums as may be necessary to pay administrative expenses in connection with such program during the fiscal year ending June 30, 1961, and to pay such costs as may be included in carrying out section 3 of the Act which added this subsection to this Act.

"'(3) The Secretary shall provide by regulations for the sharing of payments under this subsection among producers on the farm on a fair and equitable basis and in keeping with existing contracts.'

"SEC. 3. Payments in kind shall be made through the issuance of negotiable certificates which the Commodity Credit Corporation shall redeem for feed grains and, notwithstanding any other provision of law, the Commodity Credit Corporation shall, in accordance with regulations prescribed by the Secretary, assist the producer in the marketing of such certificates at such time and in such manner as the Secretary determines will best effectuate the purposes of the 1961 Feed Grain Program authorized by this Act. In the case of any certificate not presented for redemption within 30 days of the date of its issuance, reasonable costs of storage and other carrying charges, as determined by the Secretary, for the period beginning 30 days after its issuance and ending with the date of its presentation for redemption shall be deducted from the value of the certificate.

"SEC. 4. Not later than 90 days after the effective date of this Act the Secretary shall submit to the Congress a detailed report, including estimates where final figures are not available, setting forth but not limited to the number and percent of cooperators under this Act, the acreage retired from production by States, the cash payments made, the quantity and kind of feed grains made available under the payment-in-kind provisions of the Act and the value thereof, the overall cost of the program, the estimated savings compared with the program in effect before this Act became effective, and such other information as will indicate the progress, cost, and reduction of surpluses under this Act."

And the Senate agree to the same.

HAROLD D. COOLEY,
W. R. POAGE,
PAUL C. JONES,
Managers on the Part of the House.

ALLEN J. ELLENDER,
OLIN D. JOHNSTON,
SPESSARD L. HOLLAND,
HERMAN E. TALMADGE,
MILTON R. YOUNG,
Managers on the Part of the Senate.

STATEMENT OF MANAGERS ON THE PART OF THE HOUSE

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special feed grains program for 1961 submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The amendment of the Senate struck out all after the enacting clause of H.R. 4510 and inserted the language of a similar Senate bill (S. 993) as passed by the Senate. The conference has agreed on a substitute to the Senate amendment which follows in general the language of the House bill with the exception of the changes noted below. Other than technical changes, the differences between the bill as passed by the House and the substitute agreed to by the conferees are as follows:

SECTION 1

This retains the language of the House bill with some modifications. The level of price support for the 1961 crop of corn will be established by the Secretary "at such level not less than 65 per centum of the parity price therefore as the Secretary may determine" but the committee of conference understands that pursuant to this authority the support level for corn for the 1961 crop will be $1.20 per bushel.

The House bill required that soybean producers and producers of such other oilseed crops as might be designated by the Secretary would have to participate in the corn and grain sorghum acreage reduction program in order to be eligible for price supports on soybeans or such other designated oilseed crops. The conference substitute omits this requirement.

SECTION 2

Section 2 follows in general the language of the House bill. It authorizes the Secretary of Agriculture to formulate and carry out a special agricultural conservation program for corn and grain sorghums for 1961 and requires that an acreage equivalent to 20 percent of the average acreage on the farm of these two crops in the years 1959 and 1960 must be retired under the special conservation program in order for the producer to be eligible for price supports on corn or grain sorghums. An additional 20 percent may be retired at the producer's option. It requires that a corresponding increase must be made in the average acreage devoted in 1959 and 1960 to soil-conserving crops and practices and it is the understanding of the conference committee that the certification of the producer with respect to this acreage may be accepted as evidence of compliance.

The House bill contained the provision that any producer participating in the corn and grain sorghum acreage retirement program might elect, in lieu of any payment for such land retirement, to grow on the diverted acreage any crop not in surplus, not eligible for price supports, and not produced principally for livestock feed which might be designated by the Secretary. This provision has caused so much misunderstanding that the committee of conference has substituted for it a listing of the specific crops which may be designated by the Secretary. They are castor beans, sunflower, safflower, and sesame. The Secretary will designate which, if any, of these crops may be grown on diverted acreage.

Paragraph 2 of the committee substitute combines the provisions contained in paragraphs 2 and 3 of section 2 of the House bill. The authority for financing the program is virtually the same as that in the House bill except that the specific authorization for expenditure of $500 million for payments in cash in advance of appropriations is eliminated and the language makes it clear that CCC may pay the cost involved in carrying out the provisions of section 3 of the conference substitute.

Paragraph 3 of section 2 contains the Senate provision for a sharing of payments among producers on the farm on a fair and equitable basis and in keeping with existing contracts.

SECTION 3

Section 3 of the bill as passed by the House, which was its most controversial section, was modified and rewritten by the conference committee. The effect of this is to change the language and the procedures of section 3 but to leave to the Secretary the power to encourage participation in the program by releasing into the market the amount of feed grains represented by the certificates issued as payment in kind under the program authorized by the legislation. Under section 3 as passed by the House, the Commodity Credit Corporation would have been authorized to sell feed grains during the 1961 marketing year in unlimited quantities at prices not less than 17 percent below the 1961 support price, or about $1 per bushel for corn and a comparable price for grain sorghums. The new language of section 3 requires all certificates representing payments in kind to be redeemed for feed grains but a producer-certificate holder not desiring to take feed grains may obtain the assistance of the Commodity Credit Corporation in the marketing of his certificates for cash. The new language, however, gives the Secretary discretion as to when such certificates would be sold in order that the Secretary may have a measure of control over the rapidity with which the certificates may be placed on the market. The Secretary would be authorized, as a means of providing adequate assistance to producers in the marketing of their certificates, to direct the Commodity Credit Corporation to make an advance on the certificate to the producer. The Commodity Credit Corporation would then be reimbursed for such advance from the sale proceeds of the certificates. In this way, the Secretary would not be required, when he deemed such action contrary to the best interests of the program, to permit an undue quantity of grain to be put on the market. If a certificate is not presented for redemption within 30 days of its issuance reasonable storage and other charges as determined by the Secretary, beginning 30 days after issuance of the certificate and ending with its presentation for redemption, would be deducted from the value of the certificate. However, if the Department elected to hold producers' certificates off the market longer than 30 days after their issuance, producers would not have to bear storage and other charges, since the time of the marketing of the certificates would not be within their control, but would be wholly within the control of the Department. Under the language of section 3 the Secretary is required to deduct only such storage and other charges as he determines to be reasonable and this would give him ample authority to relieve the producer of storage and other charges under these circumstances.

SECTION 4

Section 4 of the conference substitute adds language which was not in the House bill. It provides that the Secretary shall submit to Congress, within 90 days after the effective date of this act, a detailed report on the progress, cost, and reduction of surpluses under the program, and other relevant information.

HAROLD D. COOLEY,
W. R. POAGE,
PAUL C. JONES,
Managers on the Part of the House.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. POAGE], chairman of the subcommittee that handled this bill.

Mr. POAGE. Mr. Speaker, I believe the conference committee has been able

to bring back to the House a very satisfactory compromise with the Senate. Basically we have kept intact the major provisions of the bill as passed by this body.

The statement on the part of the managers which was just read gave you an outline of those differences and how they were composed. It was pointed out that the very basic provisions as to support prices were retained. We do retain the provision as to how the Secretary of Agriculture shall support feed grains produced by a cooperator, and while the House bill did not have any figure in dollars and cents in it, and the conference report does not have a figure, we do provide that the support price shall be not less than 65 percent of parity, and we have the assurance of the Secretary that it will be $1.20 a bushel on corn and other feed grains in proportion, so that we start out with a sound and understandable premise.

There was some wording in the House bill relating to the land which might be placed in soybeans or any crop not raised for feed and designated by the Secretary, and that was stricken out. We simply wrote in there that it might be devoted to "sunflowers," "castor beans," "safflower," or "sesame" if so designated by the Secretary, and in the event that the cooperator saw fit to forgo the payments per acre in order to grow the nonsurplus crop on this land.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. I think the conferees on the part of the House have upheld with dignity the position of the House in the conference that took place. I agree with the gentleman that the substance of the House bill has been preserved and maintained in the conference report. I can assure the gentleman that the President is satisfied with the conference report.

Mr. POAGE. I thank the gentleman.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Illinois.

Mr. ARENDS. In other words, if I understand the gentleman correctly, he feels that the House position has been maintained, even including section 3, which was maintained in the House bill?

Mr. POAGE. I do. I have not reached section 3 in my chronological discussion, but I think that is the section in which the House is primarily interested. While the language in section 3 is completely different from the language in the House bill, I think the results achieved are substantially the same, and those results are, to wit, to allow the Secretary of Agriculture, through the power to move in this case certificates rather than grain, to move certificates into the market. The Secretary retains the power to keep the market at substantially its present level. This is not a program, as some have described it, to break the market but rather to maintain the market at approximately $1 a bushel on corn, which is the market now, so that if there is any increase, as we anticipate there will be, in the market price of corn and feed grains as the result of this bill, that increase will inure to the benefit of the cooperators and the U.S. Government and not to the benefit of noncooperators who did nothing in the world to bring about the increase.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Iowa.

Mr. GROSS. But the ability to issue certificates carries a built-in limitation that section 3 previously did not carry; is that not correct?

Mr. POAGE. That is correct, and I do not think it is a bad feature. I think that feature is all right, because it does allow everyone to know the maximum amount of grain or grain equivalent which the Secretary may ever place on the market.

Mr. GROSS. But that is definitely a limitation that was not contained in section 3.

Mr. POAGE. That is definitely a limitation, which was not contained in the original bill.

Mr. ARENDS. Mr. Speaker, if the gentleman will yield further, under the provisions of section 3 in the House bill, whereby the Secretary would be permitted to sell corn at 17 cents below the support price, what would be the equivalent under this bill? You mentioned $1. Would that be the equivalent of $1, which is the market price today?

Mr. POAGE. One dollar is the market price today, and that is the goal toward which we are shooting. The House bill provided specifically that the Department could not go below that amount and the compromise does not have that limitation on it. The limitation mentioned by the gentleman from Iowa is as to the total amount, and we anticipate that with the lesser amount which can be offered in the market, the Secretary could not effect a greater depression which he could have with the 17-percent limitation which was effective under the original bill. So we did not figure that the 17-percent limitation was necessary at this time.

Mr. ARENDS. Let me put it another way. I am not quite clear. Assuming that the market might go up in a period of 3 months—that is, the market for corn—to $1.15 per bushel, would the Secretary under the provisions of the compromise have the right to sell corn at $1 a bushel?

Mr. POAGE. Yes, he would. He would have the right to sell certificates.

Mr. ARENDS. Certificates; yes.

Mr. POAGE. Which would be redeemable in corn, which would result in the buyer getting corn at $1 a bushel.

Mr. NELSEN. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman.

Mr. NELSEN. I was interested in clearing up this point. Under the provisions of the bill as agreed to by the conferees, if part payment is made in cash or in kind on signing, immediately the Secretary would have available this certificate or commodities in like amount. Could he then dump that on the market now, which would affect the last year's crop of corn, and which would be really taking an unfair advantage of last year's crop? I wondered what the policy would be on the part of the Secretary.

Mr. POAGE. Under the bill he can clearly offer those certificates for sale whenever they are placed back in his hands by farmers. Of course, he cannot get any certificates until after somebody has signed up and has acquired the certificate. Then it does not involve breaking the market on the old corn. That was the point that I tried to make plain a while ago. I think that is the basic misunderstanding about this bill. There has been no desire at any time to break the market. The market on corn today is $1. Farmers are not getting $1.15 for their corn. Corn is not going to go up unless there is some restraint in the amount of plantings during the planting season. Everybody knows that. If we have a large number of noncooperators who plant too much, obviously the price is not going up in the market. On the other hand, if we have a large number of cooperators, the price will go up and it will go up because of the sacrifice of the cooperators. This bill—either the bill under the conference report or the original House bill—is intended simply to say that that increase in price shall come to the people who made that increase possible. By the wildest stretch of the imagination you cannot assume that anybody except the cooperator made that increase possible.

This report authorizes the Secretary if he finds that the price is going up as a result of this program, and if there is a big sign-up, the price will begin to go up—after the Secretary finds that that is going to be this result, he will recapture for the United States Government and for the cooperators the increase rather than allowing it to go to the noncooperators.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Texas.

Mr. MAHON. The gentleman knows that many of us have some very serious reservations as to the desirability of this legislation. I am much concerned over the whole matter. Some of my concern over this measure was expressed when the bill was before us some time ago.

I would like to have the gentleman's own personal view on the following question: Does he presently think that if this bill is enacted into law, it will decrease the production of feed grains, that it will decrease the Government-held stocks of feed grains, that it will increase the income of the farmer and bring on a more wholesome and stable situation in agriculture?

Mr. POAGE. It is my view that it will do all three of those things.

Mr. FOGARTY. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Rhode Island.

Mr. FOGARTY. It looks to me as though this was just a sop given to the Midwest farmers, because if they do not buy it, they are not going to have any

program. Then in the fall when prices go up, stimulated by the higher price supports, corn will go up to $1.20 a bushel. That is when my people in the Northeast are going to be hurt, because they are too far from the source of supply and as a result will feel the pressure in the increased prices on poultry and eggs and beef in those areas where we have it, and also, that price increase will be passed on to the consumer.

Mr. POAGE. Most of the people in the gentleman's area I have heard from have suggested they wanted the price of poultry to go up. It is disastrous today at the old levels, as the gentleman knows, at 12 or 13 cents, when it takes 17 or 18 cents to make any kind of profit.

I think this bill offers the greatest hope that has been offered the poultry growers any time I have known of, because it guarantees a stable feed price level for at least the next 6 months. Nothing can be better for the poultry growers than a stable feed price level, with the assurance that at the end of that time there would be an upward movement, which should strengthen the price of poultry during all of those months.

As to your consumers, they had a better deal when the farmer was getting 18 cents a pound for his poultry than they have today. The A. & P. and other stores in the gentleman's part of the country were selling dressed chickens at lower prices with the higher feed prices than they are selling them today with the cheaper feed prices. I will not guarantee that this will bring the price of chicken down, but I do assure the gentleman that the history of this thing is that you bought dressed chicken and dressed meat much more cheaply when we had higher feed grain prices than you do with the low prices here today.

Mr. FOGARTY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. FOGARTY. Mr. Speaker, I voted against this feed grain bill last week in the form in which it then was—and that was bad.

Today, I will vote against this conference committee report because it is even worse from the point of view of two groups in which I am most interested—consumers—and aren't we all—and the farmers of the defict areas of the Northeast who must buy their grain for milk and poultry production.

As the bill passed this Chamber last week, it had in it a provision under which the Secretary of Agriculture could have dumped mountains of grain onto the market. The Senate would not buy that provision. Accordingly, a so-called compromise was arrived at.

But, is it a compromise? I say "No." I say this conference version is more dangerous.

Under the terms of this conference version, the Secretary of Agriculture could depress the market price of grain, particularly corn, at planting time through a prepayment gadget. Let us not fool each other. This was written into the conference report to scare midwestern farmers into this program. Certainly, it takes no genius to understand that if a Government official has the right to depress prices at planting time, he will use that authority to intimidate farmers who might be naturally reluctant to take part.

So much for that.

But, next fall—when the huge corn crop, stimulated by the higher price supports, is harvested, the Secretary will artificially raise the market price to equal the support price, presumably $1.20 per bushel.

This is when the northeast poultry and dairymen will take it in the neck in the form of sharply higher feed prices. This is when consumers in our cities will find out what was done to them today.

All this means to me that the sponsors of this report are trying to fool some of us from the cities.

They tell us that prices will be lower pretty soon now—with the help of Government funds—but they do not tell us what the prices will be in the fall at harvesttime.

There is an old song that has this little ditty in it—"Will you love me in the springtime as you loved me in the fall?"—I would suggest we of the Northeast reverse that and ask if the sponsors of this bill will love us in the fall as they do right now.

Mr. HOEVEN. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, the Senate and House conferees on H.R. 4510 have agreed on a feed grain bill which is now before you. This is a most controversial piece of legislation. The bill has many good features and some features which cause me a great deal of concern. My doubts about the bill, in fact, were serious enough so as to keep me from signing the conference report. Hence, it should be understood at the outset that I am not for one moment suggesting how anyone should vote on the conference report. Each one of you must exercise his own judgment.

You have already had the analysis of the conference report so I do not intend to be repetitious in that respect. The bill for all practical purposes fixes the support price on corn at $1.20 a bushel which is 74 percent of parity. Needless to say, I favor an adequate support level for corn and the bill is an improvement over the present law in that regard. I favor the provision in the bill for a voluntary agricultural conservation and land retirement program for 1961 for corn and grain sorghums. In fact, I feel that the retirement of acres is one of the best mediums for cutting down on our agricultural surplus of corn and feed grains. I have introduced bills in both the 86th and 87th Congresses to bring this about. Furthermore, I am heartily in favor of the payment-in-kind program which is authorized in the bill. Bills to carry out a pay in kind principle were introduced by me in both the 86th and 87th Congresses. Furthermore, land retirement and payment-in-kind were favored by the Eisenhower administration.

I am in favor of the cross-compliance features of the bill and concur in the requirement that producers of corn, grain sorghums, and any other feed grains designated by the Secretary must participate in the land retirement program for corn and grain sorghums in order to be eligible for price supports. In my judgment, if we had had such a provision in the law today we would have avoided a lot of the surplus difficulties in which we find ourselves at the present time.

The present version of the legislation in many respects is a great improvement over the bill which squeaked through the House quite recently by a vote of 209 to 202. The main objection to that bill was section 3 which would have established the worst kind of a precedent in setting up the Secretary of Agriculture as a virtual czar of the entire corn and feed grain market. The conference did strike section 3 in its entirety from the original bill and this fact on its face would seem to make the bill more palatable.

Let me point out, however, that the present section 3 in the bill now under consideration, for all practical purposes, still permits the Secretary of Agriculture to do indirectly the very things we prohibited him from doing directly when the conference eliminated section 3 from the original House bill. The only real practical difference is that the Secretary under the revised version of section 3 would not have as much grain at his command with which to manipulate the feed grain market.

I fear that the new section 3 will still authorize the Secretary of Agriculture to manipulate and control the corn and feed grain market through the medium of negotiable certificates which would be redeemable for feed grains notwithstanding any other provision of law. Instead of actually having control of all commodity credit stocks as provided for in the original House bill, the Secretary under the revised provision of section 3 would still have control of the feed grain market through the medium of giving him control of the feed grain certificates. You will note the provision in the new section 3 which says in substance that the Secretary may assist the producers in the marketing of such certificates at such time and in such manner as the Secretary determines will best effectuate the purposes of the feed grain program authorized by the act.

This new authority unquestionably would give the Secretary full authority to release commodity credit stocks almost at will whenever he had accumulated enough of the certificates to do an effective job. The most that can be said in favor of this provision is that the Secretary could release commodity credit grains in a lesser degree than he could under the provisions of the old section 3 of the House bill. Just how much grain the Secretary could release would depend upon the degree of compliance as far as the retirement of acres is concerned.

The bad precedent of setting up the Secretary as the major-domo of the feed-grain market would still be involved.

If the conference report is approved it is my sincere hope that the Secretary of Agriculture will take the necessary safeguards in administering section 3 in a sound and sensible manner so as not to demoralize the feed grain market at any time. The only redeeming feature of the whole operation of section 3 is that the bill only applies to the crop year of 1961. It is my opinion that the bill being operated only during such a limited period cannot do too much harm. By the same token, I doubt very much whether the legislation will do much good. Reports I have received from the Corn Belt seem to indicate that there is not going to be a very heavy compliance on the part of corn producers. I am sure such compliance will fall far short of the 70 percent compliance expected by the sponsors of the legislation. As far as I am personally concerned, the operation of section 3 giving the Secretary of Agriculture extraordinary powers over the feed grain market will in no sense of the word set a precedent for any subsequent legislation in this field. The operation of section 3, as far as I am concerned is strictly limited to the crop year 1961. I would most vigorously oppose giving the Secretary similar authority in any long-range feed grain legislation.

Please bear in mind that the current marketing year for 1960 started on October 1, 1960, and runs to September 30, 1961. We are now in the period of time when feed grain farmers will market their 1960 crop. In addition, farmers have the right under the law to place their 1960 production of feed grains under price support loan until May 31, 1961. In other words, when farmers planted last year's crop in the spring of 1960, they expected—and rightfully so—that the announced program would be in effect throughout the entire 1960 marketing year. If substantial quantities of surplus feed grain are released into the domestic market under the authority which the Secretary possesses in H.R. 4510, I feel the Secretary will be changing the rules in the middle of the game. This would be a serious breach of faith on his part.

In conclusion, I foresee many serious administrative problems involved in the enforcement of the provisions of H.R. 4510, many of which are not now anticipated. I fear that the sponsors of this legislation are going to be very much disillusioned and I predict that they are not going to make good on all their generous promises made to the American farmer. This of course is the responsibility of those who are pushing us so fast across the New Frontier. If the conference report is adopted, I sincerely hope the bill will be administered with a lot of commonsense. I also sincerely hope that if the bill becomes law, it will in some measure raise the farmer's income and that it will also save some money for the already overburdened taxpayers of the country. In view of the moral obligation that the Government has toward farmers on their 1960 production, if the conference report is adopted, I urge the Secretary to exercise the utmost integrity and care in administering this part of the program.

This legislation is the creature of the Democratic administration. If it cannot make good on it's promises, the farmers of the corn and feed-grain belt, will know where to place the responsibility.

I have given you the good features of the bill as well as the undesirable features. Now each of you will have to make up his own judgment. Representing one of the greatest corn and feed grain areas of the country and having carefully weighed both the pros and cons of this temporary legislation, I have concluded to give our corn and feed grain producers the benefit of the doubt. Hence I expect to vote for the conference report.

Mr. COOLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. FINDLEY].

Mr. FINDLEY. Mr. Speaker, I rise in opposition to the conference report.

The conference report on the feed grain bill has the same dangerous approach as in H.R. 4510. It would establish a bad precedent in giving the Secretary of Agriculture the authority to beat down market prices by releasing Commodity Credit Corporation stocks.

It reverses the healthy trend of recent years toward an expanding free market for corn.

It establishes a precedent for bushelage control, which ultimately means licensing—destruction of the free American's right to produce.

Artificial pricing in this bill would endanger our feed grains exports which last year reached an alltime high of 12 million tons.

The bill flies in the face of experience. American agriculture has become great because it has been free. The bill will be effective only if the Secretary uses dictatorial power over grain marketing. So, either way, it is a bad bill.

The crying need in farm legislation today is to get Government out of the grain business, and let farmers manage their own land.

Commodities free of Government interference are the healthiest and most profitable. Commodities controlled by Government are in trouble.

This bill is bad for the farmers. Like everything else that is bad for the farmers, it is also bad for America.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Missouri [Mr. JONES].

Mr. JONES of Missouri. Mr. Speaker, having served on this conference committee, I would say that this bill that comes back here today is in a form that should not cause anyone who voted for the House bill to change his mind. I think you can safely vote for it, because it continues in effect to do the things that we felt would be helpful in bringing about a reduction in the supplies and would also have the effect of reducing production. Those are the two goals that we aimed at.

I say to those who voted against the bill because they felt it was giving the Secretary of Agriculture a blank check to take commodities from the Commodity Credit Corporation to sell on the open market to break the market; that that feature has been tied down to the extent that the grain that will flow into the market under this device by which the Secretary can stabilize the market, is restricted to the amount of certificates that will be paid to those who comply by removing not less than 20 percent of their acreage, under the bill.

I was sorry that the gentleman from Iowa [Mr. HOEVEN], brought politics into this bill by his reference to the fact that this was a Democratic creature. I think all of us should understand that the farm problem is not a partisan problem at all. I think Republicans should be just as interested as the Democrats in trying to set the stage where we can operate in an economy that will be healthy for all farmers. I think all of my friends on this side will agree that we cannot have that type of economy until we do reduce the great overabundance that we have. This bill will do that. For that reason I think you would be justified, with the changes that we accepted in the rewriting of section 3, to go along with it. Those who voted against it, perhaps on partisan grounds, now have an opportunity to reconsider their action, and vote to approve the conference report.

I am appealing to you that if you are trying to do something to help this feed grain situation you can vote for this bill.

In reference to its setting a precedent, this is an emergency. This is a plan to meet the emergency for 1 year only. If this does not do the job there is no reason why we should attempt to continue it further, but we will at least have proved that this one plan either is successful or is not successful. We have coasted along for about 8 years without doing anything and have seen our problem grow progressively worse.

I appeal to you who have been content to go along doing nothing at least to give us a chance this one year. If it fails then we can change the law to reduce production, but I believe this will reduce the overabundance and get us to the point where we set the stage for a firm, sound farm program.

Mr. Speaker, I yield back the balance of my time.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. LATTA].

Mr. LATTA. Mr. Speaker, I take this time to clear up a couple of points. I would like to address a question to the chairman of the committee, the gentleman from North Carolina [Mr. COOLEY]. Am I to understand from the conference report that the cross-compliance feature between soybeans and corn has been stricken from this bill?

Mr. COOLEY. The gentleman is correct; that section was eliminated.

Mr. LATTA. I want to thank the gentleman and to compliment the conference committee on adopting this provision excluding soybeans from the bill. When the bill was before the House for consideration I offered an amendment to do exactly that, but it was turned down by the House. I am certainly glad that the conference committee in its infinite

wisdom adopted my amendment and that the soybean-corn cross-compliance feature is now out of this bill, that producers of soybeans do not now have to participate in the corn program to secure price supports.

I would also like to direct another question to the chairman of our committee, dealing with the first 20 percent. As this bill now stands, does the Secretary of Agriculture have the choice as to whether he will pay the first 20 percent in kind or in cash? Or is that left to the producer?

Mr. COOLEY. If I understand the gentleman's question correctly, the Secretary may make a determination as to what is to be paid in kind.

Mr. LATTA. On the first 20 percent.

Mr. COOLEY. That is right.

Mr. LATTA. Then if the Secretary so desires he can make all this payment in kind for the first 20 percent, also the second 20 percent.

Mr. COOLEY. That is right, and in that event he would not use the $500 million provided in the House bill.

Mr. LATTA. In the event the Secretary decides to make payment in kind, must it be universal for each of the 50 States? Or can he designate the State of Iowa, for example, to get cash, and the State of Ohio to get payment in kind? The question is, Can he discriminate between growers?

Mr. COOLEY. The Secretary has very broad discretionary powers granted to him in the bill, but I am quite certain he would make all regulations and provisions uniform throughout the Nation. Perhaps he could do what the gentleman has in mind, but certainly I could not believe that he would.

Mr. LATTA. It certainly was not the intent of the conference committee to give him the power to discriminate among growers in the United States.

Mr. COOLEY. It certainly was not.

Mr. LATTA. I thank the gentleman.

This bill still contains a very objectional feature; I have reference to the bushelage controls contained therein. As I pointed out when the bill was before the House, I am very much opposed to bushelage controls and I am still opposed to them and I was hopeful that the conference committee in its wisdom would strike this feature from the bill.

In my opinion, we are setting a very definite precedent, whether we say so or not, by going in this direction. It is progress in reverse for the American farmer. Certainly, American agriculture productionwise has progressed farther and better than any other segment of our economy. We are the envy of all the world in this field. Certainly we should not say to the American farmer, you have progressed far enough, you should not progress any farther.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. QUIE].

Mr. QUIE. Mr. Speaker, as the new feed grain bill as it was compromised in conference comes before us, we have a bill which is different from the one which passed the House and more closely allied with what came out of the Senate.

In looking over this legislation I have decided to support it for a number of reasons:

First. The bill provides that price supports on corn be set by the Secretary of Agriculture at any level over 65 percent of parity that he desires. We have heard many times during campaigns that if the Democratic administration was in power it would set price supports at 90 or 100 percent of parity. I would like to have the people of this country see that even Secretary Freeman is setting corn price support at 74 percent of parity, when the authority is given to him.

Second. The second reason why I am supporting this legislation is that it provides for voluntary retirement of acreage, the use of payment in kind, and price supports on these commodities contingent on compliance with this program. This follows the basic principles of the Farm Bureau program for feed grain. Their bill involves more crops than are involved in this bill. Also, they provide for a longer base history, but this has many of the basic aspects of their program.

Third. I believe there is an opportunity, if the Secretary of Agriculture administers the program correctly, cut down on the surpluses, cut down on costs to the taxpayer, and improve the income of some of the farmers in my part of the country.

In section 3, however, there has been a change. You can see that we cut off the stick by which the Secretary of Agriculture can force farmers into compliance. It is true we have cut off the stick on one end, but we lengthened it on the other. The only reason why I think we could take a chance on this unwarranted authority is that the amount of grain involved will have very little effect on the market price in case there is little compliance, since the Secretary would not have very much grain to manipulate the market with anyway. If there was a great deal of compliance there would not be any necessity for him to use his authority to sell below the support level. I would hope he would make these original payments in cash rather than in kind as first intended in order that he will not harm the market. If the Secretary of Agriculture should drive prices down this spring he would be breaking faith with every farmer who expected to sell his 1960 crop corn this spring and summer. If he would lower the price of corn he would also lower the income of farmers who have corn to sell now. I ask him to not allow that to happen but, rather, to stay away from manipulating the market and to allow the free market to function to the benefit of all farmers.

I think the people of this country should have an opportunity to see how this adminstration will administer a program of this nature.

The bill carries with it a requirement that 90 days after it goes into effect the Secretary must report back to the Congress in order that we may know how he did administer the program and the results thereof. If he does not conduct himself according to the way we think the bill should be administered, we will know it before we leave this Congress. If we find he has used unreasonable power over the market, we can remove this authority through legislation before we adjourn.

For these reasons, and since it is only a 1-year bill, I am willing to permit it to go into operation to see if it will be of any benefit and give us an opportunity to judge the administrative decisions and intentions of the Kennedy administration.

In order that you might know what the bill contains I might review the provisions.

It:

First. Authorizes the Secretary to set for 1961 the price support for corn at not less than 65 percent of parity. Price support in 1961 is limited to a volume of corn and sorghum equal to the normal 1959–60 production of these grains.

Second. Directs the Secretary to establish a voluntary special agricultural conservation and land retirement program for 1961 for corn and grain sorghum farmers. Under this program he would:

(a) Make payments to participating farmers in cash and/or in kind. Payments in cash and/or in kind on the first 20-percent reduction are calculated at the basic county support rate times 50 percent of normal production. Payments in kind on up to an additional 20-percent reduction are calculated at the basic county support rate times 60 percent of normal production.

(b) Require a 20-percent diversion of corn and grain sorghum acreage for payments in cash and/or in kind and authorize a 20-percent further diversion for payments in kind.

(c) Require in 1961 a net addition of acreage devoted to soil conserving practices in 1959–60.

(d) Require weed, insect, and rodent control on the retired acreage.

(e) Allow producers to meet the 20-percent land retirement requirement, in lieu of payments, by planting safflower, sunflower, sesame, and castor beans, if designated by the Secretary.

(f) Allow small corn-sorghum farmers—those planting 20 acres or less in 1959–60—to place their entire acreage in the program.

(g) Allow prepayment, of up to half of payments, before determination of compliance.

Third. Provides that certificates issued to farmers would be expressed in dollars and redeemable in CCC feed grains—corn, oats, rye, barley, grain sorghum—at current market prices. The Secretary may assist in marketing certificates. Redemption of certificates must be within 30 days or certificates discounted. Provision made for sharing of certificates among all producers on the farm.

Fourth. Requires that producers of corn, grain sorghum, and any other feed grain designated by the Secretary must participate in the land retirement program for corn and grain sorghum in order to be eligible for price supports.

Fifth. Authorizes a general appropriation and allows CCC to pay administrative expenses from its funds. Also authorizes the incurring of advance obligations, plus the payment-in-kind costs.

Sixth. Requires the Secretary to submit a report to Congress within 90 days showing the general operation and results of the program.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Iowa.

Mr. GROSS. May I ask the chairman of the Committee on Agriculture a question? Do I understand that the Secretary of Agriculture has stated that the enactment of this legislation will mean a 10-percent increase in farm income and a cut of between $400 million and $600 million in the cost of the program?

Mr. COOLEY. The Secretary estimates that that will take place. Of course, all of that depends upon the volume of participation in the program. As the gentleman knows, we will be getting off to a late start. This legislation should be passed and sent on to the White House. Action should have been taken 2 or 3 weeks ago, perhaps. But, his estimate is that it will probably save from $400 million to $600 million on the program during the current year.

Mr. GROSS. And increase the income of the farmers by 10 percent?

Mr. COOLEY. I will read what he says:

> First, it offers to farmers who wish to cooperate an opportunity to help bring feed grain supplies more nearly in line with demand while increasing their income by some 10 percent.

Mr. GROSS. I thank the gentleman.

The SPEAKER. The time of the gentleman from Minnesota has expired.

Mr. COOLEY. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. NELSEN].

Mr. NELSEN. Mr. Speaker, may I ask the chairman of the committee a question in order to clear up a point? Am I correctly informed that under the terms of the bill the Secretary of Agriculture may require a 20 percent reduction in corn acres in order to qualify for feed grain support? Is that right? I mean, in all other feed grains, oats, barley, and so forth.

Mr. COOLEY. That is exactly right. The Secretary may name the other grains.

Mr. NELSEN. The point I wish to place in the RECORD is this concern that I have expressed for the type of farmers that live in my area. If a farmer is cut back 20 percent on his corn, he will be unable to fill his silo, and therefore he will be denied the opportunity of participating in any feed grain supports whatever. That is the concern I had of the silage provision. Now, silage does not come into competition in the feed grain market. It has been settled and the decision has been made. But, this has made it more difficult for the farmers in our area to participate, which means that you will not get the land retirement that we need in order to have this program work. Certainly, those of us who live on the farm want it to work, because the only way we can succeed is with land retirement.

Mr. COOLEY. I would remind the gentleman of the fact that we accepted the gentleman's amendment. We went to conference with it and we insisted that it be retained, but we were unable to convince the Members of the Senate.

Mr. NELSEN. I thank the gentleman. I wanted to bring this point to the attention of the House here today, and I do hope that the Secretary will use discretion with the certificates that he now gets, because if he does not, we could seriously affect the market price of the grain coming onto the market from last year's crop.

Mr. McSWEEN. Mr. Speaker, will the gentleman yield?

Mr. NELSEN. I yield to the gentleman from Louisiana.

Mr. McSWEEN. Is the gentleman's amendment still in the conference report?

Mr. NELSEN. No; silage has gone by the board.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. ARENDS].

Mr. ARENDS. Mr. Speaker, I would like to ask the chairman of the committee or the gentleman from Texas [Mr. POAGE] if I clearly interpret what we are doing here today in this conference report. Would you say that this conference report creates involuntary compulsion, and that our corn farmers find themselves in this position: That we are being told how much we can plant, how much we can sell, based on yields for the years 1959 and 1960 and then by the powers given to the Secretary of Agriculture what price we are going to get for corn? Is that a fairly accurate statement?

Mr. COOLEY. I do not see how by any stretch of the imagination the gentleman from Illinois could read such a proposition into this legislation. It has never been intended in that way, and there is nothing at all compulsory about this program.

The gentleman, as a farmer, can stay out of the program and have nothing to do with it. There is no force connected with it.

Mr. ARENDS. But the price of corn for any farmer who does not go into the program will be controlled by the Secretary of Agriculture.

Mr. COOLEY. That is right.

Mr. ARENDS. In other words, the Secretary of Agriculture through powers herein granted will say what the farmer is going to get for corn if not in the program. Now I would like to make one other statement; and I throw this out merely as a warning signal. What can we do about the statement made before the House Agriculture Committee by the Secretary of Agriculture to the effect that the support price on beans would be $2.30? Today we have a good price on beans in the free market. I have some figures given to me by a so-called student of the problem as to what the possibilities are with an increased acreage of beans.

The farmer who substantially reduces, say goes into the program with a required 20-percent reduction in corn or 40 percent, will then likely plant soybeans. At $2.30 a bushel, the proposed support price, he will do pretty well. But how are we going to compete in the world market with the price support of $2.30? So the end result may well be—and, as I say, I throw this out as a warning signal—we could have soybeans in surplus within a relatively short period of time. That, it seems to me, will follow just as surely as night follows day if the support price is put at $2.30 a bushel, as the Secretary said would be the case when he testified before the committee.

So, Mr. Speaker, I want to state to the Members of this House that this whole agriculture picture still presents a very troublesome problem and I am not at all sure that we are here curing the situation, as many of us hoped we might do.

Mr. Speaker, let me say this to the gentleman from Missouri [Mr. JONES], who spoke a moment ago on the floor; there is no inclination on the part of any of us on this side of the aisle, any more than there is on the other side of the aisle, to inject partisan politics into this matter. This is an economic question which affects the welfare of all the farmers of this country. I have repeatedly said so on the floor of this House. We are looking to the welfare of all the farmers of this country who today are in a price squeeze. And I should like to mention one other thing. While we are here attempting to increase the income of the farmer, tomorrow or the next day we are going to have a wage and hour bill before the House which in the end will have an adverse effect on the income of the farmer through raising the cost of his operation.

Mr. COOLEY. Mr. Speaker, I think the gentleman made the statement that the Secretary would under some circumstances control the price of corn.

Mr. ARENDS. Yes.

Mr. COOLEY. That is, under this bill. But the corn farmer does not have to participate at all. If he stays out he gives up the price support, and he can plant all the corn he wants to plant. There is nothing in the law that gives the Secretary any authority to hold down the price of that particular corn produced on that particular farm.

Mr. ARENDS. But I must say to the gentleman that we know what will happen when the Secretary has the certificates available and can throw the commodity onto the market.

Mr. COOLEY. I would not argue with the gentleman for 1 minute on that.

Mr. ARENDS. It would be indirect, of course, but he will be able to force down the price of corn in the open market. And so any farmer not in the program would in the end have to take for his corn exactly what the Secretary wanted to see paid.

Mr. COOLEY. Only by the sale of the certificates.

Mr. ARENDS. That is right.

Mr. COOLEY. By controlling the volume of the certificates he probably could do what the gentleman has in mind. But certainly we must trust him and I believe he will not disrupt the market.

Mr. ARENDS. I would hope so, too.

Mr. COOLEY. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I have a statement which I would like to read and which I hope the Members will listen to.

Mr. Speaker, as all of us know, this bill was very controversial when it was before the House. The final vote was favorable by a very narrow margin.

The most controversial section was section 3, which has been redrafted and I think now meets with general approval. It does meet with the approval of the Secretary of Agriculture who, after all, will administer this program provided for by the bill.

I have here a statement by the Secretary of Agriculture, Orville L. Freeman:

The compromise feed grain legislation approved late last week by the Senate-House conference committee, and scheduled to come before Congress for final approval shortly, offers new hope to farmers, consumers, and taxpayers. While not precisely in line with the administration's request, the program is workable. It will encourage participation in the effort to reduce feed grain stocks, and this is a vastly important step in the effort to restore order to the feed grain-livestock economy.

Specifically, this legislation will do these things:

First, it offers to farmers who wish to cooperate an opportunity to help bring feed grain supplies more clearly in line with demand while increasing their income by some 10 percent.

Second, it will assure consumers of this Nation fair and stable prices for the meat, milk, and poultry products.

Third, it will reduce the ultimate cost of the feed grain program for the 1961 crop by some $400–$600 million below that which would be incurred under existing law.

Fourth, it will mark a turning point in the buildup of Government-owned feed grain stocks and start us on the way toward bringing these stocks into manageable proportions.

All of us in the Department of Agriculture are grateful to the Congress and, particularly, to the members of the House and Senate Agriculture Committees on both sides of the aisle for their diligence and long hours in working on this legislation. The farmers of the Nation have already indicated their support for this forward step, and they are appreciative, first, to the President for his prompt action in proposing such legislation, and to the Congress for their favorable consideration of that legislation.

It seems to me this is a clear indication that the Secretary of Agriculture is prepared to accept the great responsibility which will rest upon him when this law is enacted. As I said a moment ago, it is a voluntary program. It has no element of compulsion in it. If a farmer wants to participate he can participate and receive the benefits. If he does not want to participate, he can do just as he pleases.

I should like to put another brief statement into the RECORD. This is on how the Department plans to use section 3, which is the controversial section of the bill:

1. A farmer will receive his payment in kind in the form of a negotiable certificate similar to a warehouse receipt which will be stated in terms of dollars. It will be worth so many dollars' worth of feed grains.

2. The amount of the certificate will be determined by taking 50 percent of the farmer's normal yield per acre for 1959 and 1960 (60 percent in the case of the additional 20 percent of acreage), and multiplying this by the county support rate for corn or grain sorghums.

3. When the farmer receives the certificate, there are three things he can do with it:

(a) Take it to a CCC warehouse and cash it in for grain.

(b) Sell it to another farmer, or someone else, who wants to cash it in for grain.

(c) Turn it in to the CCC to sell for him.

4. In the event the farmer decides to turn it in to the CCC for sale, he will probably take it to the county ASC office.

From there the certificate will be sent physically to Chicago, Kansas City, or some other CCC office in contact with large grain handlers. The certificates will then be sold to grain dealers who will present them and receive feed grains for them from CCC at market price.

5. The farmer, in the meantime, will probably have received an advance from CCC of part of the value of his certificate and the balance will be paid when the certificate is sold.

The farmer is the one who will have control of the certificate. The certificate will finally be cashed in and paid in grain.

Mr. QUIE. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Minnesota.

Mr. QUIE. In the last comment you made on the intentions of the Secretary, would he pay the farmer in advance less than the value of the certificate and then the remainder be paid after the Secretary has sold the grain involved in the certificate?

Mr. COOLEY. I think the gentleman is exactly right. The gentleman was a member of the conference committee and he will recall it was thought it would be beneficial to permit the Secretary to pay at least a downpayment so to speak—an advance on the certificate.

Mr. QUIE. Then if the Secretary sold the grain for less than the support level, the farmer would receive less money for his certificate than he expected to receive; is that correct?

Mr. COOLEY. No; after the farmer parts with it and turns it over to the CCC, it is worth so many dollars to him in the grain market and whenever it goes into the grain market, the CCC would sell it at the going price in the open market.

Mr. QUIE. Then the CCC would sell enough grain to cover the value of the certificate; is that correct?

Mr. COOLEY. That is correct.

Mr. HARVEY of Indiana. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HARVEY of Indiana. Mr. Speaker, I object to this conference report No. 170 on the feed grain bill for two major reasons.

First. It does not fix a ceiling on the price at which the Secretary, Mr. Freeman, may fix the price of corn and other feed grains.

Second. It contains the acreage allotment feature which is contrary to the approach the grain and livestock farmers approve.

While of course it may get widespread participation by the farmers in 1961 and few can disagree with the Secretary's avowed aims "to raise farm income," I believe we ought to undertake the long-range farm legislation as soon as possible.

Mr. JENSEN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. JENSEN. Mr. Speaker, I have long advocated higher supports for the six basic commodities—corn, wheat, cotton, tobacco, peanuts, and rice. This bill under consideration as adopted by the conferees provides for $1.20 supports for corn, for example, to those farmers who reduce their historical acres by at least 20 percent which is to be paid in cash or in kind with the privilege of reducing corn acres by an additional 20 percent of which all shall be paid in kind at the rate of the 60 percent of support price and 50 percent of the support price in cash of $1.20 per bushel, which in my studied opinion is far too little to bring about sufficient compliance to retire the necessary reduction especially in corn production. Nonetheless I shall vote for the bill mainly because I am willing to give the administrators of the law a chance to prove their contention that the law will raise farm income by 12 percent. I want to give the Secretary of Agriculture a chance to prove it, after the crops of 1961 have been harvested. In conclusion, Mr. Speaker, I must say that, had Congress last year made law the bill which 10 Republican Congressmen from the Grain Belt introduced, including myself, and which provided for not less than 80 percent of parity for corn and all other feed grains with payment in kind on negotiable certificates then compliance would be great enough to reduce the necessary acres.

Mr. COOLEY. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PELLY. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 231, nays 185, not voting 15, as follows:

[Roll No. 17]

NOT VOTING—15

Blatnik	McDonough	Rabaut
Buckley	Macdonald	Thompson, La.
Delaney	Mosher	Tupper
Gallagher	O'Konski	Wilson, Calif.
Hall	Powell	Wright

So the conference report was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Rabaut for, with Mr. Hall against.

Mr. Buckley for, with Mr. Wilson of California against.

Mr. Gallagher for, with Mr. McDonough against.

Mr. Delaney for, with Mr. Mosher against.

Mr. Thompson of Louisiana for, with Mr. O'Konski against.

Mr. Macdonald for, with Mr. Tupper against.

Mr. BARRY changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL EDUCATION SUBCOMMITTEE OF THE COMMITTEE ON EDUCATION AND LABOR

Mr. THOMPSON of New Jersey. Mr. Speaker, I ask unanimous consent that the General Education Subcommittee of the Committee on Education and Labor be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

EXTEND AND AMEND THE SUGAR ACT

Mr. COOLEY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, effective March 31, 1961, section 412 of the Sugar Act of 1948 (relating to termination of the powers of the Secretary under the Act) is amended to read: "The powers vested in the Secretary under this Act shall terminate on December 31, 1962, except that the Secretary shall have power to make payments under title III under programs applicable to the crop year 1962 and previous crop years".

SEC. 2. (a) Section 4501(c) (relating to termination of taxes on sugar) of the Internal Revenue Code of 1954 is amended by striking out "September 30, 1961" in each place it appears therein and inserting in lieu thereof "June 30, 1963".

(b) Section 6412(d) (relating to refund of taxes on sugar) of the Internal Revenue Code of 1954 is amended by striking out "September 30, 1961" where it first appears therein and inserting in lieu thereof "June 30, 1963", and by striking out "September 30, 1961" where it appears therein the second time and inserting in lieu thereof "September 30, 1963".

SEC. 3. Effective March 31, 1961, section 408 of the Sugar Act of 1948, as amended (relating to suspension of quotas), is amended by striking out of subsection (b) "for the period ending March 31, 1961" and inserting "for the period ending December 31, 1962"; and by striking out of paragraph (b)(1) "for the balance of calendar year 1960 and for the three-month period ending March 31, 1961" and inserting "for the period ending December 31, 1962"; and by inserting immediately before the colon in subparagraph (2)(iii) of subsection (b) a semicolon and the words "except that any amount which would be purchased from any country with which the United States is not in diplomatic relations need not be purchased" and by inserting in the "provided" clause a comma after the phrase "additional amounts of sugar" and inserting immediately thereafter the phrase "including any amounts which would otherwise be purchased from any such country with which the United States is not in diplomatic relations,"; and by striking out the semicolon at the end of subparagraph (b)(2)(iii) and inserting "except that consideration shall be given to countries of the Western Hemisphere and to those countries purchasing United States agricultural commodities;".

The SPEAKER. Is a second demanded?

Mr. HOEVEN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

Mr. COOLEY. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, certainly within the time now available to me it will not be possible to discuss in detail or with any satisfaction the sugar program as we have known it and as it has operated through all the years. I do want to say, however, that after many, many conferences, after hearings with the Secretary of State, and after several executive sessions, our committee decided to recommend to you the passage of the bill which is now before you, providing only for a 21-month extension of the Sugar Act. Unless this bill is enacted, the sugar program would expire at midnight on March 31, 1961. If that should happen, chaos would prevail in the sugar markets of America and perhaps in the sugar markets of the world. Many people engaged in the sugar industry would probably face bankruptcy and ruin because their inventories are now built up on sugar based upon the prevailing price in our domestic market which is, as you know, substantially above world market levels.

To the end that you might have an understanding as to the support which this bill has, I call your attention to a letter I have. After conferences were held by the representatives of the sugar industry from the Hawaiian Islands to Puerto Rico and all of the sugar areas of our mainland, I received on February 9,

1961, this letter, which I should like to read to you:

DEAR MR. CONGRESSMAN: This is a confirmation of our telephone conversation of last week.

All segments of the domestic sugar industry will heartily support your efforts promptly to obtain an extension of the Sugar Act for a period up to 21 months.

The industry believes, however, that a short-term extension of the Sugar Act should not delay an effort also to obtain long-range legislation at this session of Congress. It is our understanding that you concur in this view.

In the past, the industry has not felt qualified to pass upon any emergency Presidential power affecting the Dominican Republic which may be required in any extension of the act; nor does it now.

As you know the act expires on March 31 of this year. All who know the requirements of consumers of this country, whether by way of household packages or industrial products, know that the national sugar policy embodied in the Sugar Act should be extended by law well before this March 31 deadline.

We deeply appreciate the consideration which you and your colleagues on the committee have given to the problems of our industry.

Very sincerely yours,

For the Puerto Rican Sugar Producing Industry: Dudley Smith, Vice President, Association of Sugar Producers of Puerto Rico; for the Hawaiian Sugar Producing Industry: Sanford L. Platt, Vice President, Hawaiian Sugar Planters' Association; for the Louisiana and Florida Sugar Producing Industry: Josiah Ferris, Washington Representative; for the U.S. Cane Sugar Refining Industry: Irvin A. Hoff, Executive Director, U.S. Cane Sugar Refiners' Association; for the Domestic Beet Sugar Producing Industry: Loren S. Armbruster, Secretary, Farmers & Manufacturers Beet Sugar Association, Saginaw, Mich.; Richard W. Blake, Executive Secretary, National Beet Growers Federation, Greeley, Colo.; Gordon Lyons, Executive Manager, California Beet Growers Association, Ltd., Stockton, Calif.; E. W. Rising, Executive Vice President, Western Sugar Beet Growers Association, Washington, D.C.; Merrill E. Shoup, President, Holly Sugar Corp., Colorado Springs, Colo.; A. E. Benning, Executive Vice President and General Manager, the Amalgamated Sugar Co., Ogden, Utah; Frank A. Kemp, President, the Great Western Sugar Co., Denver, Colo.; Robert H. Shields, President and General Counsel, U.S. Beet Sugar Association, Washington, D.C.

In addition to these representatives of the domestic sugar industry, I have a letter dated February 20, 1961, signed by Mr. Joseph M. Creed for and on behalf of the industrial sugar users group.

Without reading the letter, which I will insert in the RECORD, I need only to tell you that these industrial users also agree to this 21 month extension and say they have no objection to it under the circumstances, and that they would urge prompt action on any such extension.

The letter is as follows:

AMERICAN BANKERS ASSOCIATION,
February 20, 1961.

Hon. HAROLD D. COOLEY,
Chairman, House Agriculture Committee, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN COOLEY: The Industrial Sugar Users Group believes that your proposed extension of existing sugar legislation for a 21-month period through December 31, 1962, is a practical solution for a temporary disposition of sugar legislation.

We recognize that time is not available to develop a long range legislative sugar program prior to the expiration of the present law on March 31.

The proposed 21-month extension is not objectionable under the circumstances and we would urge prompt action on such an extension.

We are hopeful that the House Agriculture Committee will also move promptly to develop a long range sugar program to supersede the temporary extension.

With kind personal regards.

Sincerely,

JOSEPH M. CREED,
For and on behalf of the Industrial Sugar Users Group.

The following is a letter endorsing this legislation:

PHILIPPINE SUGAR ASSOCIATION,
Washington, D.C., February 15, 1961.

Hon. HAROLD D. COOLEY,
Chairman, Committee on Agriculture, U.S. House of Representatives, Washington, D.C.

MY DEAR MR. CHAIRMAN: I have read with interest the subject bill introduced by you on February 2, 1961.

The purpose of this note is to advise you that the Philippine sugar industry endorses this legislation wholeheartedly.

With personal regards and best wishes.

Sincerely yours,

JOHN A. O'DONNELL.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Oklahoma.

Mr. ALBERT. The gentleman does know in the beet sugar growing area there is a lot of opposition to extending this act for a period of 21 months, and that there is no provision in this legislation for new American growers to participate so that mills can be built in those areas. Is that not an accurate statement?

Mr. COOLEY. I would like for all the people who are interested in expanding the production of sugar on the mainland of America to know there is nothing that will prevent any farmer from growing all of the sugar beets he wants to grow during the year 1961, and probably there will be no restrictions placed on his efforts in 1962.

Mr. ALBERT. That is not answering the question. The answer to the question is—you are not going to get a mill on the basis of what they can plant.

Mr. COOLEY. You are not ever going to get a mill based on Federal legislation because the Federal Government never in the history of the Republic has built a sugar mill.

Mr. ALBERT. No.

Mr. COOLEY. The only thing they can do is to make the acreage available to new areas and new growers. All this acreage is now available to the new areas and to the new growers. What else do you want?

Mr. ALBERT. But, they cannot depend on it—that is the whole point.

Mr. COOLEY. How can you ever depend on it? What is a new grower and what is a new area? Now you are not talking about new growers and new areas; you are talking about small growers and small growing areas. I have assured the gentlemen who are interested, and I am in sympathy with their problem, that probably early in May, just as soon as we can clear our decks in the Committee on Agriculture, we will start hearings and I will give them the very first opportunity to be heard. But there is no way by Federal law to guarantee to any area that a sugar mill will be built.

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Texas.

Mr. ROGERS of Texas. I hope the gentleman from North Carolina will explain to the House his statement that anybody can plant as many sugarbeets as he wants to—it does not mean anything. Is it not a fact that 45 percent of our sugar is brought in here from foreign countries and that 3 million tons formerly assigned to Cuba will all go to other foreign countries? American farmers are denied participation.

Mr. COOLEY. The growth provision provides 45 percent.

Mr. ROGERS of Texas. 45 percent of our domestic requirements come from foreign countries; is that not correct?

Mr. COOLEY. No, I do not think it is as much as 45 percent.

Mr. ROGERS of Texas. Well, how much is it? The record shows 45 percent. Surely the gentleman knows the answer to my question.

Mr. COOLEY. I am not arguing about the new grower provision. If you are not satisfied with the assurances given you that we will start the hearings early in May, you know what the situation is as well as I do.

Mr. ROGERS of Texas. Now the gentleman can tell how much sugar is imported from foreign countries into this country. Why will he not do it? Why are the facts being hidden from the American public?

Mr. COOLEY. We have about 9 or 10 million tons' consumption, and I do not know just exactly how much was imported. I believe about 55 percent is from domestic sources but what difference does it make?

Mr. ROGERS of Texas. It makes this difference. The American farmer is being required to foot the bill for foreign aid, yet he is denied the right to grow nonsurplus crops being produced by those countries.

Mr. COOLEY. What difference does it make?

Mr. ROGERS of Texas. The fact of the matter is that 3 million tons of the Cuban quota is being handed over to other foreign nations, and the American farmer is being denied the opportunity to produce even 1 pound more. A giant killing is being made at the expense of the American farmer.

Mr. COOLEY. It was 3,250,000 tons and, Mr. Speaker, I do not yield any further to the gentleman but I would like to discuss briefly this new grower proposition.

Texas has no monopoly on the desire to grow sugarbeets. There are at least 21 other States—all the way from Maine to Oregon—where there are new growers or new areas which would like to get into the sugar beet business.

Every proposal that has been made on behalf of these new growers would take something away from someone else. Their proposal that 75 percent of the domestic share of the increase in our annual consumption be assigned to new producers would have denied to Hawaii, Puerto Rico, and the Virgin Islands a share in our increased consumption which the law now gives them and would have changed the share of that consumption which now goes to mainland cane production.

There are no restrictions this year on the planting of sugarbeets and sugarcane in the United States and the committee has asked in its report that there be no acreage restrictions next year. Any farmer in the United States—in Texas or anywhere else—who wants to plant sugarbeets or sugarcane is free to do so and when acreage allotments are again placed into effect, his history of planting the commodity will be the basis of an allotment.

There is no restriction of any kind on the establishment of a new beet sugar factory—in Texas or anywhere else. If producers in Texas want to grow more sugarbeets and participate in the domestic beet sugar quota, they might follow the example of cane producers in Florida and build a sugar mill which would have to be taken into consideration in any future quota allotments.

An additional beet quota would be useless at this time. Beets fell 350,000 tons short of filling their quota in 1960.

Those asking for special consideration for farmers who would like to get into the sugarbeet business are making the unreasonable demand on the committee that it do something in a few days that affects every segment of the sugar industry and which can only be done after every interested party has had an opportunity to be heard.

Every major segment of the sugar industry has agreed to a 21-month extension of the law without change of its basic quota elements but if a change in these basic quota provisions were made at the request of new growers every one of these segments of the industry would want to be heard and would have a right to be heard—consumers, industrial users, the established domestic beet industry, the domestic cane industry, Hawaii, Puerto Rico, refiners, representatives of foreign sugar producers—and all the other people interested in the operation of our Sugar Act. Every one of these has agreed that the course the committee has chosen is the best one—to extend the Sugar Act temporarily for 21 months and to start hearings as early as possible on a more permanent revision of the basic provisions of the act.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. I have in my hands a copy of the Boston Daily Record of Saturday, February 25, 1961. The headline says "Canada Pours Cuban Sugar Into United States":

Cuban sugar is flowing into the United States legally from Canadian refineries at the expense of local ones, circumventing the Presidential order against sugar imports from Castro-land, the Daily Record learned yesterday.

About 7 million pounds of Cuban sugar has entered this country after being refined in Montreal, Toronto, and St. Johns, New Brunswick, since January.

I have in my area two sugar refineries and I met with both management and labor. They protested this. Presently, in the bonded warehouses in Boston, there are 10 million pounds of sugar being stored waiting for renewal of this sugar act so that this sugar will be released on April 1.

I vociferously and vigorously protest this. I think this is wrong. The protest was sent to Mr. Hoffman and to Mr. Louis Mayer, Director, U.S. Department of Agriculture. He sent a letter back saying:

The country of manufacture or production shall be considered the country of origin. Further work or material added to an article in another country must affect a substantial transformation in order to render such other country the country of origin. * * * The processing of raw sugar into refined sugar has been considered to affect a substantial transformation.

Mr. COOLEY. Will the gentleman permit me to interrupt him?

The SPEAKER pro tempore. The time of the gentleman from North Carolina has again expired.

Mr. COOLEY. Mr. Speaker, I yield myself 1 additional minute.

I have read all of this correspondence. The committee has decided to close up the loophole which I think the gentleman is complaining about. Certainly we do not intend to tolerate any circumvention of the clear intent or meaning of this law. We have put it into the report. The gentleman will find it on page 4 of the report under the heading "Transshipment of Cuban Sugar." We understand the Department will prevent sugar being shipped from Cuba and refined in Canada and then shipped into the United States.

It will be noted that the committee has indicated in this paragraph of its report that processed sugar made from Cuban raw sugars may not be hereafter imported into the United States. This is not intended to affect any processed sugar presently in the country under authorization for release by the Department of Agriculture. It is our understanding that there is a small quantity which has been brought in under existing regulations and it is not our intention to adversely affect that particular sugar. However, there is to be none brought in in the future which has been made from Cuban raw sugar.

I think the gentleman will be entirely satisfied with the provisions we have in our report.

Mr. Speaker, in response to several questions which I do not have the time to answer orally, I am placing in the RECORD at this point answers to some of these questions:

Question. Does the committee amendment mean that ex-quota purchases of sugar will be made only from Western Hemisphere countries?

Answer. No, it does not. The committee amendment must be read in the light of the overall purpose of the Sugar Act and of the amendment made to the Sugar Act in the law we passed last July. This overall purpose is to assure consumers in the United States an adequate supply of sugar. This is the overriding consideration which will guide procurement of sugar outside of our quota system to replace the sugar we are not getting from Cuba. Reference to the Western Hemisphere was put in the amendment because the committee is acutely aware of the fact that some of our smaller neighbors in the Western Hemisphere are not permitted to participate in our sugar program at this time and it felt that as long as we are buying sugar throughout the world to replace the Cuban drawback, we should take this opportunity to assist the economies of these friendly Western Hemisphere countries.

Question. Does the Western Hemisphere include the Islands of Martinique and Guadaloupe and the British West Indies?

Answer. On the map used by the committee it certainly does. I understand that the State Department does not consider some of the Caribbean Islands as part of the Western Hemisphere because they are territories of or affiliated with European countries. As far as the committee is concerned, we believe that any island or area or country in the physical area of the Western Hemisphere is part of the Western Hemisphere for purposes of this bill. That was the reason for putting the word "areas" in our amendment rather than confining it to just "countries."

Question. Does this emphasis on Western Hemisphere countries mean that a country outside the Western Hemisphere, which might also be friendly, and which might have a relatively small amount of sugar it would like to sell to the United States, will be excluded? Would this exclude the Fiji Islands, for example?

Answer. No, it would not. As I have already stated, the basic purpose of the Sugar Act and of all the amendments we have made to it is to assure U.S. consumers of an adequate supply of sugar and to protect the domestic sugar producing industry. There will be a rather substantial quantity of sugar to be obtained outside our quota system during this calendar year and I would assume that those in charge of carrying out this program will obtain that sugar wherever it can be found in the world.

Question. What is meant by the requirement that consideration is to be given those countries purchasing U.S. agricultural commodities? Does this mean that we will limit our ex-quota sugar purchases to those countries which are our best customers?

Answer. No, it does not. Here again, this provision must be read in the light of the overriding purpose of the act which is to provide us with adequate sugar supplies. It would obviously be silly to require that those in charge of obtaining this sugar should go down the foreign trade list and first try to obtain sugar supplies from those countries which the statistics show have purchased the most agricultural commodities from us. This is not the intent of this provision. On the contrary, the intent is that the administrators of the Sugar Act will use this authority when they find an opportunity to move additional American agricultural commodities on a quid pro quo basis in obtaining our ex-quota sugar and will give special consideration to such proposals.

It is likely that this authority will not be used very frequently but, on the other hand, the committee wants the President to have this authority, if there is an opportunity to use it and an indication of congressional approval of this type of transaction. It is anticipated that this consideration will come into operation only when some country which has some sugar it would like to sell the United States comes in with a specific proposal to take U.S. agricultural commodities

in return for our purchase of their sugar. It is an order to give the President the authority which those administering the program said he did not have last year when they turned down some proposals which were made on exactly this basis. For example, last year, Brazil was willing to take a very substantial quantity of our wheat in return for our purchase of some of their sugar. They came to the Department of Agriculture with this proposal and were told that there was no authority to make this kind of an arrangement. Subsequently, Brazil bought a large quantity of wheat from Communist Russia to fill their needs—the first such purchase they have ever made. It is in order to authorize the President to make this kind of a transaction that this language has been placed in the amendment.

Mr. COOLEY. May I say further that in considering this bill, the committee has not deemed it appropriate to go into any of the actions which may have been taken in the past and has dealt only with the urgent demands of the present administration that the President be granted the power to deal with this Dominican problem.

The SPEAKER pro tempore. The time of the gentleman from North Carolina has again expired.

Mr. HOEVEN. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, it is of extreme importance that the Sugar Act be extended before the scheduled March 31, 1961, termination date. So time is of the essence.

I express the hope that we can suspend the rules and pass this bill promptly. The only other recourse, as I see it, would be to ask for a closed rule on the bill. I think it is quite understandable that we cannot write a sugar bill on the floor of the House of Representatives at this stage of the game any more than you can formulate foreign policy on the floor of the House.

This bill involves foreign policy. It involves the welfare of our country. The extension has been asked for by the administration which is concerned about the foreign policy involved as well as the extension of the Sugar Act. Reference has been made to the Dominican Republic. We are not here to decide whether or not we are in favor of Mr. Trujillo of the Dominican Republic or not. The sole question is, whether or not we shall extend the Sugar Act for 21 months.

I appreciate the concern of the new growers and people from the sugarbeet areas of this country. I want to do something to help them. I want to support their position in every way possible.

The chairman of the Committee on Agriculture has told the House that he expects to conduct full hearings on long-range legislation starting during the month of May. I daresay these will be prolonged hearings, covering every phase of the sugar situation. The sensible thing to do is to extend the Sugar Act for 21 months and then hold hearings on a long-range bill.

Mrs. MAY. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentlewoman from Washington.

Mrs. MAY. You have been advised that the chairman of the committee will start hearings early in May so that we may have permanent legislation on this subject, but do you not think it would be possible to complete long-term legislation before the 21 months has passed? In other words, could we not complete our work on long-term extension of the Sugar Act in a period from 9 to 12 months?

Mr. HOEVEN. I am in no position to make any specific promise in that regard. The chairman of the Agriculture Committee has justified his position. I think it is the intention of the Agriculture Committee to conduct full hearings on a long-range sugar bill. It must be remembered, however, that the Committee on Agriculture is completely bogged down with important legislation. We still have to extend Public Law 480. We have the itinerant labor bill before us, and I understand we have to work on a wheat bill.

Mrs. MAY. Can the ranking minority member of the committee assure us that consideration of these particular issues will not hold up starting hearings in May on the bill so that the bill could be written this session?

Mr. HOEVEN. As far as it is in my power as ranking Republican member of the committee I shall insist that we have full and fair hearings on a long-range sugar bill at this session of Congress.

Mrs. MAY. One more question: I would like to point out that the wording of the letter from sugar organizations that the chairman of the committee referred to earlier as agreeing to a 21-month extension, was actually worded "up to 21 months' extension."

Mr. HOEVEN. That is correct; and it has been pointed out that every segment of the sugar industry in this country, as far as I am able to determine, is in favor of the 21-month extension.

Mrs. MAY. Up to 21 months.

Mr. HOEVEN. Up to 21 months if you prefer.

Mrs. MAY. Mr. Speaker, much as I would like to follow the leadership of my distinguished colleague from Iowa on voting to suspend the rules on this bill, I cannot in good conscience give him that support. If we vote to suspend the rules, this bill to extend the Sugar Act for 21 months will pass this House without further debate and without giving any Member an opportunity to offer an amendment that would shorten the extension time to 9 months or 1 year. Yet, I sincerely believe that a 1-year extension or less would give the Committee on Agriculture ample time to hold hearings starting early in May and write in the sound legislative changes that are so desperately needed in many areas. The changes needed will be pointed out briefly in debate today, but because of the limitations of debate on a motion to suspend the rules, this House is not going to be allowed to hear the real story of why the changes in this Sugar Act should be made as soon as possible, nor will we be able to point out how many inequities will remain status quo for Americans if no change is made in this act for 21 months. Particularly am I concerned that there is no language in this bill granting new beet areas enough tonnage to provide prospective new factories with sugar crops to process.

Within my district in the State of Washington is a potentially great sugarbeet area at the western end of the Columbia basin reclamation project. This is the Quincy district and the Quincy district presently is planted to about 2,000 acres of beets. The crop, however, is contracted to a processing company in another State, thus making it necessary to haul the raw beets great distances.

I would like to state that in the Committee on Agriculture I gladly joined with Mr. POAGE of Texas, as I have in past consideration of sugar legislation, in presenting an amendment to this bill which would have provided the incentive needed to lead to the construction of factories in these new areas. Since we lost the battle on the amendment, I supported committee consideration of extending the act for shorter periods, but these efforts did not prevail.

However, I am pleased that the committee, in the report on H.R. 5463, did agree to urge that the Secretary of Agriculture not reimpose beet quotas until after we have considered long-term legislation. As I pointed out in suggesting such language, the absence of quotas for another year would, to a degree, help new growers continue to establish a growing history, necessary under the present act.

I am very concerned about the deadline which is approaching us so fast that calls for the expiration of the Sugar Act on March 31. We must have an extension of this act. But, at this point I cannot support the motion before us to suspend the rules because in effect that would give support to passage of the bill without any opportunity to cut the extension time of 21 months to a more reasonable period. On the other hand, if we defeat the motion before us, this body will then have the opportunity to send the bill back to Rules Committee and this committee can then grant a rule on the bill that would bring the matter again before us this week in such a way that we would be allowed to offer the proper extension time amendment which I am sure every Member would be glad to support. Representations from the Senate indicate very strongly that their body would be much more willing to accept this legislation if the extension were less than 21 months. If we send this bill to them with a 21-month extension on it, and they make the change of time in that body, then we face the very grave hazard of time-consuming delay necessitated by a conference on the bill. The big question is: Can we then complete the processing of this legislation before we reach the deadline of March 31? For this reason, I shall vote against suspension of the rules on the floor today so that I may have the opportunity to support the extension for a shorter period and thus hasten action on the legislation.

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from Texas.

Mr. ROGERS of Texas. Can the gentleman from Iowa tell the House that on July 5 of last year when we extended the

Sugar Act to March 31 of this year efforts were being made to extend that act for 3 years, were they not?

Mr. HOEVEN. I think that was under consideration.

Mr. ROGERS of Texas. If this 21-month extension is granted now, the effect will be to extend the Sugar Act for the full 3 years that was desired last July, will it not?

Mr. HOEVEN. I will yield to the chairman of the committee to answer the gentleman's question.

Mr. COOLEY. We wanted a longer extension last year but had to accept a short extension in conference with the other body.

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield further?

Mr. HOEVEN. For one short question.

Mr. ROGERS of Texas. The conference report that was brought back last year contained this statement. I would like to read it:

> As a part of the understanding reached at the conference it was agreed that the conferees on the part of the House would undertake to pass a sugar bill and transmit same to the Senate at the earliest possible date after reconvening of the House in August.

I say we have not kept faith with the American people.

Mr. COOLEY. And I say the gentleman from Texas has not read the record and does not know what he is talking about, exactly that.

Mr. ROGERS of Texas. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I cannot yield further at this time; I would like to conclude my statement.

Regarding the provision in the bill relating to the Dominican Republic, that is entirely a matter of foreign policy. I said before, and I say again, that you cannot write foreign policy on the floor of the House of Representatives. Neither can you write an adequate long-range sugar bill in the short time remaining between now and the 31st day of March of this year.

The United States is a member of the Organization of American States which encompasses all of the nations of South America and Central America. The United States is a member of that organization. A great many of those republics have severed diplomatic relations with the Dominican Republic. We have a problem in Cuba, as you know, with the Castro government. We cannot act unilaterally in this respect. We have to act with our neighbors, the members of the Organization of American States, in standing together or falling together in our fight against communism and the Castro regime in Cuba. I do not think I am divulging any secrets when I say we want to get into a position in the Organization of American States whereby proper economic sanctions can be imposed on Mr. Castro and the Republic of Cuba. We must stop the infiltration of communism into that area. This, therefore, is a foreign policy decision.

We ought to stand behind the administration in what it is trying to do in preserving some semblance of peace in the area of the Caribbean. May I say in passing that this same position was taken by the previous Eisenhower administration so the matter is entirely divorced from partisan politics.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from Michigan.

Mr. CEDERBERG. Mr. Speaker, I wish to associate myself with the remarks of the gentleman from Iowa. I believe that this extension up to 21 months makes a great deal of sense. To extend it for 9 months would, in my opinion, place the Committee on Agriculture in a position, recognizing the fact that Congress is going to adjourn sometime in July or August and the act would expire prior to when we come back in January, in a position that would be extremely unfortunate.

The gentleman has also raised the question of the foreign policy aspect of this matter. I share the concern of the gentleman from Massachusetts about the possibility of Cuban sugar coming in by a sort of back door. Our Government is going to be faced with another decision, and that is the fact that the Cuban Government has requested economic aid from the international United Nations fund, to which the U.S. Government contributes 40 percent. They have an application in there asking for a special economic project to assist them because of the fact they have been losing certain revenue due to the Sugar Act.

I want to associate myself with the gentleman from Iowa [Mr. HOEVEN], and I hope this act will be extended.

Mr. HOEVEN. I thank the gentleman for his contribution.

Mr. TEAGUE of California. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from California.

Mr. TEAGUE of California. I, too, would like to associate myself with the gentleman from Iowa and to compliment him on the splendid and clear explanation he has given of this problem. He has presented it in a statesmanlike way.

Mr. RHODES of Arizona. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from Arizona.

Mr. RHODES of Arizona. The American farmer is in a position again in which his interests are going to be sacrificed on the altar of international expediency. To some extent he has been in this position before. He has been in this position in connection with cotton and as far as sugar is concerned, too. I am sorry it becomes necessary for this act to be extended in this way. I wish it were possible for us to amend the act to provide that some of the areas to the west which grow beet sugar would be allowed to continue, as I say, so that American farmers in the West would be allowed to grow the sugarbeets which they are capable of growing. However, I recognize the mood of the House and I do recognize the international situation. I may say to the gentleman from Iowa that I am very pleased with his statement, as well as the statement of the chairman of the committee as to their intentions regarding full hearings for a full adjustment of this matter. I recognize it is complicated, that you cannot do it overnight. I am pleased with the good will behind it when they point to the fact this is going to be done in May. I hope it will not be delayed. I hope we will have a bill to vote on during this session of the Congress.

Mr. DOMINICK. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from Colorado.

Mr. DOMINICK. Mr. Speaker, I wish to associate myself with the gentleman from Iowa.

Mr. COLLIER. Mr. Speaker, will the gentleman yield?

Mr. HOEVEN. I yield to the gentleman from Illinois.

Mr. COLLIER. Can the gentleman tell me why or for what reason we could not write into this act itself a protection against the back-door entry of Cuban sugar through Canada or any other country?

Mr. HOEVEN. May I say to the gentleman that I concur with his views. The matter was thoroughly discussed in committee. We have been assured by the State Department that they are checking into that matter, and I hope some positive action will be undertaken by the administration without delay.

Mr. COLLIER. Coming back to my original question, is there any reason why it could not have been written into the act? That is all I want to know.

Mr. HOEVEN. The gentleman means in the original act?

Mr. COLLIER. That is right, sir.

Mr. HOEVEN. It could have been written into the act but it was not done.

Mr. DOMINICK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. DOMINICK. Mr. Speaker and fellow colleagues, I am taking these few short minutes of your time to express my reasons for supporting the proposed extension of the Sugar Act for 21 months; namely, through December 31, 1962. As we are now aware, the present act unless extended will expire on March 31, 1961, only 10 days from this date. If the act should expire even for a few hours, it has been well established that there are speculators who have available large shipments of refined sugar which they will immediately ship into this country and demoralize the market and the industry. It is obvious, therefore, that Congress must take action before March 31 or risk the well justified charge that it has been negligent in its duty to the growers, the industry, and to the consumers.

Many of us here feel that a 9-month extension would be better than the proposed 21-month extension. Under a 9-month extension there would be an immediate necessity for holding hearings on a long-term extension designed to increase the quotas for domestic production and to create some reallocation of foreign import quotas. There are

many areas in this country which now have available to them acreage suitable for sugarbeet or sugarcane and growers in such respective areas willing to plant such crops provided that a refinery or processing plant is available—a modern beet-sugar plant of the size which could be economically operated costs in the neighborhood of $15 million. It is difficult, if not impossible, to obtain interest in financing such a plant unless there is reasonable assurance that a long-term extension of the sugar program will be in effect. For such reasons I heartily sympathize with those who are fundamentally in support of the bill which I introduced on January 6 asking for a 9-month extension so that hearings could be commenced immediately.

I recognize, however, that at this moment there is not sufficient time to revise the present bill, to get a new rule on a 9-month extension or to incorporate into either a 9-month or 21-month extension the provisions which many new, prospective growers would like to see. We must not only insure passage of this bill through the House but we can expect some hearings and perhaps some amendments from the Senate which could conceivably create the necessity of a conference to reconcile differences between the two Houses. Since it has already taken 2½ months to get the present bill before the House, it does not seem advisable to me to risk the possibility of not being able to enact some legislation before the present act expires. I feel that a most doubtful potage would be brewed by trying to write an extended sugar act in open House debate.

As I stated in my letter to the chairman of the Agriculture Committee [Mr. COOLEY], and in the copies of that letter sent to other Members, I feel that a 9-month extension with immediate hearings on a long-term extension is preferable, but that I will support the present bill because of the overriding needs of all segments of the industry at the present time.

Mr. COOLEY. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. ANFUSO].

Mr. ANFUSO. Mr. Speaker, a pressing challenge in our time is to revitalize, to put new life and new vigor into the good neighbor policy of the Americas, as initiated by Franklin D. Roosevelt.

In this sugar bill before us here today we extend again the hand of friendship to our Latin American neighbors. In this bill we specifically emphasize that consideration shall be given to countries in the Western Hemisphere, in purchasing sugar according to our needs, beyond established quotas.

We invite expanding trade with our good neighbors. Trade among nations, as buyers and sellers on equal terms, makes friends among nations.

Extension of the Sugar Act is vital to our good neighbor policy.

Mr. Speaker, all of us regret that it has become necessary to embrace in this bill before us an amendment to the basic act which permits the denial of sugar purchases above basic quotas from countries with which the United States does not maintain diplomatic relations. Similarly, we deplore the tragic situation in Cuba which already has resulted in the cancellation of sugar purchases from that country of proud people who have come under the domination of a Communist orientated dictatorship.

In this situation, in this debate upon the Sugar Act extension, I want to applaud the efforts of President Kennedy, during his first days in the White House, to reseal the bond of friendship in the Americas. On March 13 he set forth a 10-point, 10-year economic and social development program for Latin America, to meet the challenge of "a future full of peril, but bright with hope."

He has given assurances that the United States is prepared to give financial aid "if the countries of Latin America are ready to do their part." He has made known that the economic development program he advocates for our neighbors to the southward looks toward modification of "social patterns so that all, and not just a privileged few, share the fruits of growth."

Mr. Speaker, I believe no other great and strong nation in all history has approached the record of the United States in championing the integrity and sovereignty of its neighboring nations. Now our Government is ready to aid in a substantial way the economic and social development of these neighboring nations.

It is my hope that when we again consider sugar legislation in the Congress, the good neighbor policy will have advanced the friendship of nations in this hemisphere in a way that we can deal freely and confidently with all our sister nations who share in our markets, that the conditions which have brought the breaking of diplomatic relations with any nation in this hemisphere will have been remedied and that democratic processes will then prevail in all these nations.

I appeal for approval of the legislation now before us as a step in this direction of friendship with the 200 million inhabitants of the good neighbors of Latin America.

Mr. COOLEY. Mr. Speaker, I yield such time as he may desire to the gentleman from Texas [Mr. MAHON].

Mr. MAHON. Mr. Speaker, I wish to be recorded as unalterably opposed to the present bill. I hope it will be defeated.

It is most regrettable that we have no chance to discuss the details of the problem or offer amendments to the bill. What we need is a 9-month extension and action before the adjournment of this Congress on a satisfactory long-range program. Early action is in our best interest internationally and in the best interest of domestic growers and prospective domestic growers.

Mr. COOLEY. Mr. Speaker, I yield such time as he may desire to the gentleman from Kansas [Mr. BREEDING].

Mr. BREEDING. Mr. Speaker, I am opposed to a 21-month extension of the Sugar Act. I am in favor of a 9-month extension of the Sugar Act. When the committee voted to extend the present program for 21 months, it failed to recognize the need for more acreage for our own growers. In an agreement that was reached last year, when the act was extended for a short period, it was agreed that the task of making major changes in the act would be taken up this year. It now appears that the whole concept has changed and it seems to be the position of the chairman and many members of the committee that the law should be extended at the present time for 21 months, which means it would be 3 years before domestic growers could be given consideration. I think the chairman of the House Committee on Agriculture is breaking faith with Members of Congress when he insists that the act be extended for 21 months, at this time. It is most urgent that the act be amended, to increase domestic production of sugarbeets. I believe our sugarbeet farmers should be permitted to produce more of the sugar the United States consumes. There will have to be a major shift, in the present sugar quota, since we can no longer do business with Cuba. My people are only asking for their fair share of this quota. I earnestly beseech this body not to extend this act for 21 months, at this time, so that more debate on the general revision of the act can be had, as it pertains to quota provisions.

Mr. COOLEY. Mr. Speaker, I yield such time as he may desire to the gentleman from Oklahoma [Mr. WICKERSHAM].

Mr. WICKERSHAM. Mr. Speaker, I am opposed to a 21-month extension of the Sugar Act. A group of Congressmen from Texas, Kansas, New Mexico, Oklahoma and other States requested permission to appear before the House Agricultural Committee and the Rules Committee in behalf of a 9-month extension only, but we were not afforded the opportunity of being heard.

The old song, "Sugar in the morning, sugar in the evening, and sugar at suppertime," may not be applicable if we continue to deny the American farmer, who is classified as a new grower, the right to grow sugarbeets and get them refined.

Many farmers are forced to reduce acreage formerly planted to cotton, wheat, grain sorghums and peanuts; consequently, they should be permitted to grow other crops. The growing of sugarbeets is profitable. It is unfair to permit Cuba and other foreign countries to receive all of the allotments, especially since the population is growing at a tremendous pace, and especially, in view of the existing international situation.

Mr. COOLEY. Mr. Speaker, I yield such time as he may desire to the gentleman from New Mexico [Mr. MORRIS].

Mr. MORRIS. Mr. Speaker, I hope that this House will turn down this 21-month extension; that a 9-month extension will be brought to this floor, and I think it will be passed unanimously.

Mr. Speaker, I want to point out to this House that, as far as know, there have not been any hearings held on this legislation. Now, what is going to be

the foreign policy answer when the countries of Latin America, who are importing Cuba's quota, acquire a $150 million a year vested interest in this quota? What is going to be your answer when you take this away from them? Mr. Speaker, I hope that this House will turn down this 21-month extension and bring out a bill we can all support—a bill for a 9-month extension. Then the House Committee on Agriculture can hold hearings and every citizen may have a chance to be heard. Then the people who now have a monopoly on the sugar industry in this country, on the importation of sugar into this country, will not be the only ones to have the chance to be heard.

At the present time there are only 12 firms that import all the sugar into this country.

The SPEAKER. The time of the gentleman from New Mexico [Mr. MORRIS] has expired.

Mr. COOLEY. Mr. Speaker, I yield 1 minute to the gentleman from Texas [Mr. ROGERS].

Mr. ROGERS of Texas. Mr. Speaker, I want to say this: I am very happy to get this minute. I have been trying to get time on this bill and have been denied it at every turn. There were no hearings held on this bill before the committee. I received a letter from the chairman telling me I would be scheduled to be heard. I was not given the opportunity to be heard. The Committee on Rules has been circumvented on this situation. What you are fixing to do by the passage of this bill at this time is to turn 3 million tons of sugar over to foreign nations and to deny the American farmer the right to grow 1 pound of it; and those 3 million tons of Cuban sugar can be transshipped into this country from other foreign countries and probably will.

If the Members of this House understood this bill, if hearings had been held on it, I think there would be a different air in this Chamber.

Mr. Speaker, I think we can do something against communism this afternoon if we vote down this bill and get the opportunity to debate this matter.

Mr. HOEVEN. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. QUIE].

Mr. QUIE. Mr. Speaker, as we look at this legislation I think we are convinced that we should have a 9-month extension rather than a 21-month extension.

Mr. LANGEN. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman.

Mr. LANGEN. I thank the gentleman for yielding. I take this time in order to express my concern as to the wisdom of a 21-month extension at this point.

Mr. Speaker, I do so because of the need for revisions in the law to allow for greater participation on the part of domestic growers. This need has been expressed over the past many years in terms of the great desire of our domestic farmers to grow beets, and by the fact that we have very substantial evidence of their ability to do so. In our own Red River Valley area of northwestern Minnesota farmers have for many years been making applications for beet allotments without success. The present beet industry which we do have in our area is ample proof of the many advantages of growing and processing beets in this area. All that has been lacking are additional allotments, and this is the case in several other domestic areas.

In the light of this great domestic potential and the need for putting it into operation in terms of a longer-term revision of the Sugar Act, a 21-month extension seems objectionable to me. Surely we have ample time in the remainder of this session to arrive at a revised act which will allow our domestic producers to participate in fulfilling a greater share of the sugar market. Therefore, a 9-month extension would seem to be very ample. And in addition, if such a revision could not be reached this session, it would be extremely simple to add another extension later. I believe our domestic producers deserve at least this opportunity to present their case.

Another undesirable aspect of extending the present act for 21 months is that it will tend to set a precedent for buying sugar from foreign countries who will then be dissatisfied if a part or all of their American market is closed. This would be much less of a problem under a 9-month extension.

It would be my hope that the Agriculture Committee might, in the near future, commence open hearings on the overall subject of sugar legislation. Its present procedure of dealing with sugar legislation almost exclusively in executive session certainly precludes domestic producers having an opportunity to present their case. I am sure with this opportunity that we would have a much better chance of achieving the increased domestic sugarbeet acreage which would contribute so much to a strengthening of American agriculture.

Mr. QUIE. Mr. Speaker, there is a great opportunity in southern Minnesota to raise sugarbeets. We just passed a bill to divert some acreage from feed grains. Higher domestic sugar beet quotas would divert acreage from feed grains in my part of the country. More important than that however, we should look at the decision that this Congress is making; we should consider the use of this Congress by the State Department and the administrative branch on a foreign policy decision. Some of us have serious reservations about the foreign policy ramifications involved in this bill, particularly in singling out one nation for censure.

It is our conviction that the Constitution of the United States has firmly fixed responsibility for the conduct of foreign policy upon the President and the executive branch of the Federal Government and not upon the Congress. We believe the Congress should provide such authority as is necessary for the President to meet this constitutional responsibility, but we do not believe that we should attempt in the Committee on Agriculture to provide in a farm bill specific authority to deal with one particular country on one particular commodity. Nor do we believe the Congress should take a specific foreign policy action when the Constitution reserves such action for the President using the offices of the Department of State. Our responsibility in sugar legislation is to assure the President sufficient authority to meet the foreign policy questions involved with all countries affected by the act.

The previous administration recognized this principle. On March 15, 1960, the Eisenhower administration in its formal request for sugar legislation stated as follows:

> The proposed bill accordingly authorizes the President, whenever such action is necessary to insure adequate supplies of sugar or is otherwise required in the national interest, to reduce the quota for a calendar year for any foreign country, other than the Republic of the Philippines, without the necessity of waiting for additional legislation or for a critical situation to develop. For the same reason, provision is also made for obtaining replacement sugar supplies from other sources.
>
> It is not known whether the need to exercise this authority will ever arise. If it does, each action would be with respect to a single year and would be made in a manner consistent with our international obligation. The circumstances under which the Presidential authority would be exercised cannot now be foreseen. For instance, early in a marketing year a large quantity of sugar might be needed and timing would be of secondary concern. Late in a marketing year timing of delivery might be of paramount importance, although only a small quantity might be involved. Accordingly, the Secretary is authorized to acquire replacement sugar in the manner he deems appropriate at the time such action may be taken.

The specific statutory language suggested by the Eisenhower administration provided in part as follows:

> (2) For the purposes of meeting the requirements of consumers in the United States, the Secretary is authorized to cause or permit to be imported into the United States, in such manner, from such sources, and subject to such terms and conditions as he deems appropriate under the prevailing circumstances, a quantity of raw sugar, not in excess of the sum of any reductions in quotas made pursuant to this subsection.

As I said last year, no matter whether the President is a Republican or a Democrat, he should make those decisions.

Mr. Speaker, I think we ought to take a serious look at this. In the Committee on Agriculture I supported an amendment offered by one of the members which would have given the President broad authority. I think if we let this bill go back to committee, we could bring it back in the right form and pass it early next week. We could take care of this before the March 31 deadline and with a 9-month extension so we would be insured of action to the benefit of domestic producers.

Mr. DEROUNIAN. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from New York.

Mr. DEROUNIAN. Mr. Speaker, may I say to the gentleman that I do not like an Iron Curtain on any legislation in this House. I think there is one here. I think this is a steamroller. I do not like the smell of this bill and I am going to vote against it.

Mr. BRUCE. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Indiana.

Mr. BRUCE. I should like to associate myself with the gentleman's remarks and go one step further, by saying that contrary to the statements that have been made that simply because the previous administration was for the restrictions we are literally bound to that, I disagree.

Mr. DERWINSKI. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DERWINSKI. Mr. Speaker, this debate on the extension of the Sugar Act is displaying widespread disagreement not only on the part of members of the Agriculture Committee but the entire membership of the House. I join those who object to the 21-month extension as provided in the bill now being debated since I feel it creates a position of inflexibility which would be detrimental to the ability of Congress to write a new Sugar Act should circumstances affecting our purchases of sugar drastically change.

I feel that the Congress should meet this issue head on and that the Agriculture Committee should, as it has promised, commence hearings on the entire sugar production problem. Certainly, a 12-month extension would be ample time for the congressional committees to study this matter. I therefore will vote against the extension proposed today in the hope that we could instead approve the extension for a 12-month period which I feel would be a more realistic position.

May I also point out that the discussion this afternoon has been devoted mainly to generalized statements concerning foreign relation implications in the extension of sugar quotas. Numerous members have discussed the problems of the domestic sugarbeet industry and its indirect relationships to the acreage problems in other commodity areas. We should also take into account the problems facing the sugar producers of Puerto Rico and Hawaii in their long range interests in readjustment to the sugar quota.

But I am greatly disturbed by the complete indifference to the American consumer who, in effect, subsidizes the international sugar market. The historic subsidy paid to Cuban and other sugar producers comes from the pockets of the U.S. consumers. I trust the Members of Congress could appreciate the additional complication that deserves to develop should the public be accurately informed of the manipulations and machinery of the sugar quota system and the effect it has had in creating for them an artificially high price for the sugar they consume.

I am also disturbed at this apparent effort of Congress to evade responsibility in this field. Of necessity, we must make mention of the recent administration proposals to take away from Congress legislative power in the vast agriculture programs. At this time it would be well for Congress to reassess its authority in legislative fields and not weakly abdicate power to the legislative branch of Government which is already swollen with petty bureaucratic tyrants who administer the multitude of Federal agencies with disregard for our citizens in their capacity as taxpayers.

Mr. HOEVEN. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Speaker, I have been intrigued by the touchiness on the part of some Members of the House this afternoon on the subject of foreign policy. Why, bless your hearts and souls, you vote on foreign policy when you consider authorization bills and appropriations for the so-called implementation of foreign affairs. Why are you so touchy this afternoon about foreign policy, and why is there no prohibition in this bill against the back-door importation of sugar from Cuba?

I am opposed to this kind of procedure wherein it is impossible to offer an amendment prohibiting Cuban sugar from coming into the United States through the back doors of other countries.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from North Carolina.

Mr. COOLEY. The committee believes that it is in the bill, and we believe that the administration has the authority to prevent a circumvention of the law.

Mr. GROSS. If this bill could be amended I could write a provision—and it would not take very long, either, so that there would not be any doubt about it.

Mr. COOLEY. We think it is in the bill, just what the gentleman is complaining about. We put it in the report to make our intent definite and clear.

Mr. GROSS. The report is not binding. A prohibition in the bill would be.

Mr. COOLEY. If we open up the consideration of this bill we will be here weeks. We must pass this bill or we will have chaos in the sugar industry.

Mr. GROSS. It is never good business to pass poor legislation. I am not for this bill for that reason.

On this matter of foreign policy, the gentleman from Michigan [Mr. CEDERBERG] said that negotiations are now underway through which the United Nations special fund would provide financial aid to Cuba's Communist Dictator Castro. I have here an editorial from a New York newspaper which states that Paul Hoffman, the director of the U.N. special fund, has already signed an agreement to give financial aid to Castro, and of course American taxpayers are putting up 40 to 50 percent of the money that goes into the United Nations special fund.

How silly can we get. On one hand, we break off diplomatic relations with Cuba and refuse to buy their sugar only to find it being transshipped from other foreign countries and sold in this country. On the other hand, Paul Hoffman, that great liberal with our tax dollars, has either engineered a deal or is trying to put one through that would help rescue Castro from the serious internal situation in Cuba.

I regret there is not more time to debate this ridiculous situation.

Mr. HOEVEN. Mr. Speaker, I yield myself the remainder of my time.

Mr. Speaker, there is a rule in law which says that equity never does a vain thing. You may turn down the suspension of the rules, if you desire. If you do so, I think you will be immediately confronted with a closed rule on this very same piece of legislation. Time is of the essense and you cannot possibly write a long-range sugar bill on the House floor between now and the 31st day of March when the present act expires. Let us be realistic about this thing. The entire sugar industry of the country is satisfied with the 21-month extension. Furthermore, the chairman of our committee has promised you that we will start hearings on a long-range program in the month of May. It seems to me that should suffice.

I do hope you will suspend the rules and pass the extension bill. You cannot afford to take a chance in letting the present extension lapse on the 31st of March. This might well happen if we keep on dillydallying along.

The SPEAKER. The time of the gentleman has expired.

Mr. COOLEY. Mr. Speaker, I yield 5 minutes of the remaining 6 minutes to the gentleman from Texas [Mr. POAGE].

Mr. POAGE. Mr. Speaker, not since that fateful day when the Puerto Rican terrorists shot up this House while we were discussing Mexican labor can I recall having taken the floor to oppose the position of my chairman on an agriculture bill. I hope our present disagreement is not a portent of violence. Today, however, I must express my opposition to the pending sugar bill on two counts. That there may be no misunderstanding as to my position, and that I may not say what I do not intend to say, I have reduced my statement to writing.

In the first place, this bill is, in my opinion, defective in that it makes no provision for the recognition of the rights of new growers and new areas. I think that as the American public uses more sugar—and we do each year—that more American farmers should be given the right to grow sugar. Last year we assured these farmers that we would give consideration to their plight this year. This bill does not keep faith with those farmers in new areas who want to grow sugarbeets. In my opinion, it would have been a simple matter to allocate a portion of the domestic growth factor to these new growers in new areas. Such a course would have taken nothing away which any grower—foreign or domestic—now has. It would have given these people a chance to begin some small development of the sugar industry. I anticipate that the other body may make such provision, but in my opinion, it was our duty to deal fairly with these people. This bill does not deal fairly with them, and I would be compelled to oppose it on that ground alone.

There is, however, in my opinion, a far more dangerous aspect of this bill. This

is not simply an agriculture bill. It is designed to be used as an instrumentality of power in our foreign relations. This bill makes provision for discrimination between the so-called full-duty countries which have in the past supplied a portion of our domestic market. It assures all but one of those countries of a new and continued preference in the American sugar market in direct proportion to the amount of sugar which each of these countries has heretofore supplied.

The one exception is the Dominican Republic. Here it is definitely intended, and the bill grants the power to apply a discriminatory treatment. Our committee was not advised just exactly what the State Department expected to attain by such treatment, but it is obvious that we are being called upon, through an agriculture bill, to impose a penalty on the cane producers of the Dominican Republic because either we or someone else does not like the Government of the Dominican Republic. We were told that that Government is a dictatorship. I assume it is. I assume it has been for more than 30 years. I don't like dictatorships. I would not like to live under a dictatorship, but clearly the United States of America has not set about to destroy all dictatorships.

I am advised that we have, since the close of the war, extended aid valued at more than a billion dollars to Mr. Tito in Yugoslavia. I don't believe anybody would suggest that Mr. Tito was President as a result of the type of democratic process which we recognize as such in this country. Nor can it be said that Mr. Franco's government in Spain differs very materially from General Trujillo's government. And yet, we support the Franco regime with vast sums of money. I am not trying to be critical of any government. I am merely saying that the United States is not dedicated to the principle of eradicating dictatorships throughout the world.

Whatever Dictator Trujillo's merits or demerits may be, he did take a bankrupt economy and paid its debts. He did take a country without a single public school and has established general primary education. He did take a country with no roads except those which had been built by the U.S. Marines and established a reasonably good system of domestic communication. He did bring the standard of living of the people of his island up from very close to the bottom to the third highest in the Caribbean. He has always respected American rights and has protected the property of all people. He has stood firm against communism.

Today we see the vast contrast between a Communist dictator in Cuba and an anti-Communist dictator in the Dominican Republic. Which do you prefer? As between the two, I have no hesitancy in saying that I prefer the anti-Communist type.

What is our policy of chastisement for General Trujillo intended to achieve? Are we trying to overthrow his government? If so, what can we expect in its place? If we succeed, I believe that every thinking American knows that the present Government of the Dominican Republic will be succeeded either by the direct agents of Mr. Castro or a Castro-type Communist government. And if the Dominican Republic becomes a second Communist outpost in the Caribbean, the Republic of Haiti also must fall. It could not remain on the same island without succumbing to communism. I know not what will then happen in the British Federation in the West Indies, but I am certain that a Communist stronghold in Hespanolia would certainly weaken democracy throughout that whole area. And suppose we do not succeed in overthrowing Mr. Trujillo? Does any reasonable man expect him to accept this abuse and retain his strong anti-Communist position? Indeed, will he not then be forced into the hands of Communism to support himself? Will not all the world be on notice that the United States is not seriously concerned with any other nation's attitude toward Communism?

I sought desperately to find what the State Department wanted the Dominican Republic to do to purge itself. But I have sought in vain. I have been unable to get any assurance that even the removal of General Trujillo from the island and the commitment of the existing ing government, of which he incidentally is not an official, to conduct elections at the regular election time and to even allow the Ford Foundation to observe the elections would be satisfactory to our Government. Just what does our Government want? Apparently, we want first to force General Trujillo out of the Dominican Republic under humiliating circumstances. Would we rather have the Communists take over the island than to handle the succession of government in an orderly and constitutional manner? I hope not.

I hope I misunderstand the policy of my own Government. But I must say with all charity and in all sincerity that so far I do not understand that policy, and I am sure that there is not a man on the Agriculture Committee who can explain that policy to you. Convinced as I am that this policy is bound to lead to another communistic government in the Caribbean, I cannot support this bill.

I know we need a sugar bill. I want a sugar bill, but I do not want one bad enough to vote for a bill which might actually encourage communism in another American Republic.

The SPEAKER. The time of the gentleman from Texas [Mr. POAGE] has expired.

Mr. COOLEY. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 1 minute remaining.

Mr. COOLEY. May I just make one statement to say that the outgoing administration of President Eisenhower recommended the position that the gentleman from Texas has just stated.

I know that this act is vital to the welfare of many of our own people, and I hope it will pass.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. COOLEY. I yield briefly.

Mr. O'NEILL. Was it the intent of the Congress when the original bill was passed last year to permit Cuban sugar to be shipped to Canada or any other foreign country and refined and then sent to the United States, which is now condemned?

Mr. COOLEY. No, it was not the intent of Congress that Cuban sugar should come into this country after we refused to restore that quota.

The SPEAKER. The time of the gentleman has expired.

CALL OF THE HOUSE

Mr. BASS of Tennessee. Mr. Speaker, I suggest the absence of a quorum, and I make a point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. COOLEY. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 18]

Baker	Jones, Mo.	Thompson, La.
Blatnik	Lesinski	Thompson, N.J.
Brademas	McDonough	Tupper
Buckley	Mosher	Wilson, Calif.
Gallagher	O'Konski	Wright
Griffin	Rabaut	
Hall	Springer	

The SPEAKER. On this rollcall, 423 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

EXTEND AND AMEND THE SUGAR ACT

The SPEAKER. The question is, Will the House suspend the rules and pass the bill, H.R. 5463?

Mr. ROGERS of Texas. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 284, nays 129, not voting 18, as follows:

[Roll No. 19]

NOT VOTING—18

Bailey	Hall	Rabaut
Baker	Harding	Rains
Blatnik	McDonough	Thompson, La.
Buckley	Mosher	Tupper
Curtis, Mo.	O'Konski	Wilson, Calif.
Gallagher	Pfost	Wright

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Rabaut and Mr. Rains for, with Mr. Curtis of Missouri against.

Until further notice:

Mr. Blatnik with Mr. Mosher.
Mr. Wright with Mr. McDonough.
Mr. Thompson of Louisiana with Mr. Baker.
Mr. Buckley with Mr. Tupper.
Mr. Gallagher with Mr. Wilson of California.
Mrs. Pfost with Mr. Hall.
Mr. Bailey with Mr. O'Konski.

Messrs. CANNON and LOSER changed their vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDING FAIR LABOR STANDARDS ACT OF 1938

Mr. MADDEN, from the Committee on Rules, reported the following privileged resolution (H. Res. 229, Rept. No. 182), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution, it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3935) to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the Act to $1.25 an hour, and for other purposes. After general debate, which shall be confined to the bill and continue not to exceed seven hours, to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Education and Labor, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider, without the intervention of any point of order, the substitute amendment recommended by the Committee on Education and Labor now in the bill, and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted and any member may demand a separate vote in the House on any of the amendments adopted in the Committee of the Whole to the bill or committee substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

INCOME OF FOREIGN CENTRAL BANKS

Mr. MILLS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5189) to amend the Internal Revenue Code of 1954 to exempt from tax income derived by a foreign central bank of issue from obligations of the United States.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart C of part II of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 895. INCOME DERIVED BY A FOREIGN CENTRAL BANK OF ISSUE FROM OBLIGATIONS OF THE UNITED STATES

"Income derived by a foreign central bank of issue from obligations of the United States owned by such foreign central bank of issue shall not be included in gross income and shall be exempt from taxation under this subtitle unless such obligations are held for, or used in connection with, the conduct of commercial banking functions or other commercial activities."

(b) The table of sections for such subpart C is amended by adding at the end thereof the following:

"Sec. 895. Income derived by a foreign central bank of issue from obligations of the United States."

(c) The amendments made by subsections (a) and (b) shall be effective with respect to income received in taxable years beginning after December 31, 1960.

The SPEAKER. Is a second demanded?

Mr. BYRNES of Wisconsin. Mr. Speaker, I demand a second.

Mr. MILLS. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the bill H.R. 5189 exempts certain foreign central banks from tax on any income they derive from investments in U.S. Government obligations but only to the extent such obligations are held for or are used in connection with their central banking functions. It would not exempt the income from such obligations if they are held for or used for commercial activities.

The President requested this legislation as one of various desirable steps intended to improve this country's ability to defend its gold reserves. A similar proposal was made by the administration last year but there was not sufficient time for its consideration by Congress. It is anticipated that the bill will have a negligible effect on revenues.

Mr. Speaker, under present law, foreign central banks which are an integral part of the government of the country in which they are located are exempt from tax on all U.S. investment income under section 892 of the code. If such banks are not a part of the government but are established as independent corporations, they are generally subject to tax on their U.S. investment income at a flat 30-percent rate or at a lesser rate under some tax treaties.

There are two exceptions to this where an exemption is now provided: First, interest on bank deposits—section 881—is also exempt for foreign depositors;

second, in the case of income derived from bankers' acceptances. An exemption is provided for these foreign central banks—section 861. Since no similar specific statutory exemption is provided with respect to income derived from U.S. Government obligations, such income is taxable to such banks when they are not an integral part of the foreign government.

The problem arises under present law because in a number of foreign countries—mostly the smaller ones—the central banks are not operated as an integral part of the government but are set up as separate corporations which are wholly owned by such governments, somewhat along the lines of our own Federal Reserve bank. Prior to 1946, the Internal Revenue Service had ruled that foreign central banks so organized were governmental entities and hence entitled to exemption from tax on all of their U.S. investment income. In 1946, this position was reversed. The most recent ruling on this subject holds such banks are not entitled to tax exemption as foreign governmental entities with the result that they are subject to tax on all U.S. investment income except bank deposit interest and income from bankers' acceptances. However, application of this ruling has been suspended pending the introduction of this proposed legislation.

The objective of this bill is to make investments by foreign central banks in U.S. Government obligations at least as attractive from a tax standpoint as investments made by them in domestic bank deposits or bankers' acceptances. It is also designed to alleviate our gold flow problem by providing a means of holding or attracting foreign dollar investments by such banks by providing an investment alternative superior to the holding of gold.

Mr. Speaker, I must say that this bill taken by itself, if nothing else is done, will not make the great material contribution to the defense of our gold reserves that all of us desire, but it should be borne in mind that this bill is only one part of an overall program suggested for that purpose. This part of the overall program was referred to the Committee on Ways and Means. We will consider during the coming days of this week another bill that is also a part of the overall program in the direction of helping us to better defend our gold reserves.

Mr. Speaker, I think this bill should pass without opposition because it very definitely works in the direction of improving our gold reserves.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Iowa.

Mr. GROSS. Will the gentleman be a little more explicit as to what he means by "negligible effect" upon the revenue?

Mr. MILLS. The word "negligible" is used in our committee when it is not possible to give a specific dollar estimate of what the effect upon revenue will be, but only when it is believed the revenue effect will be less than a half million dollars a year. This is considered negligible in our committee in the relation of the half million dollars or less to the total receipts of many billions of dollars.

Mr. GROSS. Mr. Speaker, will the gentleman yield further?

Mr. MILLS. I yield.

Mr. GROSS. If a foreign bank holds Treasury bills or other U.S. securities, is interest now paid on them?

Mr. MILLS. If a foreign bank has Government obligations in any form and those obligations bear interest, the interest is paid to the foreign central bank.

Mr. GROSS. Under present law.

Mr. MILLS. Under present law, we pay interest to the holders of our obligations whether they be foreign central banks or whether they are other foreign banks.

Mr. GROSS. Would that be continued, or does this bill change that?

Mr. MILLS. No, it does not change it in any way. What we are trying to do in this legislation is to make it possible for a foreign central bank of issue, where that bank is not an integral part of the foreign government, to invest at least part of its monetary reserves in U.S. Government obligations instead of demanding gold and drawing down our gold reserves. The foreign central bank of issue is likely to prefer an investment in U.S. obligations since these pay interest. However, if we tax the interest income on these obligations the foreign central bank may be unwilling to make such an investment. This is only a problem where the foreign central bank is a separate corporation. Where it is an integral part of the foreign government it in no case pays U.S. tax on income from investments here.

Mr. GROSS. I have read this report and it seems unusual in this respect, that there is no statement on the part of the Secretary of the Treasury or the Internal Revenue Service, so far as I can see.

Mr. MILLS. There was no letter submitted to the committee from the Treasury Department. This was submitted by the President in his message on our gold reserves that came to us earlier this year and you will see that the President's position is indicated in the last paragraph of the summary of the committee report. I can assure the gentleman that this administration and the previous administration both recommended this proposition just as it is submitted to the House today.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield such time as he may desire to the gentleman from Michigan [Mr. KNOX].

Mr. KNOX. Mr. Speaker, I am opposed to this legislation. I opposed it in the Committee on Ways and Means.

Mr. Speaker, the bill now before us purports to deal with problems arising from experience in the past several years with our changing balance of payments position and its impact on our domestic gold supply. The bill, H.R. 5189, would amend our Federal tax code to exempt from income tax liability those amounts earned as interest by a foreign central bank of issue on U.S. Government obligations.

It has been argued in support of this measure that the bill would, first, grant tax treatment to eligible central banks incorporated separately from the governmental entity similar to that accorded to those banks separately incorporated; second, equalize the tax treatment of investments in Government obligations with that accorded to investments in U.S. bank deposits and bankers' acceptances acquired with reserve funds of foreign central banks of issue; third, encourage the holding of U.S. Government obligations by central banks of issue; and fourth, thereby, assist the United States in defending its gold reserves.

Mr. Speaker, this is at best a gesture to deal with a problem that needs much more than a gesture. It is an attempt to sweep under the rug our unpleasant fact of life that will not long remain concealed even though this legislation passes.

H.R. 5189 does for foreign central banks what I would like to do for our own citizens. It provides that the interest on Government bonds held by these banks shall be tax exempt. It is my view that before we exempt these foreign banks from tax liability, we should give some consideration to granting a similar exemption for the benefit of our citizens who hold Government bonds.

Mr. Speaker, many of our citizens bought bonds years ago as a patriotic duty—as a vote of confidence in the future of America—and they have held those bonds at the urging of their Government beyond the original maturity date. What has happened to the purchasing power of the dollars they used to acquire those bonds? In many cases the dollar value has been cut in half as a consequence of irresponsible fiscal policy by the Federal Government, with the result that these citizens at bond redemption time are getting back less purchasing power even with interest included than they originally invested—and yet these citizens must pay taxes on that interest income. Does it make sense to exempt interest income of foreign central banks from tax and require our citizens to pay tax on the same kind of income?

Mr. Speaker, we will be fooling ourselves, and only ourselves, if we think H.R. 5189 will be an effective means by itself in defending our declining gold reserves. Our gold reserves can be effectively defended only if we are willing to deal straightforwardly with the causes of our gold outflow, namely, inflation and excessive Government spending abroad. If we can demonstrate convincingly to people at home and abroad that we will not pursue an inflationary Government fiscal policy and if we will induce some semblance of sanity into our foreign economic aid policies, then we can expect confidence in the value of the dollar and a favorable balance of payments position to defend not only our gold supply but our economic strength as well.

It is said that this legislation will encourage foreign countries to hold U.S. obligations instead of seeking to convert their dollar holdings into gold. Mr.

Speaker, that contention is of doubtful validity because there are other means of holding dollars with tax-exempt interest being earned and those other means have not prevented a flight to gold when the world became uncertain about America's fiscal policy and the soundness of the dollar.

In the period 1946 through 1953, the United States transferred to the rest of the world in gifts and loans—exclusive of military items—approximately $30 billion of goods and services. Another $30 billion has been transferred in the subsequent period. In addition we have made $25 billion in military items available to the rest of the world since 1946. Thus a total of $85 billion has gone from the American taxpayers to help defend and restore the other countries of the world. Many countries who are the principal beneficiaries of this assistance have emerged as our principal competitors in world trade channels. Many of these countries are in better overall financial condition than we are but we hear of no reduction in the demands for American foreign aid.

In a memorandum referring to balance of payments officials of one of our free world allies recently received from our Under Secretary of State it is stated:

> The deficit of the United States arises wholly from its commitments and actions in the common defense of the free world. Without this freely assumed obligation the United States would now be running a heavy surplus in its balance of payments.

In spite of this frank acknowledgment in a diplomatic communique as to the basic causes of our present gold and balance-of-payment problems, there seems to be little disposition to deal with those causes. Instead, we are contenting ourselves with feeble and ineffectual measures such as the one before us today and other proposals which continue the policy of discriminating against our citizens so that we can continue as the world's extravagant benefactor.

Mr. Speaker, the Congress should deal realistically and thoroughly with the causes and resulting problems of our gold outflow and our adverse balance of payments. We are not doing so with this legislation.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield myself 9 minutes.

Mr. Speaker, as has been pointed out by the chairman of the Committee on Ways and Means the President requested this legislation as part of his so-called program to improve this country's ability to defend our gold reserves. The administration has listed the proposal as an important part of that program. At this time when every pronouncement from the White House of any program is hailed as some great new venture in the direction of solving problems, I think we might call attention to the fact that this legislation was requested by the prior administration as long ago as September 14, 1959.

Mr. Speaker, I ask unanimous consent to insert as part of my remarks the letter from the then Acting Secretary of the Treasury to the Speaker on that date requesting such legislation.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin [Mr. BYRNES]?

There was no objection.

(The matter referred to follows:)

THE SECRETARY OF THE TREASURY,
Washington, D.C., September 14, 1959.

Hon. SAM RAYBURN,
Speaker, House of Representatives,
Washington, D.C.

MY DEAR MR. SPEAKER: There is enclosed a draft of proposed legislation which would amend the Internal Revenue Code of 1954 to grant exemption from income tax to foreign central banks on interest derived from bonds or other obligations issued by the United States, provided such obligations are held in connection with the normal functions of a central bank and not for commercial banking purposes.

Under existing law, a foreign central bank is exempt from tax on two forms of income. It is exempt from tax on interest received on bank deposits in the United States, like any other foreign corporation not engaged in trade or business within the United States. In addition, it is exempt from tax on income from bankers' acceptances by virtue of a special provision in the law applicable to foreign central banks. Thus, the proposed bill would extend to the interest on Government obligations the same treatment now accorded these two types of income received by foreign central banks.

Prior to 1946, the Internal Revenue Service held that a foreign corporation that was wholly owned by a foreign government was exempt from income tax under the provisions of section 116(c) of the 1939 Revenue Code (sec. 892 of present law) which exempted a foreign government from tax on income from sources within the United States. In 1946 this position was reversed by I.T. 3789, in which it was held that the benefits of section 116(c) do not apply to a corporation, even though wholly owned by a foreign government, since it is an entity separate and distinct from the government. This reversal of position followed the rejection by the Joint Committee on Internal Revenue Taxation of a refund claim relating to taxes that had been paid by a corporation wholly owned by a foreign government. In 1950 the Tax Court handed down a decision in *Louis Vial v. Commissioner* (15 T.C. 403), bearing on this issue. The question in this case was whether employees of a foreign corporation, government owned, were exempt from U.S. income tax as employees of the foreign government. The court found that the corporation involved was unlike the ordinary type of U.S. corporation in that no stock was issued and the corporation was without stockholders. On this basis it held that the organization was a part of the foreign government. The Internal Revenue Service acquiesced in the decision, indicating that a corporation created by a foreign country under its laws and wholly owned by it would be considered part of the foreign government.

Applying this test, the Service ruled in 1955 that the Commonwealth Bank of Australia was entitled to tax exemption as part of the Australian Government. Upon review of the bank's claim for refund, the Joint Committee on Internal Revenue Taxation disagreed with the position of the Service and rejected the claim. It took the position that an entity with the attributes of a domestic corporation should not be considered a part of a foreign government even if organized under the laws of the foreign government and wholly owned by it. Thereupon the Service revoked the ruling, and revocation letters were mailed on August 8, 1956, to the Commonwealth Bank of Australia as well as other banks which had obtained similar rulings. Because of fiscal repercussions anticipated in connection with a shift of the U.S. investments of foreign central banks, the revocation was suspended after consultations between the joint committee and the Treasury and pending the introduction of amendatory legislation.

Foreign central banks have increasingly acquired dollar assets for their international monetary reserves. These have taken the form of bank deposits, bankers' acceptances and U.S. Government obligations, but the uncertain tax status of the interest on Government obligations has tended to discourage investment in the latter. Treasury bills are a desirable form of investment for liquid dollar assets of foreign central banks, and there would seem to be no sound reason to make bank deposits and bankers' acceptances more attractive to foreign central banks than Government securities. The proposed bill would achieve uniformity of treatment by restoring substantially the same conditions that prevailed prior to 1946, when no tax distinction was drawn on the basis of the form of organization of foreign central banks.

The exemption in the draft bill is applicable only to a "foreign central bank of issue." This is a term used in the law at present in connection with the exemption accorded income from bankers' acceptances, and is defined in existing regulations. It is a bank which is by law or Government sanction the principal authority, other than the Government itself, issuing instruments intended to circulate as currency, and generally is the custodian of the banking reserves of a country.

The exemption would apply to securities held in connection with central banking functions and not in connection with commercial banking. The objective of this differentiation is to avoid giving any preferential treatment to the commercial activities of a Government instrumentality as compared with a private enterprise carrying on similar activities. It is understood that those central banks holding the largest proportion of Treasury securities owned by foreign central banks do not engage in commercial banking activiities. Where they do, the commercial activities are often conducted by a separate department of the bank with separate accounts. Such separate accounting will often help to identify the nature of a bank's holdings of Government securities. Moreover, U.S. Government obligations owned by foreign central banks are ordinarily purchased and held for them by the Federal Reserve Bank of New York. Since the Federal Reserve Bank of New York does not engage in commercial banking activities, Government securities purchased and held by it for foreign central banks would not be used in connection with commercial banking activities.

Where securities are purchased and held by commercial banks in the United States, it is likely that the commercial bank will have information as to whether they are held in connection with the central bank's commercial activities in the United States or not. It is not intended to trace the holdings of a central bank to ascertain what connection, if any, they may have with its activities outside the United States. If the holding is not connected with a commercial transaction in the United States, as a pledge for commercial letters of credit, for example, then the exemption would apply.

The revenue effect of the proposed bill is minor. There are several reasons for this. The holdings of some banks are now exempt from tax, because the banks are either integral parts of a foreign government and qualify under section 892 of the code or are merely acting as agents for the foreign government which owns the securities. In other

cases, the interest is exempt from tax in accordance with a general reciprocal exemption provision of an income tax convention. Finally, a substantial portion of the dollar assets owned by foreign central banks is in a presently tax-exempt form such as time deposits and bankers' acceptances.

It would be appreciated if you would lay the proposed legislation before the House. A similar proposal has been submitted to the President of the Senate.

The Bureau of the Budget has advised the Treasury Department that there is no objection to the presentation of this bill.

Sincerely yours,

FRED C. SCRIBNER, Jr.,
Acting Secretary of the Treasury.

Mr. BYRNES of Wisconsin. Mr. Speaker, I would point out, as I suppose is pretty apparent, that this request of the previous administration dated September 14, 1959, for legislative action on this same proposal that is before us today was not honored. Bills were introduced. No action was taken. I introduced a bill to provide this authority. I would differ with the committee report and I would differ with my chairman, frankly, when it is stated that not sufficient time existed for the consideration of the proposal from the time the request was made on September 14, 1959, until we adjourned last year. There was certainly ample time; in fact, I think my chairman will admit that we did have executive session hearings on this matter.

We had before the committee various Treasury officials discussing this matter. We also discussed it within the committee. I think we also came to the general conclusion that this was one of the items on which there was no controversy really as to what should be done. But still we did not act.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Arkansas.

Mr. MILLS. I agree with the gentleman's observation. When I used the expression "lack of time" I was thinking in terms of the overall legislation which the gentleman from Illinois [Mr. MASON] and I first introduced and which the gentleman from Wisconsin subsequently introduced. This was only one of the sections of that bill. There were some sections of that bill which were controversial, and I did not think we had sufficient time last year to cover all those sections.

Mr. BYRNES of Wisconsin. I would suggest to the chairman that he might have done the same thing then as he has done this year with respect to the two proposals in the original bill of this Congress that included this subject (H.R. 5077.) We divided the two proposals into separate bills because one element of the original bill is still subject to question and is now set forth in H.R. 5191 which is still before the committee.

I think something should be said here about how apparently there is a different attitude now as to whether measures which are in an administration's program should be given prompt consideration by the Congress. I am pleased to see that now all of a sudden it is listed as urgent and is a great part of the program this Nation must have to meet some of the problems and perils that confront the country. But I would underline that there is nothing new in this so-called new program of the New Frontier. I favored the proposal made by the past administration and I am for the proposal when it is made by the new administration. I introduced a bill at the last session to accomplish this objective. I joined with the chairman again this year in introducing a companion bill, H.R. 5190, in this session.

Let me, Mr. Speaker, speaking briefly to the merits of the legislation. It deals, of course, with the tax status of interest earnings of central banks of issue of foreign countries. There are presently in the law two discriminations: first, a discrimination between countries, and secondly, a discrimination between types of investment.

As far as the first discrimination is concerned, namely, between countries, your attention should be called to the fact that whether or not taxes are paid on the interest earnings depends to a large extent upon the organizational form that the central bank takes. If the central bank happens to be in the form of the Central Bank of the Soviet Union, which is an integral part of the Government, then it pays no taxes on the interest it earns. But if it is organized in some foreign country along a pattern similar to that which our Federal Reserve bank is organized as a separate entity—a separate corporation—then it would pay taxes on the interest it earns. So in existing law we have that discrimination between countries according to the organizational structures of the central banks in the respective countries.

Mr. JENSEN. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Iowa.

Mr. JENSEN. Then as I understand it is presumed that this legislation will prevent the nations involved from calling on our gold reserve because they will not be forced to pay taxes as this bill provides. Is that not the way it is going to protect our gold reserves? Will the gentleman explain it?

Mr. BYRNES of Wisconsin. If the gentleman will permit me to get through the reference to the discriminations that exist in present law, I may be able to give the gentleman at least some of the feeling as to how this legislation does have some relationship to the outflow of gold.

Mr. Speaker, I was pointing out the discrimination that now exists in the law according to the way the central banks are organized in the different countries. If for instance interest is earned by a central bank of issue and the bank is a separate corporation, we tax it. If the country happens to have a central bank of issue that is not a corporation but is instead a direct and immediate government entity without separate corporate form then we do not subject that bank to tax.

I would point out the second discrimination that exists has to do with the type of investment. If the foreign central bank invests in this country in bank deposits or in bank acceptances, then the interest it earns as a result of that dollar holding is exempt from tax. But, if the foreign central bank which is a separate corporation invests in U.S. bonds, notes, or bills, then the interest earned is not tax exempt.

So, as I say, we in a sense have the combination of the two discriminations which exist. One of the purposes of this bill is to clear up that matter so that whether a central bank of issue—after this bill is passed and in its governmental capacity rather than in a commercial capacity—invests in Treasury bills or in bank deposits or bank acceptances, the interest thereon will be exempt from tax regardless of the form of organization of the central bank in the first instance.

I will next discuss the aspect of the matter that affects our gold situation, as mentioned by the gentleman from Iowa [Mr. JENSEN]. Your foreign central banks for the most part today must back up their currency issues to a degree with dollar holdings, and with bank credits. We are the international banker in the world today, and therefore the support of the currency of many of the countries, if not most of the countries, in the free world at least, is the American dollar. The question is whether we are going to have these foreign central banks holding Government bonds, or whether they are going to be holding gold, or whether they are going to be holding just a deposit in an American bank. It is the opinion of the proponents of this legislation that by encouraging more dollar holdings in the form of Government bonds, and by encouraging less holdings in gold itself, there will be less of a drain on our gold reserves. That is why this bill is considered as a move in the right direction. This is not going to cure the matter overnight or by itself, but I think it will be of some help.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Iowa.

Mr. GROSS. What about reciprocity?

Mr. BYRNES of Wisconsin. I would point out in response to the gentleman that in some cases we have today situations involving tax treaties under which we have given reductions in tax.

Mr. GROSS. What about in the absence of a treaty?

Mr. BYRNES of Wisconsin. Whether or not there is a treaty, you still have a situation where some foreign bank holdings in this country, if they are held in Treasury obligations will be taxable so far as the interest that is earned is concerned. But, if they are held in a bank deposit, or in bankers' acceptances, then the interest is not taxable. I would say to the gentleman that for the most part, the foreign central bank holdings in this country of dollar credits are important because we are the central banker for the free world.

Mr. GROSS. This legislation has the effect of improving the position of the central bank; does it not?

Mr. BYRNES of Wisconsin. I would say to the gentleman, that this bill has the effect of putting our Government bonds, notes, and bills on a par with bank deposits or bankers' acceptances insofar as U.S. tax treatment is concerned.

Mr. GROSS. But, it improves the position of the foreign central bank in that they do not have to pay taxes; is that correct?

Mr. BYRNES of Wisconsin. No, because all the foreign central banker has to do today is either to put his money in gold, or to put it in bank deposits and bankers' acceptances and he accomplishes the same objective.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield to the gentleman from Arkansas.

Mr. MILLS. Mr. Speaker, in my opinion, this is the crux of the whole proposition that the gentleman from Iowa refers to.

We are not trying to do something for the foreign central bank of issue of a foreign country. What we are trying to do is to make it possible for a foreign central bank that issues currency to decide to back this currency up with reserves held in U.S. Government bonds, rather than coming to the United States and saying: "We want gold that we can use as reserves for our currency."

I ask my friend if that is not the crux of the matter.

Mr. BYRNES of Wisconsin. Certainly, we are seeking to eliminate the discrimination against the purchase of U.S. Government bonds.

Mr. GROSS. But the central bank, by virtue of this tax exemption——

Mr. BYRNES of Wisconsin. But they can be exempt today. That is why I pointed out in my earlier remarks that a discrimination exists as between the type of central banks. One central bank is exempt. If it is organized along the lines of our Federal Reserve System it is not exempt. So we are trying to treat them the same, regardless of organizational form.

The SPEAKER. The time of the gentleman from Wisconsin has again expired.

Mr. BYRNES of Wisconsin. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Speaker, I join with the request of the chairman of the Committee on Ways and Means that the House vote to suspend the rules and pass the bill H.R. 5189. This legislation is intended to provide an inducement to foreign countries to hold U.S. obligations and not convert their dollar balances into gold.

The inducement to hold Government obligations arises from the tax exemption that would be granted under the bill on income derived by a foreign central bank of issue from U.S. obligations. Under existing law a foreign central bank is exempt from tax on interest received on bank deposits in the United States and on income from bankers' acceptances. This legislation would add a third category, namely, U.S. bonds to the type of holdings that would have tax-exempt interest.

This legislation was recommended in a message to the Congress by the President on February 6, 1961. This same legislation was also recommended to the Congress by the previous administration.

Mr. Speaker, while this legislation is proper legislation and deserves the approval of the membership of the House, I must in all candor point out to the membership of the House that the proposal taken by itself is more of a placebo than it is a meaningful panacea to deal with the problem of the outflow of gold. The foreign demand for gold instead of dollars comes from the lack of confidence in the stability and value of the dollar and comes from an uncertainty as to America's willingness to impose on itself the fiscal disciplines and regimens required of any nation that would be the world's banker. I am confident that if we could convince the world that America was no longer going to engage in unsound deficit financing so that we could avoid inflationary pressures and if we were to manage our affairs in such a way as to create a favorable balance of payments position, it would not be necessary for us to provide tax-free interest in order to induce foreign countries to hold dollars instead of gold.

Mr. Speaker, the distinguished chairman of the Ways and Means Committee and my esteemed colleague from Wisconsin [Mr. BYRNES] have provided an able description of the purpose of this legislation. Therefore I will not take further time in the debate this afternoon. I will merely reiterate that while it is appropriate that this legislation should be passed, we should not vote in favor of the proposal under the misapprehension that we are taking a major step to deal with the international monetary and gold problems that presently confront us.

Mr. MILLS. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is, Will the House suspend the rules and pass the bill H.R. 5189?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

SPECIAL DIVIDENDS FOR CERTAIN NSLI POLICYHOLDERS

Mr. TEAGUE of Texas. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4539) to amend section 723 of title 38 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes, as amended.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 723 of title 38, United States Code, is amended by adding at the end thereof the following:

"(d) The Administrator shall determine the amount in the revolving fund referred to in subsection (a) of this section which is in excess of the actuarial liabilities of such fund including contingency reserves. Such excess shall be paid in cash as a special dividend, without interest, subject to the conditions provided in this subsection. The Administrator shall determine the administrative cost to the Veterans' Administration of paying such dividend, which cost shall be deducted from the excess and transferred to the appropriations "General operating expenses—Veterans' Administration". Insurance issued under section 621 of the National Service Life Insurance Act of 1940 or converted or exchanged under subsection (b) of this section, which was in force by waiver or timely payment of premiums or as paid-up or extended term insurance during one of the premium months beginning with the month of November 1960 and ending with the month of January 1961, may be eligible for the special dividend, subject to such conditions, other than specified in this subsection, as the Administrator shall determine to be reasonable and practicable. The dividend shall be paid as soon as practicable after whichever of the following dates is the latest:

"(1) the date of enactment of this subsection in case of insurance heretofore converted or exchanged under subsection (b) of this section;

"(2) the date insurance issued under section 621 is converted or exchanged under subsection (b) of this section if such conversion or exchange is made within two years after the date of enactment of this subsection; or

"(3) the date of death of the policyholder where insurance issued under section 621 is not converted or exchanged and such death occurs on or after the premium due date in November 1960 and before the expiration of two years after the date of enactment of this subsection.

"(e) After March 1, 1961, the Administrator shall from time to time transfer from the revolving fund referred to in subsection (a) of this section to general fund receipts in the Treasury such amounts as he determines are in excess of the actuarial liabilities of the fund including contingency reserves."

The SPEAKER. Is a second demanded?

Mr. ADAIR. Mr. Speaker, I demand a second.

By unanimous consent, a second was considered as ordered.

Mr. TEAGUE of Texas. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, this bill seeks to authorize the payment of a special insurance dividend estimated at approximately $60 million, the average amount ranging between $100 and $150, to those holders of "RS" or "W" insurance—some dividends might be much more. This insurance was issued on and after April 25, 1951, and through December 31, 1956—covering service which began on June 27, 1950, the start of the Korean conflict.

Eligible individuals had to apply within 120 days after discharge to obtain this insurance. When this insurance was originally authorized, pursuant to Public Law 23, 82d Congress, it was made nonparticipating and placed on a modern mortality table basis. However, the premium payments have resulted in the accumulation of approximately $65 million, which are not legally available for dividends but which, in equity, should be paid to the policyholders who have made this accumulation possible. Thus, the necessity for this legislation.

The holders of "W" insurance, which is both permanent and term, would be eligible for receipt of a dividend im-

mediately upon the enactment of this legislation. The number in this group is approximately 420,000. The balance of approximately 220,000, who are holders of "RS" insurance, would be paid a dividend immediately also if they exchanged or converted their term policies within a 2-year period to the "W" type of insurance, either term or permanent. The reason for this requirement is to provide a safeguard against the retention of term insurance to such an advanced age as to make the premiums prohibitive, as some World War I veterans are presently experiencing.

Future excess funds after the 2 year period above the level needed for death claims would be covered into the Treasury. The VFW, DAV, and AMVETS support the proposal and the American Legion, having no mandate on the proposal, has expressed no objection to it.

This legislation requires no appropriation of Government funds for the expense to the Veterans' Administration of paying the dividend or for the dividend itself. The Veterans' Administration favors the enactment of this proposal.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. TEAGUE of Texas. I yield to the gentleman from Iowa.

Mr. GROSS. Is the gentleman saying that the dividend presently being paid is legal?

Mr. TEAGUE of Texas. It is legal. It was authorized in the original legislation. In the legislation that covers this particular insurance there was no authority given for the paying of dividends.

Mr. GROSS. This particular bill applies only to a certain group of veterans?

Mr. TEAGUE of Texas. That is true.

Mr. GROSS. Then these veterans are not getting the dividend payments that are going out now?

Mr. TEAGUE of Texas. They are not.

Mr. GROSS. May I ask the gentleman this question: Why are not these premiums more realistic? Why should we have these huge dividend payments going on? Why does not the Veterans' Administration or the Veterans' Committee reduce the premium payments so that there will not be these dividends going out every year?

Mr. TEAGUE of Texas. It would be up to Congress to write a law that would permit them to do that. It was set according to the mortuary tables, and we did not expect there would be any dividends, but there are.

Mr. GROSS. Does not the gentleman agree with me that when the dividend is half the cost or more of the annual premiums, that the premium rate ought to be cut?

Mr. TEAGUE of Texas. I do; but it is a contract which cannot be changed without further legislation.

I might say to the gentleman that I have before this session of Congress a bill that I hope to be able to bring out that will say that the insurance fund should pay for the cost of the insurance.

Mr. GROSS. I do not think the premium rate is at all realistic, in view of the dividends being paid.

Mr. TEAGUE of Texas. I will say that when this legislation was written an attempt was made to write into it a realistic rate.

Mr. GROSS. I want to ask the gentleman this question since we are on the subject of national service life insurance: The dividend presently being paid goes to those who hold term insurance as well as those who have other forms of insurance where they have an equity in their policies. Suppose a veteran has term insurance and drops or lapses his insurance upon receipt of his dividend check. How is the Federal Government going to collect for the unearned dividend that has been paid to him perhaps months in advance?

Mr. TEAGUE of Texas. Of course, the gentleman is aware that there is a notice sent out to each veteran warning that the policy will be dropped if the premium is not paid.

Mr. GROSS. But there are no reserves and no equity in his term insurance. How is the Federal Government going to collect?

Mr. TEAGUE of Texas. Unless there is a lien against the policy I do not know.

Mr. GROSS. There is no reserve, he has no equity.

Mr. TEAGUE of Texas. It will be up to the responsible department to try to collect.

Mr. GROSS. Does the gentleman know of any private insurance company that would operate on this basis?

Mr. TEAGUE of Texas. I do not.

Mr. GROSS. There is no way for the Government to collect except to go into court and sue the veteran, is there?

Mr. TEAGUE of Texas. That is correct.

Mr. GROSS. And I wonder what a judge would hold, because the veteran did not ask for this prematurely paid dividend; it was forced upon him; he did not ask for it. I wonder what a Federal court would hold.

Mr. TEAGUE of Texas. I could not tell the gentleman.

Mr. ADAIR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill would authorize a special dividend on veterans' special life insurance. In 1951 the Congress authorized postservice term insurance which was nonparticipating and nonconvertible. In 1958 the law was amended to authorize the conversion or exchange of this term insurance to other plans at more attractive rates. However, because the premiums required by law on the term insurance were much higher than actuarially necessary there has accrued a substantial surplus of around $60 million in the revolving fund in the Treasury. Although the insureds have no present legal right under contract to this surplus it is only equitable that they be granted a right to share in this surplus that has developed for their excess premiums.

H.R. 4539 would authorize a one-time special dividend on this insurance payable at once to those who have converted or exchanged their insurance to the new plan and payable to the other term policyholders if they so convert or exchange within 2 years or die during that period. Administrative cost to the VA of paying the dividend would first come out of the surplus. The bill would also authorize the Administrator to transfer from time to time to the Treasury such surplus as may accrue to the fund in the future. The VA favors enactment of the bill as amended by the committee.

Mr. Speaker, I yield back the balance of my time.

Mr. TEAGUE of Texas. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is, Will the House suspend the rules and pass the bill H.R. 4539, as amended?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

VOCATIONAL REHABILITATION TO CERTAIN VETERANS

Mr. TEAGUE of Texas. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 848) to amend section 1502 of title 38, United States Code, to provide vocational rehabilitation to certain veterans in need thereof to overcome the handicap of a disability incurred in or aggravated by active service after World War II and before the Korean conflict, or after the Korean conflict, as amended.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1502(a) of title 38, United States Code, is amended to read as follows:

"(a) Every veteran who is in need of vocational rehabilitation on account of a service-connected disability which is, or but for the receipt of retirement pay would be, compensable under chapter 11 of this title shall be furnished such vocational rehabilitation as may be prescribed by the Administrator, if such disability—

"(1) arose out of service during World War II or the Korean conflict; or

"(2) arose out of service after World War II, and before the Korean conflict, or after the Korean conflict, and is rated for compensation purposes as 30 per centum or more, if less than 30 per centum is clearly shown to have caused a pronounced employment handicap."

(b) The first sentence of section 1502(c)(3) of title 38, United States Code, is amended to read as follows:

"(3) Vocational rehabilitation may not be afforded to a veteran on account of post-World War II service after 9 years following his discharge or release; except vocational rehabilitation may be afforded to any person until—

"(A) August 20, 1963, if such person was discharged or released before August 20, 1954, or

"(B) Nine years after the date of the enactment of this subparagraph if such person is eligible for vocational rehabilitation by reason of a disability arising from service before such date of enactment, but either after World War II, and before the Korean conflict, or after the Korean conflict."

(c) Section 1502(c)(4) of title 38, United States Code, is amended (1) by striking out "Korean conflict service" and inserting in lieu thereof "post-World War II service"; and (2) by striking out "his service during the Korean conflict" and inserting in lieu thereof "such service".

(d) Section 1502(d) of title 38, United States Code, is repealed.

The SPEAKER. Is a second demanded?

Mr. ADAIR. Mr. Speaker, I demand a second.

The SPEAKER. Without objection a second will be considered as ordered.

There was no objection.

Mr. TEAGUE of Texas. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this bill would make permanent the vocational rehabilitation program for World War II service-connected veterans which was originally enacted as Public Law 16, 78th Congress. It was specifically extended by Public Law 894, 81st Congress, to the Korean conflict group, and continued through January 31, 1955, when it was terminated by Presidential proclamation. Training is generally limited to 4 years. At the present time 128 World War II veterans are in training and approximately 6,000 Korean conflict veterans.

In making permanent this program, the bill also covers those individuals who had service-connected disabilities and service between July 25, 1947, and June 27, 1950—the period between World War II and the Korean conflict. Thus this bill covers the interim group and provides coverage for individuals serving on and after February 1, 1955.

The law provides for training only those veterans who are service connected and has been well administered and of great benefit to this deserving group. Over 615,000 World War II veterans were trained and approximately 66,000 Korean veterans.

The monthly subsistence allowance is set between $65 and $120 and, in addition, the veteran draws disability compensation which is subject to a guaranteed floor which is increased for dependents. The floor is as indicated:

First. If his service-connected disability is less than 30 percent, $115, plus the following amounts for additional dependents: (A) $10 for one child and $7 for each additional child, plus (B) $15 for a dependent parent; or

Second. If his service-connected disability is 30 percent or more, $135, plus the following amounts for additional dependents: (A) $20 for one child and $15 for each additional child, plus (B) $15 for a dependent parent.

Tuition costs for vocational rehabilitation in fiscal year 1960 averaged $706, while books and supplies amounted to $87. This represents a 42-percent increase since 1952 in the case of tuition and 99 percent for books and supplies. These sums are in addition, of course, to the subsistence allowance for the veterans.

The Veterans' Administration has indicated in the report of that agency that it favors enactment of this proposal and estimates that in the fiscal year 1962 the monthly average of trainees will be 3,900, with a total cost for that year of approximately $11,500,000. Costs will gradually rise through 1962 to $22,980,000.

Information has come to the attention of the committee that there has been some discussion in the executive branch of the Government concerning the possible transfer of this program to the Department of Health, Education, and Welfare. Speaking for myself, and I am sure for all members of the committee, I would oppose such a transfer as not being either in the best interests of the program, the veteran, or the Government.

The VFW, AMVETS, and DAV support the program, and I know of no opposition from the American Legion. I include herewith correspondence from the above-mentioned organizations:

AMVETS,
March 6, 1961.

Hon. OLIN E. TEAGUE,
Chairman, Veterans' Affairs Committee,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. TEAGUE: Our attention has been invited to the fact that H.R. 848 and H.R. 4539 will soon be considered by the Committee on Veterans' Affairs. AMVETS endorse both of these measures and respectfully urge approval by your committee.

H.R. 848 extending the benefits of vocational rehabilitation to persons disabled while serving between the end of World War II and the beginning of the Korean conflict and those serving after the Korean conflict, is sound legislation. Persons serving in these periods serve under the compulsion of the draft and are subjected to hazards not normally encountered in the traditional concept of peacetime service. If disabled, thus creating an occupational handicap, it is our feeling that the Federal Government has a responsibility in retraining them for new occupational pursuits.

H.R. 4539, would provide for the payment of dividends on insurance issued under section 621 of the National Service Life Insurance Act of 1940. Inasmuch as the premiums collected have resulted in an accumulation of moneys that are surplus to the needs of the fund, we approve of the payment of a dividend. The precedent for such action is well established by the practice of continuing dividend payments to World War I and World War II policyholders under U.S. Government life and national service life insurance.

It has been indicated that one school of thought suggests the administrative costs should be deducted from the fund prior to the payment of dividends. We urge that this concept be rejected by your committee. The administrative costs of other Government insurance programs for veterans are not charged to the fund but are paid out of appropriations. There appears to be no valid reason for making an exception in this instance.

AMVETS respectfully requests that the committee report these measures favorably at the earliest possible date.

Sincerely yours,

JOHN R. HOLDEN,
National Legislative Director.

DISABLED AMERICAN VETERANS,
Washington, D.C., March 3, 1961.

Hon. OLIN E. TEAGUE,
Chairman, Committee on Veterans' Affairs,
House of Representatives, Washington, D.C.

DEAR MR. TEAGUE: This has reference to the information received from your committee staff that on March 7, 1961, H.R. 848 and H.R. 4539 will be taken up for consideration, and that the Disabled American Veterans and others interested may submit statements in lieu of a formal hearing.

H.R. 848 would amend section 1502 of title 38, United States Code, to provide vocational rehabilitation to certain veterans in need thereof to overcome the handicap of a disability incurrred in or aggravated by active service after World War II and before the Korean conflict, or after the Korean conflict.

In accordance with the legislative policies of this organization and the affirmative position taken in the past when substantially similar proposals were presented for consideration the DAV is in agreement with the provisions of H.R. 848 and desires to be recorded as endorsing this proposed legislation.

H.R. 4539 would amend section 723 of title 38, United States Code, to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section. In view of the equitable objectives of this proposed legislation the DAV is favorable to its enactment.

The foregoing statement is submitted for the record with appreciation of your consideration.

Sincerely,

ELMER M. FREUDENBERGER,
National Director of Legislation.

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Kansas City, Mo., March 7, 1961.

Hon. OLIN E. TEAGUE,
Chairman, House Veterans' Affairs Committee, House of Representatives, Washington, D.C.

DEAR MR. TEAGUE: This is in reference to two bills scheduled for consideration by your committee on March 7, namely, H.R. 848, which would provide vocational rehabilitation to certain veterans to overcome a handicap of a disability incurred in active service during peacetime, and H.R. 4539 which would provide for immediate payment of dividends on certain national service life insurance.

Respecting H.R. 848, the Veterans of Foreign Wars has always held that veterans disabled by service-incurred disabilities should receive the highest consideration. Consequently the VFW has long favored vocational rehabilitation for those veterans who have incurred a disability by virtue of active service which disability has left the veteran with a vocational handicap. It seems inconsistent to discharge post-Korean veterans with serious vocational handicaps and no program for rehabilitation similar to the vocational programs of World War II and the Korean conflict. This inequity will be eliminated by the approval of H.R. 848.

The Veterans of Foreign Wars does not have any official position with respect to H.R. 4539. In the absence, however, of any mandate it is believed, based on previous policy and nationally approved resolutions, that the VFW would favor such a proposal inasmuch as dividends represent overpayments in the form of premiums. The disbursement of these dividends represents paying back money that has been accumulated in this manner. Since the money would be returned to the veterans who paid it in it seems only logical that these same veterans policyholders should receive the dividends which is just what this bill proposes.

With these views in mind, the Veterans of Foreign Wars urges favorable consideration of this legislation with the hope that it will receive quick approval by the Congress.

Thanking you for this opportunity to express the views of the Veterans of Foreign Wars, I am,

Sincerely yours,

FRANCIS W. STOVER,
Director, National Legislative Service.

Mr. ADAIR. Mr. Speaker, I yield myself such time as I might require.

Mr. Speaker, this bill (H.R. 848) will provide comprehensive vocational rehabilitation services for persons seriously disabled by military service after the end of the Korean conflict. It also will afford eligibility for those few individuals who may need vocational rehabilitation aid as a result of a disability incurred during the period from the end of World War II to the beginning of the Korean conflict. The new program would be a modification of the program which has proved so satisfactory for disabled veterans of World War II and Korea. It will place responsibility on the Administrator of Veterans' Affairs to determine the need for vocational rehabilitation and to prescribe and provide the kind of training necessary to fit the veteran for employment consistent with his disability. It will authorize vocational counseling to assist in making sound determination.

The extensive training as well as subsistence allowance to a veteran will be borne by the Government. Like the war programs, a 9-year period following a discharge will generally be available during which the veteran may receive rehabilitation services. After the program has been underway for a few years, it is estimated that the cost will approximate $20 million annually for direct benefits.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

GENERAL LEAVE TO EXTEND REMARKS

Mr. TEAGUE of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to extend their remarks in the RECORD on the two bills just passed.

The SPEAKER. Is there objection to the request of the gentleman from from Texas?

There was no objection.

COMPENSATION UNDER LONGSHOREMEN'S AND HARBOR WORKERS' COMPENSATION ACT

Mr. ZELENKO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1258) to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of section 6 of the Longshoremen's and Harbor Workers' Compensation Act, as amended (33 U.S.C. 906), is amended to read as follows:

"(b) Compensation for disability shall not exceed $70 per week and compensation for total disability shall not be less than $18 per week: *Provided, however,* That, if the employee's average weekly wages, as computed under section 10, are less than $18 per week, he shall receive as compensation for total disability his average weekly wages."

SEC. 2. Section 9(e) of the said Act is hereby amended to read as follows:

"(e) In computing death benefits the average weekly wages of the deceased shall be considered to have been not more than $105 nor less than $27 but the total weekly compensation shall not exceed the weekly wages of the deceased."

SEC. 3. Section 14(m) of the said Act is hereby amended to read as follows:

"(m) The total money allowance payable to an employee as compensation for an injury under this Act shall in no event exceed in the aggregate the sum of $24,000: *Provided,* That this limitation shall not apply to cases of permanent total disability or death: *And provided further,* That in applying this limitation there shall not be taken into account any amount payable under section 8(g) of this title for maintenance during rehabilitation or any amount of additional compensation required to be paid under this section for delay or default in the payment of compensation or any amount accruing as interest upon defaulted compensation collectible under section 18."

SEC. 4. The amendments made by the foregoing provisions of this Act shall become effective as to injuries or disability sustained on or after the date of enactment.

The SPEAKER. Is a second demanded?

Mr. AYRES. Mr. Speaker, I demand a second.

Mr. ZELENKO. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ZELENKO. Mr. Speaker, I yield myself such time as I might require.

Mr. Speaker, this bill will provide increased benefits in the case of the disability of longshoremen injured while at work. A similar bill passed the House unanimously last year but was tabled by the Senate because of insufficient time to consider it.

This bill was passed unanimously by the Committee on Education and Labor of the House during this present session. What it does is to make realistic the benefits for total disability for those longshoremen injured while on the job. It follows the classic compensation formula, which is two-thirds of the average weekly pay of the injured worker. Since the last legislation on this subject there has been a substantial increase in wages of longshoremen, so that at the present time the disability benefits are inadequate. This bill conforms the benefits to present-day wage levels and living costs. It is most necessary legislation for American workers in our most hazardous occupation.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. ZELENKO. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. Mr. Speaker, in the 86th Congress we reported this bill out of the committee unanimously. In the 1st session of the 87th Congress our subcommittee passed it unanimously and the full committee did likewise. I recommend to the majority leader that we consider this bill in the light of all the ramifications of good legislation.

Mr. ZELENKO. I thank the gentleman.

Mr. Speaker I ask unanimous consent that the gentleman from New York [Mr. POWELL] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POWELL. Mr. Speaker, I rise in support of the bill before us, H.R. 1258. This bill is identical to H.R. 12777 which was reported out unanimously by the full committee on August 29, 1960, and passed the House by unanimous consent on August 31, 1960. The bill was then referred to the Senate Committee on Labor and Public Welfare on September 1, 1960; however, no action was taken by the Senate.

On the 21st of February 1960, Mr. McCauley, Director of the Bureau of Workman's Compensation, Department of Labor, gave testimony in support of the bill. He stated that the then Secretary of Labor, Mitchell, endorsed the bill. H.R. 1258 is endorsed by the current Secretary of Labor, Arthur Goldberg.

THE PURPOSE OF THE BILL

The purpose of H.R. 1258 is to provide increased benefits for employees covered under the Longshoremen's and Harbor Workers' Act who have suffered disabling injuries and for their families in case of death of the employee. The increase in the benefits is designed to conform to present day wages and living costs and thereby bring the benefit structure into line with the original intent of the act. The bill raises the $54 maximum in the present law to $70. Under the present law death benefits are computed by considering the average weekly wages of the deceased to have been not less than $27 or more than $81. This bill provides for increasing the ceiling from $81 to $105. The present law restricts the amount paid in case of an injury to an employee to a total of $17,280. This bill would increase that total amount payable from $17,280 to $24,000.

Longshoremen and harbor workers are engaged in one of America's most hazardous occupations. Passage of this bill merely gives these workers a compensation rate generally received by workers throughout the country—two-thirds of their gross earnings.

Testimony given at the committee hearings clearly reveals that the average earnings of the longshoremen and harbor workers substantially exceed the $81 ceiling established in 1956. The increase of the aggregate compensation benefits from $17,280 to $20,400 results from the increase of the wage basis—$81 to $105.

Mr. Speaker, I believe this legislation is sound in principle, humane and just in purpose. And, therefore, I urge upon my colleagues that they accord this worthwhile legislation prompt and favorable consideration.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

AUTHORIZING CERTAIN BEACH EROSION CONTROL OF THE SHORE IN SAN DIEGO COUNTY, CALIF.

Mr. McFALL. Mr. Speaker, I move to suspend the rules and pass the bill (S. 307) to authorize certain beach erosion control of the shore in San Diego County, Calif.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for beach erosion control at Oceanside, San Diego County, California, is hereby authorized, in lieu of the existing Federal beach erosion control project, substantially in accordance with the recommendations of the Chief of Engineers in his report contained in House Document Numbered 456, Eighty-sixth Congress, at an estimated cost of $1,498,000.

SEC. 2. The Secretary of the Army is hereby authorized to reimburse local interests for such work done by them on the beach erosion project authorized in section 1, subsequent to the initiation of the authorized study which forms the basis for the project: *Provided,* That the work which may have been done on this project is approved by the Chief of Engineers as being in accordance with the project hereby adopted: *Provided further,* That such reimbursement shall be subject to appropriations applicable thereto or funds available therefor and shall not take precedence over other pending projects of higher priority for improvements.

SEC. 3. There is hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

The SPEAKER. Is a second demanded?

Mr. GROSS. Mr. Speaker, I demand a second.

Mr. McFALL. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. McFALL. Mr. Speaker, I yield myself such time as I may desire.

Mr. Speaker, the purpose of this bill is to authorize the modification of the existing beach erosion project at Oceanside, Calif. We find that the cost of beach restoration and subsequent nourishment to be borne by the United States in accordance with the recommendations of the Chief of Engineers is estimated at $1,498,000.

The River and Harbor Act of 1958 authorized beach erosion projects for Imperial Beach, Ocean Beach, and Oceanside, Calif. The project at Oceanside was authorized at a total cost of $540,000, with $360,000 being non-Federal and $180,000 being Federal cost.

The project for Oceanside, as authorized, provides for the construction of a protective beach.

The River and Harbor Act of 1958 directed a survey of Camp Pendleton Harbor and Oceanside, Calif., with a view to determining the extent of Federal aid which should be granted toward recommended beach erosion control measures at Oceanside, in equity, without regard to limitations of Federal law applicable to beach erosion control.

The report of the Chief of Engineers is printed in a House document and recommends that the measure before the House be adopted. The Chief of Army Engineers reports that an additional beach is necessary; that additional erosion work and additional cost is necessary and recommends that the Federal Government pay the entire first cost of it, with certain yearly maintenance to be borne by local interests. The reason for this departure from the usual beach erosion project is because of the construction at Camp Pendleton. Jetties were constructed at Camp Pendleton as a wartime measure, and the Chief of Engineers said that they are primarily responsible for the erosion problem at Oceanside where the shore had previously been stable.

Mr. Speaker, this bill was unanimously recommended by the committee; it is recommended by the Corps of Engineers, and the Bureau of the Budget advises that they have no objection to the presentation of this report to the Congress.

Mr. GROSS. Mr. Speaker, I yield myself such time as I may consume.

I ask the gentleman a question or two. The first cost to the Federal Government, as I understand the report, is $1,498,000; is that correct?

Mr. McFALL. That is correct. That is the total cost of the project.

Mr. GROSS. The total cost?

Mr. McFALL. As I understand, it is the total cost.

Mr. GROSS. Well, the report says the first cost. The first cost, then, is the last cost; is that correct?

Mr. McFALL. I think that it refers to the second cost as the maintenance cost, which is $1,000 a year.

Mr. GROSS. Is it $1,000 a year?

Mr. McFALL. Yes; $1,000 maintenance cost, which is to be borne by the local interests. But, the first and only primary cost is the amount that the gentleman quoted.

Mr. GROSS. Approximately $1,500,000.

Mr. McFALL. Yes.

Mr. GROSS. That is the only cost to the Federal Government aside from maintenance of $1,000 a year?

Mr. McFALL. That is right. The maintenance is local. There is no Federal maintenance.

Mr. GROSS. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Speaker, the thing that bothers me is that when the Canadians changed the course of water that naturally flowed into Hudson Bay and shoved it down into Lake Superior and we had it on the east side of Michigan in Lake Huron and on the west side of Michigan in Lake Michigan where the high water, every time there was a storm, washed the lake banks out from under the cottages, we could not get the Engineers to do anything and we could not get your Committee on Public Works to do anything. Now, explain to me, if you can, if there is any explanation, why this favoritism all around the rest of the country when on the Great Lakes we cannot get any help when the Canadians turn that water down on us and cause that damage or at least contribute to the cause of the damages.

Mr. McFALL. I am informed that there was a survey made of the project to which the gentleman refers and that the Corps of Engineers did not recommend it.

Mr. HOFFMAN of Michigan. Sure they did not, and I want to know why; why it is that all this money goes somewhere else: east coast, west coast, Florida, California, all around but none to Michigan.

All up and down old Mississippi and the Ohio but never a look at Michigan.

Mr. McFALL. I would say to the gentleman that I have been on the Committee on Public Works now for 5 years. We have great confidence in the Corps of Engineers. We cannot go behind them, except infrequently. If they went into the project that the gentleman has, I am sure they did so in a completely impartial and engineerlike fashion and would have recommended something had it been necessary. I do not know of my own knowledge whether it is necessary or not. I do not know the specific project to which the gentleman refers.

Mr. HOFFMAN of Michigan. I know something about it, because we have had it for 15 or 20 or 30 years. Over there on the west side of Michigan, on the east side of Lake Michigan, at the lower end of the lake, we have a layer of clay, and below it we have a layer of sand and then above it some more sand and then another layer of clay. The Federal Government helped construct a highway right along the bank so that when the big trucks go along there, they shake the whole thing and that surface water seeps through and carries the sand out and lets the clay drop down. Then the houses—and I do not mean one or two, I mean a number of them—tip over into the lake.

The Engineers take a look at it, they make a survey, they take some pictures, the damage is there and in part it is caused by our own Government's permitting the Canadians to send that water which should go north down south, and the construction of a highway which causes this damage.

Is it because our project does not cost enough? Cannot the Engineers be bothered unless it costs a million or two dollars or more?

Mr. McFALL. The way the gentleman describes the project it sounds like a very serious problem. I would hope that the gentleman would introduce a bill which would be referred to our committee that would take care of this, and if he did I am sure the committee would be very glad to have hearings on the bill and ask the Corps of Engineers why they have not seen fit to authorize or recommend it, if such be the case; and I am so informed. We would be most happy to have the gentleman from Michigan take such action.

Mr. HOFFMAN of Michigan. It certainly has been serious. If you owned a fine, substantial home and it slipped into the lake it would be serious. If the gentleman will pardon me for interrupting, this has been running along for 20 or more years, yes 30 years, and we have not gotten anywhere. All the folks over there can do is to pay taxes. We do not get any relief from the Federal Govern-

ment and I want to know why the discrimination.

Mr. McFALL. I do not think there is any discrimination.

Mr. HOFFMAN of Michigan. There sure is. The only thing I can figure out is we do not put enough of a price on it, that the Engineers will not be bothered with little things costing less than a million dollars or 2 or 3 or 4 million dollars. Cannot the gentleman ask them and find out? I keep asking them and I do not get anywhere.

Mr. McFALL. If the gentleman would like me to, I certainly will find out.

Mr. HOFFMAN of Michigan. We are tired of being on the paying end all the time, with nothing coming back. I do not propose to be a dog in the manger but am growing weary of having the Engineers just pass us by. From here on perhaps I should just call for a record vote.

The SPEAKER. The question is, Will the House suspend the rules and pass the bill S. 307?

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

AUTHORIZING CONSTRUCTION FOR MILITARY DEPARTMENTS

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 227 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5000) to authorize certain construction at military installations, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed three hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. COLMER. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio [Mr. BROWN], and pending that I yield myself such time as I may consune.

Mr. Speaker, House Resolution 227 provides for the consideration of H.R. 5000, a bill to authorize certain construction at military installations, and for other purposes. The resolution provides for an open rule with 3 hours of general debate.

The purpose of H.R. 5000 is to provide construction and other related authority for the military departments and the Department of Defense within and outside the United States, and authority for construction of facilities for the Reserve components.

The military construction authorization requested this year for the Active Forces is approximately $708 million and is substantially less than the $998 million provided last year, the difference being approximately $290 million less.

This drastic reduction in military construction requirements points up the fact that a substantial portion of the new construction requirements have now been met.

Construction of Strategic Air Command dispersal bases and alert facilities and basic air defense installations will be virtually completed this year. However, decreases in these areas of military construction requirements have been partially offset by some increases for missile base construction.

The 1962 programs continue to provide for future Titan and Minuteman base construction and include authorizations for additional base construction to support the Polaris submarine fleet. Authorizations for the improvement of radar systems associated with the Nike-Hercules in this country and overseas and control facilities for Hawk air defense missiles overseas are also provided, as is additional construction of test facilities for the Nike-Zeus antimissile development program.

The construction program contained in H.R. 5000 is based on the forces which we plan to have over the next several years, during which time it is expected that the number of wings in the Air Force will decrease. However, it is expected that this decrease will be offset by an increase in missile-squadron strength.

In summary, the program contained in H.R. 5000 reflects the new construction authorization required by the military departments to maintain our current military posture.

Mr. Speaker, I urge the adoption of House Resolution 227.

Mr. BROWN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, as the gentleman from Mississippi has explained, House Resolution 227, which is an open rule providing for 3 hours of general debate, makes in order the consideration of the bill H.R. 5000, from the Committee on Armed Services, better known as the military construction bill.

This measure carries in it authorization for the expenditure of slightly over $800 million for military construction not only within the United States but in other sections of the world as well. More than half the $800 million, I believe, $431 million, would be allocated to the use of the Air Force.

As I said a moment ago, these military construction items cover the waterfront pretty well. You will find in the bill and in the report that amounts are authorized for various construction expenditures in most of the States of the Union and in many of the various military installations, perhaps in your own district.

As I know from the number of individuals who have contacted me and others, there are some provisions in this bill which may come under discussion. There may be amendments offered to strike out or increase the amounts of certain authorization items.

May I inquire from the leadership on the other side of the aisle whether it is the intent and purpose of the chairman of the legislative committee to bring this bill up for debate tonight, or will the debate be postponed until tomorrow after the rule is adopted?

The SPEAKER. The bill will not be brought up for consideration today.

Mr. BROWN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include a newspaper article, and to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, whether the United Mine Workers' new policy is a part of the New Frontier or just the result of natural progress may be immaterial, but is encouraging.

Following is a telegram from John L. Lewis, then head of the United Mine Workers of America, to William Sneed, president of Subdistrict 10, District 13, UMWA, Herrin, Ill., dated June 19, 1922, and which, in part, read:

> We now find that this outlaw organization is permitting its members to act as strikebreakers at numerous pits in Ohio.
>
> We have through representatives officially taken this question up with the officers of the Steam Shovel Men's Union and have failed to secure any satisfaction.
>
> Representatives of our organization are justified in treating this crowd as an outlaw organization and in viewing its members in the same light as they do any other common strikebreaker.

President Lewis' telegram was posted in several places. Preparations for an attack on the strip mine were begun at once and at 2:30 p.m. on June 21, the attack began. The loyal workers and their guards surrendered.

The captives, in double file, were marched toward Herrin. McDowell, the mine superintendent, a cripple, could not keep up and, after a mile, the strikers shot him to death. Other workers were lined up against a wire fence, told to climb the fence and run. Thirteen of the prisoners were shot to death as they climbed the fence. A 14th lived until a newspaperman arrived. Four died of wounds on reaching the woods. Eight men who first escaped were caught. Two were hanged to trees and six were tied together on one rope which was attached to a motor car, dragged, and, after being exhibited in Herrin, taken to a cemetery and shot. The throats of three were cut. One of the six lived to tell the story—Washington Post, June 21, 1937; the New York Sun, June 21, 1937; and the Chicago Tribune, July 18, 1937, all put out articles on the 15th anniversary of the killings; CONGRESSIONAL RECORD, 76th Congress, 1st session, volume 84, part 5, May 18, 1939.

A NEW POLICY

But the Chicago Tribune of March 17, last Friday, shows some improvement.

Two United Mine Workers locals—9635 and 8878—have agreed not only not to hang a mineowner but to stop violence and threats of violence. Russell Freeburg, of the Chicago Tribune Press Service, gives us the story, which is as follows:

UNION AGREES NOT TO HANG MINEOWNER—DOUSES GUNS, CLUBS, AND ROCKS, TOO

(By Russell Freeburg)

WASHINGTON, March 17.—Two United Mine Workers locals agreed today to stop violence and threats of violence, including threatening to hang the owner of an Alabama coal mine.

The stipulations were part of a consent order entered by the National Labor Relations Board.

The miners, besides stopping threats of hanging the owner, agreed they would stop hurling rocks at his trucks, blocking mine entrances with fallen trees, and arming pickets with submachine guns.

GROWS OUT OF STRIKE

The NLRB case grew out of a strike at the Abston Construction Co. strip mine near Brookwood, Ala.

Mine workers locals 9635 and 8878, the order shows, threatened to hang C. L. Abston, owner partner of the mine, if he did not shut down his operations.

In the order, the miners agreed to cease blocking entrances and exits that employees of the mine use in going to and from work by massing pickets armed with rocks, clubs, and submachine guns and barricades of trucks and felled trees.

They said they would stop physically assaulting and inflicting bodily injury upon nonstriking employees when they attempt to cross the picket line. Restraining and coercing employees also was stopped.

RESTORES SLEEPY EMPLOYEE

The NLRB ordered the locals to post notices of their agreement in their business offices and meeting halls for 60 days. It warned against attempts to alter, deface, or cover the posters.

In a lighter decision, NLRB General Counsel Stuart Rothman ruled that a company may be able to deprive an employee of some sleep, but that is no reason to fire him. Rothman voided the discharge of an employee of a food manufacturing concern who failed to report for work at 6 a.m. as ordered rather than his usual starting time 2 hours later.

Would it not be well if, while spending so much thought, time, and sending aid to bring civilization and industry to other parts of the world, we would first set our own house in order?

Mr. COLMER. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DISSENTING OPINIONS IN THE WILKINSON-BRADEN CASES

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, on February 27, the Supreme Court of the United States in 5-to-4 decisions affirmed the judgments of the court of appeals in the Frank Wilkinson and Carl Braden cases. Wilkinson and Braden had been convicted, after jury trials, and sentenced for contempt of Congress for refusal to answer certain questions pertaining to Communist activities. The questions had been posed at hearings conducted by the Committee on Un-American Activities.

My purpose in addressing the House today is to comment on the dissenting opinions in these cases, because they raise issues that are of serious consequences to our constitutional form of government. Now I will agree, that within the framework of our democratic institutions there is certainly room for expression of mere differences of opinion. If the dissenting opinions in the Wilkinson and Braden cases amounted to that only, I would not impose upon the time of the House to discuss them.

However, we are dealing in these cases with matters that drive more deeply into the body and very heart of our basic constitutional system. By the narrow margin of one vote on the Court was avoided the interesting spectacle of a head-on collision between the judiciary and the Congress—a result too close to pass without comment. By one vote was postponed a necessary resolution of the question whether the judiciary would be permitted to destroy a committee of the Congress, lawfully constituted by the Congress in the exercise of legislative power constitutionally delegated. The Wilkinson and Braden dissents suggest a determined challenge to the doctrine of separation of powers, a doctrine hitherto and long recognized as fundamental to our constitutional system and the maintenance of our liberties.

Of course this is not a new problem. Our forefathers nearly 200 years ago had directed their attention to this issue. They were early concerned with tyranny in any and all of its forms, whether that of the legislative and executive branches—or of the judicial branch, although it was perhaps least expected that a challenge to our legislative function and power would arise from the judicial branch. Alexander Hamilton suggested that the power of instituting impeachments, vested in the legislative body, would be a sufficient check and safeguard against the encroachments of the judiciary on legislative authority—"Federalist," Nos. 81 and 79.

I do not, by any means, advance the thought that we consider in this House any form of radical surgery, by way of impeachment, to curb this judicial aberration. Nor do I propose that we utilize the process of impeachment to discipline and contain those members of the Court who overstep—although repeatedly and ungracefully—the boundaries constitutionally set and fixed for the exercise of their duties.

Mr. Speaker, I would not have thought that the day would come when the judicial power would so boldly impinge upon the legislative power, in pronouncements of such dubious content as in the Wilkinson and Braden dissents, although we had been forewarned of the course there taken by these minority Justices in several recent decisions of the Supreme Court, of which I believe the entire country has taken note and at which most of us stand aghast. Nor have we before been subjected to such intemperate language in derogation of our legislative prerogatives and dignity, except perhaps in the cases of Watkins and Barenblatt.

What privilege inherent in the traditional judicial process authorizes these minority Justices to impose their personal prejudices upon the congressional power? As a lawyer, I see none. Does the minority wish to constitute itself as a third Chamber of the Congress? I would borrow the words of an eminent jurist, Learned Hand, and say, "If we do need a third Chamber it should appear for what it is, and not as the interpreter of inscrutable principles."[1] On the other hand, there are those who suppose that, somehow, by the moral radiation of its decision, a court may point the way to a resolution of social conflicts better than a legislature. Again joining Learned Hand, "I should indeed be glad to believe it, and it may be that my failure hitherto to observe it is owing to some personal defect of vision. Besides, for a judge to serve as communal mentor appears to me a very dubious addition to his duties and one apt to interfere with their proper discharge."[2]

In reading the dissenting opinions I can reach no other conclusion but that the dissenters have, in effect, determined to destroy this committee of Congress—not for any valid constitutional reason, but simply because they do not personally agree with its purpose and subject of investigation. They wish to work their personal will against the constitutional prerogatives of the Congress, to advance their own views as to proper subjects for legislative investigation, and the course the inquiry should take. These are matters for the Congress to evaluate. It is not judicial prerogative, but in fact judicial presumptuousness, in this way to interfere with the lawful course of congressional inquiry.

The effort of the minority of the Court seems particularly startling when we consider that the power of Congress to legislate in the field of Communist activity has never been doubted. As was said by Mr. Justice Harlan, speaking for the Supreme Court in *Barenblatt* v. *United States*, 360 U.S. 109, at page 127, which was a decision involving this committee:

> That Congress has wide power to legislate in the field of Communist activity in this country, and to conduct appropriate investigations in aid thereof, is hardly debatable. The existence of such power has never been questioned by this Court, and it is sufficient

[1] Learned Hand, "The Bill of Rights," Harvard University Press, 1960, p. 70.

[2] Ibid., p. 70f.

to say, without particularization, that Congress has enacted or considered in this field a wide range of legislative measures, not a few of which have stemmed from recommendations of the very Committee whose actions have been drawn in question here. In the last analysis this power rests on the right of self-preservation, "the ultimate value of any society," *Dennis* v. *United States* (341 U.S. 494, 509). Justification for its exercise in turn rests on the long and widely accepted view that the tenets of the Communist Party include the ultimate overthrow of the Government of the United States by force and violence, a view which has been given formal expression by the Congress.

So that the House might exercise its legislative function advisedly and effectively, in the domain of national security on the subject of Communist activities, the committee of which I am now chairman was established as a standing committee by the House rules, which in turn have their base in article I, section 5 (the rulemaking power) of the Constitution. By rule XI, express power was granted to this committee to make investigations and to exact testimony. It was pointed out in *McGrain* v. *Daugherty*, 273 U.S. 135, 161, that—

> In actual legislative practice power to secure needed information by such means has long been treated as an attribute of the power to legislate. It was so regarded in the British Parliament and in Colonial legislatures before the American Revolution; and the like view has prevailed and been carried into effect in both Houses of Congress and in most of the State legislatures.

Indeed, Thomas Jefferson points out that the House may proceed to inquiry even on the basis of "common fame," that is to say, common report or rumor—Thomas Jefferson, "Manual of Parliamentary Practice" at section XIII.

It would seem obvious that information, which is the object of investigation, is basic to the exercise of the lawmaking function, and necessarily precedes the adoption of specific legislation. In fact it would also seem obvious that investigation may properly be utilized to gather facts and information for the purpose of determining whether legislation should be proposed at all. It is entirely within the legislative province for the Congress to inform itself on any subject which appears of national concern and importance in relation to its general lawmaking powers. Accordingly Woodrow Wilson, a noted student of political science, later President of the United States, has said—paradoxically perhaps—that—

> The informing function of Congress should be preferred even to its legislative function.[3]

It is on this subject—of the Congress informing itself with regard to Communist activities—that I have been particularly perplexed by the minority justices. When dealing with contempt cases involving this committee, this minority seems hypnotized by the expression, "exposure for exposure's sake." Indeed, this phrase has been echoed and reechoed with such frequency between the Court and left-wing circles, that I am unable to determine its origin. Somehow in the process the word "exposure" has been downgraded. Rightly considered, the informing process involves exposure—when the truth is concealed. Exposure is education—the bringing forth of truth. We must not permit the incident of exposure, necessarily involved in our investigations for legislative purposes, to be debased by a name-calling which appears to have as its sinister purpose the suppression of understanding, and which is used, I believe, to erect ideological barriers to the extraction of information. The Congress is not so naive as to be brainwashed by such phrases. Need we assure the minority on the Court that we in the Congress do not "expose for exposure's sake" in any greater degree than that the Supreme Court "decides for decision's sake?"

If Wilkinson and Braden had pleaded the fifth amendment as a bar to congressional inquiry, these cases would not have been in the courts—or the subject of comment today. Such pleas would have operated as an absolute bar to inquiry. For obvious reasons this course was not pursued. Instead, they chose to rely on the first amendment, and contempt citations necessarily followed. The dissenting Justices would shield and support them on this plea, regarding it as sufficient justification for refusing pertinent information to the Congress relating to Communist propaganda activities. If this result were upheld, congressional inquiry into many matters of national concern, on such principle, could be completely frustrated by recalcitrant witnesses who had no other reason for rejecting their civic responsibilities than that they chose to remain silent. And needless to say, particularly this committee's mandate from Congress to pursue such inquiries as are here involved, would be rendered ineffectual.

Assuming the basic premise, namely, that Congress may legislate in the area of Communist activities—a premise the minority has not denied—it necessarily follows that pertinent congressional inquiry may be inhibited on the basis of acknowledged testimonial privileges, and none other. Is a witness in the criminal courts permitted to plead the first amendment to any question pertinent to the issue there being examined? Of course not. From the imperative demands of public policy—that the witness communicate his knowledge—he may shield himself by means of the fifth amendment only, or other well-recognized privileges, such as that of attorney-client, husband-wife, and the like. Nor may he adopt the extraordinary course of utilizing the first amendment to shield himself from the consequences of pleading the fifth amendment. Why does the minority thus misapply the historic rights of the first amendment, in the adoption of this sort of legal sleight-of-hand?

Mr. Speaker, this brings me to the heart of the matter. I suggest that the particular antipathy of the minority to what they term "exposure" in these cases is an act of sheer expediency—and rests upon no principle of law. Let us examine the facts.

Justice Douglas, writing for the minority, said this in the Braden case:

> History has amply proved the virtue of political activity by minority, dissident groups, who innumerable times have been in the vanguard of democratic thought and whose programs were ultimately accepted. Mere unorthodoxy or dissent from prevailing mores is not to be condemned. The absence of such voices would be a sympton of grave illness in our society.

Such sweeping generalities when applied to Communist activities is certainly astounding. They also apply with as much reason to former Nazi Bund activities. Were the Nazis in the vanguard of democratic thought? Indeed we cannot expect such voices to be absent from our society, but I fail to see the virtue of the disasters toward which such voices carry us. It is incredible that the minority should argue for this sort of undefined and lawless activity in the realm of speech and press. To give such activity undeserved respectability by describing it euphemistically as "discussion of political affairs," is totally unwarranted and a conception wholly inapplicable to Wilkinson and Braden, as likewise to the case of Yates.[4]

Indeed, in the Yates case, which reversed a conviction of leading Communists under the Smith Act, with the concurrence of Justice Douglas, Justice Black said:

> I believe that the first amendment forbids Congress to punish people for talking about public affairs, whether or not such discussion incites to action, legal or illegal.[5]

To say the least, this extraordinary language would have shocked Holmes and Brandeis, who, while recognizing that the rights of free speech and assembly are fundamental, declared that they are not in their nature absolute, and held that—

> Their exercise is subject to restriction, if the particular restriction proposed is required in order to protect the State from destruction or from serious injury, political, economic or moral.[6]

Of course, in the cases of Wilkinson, Braden, and Yates, Justices Black and Douglas were dealing with Communist activities. But what did they say when dealing with equivalent Nazi activities in the realm of speech and press? Let us see.

In the case of *Viereck* v. *United States*, 318 U.S. 236, the majority of the Court reversed the conviction of the petitioner, who had been convicted of a violation of the penal provisions of the Foreign Agents Registration Act of 1938[7] because of omission to state a material

---

[4] *Yates* v. *United States*, 354 U.S. 298.

[5] Ibid., p. 340.

[6] *Whitney* v. *California*, 274 U.S. 357, at p. 373, which upheld the conviction of Miss Whitney, charged with the felony of organizing the Communist Labor Party of California, of being a member of it, and of assembling with it. Justices Brandeis and Holmes concurred in a separate opinion.

[7] This act was expressly adopted to carry out the recommendation made in 1935 by the McCormack committee, which was a Special Committee To Investigate Un-American Activities, the predecessor of the present standing committee of that name. See *Viereck* v. *United States*, *supra*, p. 244.

fact required to be stated in a supplementary registration statement filed by him with, and under regulations of, the Secretary of State, by which Viereck was required to disclose information of his political activities which were wholly on his own behalf, and not on behalf of the Nazi government. The majority reversed the conviction because the requirements of the registration statement exceeded the prohibitions of the act, which related only to those persons acting as agents of a foreign principal, either as public relations counsel, publicity agent or representative.

Justices Black and Douglas dissented and would have sustained the conviction. Justice Black, in whose dissent Justice Douglas concurred, then said this:

> The general intent of the act was to prevent secrecy as to any kind of political propaganda activity by foreign agents. Both the House and Senate committees reporting the bill under consideration declared it to be their purpose to turn the spotlight of pitiless publicity upon the propaganda activities of those who were hired by foreign principals. Appreciating that propaganda efforts of such a nature are usually conducted in secrecy, they wanted to make full information concerning it available to the American public and sought by the passage of this bill to force propaganda agents representing foreign agencies to come out in the open in their activities, or to subject themselves to the penalties provided in said bill. They declared that the purpose of the bill was to require all such hired agents to register with the State Department and to supply information about their political activities, their employers, and the terms of their contracts.
>
> What emerged from extended congressional investigations, hearings, and deliberations was this act, intended to provide an appropriate method to obtain information essential for the proper evaluation of political propoganda emanating from hired agents of foreign countries. As the House and Senate committees considering the bill said, it "does not in any way impair the right of freedom of speech, or of a free press, or other constitutional rights." Resting on the fundamental constitutional principle that our people, adequately informed, may be trusted to distinguish between the true and the false, the bill is intended to label information of foreign origin so that hearers and readers may not be deceived by the belief that the information comes from a disinterested source. Such legislation implements rather than detracts from the prized freedoms guaranteed by the first amendment. No strained interpretation should frustrate its essential purpose (p. 250 f).

Now what is the essential difference between the former "political" activities of the Nazis in the United States and the "political" activities of the Communist Party, that would yesterday qualify the first amendment in Viereck's case but today would render it absolute in the cases of Wilkinson and Braden? There is none. The justification for the Viereck dissent by Justices Black and Douglas was that the propaganda efforts of the Nazis were conducted in secrecy. That is precisely the situation in the case of Communist activities, both as to the party and its propaganda.

Evident in these dissents is the unabashed rejection of consistency and principle. It is entirely right that I should question this serious breach in the discipline of the common law, our ancient and noble heritage, which teaches respect for stare decisis, that is to say, adherence to principles of law or judgments established in prior decisions. For law is a standard of conduct. There must be some predictability in the law for those who must live by it, and equal treatment to those who must come before the same tribunal for judgment. This is no more than a demand of liberty—a government of laws, with its certainty, and not of men, with their caprices and prejudices.

Although in establishing the Supreme Court of the United States, our forefathers assumed that the Court would be composed of lawyers trained in, and with respect for, the traditional discipline of the profession—maintaining a reasonable adherence to consistency and the principle of stare decisis—the minority justices appear to me to have completely broken from this discipline. Chaos now reigns. And I do not think that Supreme Court opinions are improved by the inclusion within them of newspaper editorial comments and other hearsay, which have not been admitted in evidence, nor should such be the basis or authority for legal decision. May I venture to predict that in the forthcoming decisions involving the Subversive Activities Control Act, which is essentially an information statute, as is the Foreign Agents Registration Act, you will find Justices Black and Douglas complaining the the former act contravenes the first amendment simply because it deals with Communist activities, a result these justices did not reach under the latter act in the Viereck case because it dealt with Nazi activities?

I wish further to take issue with the assertion of these Justices, that this committee was putting questions to Wilkinson and Braden relating to their personal beliefs. Here again they have given an extremely careless misrepresentation of the facts. An examination of the questions asked of Wilkinson and Braden, for which they were charged with contempt of Congress, or put to them in the course of the hearings, in no instance bears out the assertion that they were questioned about their beliefs. Not one single question was asked of either Wilkinson or Braden whether either believed in this or that. The questions related solely to their activities in and on behalf of the Communist Party, a party which is now universally recognized as a secret criminal conspiracy composed of a small band of revolutionaries, controlled and directed by a foreign dictatorship, employing deceit, espionage, sabotage, and terrorism, having as its avowed objective, the early demise of our constitutional form of government, by force and violence, irrespective of the will of the majority. These are not questions of mere "beliefs," "dissent," or "unpopular views," but acts and conduct which no civilized and humane society can tolerate or survive.[3]

It may be that Communists should be permitted to talk—and believe me, they are doing just that, ad nauseam. But it does not follow that their talk, or activities, shall be unregulated, or that they should be privileged not to talk to Congress—on the specious basis of the first amendment. Is it not desirable—and necessary—to defend ourselves against espionage, sabotage, and terrorism? Is it not important to preserve the integrity of free speech, to insure the democratic process of full and open discussion, in a word, to make democracy workable? That was the purpose of the Foreign Agents Registration Act. Justices Black and Douglas thoroughly approved in the Viereck case, which dealt with Nazi talk.

But they would have you believe that there is something objectionable in the process of questioning a Communist about his activities, to which they refer as his "associations." By the magic of this phrase, "questioning about associations," we are expected at once to capitulate and with horror to withdraw from such practice, that is to say, like Pavlov's dog, to salivate at its mere sound. How are facts gathered, even in the criminal courts, which have the highest standards for the production of evidence? Let us take the case of the man charged with burglary. There are three general categories of proof:

First. An admission, confession, or plea of guilty.

Second. Direct or eyewitness testimony to the act of burglary.

Third. Circumstantial evidence.

The last category is none other than proof by association, and its validity or effect depends on how close the association may be. Association is, therefore, under proper circumstances, an entirely reliable and acceptable means of establishing facts. Of course, on this committee we do not prosecute, but gather facts by means of pertinent questions relating to the activities, not the associations, of the witness for the information of the Congress in relation to its lawmaking function.

Moreover, it is perfectly absurd for the minority Justices to complain be-

---

[3] The minority Justices are confused by the fact that the Communst Party appears at times to advance liberal or reform causes, not realizing that reform is not the objective of the Communist Party but is used as the vehicle for creating and gaining mass support for its illegal objectives. Marx expressly stated, "For us the issue cannot be the alteration of private property but only its annihilation, not the smoothing over of class antagonisms but the abolition of classes, not the improvement of existing society but the foundation of a new one." (Quoted and cited in "Facts on Communism," col. I, H. Doc. Number 336, 86th Cong. 2d sess., p. 59.) It was pointed out by Stalin in analyzing the problems of Leninism: "To a revolutionary * * * the main thing is revolutionary work and not reforms * * *. That is why, with revolutionary tactics under the burgeois regime, reforms are naturally transformed into instruments for disintegrating this regime, into instruments for strengthening the revolution, into a base for further development of the revolutionary movement. The revolutionary will accept a reform in order to use it as an aid in combining legal work with illegal work * * *. That is what making revolutionary use of reforms and agreements under the conditions of imperialism means." (Ibid., p. 100f.)

cause the committee subpenaed Wilkinson, who had been engaged as an identified Communist in promoting in the South Communist propaganda to abolish this committee, when as a matter of fact the hearing held by this committee was for the express purpose of ascertaining Communist propaganda activities in the South. If this committee were to be restrained by the Supreme Court from questioning any Communist who had criticized this committee, it would be impossible to question any Communist on relevant subjects. I say that because it is the declared program of the Communist Party to abolish this committee, and by the discipline of the party all Communists are required to pursue this major propaganda effort to which the party is dedicated.

At the 17th National Convention of the Communist Party, U.S.A., secretly held commencing December 10, 1959, at a hotel in New York City, the party reiterated this objective in the adoption of its resolution on the 1960 elections which, in pertinent part reads as follows:

> To advance the cause of peace and progress, the Communist Party will enlist support of the following immediate program: Abolish the witchhunting House Un-American Activities Committee and the Senate Internal Security Committee.

Parenthetically, I ought to call attention to the use in this resolution of the words "peace" and "progress," which is typical Communist doubletalk. Our studies indicate that the Communists have a perverted language of their own. Such liberal terminology is employed here, as elsewhere by them, to deceive the ignorant and to make attractive the totalitarian objectives of the Communist Party. The "peace" to which they refer is the peace which they expect to ensue when they succeed in dominating the world. The "progress" to which they refer is progress in the adoption of Communist policy or doctrine. You will also observe the employment of the typical Communist smear phrase, "witchhunting,"[9] which is the language you will remember appears in the manifesto of the 81 Communist Parties that met in Moscow in November 1960, when speaking of anti-Communist activities, and at which they reaffirmed their adherence to Marxism-Leninism in the struggle for world domination. Of course, I need not state that the Salem witches were the product of imagination, but the Communist witches are very much alive today in all parts of the world. I believe it is quite possible that the minority on the Supreme Court may have been somewhat confused by this type of language, and could well employ some of their time in a study of our hearings and documents.

In expressing fear that anyone promiscuously called a Communist, or whoever criticizes this committee, may be interrogated by this committee, Justices Black and Douglas have ignored the evidence—a practice which is the basis of most fear. It is quite obvious that this committee has a sense of responsibility in conducting its work—a sense of responsibility perhaps sometimes absent in the work of the minority Justices. Our conduct has proved that such questions as are posed to Braden and Wilkinson are posed only after painstaking investigation into the identity, background, and activities of the witnesses by skilled investigators, some of whom are ex-FBI agents of long experience, and after prior committee consultation and action.

It must be understood that this committee proceeds discreetly in accordance with strict rules of procedure, long adopted and which have served as the model for the standing rules of the House, now governing all committees, and embodied in parts of rule XI. Indeed, this committee was the first committee of the House of Representatives to adopt written rules of procedure. We have been zealous to protect the civil rights of all persons, and we believe we have succeeded in this respect.

Moreover, we shall always welcome and consider constructive criticism, which is motivated by genuine interest to preserve our free society. We will oppose abolition, which is the objective of the Communist Party to destroy our security and to victimize our people. But we cannot guarantee to preserve the good will of Communist witnesses, or other Communists, or those in complicity, with any more success than the courts can preserve that of defendants charged and tried for crime, and for which reason no one would suggest that the criminal courts be abolished.

In this connection, I would like to note that the American Bar Association appointed a special committee on Communist tactics, strategy, and objectives, which made a very thorough review of the work of this House committee, including the reading by each member of that bar committee of hearings conducted by us over a period of at least 6 months. On February 25, 1952, that group of the American Bar Association made a report which included the following language:

> The congressional committees investigating communism, and in particular the House Un-American Activities Committee, have been attacked on the ground that they have engaged in smear campaigns and have invaded the constitutional rights of persons investigated. Your committee is impressed with the fairness with which hearings before that committee have been conducted during the period of time indicated by our study of the published testimony. We are satisfied that the witnesses called to testify before the committee are being treated fairly and properly in all respects and we also feel satisfied that each witness is accorded full protection so far as his constitutional or other legal rights are involved; moreover, the confidential communications between attorneys and clients have been fully respected.
>
> It is the view of your committee that current attacks on the House Un-American Activities Committee are unjustified. Whether deliberate, or misguided, such unwarranted attacks result in reducing the effectiveness of that committee's great service to the American people.

Since the above report was made, this House committee has continued to respect the civil rights of witnesses.

Mr. Speaker, this committee of the House is an instrumentality of the House constituted by it to probe the complex Communist conspiracy. We are meeting our responsibilities. We are in agreement as to the overriding necessity for preserving our form of government—and its constitutional freedoms which are now effectively misapplied by our enemies toward the dissolution of this free society. It is my fervent hope that this minority of the Supreme Court will meet its responsibilities by directing their attention to a study—and understanding—of the purposes and methods of this odious conspiracy. Thereby the occasion for review—or disagreement—in such cases as that of Wilkinson and Braden may well be diminished.

I believe it is in no small part due to the efforts of this committee of the Congress that we in America, within our borders, have been able to contain the Communist conspiracy to a degree unknown in any of the other remaining democracies of the world, all of which are now ominously threatened and agitated from within by its tentacles. The wisdom and understanding of our Congress is clearly reflected in this committee which is its creation, and which is employed as a democratic agency consistently with the procedures and ideals of our free institutions. And for that wisdom and understanding, I know that the vast numbers of our people and posterity are and will be forever grateful to the Congress.

ONLY QUOTAS WILL PROTECT OUR TEXTILE INDUSTRY FROM THE "INVASION" OF LOW-WAGE IMPORTS

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the American textile industry is fighting for its very survival. Every year since the end of World War II, mills have been closing and jobs have been wiped out, in spite of the fact that the domestic market for textile products has been increasing with the growth of our population.

What is the reason for this tragic contradiction? The invasion of the American market by low-wage foreign textiles has been gradually displacing our own textile industry. It has now reached the critical stage. Imports of textiles and textile products have doubled in the past 2 years, and have reached the dangerous total of more than 1,300 million square yards.

---

[9] Lenin has set forth the standard method of Communist propaganda. His words are as follows: "The wording (of our press campaign against our political foe) is calculated to provoke in the reader hatred, disgust, contempt * * *. The phrasing must be calculated not to convince but to destroy the ranks (of the enemy)—not to correct the adversary's mistake, but to annihilate, to raze to the ground, his organization. This wording must really be of such a kind as to provoke the worst notions, the worst suspicions about the adversary; it must sow discord in the ranks of the proletariat and be the opposite of phrasing which would convince and correct."

Year after year, spokesmen for the industry have come to Washington seeking some reasonable protection from their Government, but have received none. Management and labor are united in trying to rouse the Government from its inertia. In desperation, the Garment Workers threaten to boycott all imports of foreign-made clothing.

My office has received many appeals for help from management. The president of a worsted top manufacturing company recently wrote to me stating that:

> Thousands of textile workers are among the unemployed, and there are more and more joining the ranks of unemployed, because we simply cannot withstand this overwhelming competition from low-wage countries.

Make no mistake about it. Textiles are basic to the economy and the security of the United States. From the growers of cotton and wool, and the manufacturers of manmade fibers, to the processors of these products for use by the apparel and other industries, there is woven an economic interrelationship of tremendous proportions. In the center of it are the textile and apparel industries that employ a total of over 2 million workers, with an annual payroll of $7 billion.

As recently as January 30, 1959, the Office of Civil and Defense Mobilization declared:

> On this point there need be no equivocation. The OCDM regards the textile industry as an essential industry and considers it an essential part of the Nation's mobilization base.

But the fact is that we have been standing by and watching the slow but steady strangulation of that industry by the overpowering pressure of low-wage imports without coming to its rescue. Italy, Japan, and the United Kingdom have been taking over an expanding share of our domestic market for some time, and now they have been joined by Hong Kong, India, Pakistan, Portugal, Spain, and Egypt. Imports of wool cloth jumped 25 percent between 1959 and 1960, reaching an all-time high.

Today, cotton goods imports are four times greater than in 1955, and over double those of 1958. Clothing of woven wool fabrics was imported in 1960 at more than three times the rate of 1958. All other categories reflect similar increases.

Between 1947 and 1958, and before the recent surge in imports, the U.S. wool textile industry was forced to close down 248 establishments, with a loss of 91,000 production jobs.

The plain, stark fact is that quotas are required because tariffs, under present policy, fail to offset low foreign wages. Compare the following hourly wool textile wage rates:

United States of America	$1.73
Britain	.54
Italy	.30
Japan	.14

Much as we want to raise the present Federal minimum wage in the United States from the present $1 per hour to $1.15, and then to $1.25, we must realize that our textile industry will be utterly ruined unless we provide a compensating protection against low-wage foreign imports.

The answer is simple, clear, and imperative: the Government of the United States must move swiftly and in the national interest to establish textile and apparel quotas for each country exporting these products to the United States, with the quotas divided into product categories to prevent concentration in any particular type of goods.

HON. BURR P. HARRISON

Mr. IKARD of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. IKARD of Texas. Mr. Speaker, it is with regret that we have learned of the decision of the Honorable BURR HARRISON to retire from public service at the end of this Congress. By his service here, BURR HARRISON, with his unusual energy, intelligence, and integrity, exemplifies the highest order of public service. Few Members of Congress have matched the standard set by him in his understanding and knowledge of the problems and challenges that face us.

Probably more than any other State, the Commonwealth of Virginia has from the very beginning of our Republic to the present sent leaders to the Congress. BURR HARRISON has maintained this great tradition and occupies a position in the front rank of the great Virginians who have served here.

Mr. Speaker, I am pleased to include here an editorial from the News-Virginian, Saturday, March 18, that evidences the esteem his constituents hold for our colleague, and I know expresses very well the feelings of all of us here.

RETIREMENT OF BURR HARRISON FROM WASHINGTON LOOMS AS A TRAGIC LOSS

(By Louis Spilman)

As of this moment it is apparent that BURR P. HARRISON, Representative in the U.S. Congress from Virginia's Seventh District, is serving his last term. This decision has been reached by Mr. HARRISON. It is wholly incompatible with the hopes, desires, and wishes of virtually his entire constituency in the Seventh District. Mr. HARRISON entered Congress as a Representative from the Seventh Virginia District in 1946. At that time he was elected to succeed the present junior Senator from Virginia, the Honorable A. WILLIS ROBERTSON.

Mr. HARRISON is now serving in his ninth consecutive Congress—filling out the unexpired term of Senator ROBERTSON in the 79th and being reelected to the 80th, 81st, 82d, 83d, 84th, 85th, 86th, and 87th. Mr. HARRISON was advised by his physician to retire prior to his election last November to the 87th Congress. Loyalty to his district and his country caused him to continue to offer for service. He was elected without opposition. His physician has now convinced Mr. HARRISON that it is to his best interest and to the best interest of his family, to remove himself from public life. Accordingly he has let it be known that he will not be a candidate to succeed himself in November 1962.

Few Members of Congress have served with greater distinction than Mr. HARRISON. Having served prior to his entrance into Congress as Commonwealth's attorney of Frederick County (1932–39); member of the Virginia Senate (1940–42); and from 1942 to 1948 as judge of the 17th Judicial District of Virginia, he brought a background of experience, a keen mind and a profound knowledge of public affairs to Washington. But his greatest distinction arises from his loyalty and dedication to his constituents and his sense of responsibility to his country at large.

He has worked zealously and indefatigably for good government in Washington and for the best interests of his constituents in the Seventh District. He has faithfully and regularly visited every one of the 14 counties and 5 cities he represents. There are nearly 300,000 persons in his district and he is personally known and beloved by most of them. Regardless of political party he has served those he represents with thoroughness and dispatch.

During these past 15 years Mr. HARRISON has grown immensely in stature, knowledge of national and international affairs and, particularly through his membership on the House Ways and Means Committee, in tax and fiscal matters. He is a friend. He is a respected member of the national administration. He is too important to the country and to his district to permit his retirement and far too young to have retirement thrust upon him by his physician. Actually his health is excellent but the toll of public life is keen. We want him to remain in Congress but we recognize fully his right to enjoy the remaining years of his life in comparative quiet and calm. Certainly he will carry with him into retirement the inner knowledge of having served ably, effectively and devotedly.

MEMBERS INVITED TO SUGGEST CONSTITUENTS AS WITNESSES FOR SMALL BUSINESS COMMITTEE HEARINGS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, since the opening of the 87th Congress, the House Small Business Committee has received many requests from Members who desired assistance in resolving small business problems confronting their constituents. All of these requests are given priority consideration by the committee and they also receive my personal attention. At this time, I should like to announce once again that the Members' requests for assistance are welcome at all times, for the Small Business Committee considers that one of its most important functions is to serve and assist the Members in every way possible.

The committee has not as yet reached final decision regarding the places or dates that its hearings will be held during the 87th Congress. It appears to be reasonably certain, however, that after the Congress has adjourned this summer such hearings will be held in virtually all sections of the United States and that a wide variety of small business problems will be explored. Members of the House are invited to submit the names of any of their constituents whom they would like to be invited to appear as witnesses be-

fore the committee or one of its subcommittees.

Following is a listing of the subcommittees, their members, and jurisdictions:

HOUSE SMALL BUSINESS COMMITTEE, 87TH CONGRESS

SUBCOMMITTEE

Representative WRIGHT PATMAN, chairman of the full committee, and Representative WILLIAM M. MCCULLOCH, ranking minority member of the full committee, are ex officio members of each subcommittee.

Subcommittee No. 1, Organization and Operation of Small Business Administration: Representative JOE L. EVINS, chairman, Democrat, of Tennessee; Representative SIDNEY R. YATES, Democrat, of Illinois; Representative DALE ALFORD, Democrat, of Arkansas; Representative ARCH A. MOORE, Jr., Republican, of West Virginia; Representative WILLIAM H. AVERY, Republican, of Kansas.

Subcommittee No. 2, Small Business and Government Procurement: Representative ABRAHAM J. MULTER, chairman, Democrat, of New York; Representative SIDNEY R. YATES, Democrat, of Illinois; Representative TOM STEED, Democrat, of Oklahoma; Representative H. ALLEN SMITH, Republican, of California; Representative HOWARD W. ROBISON, Republican, of New York.

Subcommittee No. 3, Foreign Trade, Foreign Aid, and Basic Metals: Representative SIDNEY R. YATES, chairman, Democrat, of Illinois; Representative JOE L. EVINS, Democrat, of Tennessee; Representative ABRAHAM J. MULTER, Democrat, of New York; Representative ARCH A. MOORE, Jr., Republican, of West Virginia; Representative RALPH HARVEY, Republican, of Indiana.

Subcommittee No. 4, Taxation: Representative TOM STEED, chairman, Democrat, of Oklahoma; Representative ABRAHAM J. MULTER, Democrat, of New York; Representative JAMES ROOSEVELT, Democrat, of California; Representative H. ALLEN SMITH, Republican, of California; Representative RALPH HARVEY, Republican, of Indiana.

Subcommittee No. 5, Distribution Problems Affecting Small Business: Representative JAMES ROOSEVELT, chairman, Democrat, of California; Representative TOM STEED, Democrat, of Oklahoma; Representative DALE ALFORD, Democrat, of Arkansas; Representative ARCH A. MOORE, JR., Republican, of West Virginia; Representative WILLIAM H. AVERY, Republican, of Kansas.

Subcommittee No. 6, Advertising and Growth Opportunities for Small Business: Representative DALE ALFORD, chairman, Democrat, of Arkansas; Representative JOE L. EVINS, Democrat, of Tennessee; Representative JAMES ROOSEVELT, Democrat, of California; Representative WILLIAM H. AVERY, Republican, of Kansas; Representative HOWARD W. ROBISON, Republican, of New York.

Special Subcommittee on Small Business Problems in the Dairy Industry: Representative TOM STEED, chairman, Democrat, of Oklahoma; Representative JAMES ROOSEVELT, Democrat, of California; Representative DALE ALFORD, Democrat, of Arkansas; Representative HOWARD W. ROBISON, Republican, of New York; Representative RALPH HARVEY, Republican, of Indiana.

THE WALL STREET JOURNAL GIVES A GOOD DESCRIPTION OF HOW THE FEDERAL RESERVE MANAGES INTEREST RATES

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, I would like to commend to the Members' reading a feature article which appeared in the Wall Street Journal this morning, March 21, under the general title "Managing Money." It contains an excellent description of the operations of a little-known but most important feature of our Government. It also contains a good description of the peculiar problem the Federal Reserve is up against at the present time as a result of the recent run on our gold reserves.

Many people do not understand how interest rates are determined. In fact, we frequently hear statements, and read statements, to the effect that the interest rate is simply the price of money, and the price of money is determined by the supply of money and the demand for its use. Such statements are largely true; but they overlook the point that the Federal Reserve determines the supply, and, indeed, it adjusts the supply upward or downward almost every day of the year, and frequently from hour to hour within the day. Furthermore, factors other than supply and demand help determine interest rates.

The Federal Reserve has several means for influencing interest rates upward or downward without respect to changes in the supply-demand balance. And it has means of changing the relationship of the differential between long-term and short-term interest rates also without respect to changes in the supply-demand balance.

Why should the Members be concerned with what level of interest rates the Federal Reserve maintains in the American economy?

The question is important to every authorization, appropriation, and tax measure the Congress is considering. It determines which general course of policy we shall follow.

While we do not generally speak of the matter in the terms I am about to use, the fact is that one of the main functions of the Federal Government is to provide general economic regulation. In recent decades the Federal Government has followed either of two general means to try to achieve this regulation. We usually refer to this regulation as trying to maintain economic stability, avoiding both runaway booms and economic depressions.

One of the means we use for this purpose is our general fiscal policy. Thus in recession times, Federal spending is increased and tax revenues drop. In this way, the Federal Government goes deeper into debt to pump more purchasing power into the economy.

The other means of trying to achieve stability is through management of the money supply and interest rates. Thus in prosperous times, the Federal Reserve tightens the money supply and raises interest rates for the purpose of restraining investment in new productive plants, new houses, and so on. On the other hand, when recessions occur, the Federal Reserve eases the money supply and lowers interest rates for the purpose of trying to stimulate investment. That is to say, this is normally the case.

IN GOLD RECESSION

At the present time, although we are in a recession, the Federal Reserve is maintaining interest rates at a higher level than it has used in past periods of inflationary boom when it was imposing an interest rate calculated to suppress investment. The reason for this is, supposedly, that since the middle of last October, the Federal Reserve has lost its ability to prescribe interest rates purely on the basis of what it thinks the domestic economy requires. It must now keep short-term interest rates very high—or so it thinks—in order to prevent bank depositors and investors in short-term securities from moving their funds to Europe to take advantage of the high interest rates prevailing there. And the reason why this is thought to be necessary is, of course, that the more dollars going abroad, the more likely it is that some of these dollars will be used by foreign central banks to purchase some of the Treasury's gold. We feel that we cannot afford to sell the gold. We are, in short, in a gold recession. In an attempt to preserve the gold, the Federal Reserve is maintaining interest rates so high that these are causing a recession in the domestic economy. Whether under these circumstances the President will recommend, and the Congress will appropriate, a sufficient volume of deficit spending is another question.

I hope that those Members who are interested in the exact methods the Federal Reserve uses to manage interest rates will read the Wall Street Journal article by Arlen J. Large. The article is as follows:

MANAGING MONEY: U.S. BOND MARKET ROLE SPOTLIGHTED BY FED'S INTEREST RATE MOVES; RESERVE SYSTEM HITS SNAGS AS IT TRIES TO CUT COST OF LONG-TERM BORROWING; 17 DEALERS AND $150 BILLION

(By Arlen J. Large)

NEW YORK.—A little-known securities market here is involved in controversial experiment in managing money. The success or failure of the experiment could have a lot to do with the future of America's domestic economy and its holdings of gold.

This market consists of 17 dealers in Government securities, linked together by a network of private telephone wires, odd tribal customs and a clannish jargon. The market's annual volume of $150 billion or more is several times that of its more famous cousin and financial district neighbor, the New York Stock Exchange. Most of the Government securities market's business comes from such private customers as banks, insurance companies, and corporations seeking profitable investments, or wanting to turn their securities into cash. But the market's biggest single customer is the Federal Reserve System.

By careful planning of its purchases and sales of Treasury securities, the Federal Reserve now is trying to push down long-term interest rates. The purpose of this effort, which is suffering some setbacks, is to make long-term borrowing cheaper in the hope that more people then will decide to build homes and expand factories with borrowed funds.

BOLSTERING SHORT-TERM RATES

Simultaneously, the Federal Reserve is trying to keep short-term rates up, in the hope that fewer investors then will take money

from the United States to seek higher yields abroad. The United States for years has been spending, lending and investing more abroad than foreigners have been spending, lending and investing here. As a result, foreigners have piled up holdings of dollars, part of which they have used to buy gold from the United States; the U.S. store of gold in the past year alone has fallen by more than $2 billion.

No one questions the Federal Reserve's ability to influence interest rates. When the system buys Treasury securities, it puts more lendable funds into the banking system. When it sells Government securities, it causes buyers to take money out of banks. But many economists and Government securities dealers doubt whether the system can keep one type of rate up while depressing another.

In its efforts to do so, the Federal Reserve has altered its long-standing policy of trading almost exclusively in securities that mature in less than 1 year. In the 4 weeks since the change was announced, the system has added to its holdings $432 million of securities that mature in more than 1 year. Its aim is to push up the prices of such securities and thus depress their yields; such changes on Government issues would be likely to lead to similar shifts both on new and outstanding private, State and city securities.

A number of Government securities dealers wonder what will happen to the Federal funds received by the sellers of longer term Treasury securities. If much of the money is reinvested in short-term securities, partly because of uncertainty about success of the Federal Reserve's efforts to bolster long-term bond prices, short-term rates might tend to go down and long-term rates would get firmer. And the Federal Reserve System would have bought a lot of longer term issues without achieving its aims.

MARTIN AWARE OF DANGERS

Federal Reserve Chairman Martin, who resisted the technique for years, is aware of the dangers. But he has told Congress he believes the effort to nudge longer term rates lower will have some success. So far there's no statistical evidence to back him up.

On the last trading day before the Federal Reserve announced its change in policy a Treasury bond maturing in 1969 was being traded at a price yielding the buyer 3.69 percent. After edging higher for a while after that, the price recently has fallen, so that the bonds of 1969 yesterday were yielding 3.70 percent. Similar increases in yields have come in other longer term issues.

Its far too early, however, to declare that the Federal Reserve's program has failed. For the moment, the System's efforts are running into heavy counterforces. A strong stock market is attracting private investment funds that might otherwise have gone into bidding up bond prices. Heavy offerings of State and local bonds have built up the supply of debt securities; this also tends to depress prices of longer term issues.

These difficulties so far aren't deterring the System from pushing its program. The actual buying and selling is handled in a tightly guarded room on the ninth floor of the fortresslike Federal Reserve Bank of New York, three blocks north of Wall Street. The Federal Reserve bank officials in New York get their orders, in general terms from the Federal Reserve's Open Market Committee, which usually meets every 3 weeks in the System's white marble headquarters building in Washington. The traders' specific, day-to-day instructions are formulated by officials of the New York bank and Washington headquarters.

The Open Market Committee is composed of the Federal Reserve Board's 7 Governors, plus 5 of the 12 regional Federal Reserve bank presidents. The New York Reserve Bank's president, lanky, balding Alfred Hayes, is permanent vice chairman of the group; the other 11 presidents take turns serving on the committee. Chairman of the group is Mr. Martin.

The Committee gages the state of the economy and considers international developments. In the light of these factors, it decides whether to buy or sell Government securities—and what types to buy or sell—and passes on general instructions to the New York Reserve Bank.

These instructions must be interpreted in the light of day-to-day developments. To keep abreast of what's happening between the Washington meetings, officials at the New York bank operate an elaborate intelligence system. Between 9:30 and 11 o'clock each morning they talk in person and by phone with market dealers, and with Treasury officials in Washington. They also check all the latest statistics on interest rates, and figures on bank reserves which serve as a measure of bank lending power.

From all this probing, the bank's officers get a good notion about financial trends shaping up on any given day. By 11 o'clock, they're ready for a telephonic strategy conference with headquarters to plan that day's operation. At the New York end, the participants are usually Robert Rouse, manager of the System's open market account; Mr. Hayes, the bank's president, and perhaps a lesser officer or two. In Washington, officials interested in the "morning call" generally drift into the office of Woodlief Thomas, a Board economist, where the chatting is done on extension phones; participants usually include Mr. Thomas, at least one Governor and several other staff officials. In addition, the Federal Reserve switchboard operators plug in at least one district bank president talking from his home base in Chicago or San Francisco or elsewhere.

On any given day, the procedure decided upon can go directly counter to the committee's long-term credit policy. Suppose the Committee's standing instructions call for supplying plenty of bank reserves—as is now apparently the case. But suppose also that Mr. Rouse's morning sleuthing detects that vagaries of the financial pipelines today will dump heavy sums into bank reserves. This happens if heavy payments by checks between banks are delayed in transit, or if people simply deposit lots of cash in banks. If so, the New York Reserve Bank may today tighten the money market by selling securities, to absorb reserves that are deemed temporarily too great.

TESTING THE MARKET

Or Mr. Rouse might have another trick in mind for clearance during the 11 o'clock phone check with Washington. His own feel of the market, plus slight statistical hints, may indicate that loan funds have become a bit scarcer than before. It could represent the true beginning of a heavier business demand for money, or it could simply be a money market fluke. To find out which, Mr. Rouse could decide to pump some additional money into the market by buying a batch of bills from dealers with the explicit understanding that he'll sell them back a day or two later. This temporary cash injection will give him a chance to see whether money supplies remain tight—a sign that business demand may be real—or whether the extra funds tend to glut the money market.

Once the day's strategy has been fixed, Mr. Rouse passes the word to traders on the ninth floor trading desk. These men who'll do the actual buying or selling aren't told what Mr. Rouse and his headquarters colleagues are up to; they're merely told what to buy or sell.

Suppose the plan is to buy $10 million worth of bonds under the new policy directive. It's now time—usually about midday—for the go-around. Each Federal Reserve trader is assigned one or two dealers to call, and at a given signal they flick their direct-line telephone switches. At the private trader's position on the other end, a light labeled "Fed Res" blinks on.

The Federal Reserve trader asks, "How do you make the 4's of October 1969?" This is a request for a price at which the dealer will sell the 4 percent Treasury bonds which mature in October 1969. The dealer quickly makes a price for this and any other requested issues. The dealer is reminded to "stand on your market" for about 20 minutes, and the Federal Reserve trader hangs up.

The initial calls, made simultaneously to prevent any dealers from having exclusive knowledge of impending purchases that could affect prices, are completed in 5 minutes or less. The prices obtained from the dealers are listed on a single tally sheet, and the trading desk's boss decides which dealers will be called back and given the order.

OUTSIDERS ARE BARRED

To cloak its day-to-day purchases and sales, the Federal Reserve goes to some lengths. Outsiders are barred from the ninth-floor trading room in the Federal Reserve bank, where traders sit at 17 telephone positions around a big horseshoe-shaped desk. If a well-informed outsider were permitted to enter the trading room, it's conceivable that he might be able to gage the extent and direction of the Federal Reserve's operations. And that is something the Reserve System wants to avoid, because such an outsider might then have an advantage in the market.

No individual Government securities dealer during any given day knows how much the Federal Reserve is buying or selling. Each dealer will have been asked by the Reserve System to supply some prices and may have made some purchases or sales. But dealers do not exchange information on the extent of their dealings with the Federal Reserve. So each dealer, at best, will have only partial information during the trading day.

The Federal Reserve traders themselves are well known by voice to the private market traders, but off-the-job fraternizing is avoided. "There's no particular rule about social contacts," says one Federal Reserve official. "But it's hard to keep from talking shop when traders get together, and that makes it embarrassing for everyone." At the retirement party in 1956 for Mary Whelan, a Federal Reserve trader who was well known—by voice—to all the dealers, many of them met her in person for the first time.

A major aid to the Federal Reserve in preserving the secrecy of its operation: In addition to buying and selling for its own account, it handles Treasury securities transactions for Federal agencies and trust funds and foreign central banks. Reserve System officials are fairly satisfied that the dealers are kept in the dark about a given day's operations, and the dealers themselves tend to agree. "You never can be sure about the Federal Reserve," says an executive of one big dealer firm.

THE 17 DEALERS

Each Thursday, the Reserve System makes public a report showing changes in its portfolio during the week which ended on the previous day. This report is given wide distribution through newspapers, so that no single trader or investor gains any market advantage from it.

The Government securities market itself consists of 5 dealer firms that actually are banks, handling securities only on the side, plus 12 that are specialists in buying and selling the I O U's of the Government and business. Some of them, such as Discount Corp., deal mainly in securities of

the Federal Government; others, such as Salomon Bros. & Hutzler, offer a "department store" range of Federal, State, and private obligations.

The other nonbank dealers include Bartow, Leeds & Co.; Briggs, Schaedle & Co., Inc.; C. F. Childs & Co., Inc. (Chicago); C. J. Devine & Co.; First Boston Corp.; Aubrey G. Lanston & Co.; New York Hanseatic Corp.; Wm. E. Pollock & Co., Inc.; Chas. E. Quincey & Co.; and D. W. Rich & Co., Inc. Bank dealers are Bankers Trust Co.; Chemical Bank New York Trust Co.; Continental Illinois National Bank & Trust Co. (Chicago); First National Bank of Chicago, and Morgan Guaranty Trust Co. The Chicago-based firms have trading branches in New York.

All 17 dealer firms are recognized by the New York Federal Reserve Bank as outlets for its own money-managing operations. The field technically is open to newcomers, but the number of dealers remains fairly constant. "There seems to be a natural law about this," observes one Federal official. The law according to two Carnegie Institute professors who recently studied the market on behalf of Congress, appears to be the difficulty for any larger number of dealers to make a profit and find capital to finance their operations. The dealers try to make a profit by selling Government securities at prices higher than those which they pay.

The private traders buy and sell millions of dollars worth of securities on their telephonic word alone; they personally rarely see the pieces of paper they are trading. The actual transfer of the securities is handled by other employes of the dealer firms. When a dealer firm sells a Treasury bond to the Federal Reserve, for example, an employee of hte firm will deliver the bond to the New York Reserve Bank and pick up the Federal Reserve's check.

THE "FED" AND THE "FED'L"

An easy familiarity with big sums is only one mark of the exclusive dealer fraternity. Another is an intimate knowledge of the workings of the Federal Reserve System, with which they're in close daily contact. This familiarity is reflected in the market's language. A stockbroker who wants to appear sophisticated might talk about the "Fed" to indicate nickname familiarity with the Federal Reserve System. But a real insider on the Government securities market is more likely to refer to "the Fed'l." And it's a rare dealer firm executive who calls Chairman William McChesney Martin, Jr., anything but "Bill."

In their own operations, the 17 dealer firms do more than match up a prospective seller of securities with a prospective buyer. Most of them accumulate securities for their own inventory from which customers are supplied, much as a used car dealer stocks his sales lot. As with used cars, the trick in Government securities is to accumulate no more of a stock of a certain security than can be resold at a profit.

The Treasury has outstanding some $190 billion worth of I O U's that can be traded on the market. But dealers do more business in some issues than in others. Long-term bonds maturing in 20 to 30 years typically are held for long period by insurance companies, pension funds, and mutual savings banks. Because not many of these securities change hands often, a $500,000 transaction in such bonds is considered large.

In contrast, dealers buy and sell heavy volumes of short-term Treasury bills maturing in 6 months or less; these are bought by banks and corporations that don't want to leave spare funds idle without interest earnings even for short periods. These bills are sold when cash is needed to pay expenses. A sale involving less than $1 million is regarded by dealers as peanuts; not until a bill deal hits $25 million or more are you talking big money.

A $25 MILLION SALE

Say, for example, that United States Steel wants to sell $25 million of bills. Its treasurer will call a dealer firm and ask a man on the trading desk what price he's willing to pay. The trader will quote a price there and then, even though he often does not know the volume involved. If it's one of the larger dealers, he'll feel obliged to stand by his market and buy the whole $25 million worth. After that, it's up to the dealer firm to resell the bills to someone else at a higher price if it can.

Traders do not work entirely by intuition, of course. The trading rooms of most dealers have a quote board on the wall listing the dealers' own current prices for each traded issue. Also, dealers adjust their own inventories by trading with each other; some of the 17 firms do most of their business with other dealers. If a trader wants to know a competitor's prices, he flicks a private line switch on his telephone box and asks his counterpart for a run on prices.

Price-swapping aside, one of the distinguishing aspects of the market is its aura of great secrecy, of not letting other dealers know what you're doing. Dealers tend to brag about the competitiveness of their market, and they're backed up on this point by the Carnegie Institute professors who studied the market for Congress. Active competition seems to prevail when dealers are trading the heavy-volume short-term securities, their report said. There's less competition in long-term issues, but the Carnegie men say this is due to the small supply of such securities, and isn't the dealers' fault.

Secrecy is deemed especially necessary when a dealer gets a big order from a customer. The dealer perhaps can fill part of the order from his own inventory, and go shopping around for the rest. If other dealers know what's up, the price of the desired issue will be bid higher. To thicken the plot, dealers sometimes ask someone outside the market—perhaps a stock market broker—to do the telephoning, thus masking the identity of the real buyer.

SELECTING THE TRADERS

Traders selected for phone duty are a special breed of men, to hear their supervisors tell it. "A good trader must have the wisdom of Solomon, and the brass-nerve of an Irishman," says H. N. Repp, president of the Discount Corp. Executives also place high marks on quick thinking; in a busy market, a trader might handle up to 20 phone conversations an hour. The market in New York opens at 10 a.m. and runs straight through to 3:30 p.m.; some traders must lunch in their office.

Some of the dealer firms pride themselves on the freedom given trading desk men to commit heavy sums of the firm's money in hectic trading without checking first with the boss. One trading supervisor proclaims his own firm's freedom by contracting it with others: "In some outfits, you can't buy 10 bonds without running to Poppa."

Most elusive of the trading desk man's talents is a "feel of the market," being able to sense the strength of demand and the pressure of supply. "Sometimes," says a market veteran, "you have to decide whether a rush of sell orders means real market weakness, or whether there are still underlying elements of strength that could fool you." Traders who have a good market feel are highly prized, paid salaries ranging up to $50,000 and sometimes awarded a partnership in the firm.

ONE ACCOUNT OF THE WAY CHICAGO ASSISTS IN THE ELECTION OF A PRESIDENT

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD at this point and to include a newspaper article.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, Chesly Manly's story in the Tribune of March 18, tells us something about fraudulent voting, and points to the necessity of constant vigilance and, it might be added, aggressive action by the National Department of Justice.

The story follows:

STORY OF BIG CITY VOTING FRAUDS AN OLD, SHOCKING ONE: METHODS REMAIN THE SAME AFTER 30 YEARS

(By Chesly Manly)

Thirty years ago on November 4, 1930, this reporter observed polling places in the flophouse district of South State Street, in Michael "Hinky Dinky" Kenna's first ward, and talked with dozens of "repeaters" who were paid 50 cents every time they voted.

"We're going along," explained a Republican precinct captain. "If we don't say anything they give us a few votes. They register these floaters by the hundreds, under any names. Then when a bum comes in to vote they instruct him. He can use any name on the precinct roll."

The procedure is the same in elections now, including Republican collusion in Democratic fraud, as will be shown later by a summary of court cases.

KANSAS CITY RECORD

Election stealing in New York City, Albany, Jersey City, Chicago, and other cities has reached shocking proportions at various times, but all records for grand larceny of ballots probably were broken by the Pendergast machine in Kansas City, of which President Harry S. Truman was a dues paying member and beneficiary.

In 1934 Tom Pendergast, the boss, chose Truman, then a county judge, to run for the Senate. In a three-way contest for the Democratic nomination, Truman's plurality was 41,000 votes. Jackson County and Kansas City, where it was estimated that Pendergast disposed of 60,000 ghost votes, gave Truman 138,423 and his two opponents 10,437.

Maurice Milligan, appointed U.S. attorney by President Roosevelt, obtained 259 convictions for frauds in the 1936 election and temporarily broke the Pendergast machine. Boss Pendergast himself went to prison for income tax fraud. In 1938 Sen. Truman unsuccessfully opposed confirmation of Milligan's appointment for a second term, and in 1940 he was repaid for his loyalty to the Pendergast machine. He won renomination for the Senate by 7,000 votes.

In 1946 Truman undertook to purge Representative Roger Slaughter, a conservative Democrat on the House Rules Committee, from the Kansas City district. Truman supported Enos Axtell, a political unknown, who defeated Slaughter by 2,300 votes in the August 6 primary.

The Kansas City Star said the election was as crooked as any ever held in the city. Charles Binaggio, a gangster ally of the Pendergast machine, sent flying squadrons of unregistered voters from precinct to precinct, voting them again and again. In many precincts Slaughter received no votes at all, and in four wards the count was 6 to 1 for Axtell.

FBI'S HANDS TIED

The Star collected affidavits from 1,400 witnesses of fraud and raised such a clamor that Attorney General (now Supreme Court Justice) Tom Clark had to do something about it but he assigned an assistant, T. Lamar Caudle, to the task and Caudle issued instructions which effectively tied the hands of FBI investigators.

Meanwhile, a county grand jury found evidence of "a deliberate and calculated plan to miscount votes and otherwise steal the election."

The Senate Judiciary Committee began an investigation of the Justice Department, but during the night before Attorney General Clark was to testify, the primary ballots were stolen from a vault in the election commissioners' office, which was blown open with nitroglycerin.

Seventy-one persons were indicted, but with the evidence missing prosecution was futile.

If LYNDON JOHNSON'S election as Vice President in 1960 was not stolen, there is little doubt among sophisticated Texans that his nomination for the Senate was stolen in 1948.

Several days after the polls had closed on August 28 it was announced that the ballots of precinct 13 in Jim Wells County gave JOHNSON a lead of 87 votes over former Gov. Coke Stevenson. The theft of that election was so flagrant that the State Democratic committee confirmed the result by a margin of only one vote, 29 to 28.

BALLOTS THROWN OUT

In the closest Texas election since 1948, John F. Kennedy and JOHNSON won that State's 24 electoral votes for President and Vice President in 1960 by an officially proclaimed majority of 46,233. Auditors employed by Texas Republicans found that 90,975 ballots, most of them marked for Richard Nixon and Henry Cabot Lodge, were thrown out in 208 of the State's 233 paper ballot precincts.

Under Texas law, voters in paper ballot precincts were required not only to put crosses after the names of candidates of their choice but also to cross out the others. Election judges, however, were authorized to give effect to the intent of the voter.

This ingenious arrangement permitted wholesale rejection of ballots in precincts with Nixon-Lodge majorities and acceptance of similarly defective ballots in precincts with Kennedy-Johnson majorities.

VOTE HERDING TACTICS

It was reported that Democratic bosses in Mexican border counties bought poll tax certificates in blocks of 300 to 3,000, at $1.75 a certificate, for use in vote herding operations.

In many Texas precincts there were overcasts—more votes than qualified voters, as shown by the poll tax lists. Texans who are over 60 are exempt from the poll tax, but the number in this category, according to the national average, is less than one-fourth of the total in the 21-to-60 age group.

In Fannin County, poll taxes were paid by 4,838 voters. If 25 percent of this number, or 1,209 voters were exempt from the poll tax, a total of 6,047 were eligible to vote. Yet 6,163 voted.

Fanning County is in the district of Representative SAM RAYBURN, Speaker of the House. The New Orleans Times-Picayune reported that poll taxes were paid by 43,175 voters in the eight counties of RAYBURN'S district, that not more than 53,966 were qualified (allowing a 25 percent increase for exemptions), and that 49,166 actually voted.

A 91-PERCENT TURNOUT

This would be 91 percent of the eligible votes, an unheard-of turnout for Texas or any other Southern State.

In the Federal District Court of Houston, Republicans sought a recount and an injunction against certification of the Texas vote, on the ground that Republicans as a class were deprived of their civil rights, in violation of Federal law. To nobody's surprise, the suit was dismissed by Judge Ben Connally, son of former Senator Tom Connally and a Truman appointee.

COMMUNITY BUSINESSMEN OPPOSE RAILROAD MERGER

The SPEAKER. Under previous order of the House, the gentleman from Washington [Mr. MAGNUSON] is recognized for 30 minutes.

Mr. MAGNUSON. Mr. Speaker, the financial pages of the newspapers in recent months have carried story after story reporting on the growing movement toward consolidations and mergers in the railroad industry. Since most of these articles have been based upon statements made by representatives of railroad managements or investors who have shaped and planned the proposed mergers, it is natural that they should tend to present the case for railroad consolidation only in the most favorable light.

Those spokesmen for the financial interests which control the railroads involved in the present nationwide movement for mergers and consolidations base their case solely on the grounds that through so-called economies that would be possible if the merger proposals are approved, the consolidated railroads would be able to earn a higher profit for their owners. That is not an undesirable goal, but certainly when it involves an industry which is as vital to the future economic growth and national security as the railroads, such a gain for railroad stockholders must be weighed against any possible adverse effects upon the public at large.

What are the so-called economies which railroad management is seeking to achieve through consolidation of railroad properties? Essentially, they come down to being an elimination of service. Nearly all of the proposed mergers involve the abandonment and tearing up of railroad tracks and roadbeds, the elimination of shop facilities for repair and maintenance, the running of fewer trains, and the laying off of thousands of railroad employees.

When thus analyzed, it is easily seen that the higher profits which railroad managements are seeking from merger would come from a shrinkage of our great national railroad network and a cutting back on the services it performs. Along with this cutback would come many adverse effects upon railroad communities, and upon the general geographic region in which the cutbacks in service are sustained.

To tell this side of the story, 67 public-spirited business firms and individuals in Auburn, Washington, have recently joined together to purchase a full-page advertisement in the Auburn Globe-News of February 22, 1961. These people set forth six reasons explaining why they are opposed to the merger of the Great Northern and Northern Pacific Railroads and urge Congress to undertake a searching inquiry into the effect of this proposal. The reasons they give for their position are as follows:

1. The merger could result in the loss of a $3,500,000 payroll in Auburn. The 482 employees of the Northern Pacific who live in Auburn and the 113 who live in the immediate surrounding area would be adversely affected by this merger. Many of them could be forced to move away from the Auburn area if they were to be maintained by the company.

2. The Auburn School District, if the merger were effected, could stand to lose tax support needed to cover the cost of 1 elementary school, 20 teachers, 1 principal, 1 custodian, and their payroll. This could mean serious curtailment of educational service for the district.

3. There has been no indication that if such a merger were effected there would be such gains in efficiency that there would be a substantial rate reduction in shipping costs. If the merger is justified in the public interest then one of the first things the railroads could have announced was a proposal to reduce freight rates. This has not been done.

4. Many cities and communities in Washington, Idaho, Montana, North Dakota, and Minnesota, most of them not to be affected as adversely as Auburn, have still taken strong, official positions against the merger. A large number of public officials in all States have spoken out opposing the merger. In Auburn, our city government and chamber of commerce are both officially opposed to the merger.

5. Merger of the two railroads could contribute seriously to the growing unemployment trend here and in all other communities where the two railroads are now operating. Wherever railroad mergers have taken place many longtime employees have been forced to retire or be transferred at substantial losses.

6. We have not been shown that this giant merger is genuinely necessary. It certainly cannot be justified in the interest of national defense and we question seriously how much it will increase the scope and efficiency of service to the whole Northwest. Most certainly it would have a drastic effect on the economy of our community.

These six reasons advanced by this group of businessmen and individuals in Auburn for opposing this railroad merger clearly indicate that there is another side to railroad consolidations than the one of anticipated higher railroad earnings that is given in the stories on the financial pages. Both the Great Northern and Northern Pacific Railroads are already highly profitable enterprises. As our Nation once again begins to move out of recession toward a new economic growth, these railroads can expect to become even more profitable from the increased transportation they will be called upon to provide the expanding Northwest region. The great Northwest is still one of the areas in our Nation which is undergoing tremendous economic growth, and it will have need for more—not less—railroad services in the years ahead.

We cannot allow any curtailment in railroad services, which would delay or hamper this expansion, to take place solely because of a desire to increase railroad profits. I agree fully with the public-spirited citizens of Auburn who have shown a commendable concern over the threat to the future of their community which has been raised by the Great Northern and Northern Pacific merger proposal. I support completely their view that the Congress should undertake a searching inquiry into the effect of this proposal.

Moreover, I believe that the threat to the future of railroad transportation throughout the country which is raised

by the present widespread movement toward consolidation of rail properties is so great that it is time that the Congress called a halt to the consummation of any further railroad mergers until a thorough study of their adverse effects upon the general public has been undertaken. We should not—we must not—allow a desire for higher profits by a comparatively small group of financial interests to so curtail our railroad transportation potential that the future economic growth and stability of our entire Nation is stunted and hamstrung.

Mr. Speaker, I believe that the action of these citizens and business firms of Auburn, Wash., in purchasing advertising space to tell their views about railroad merger is to be highly commended.

I ask unanimous consent to include a list of their names, as taken from the above-referred-to advertisement, in the RECORD at this point.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The list of names referred to was ordered to be printed in the RECORD as follows:

Cugini Florists, Peckenpaugh Drug Co., Price Funeral Chapel, Geo. Bachus & Sons Chevron Service, Pfeiffer Glass Co., Brewer Motor & Equipment Co., Mike Wood Furniture & Appliances, Inc., Roberts Motors, Bothell Chevrolet-Cadillac, Inc., Ralph C. Berghuis, O.D., American Savings & Loan Association, Manson's Rexall Store, Weese Jewelry, Arndt's Richfield Service, Evans Drug Co., Stan Sorenson Heating Co., Dietzen's Thriftway, Larberg's Shoprite Food Store, Wakefield's Shoe Repair, Cottage Cleaners, Wilber Studio, Steiger's Union Service, Clifford Westby & Son, Insurance, Aaby Realty & Insurance, Armstrong Realty, Auburn Auto Parts, Auburn's Buick Center, Auburn Concrete Products, Auburn Dairy Products, Inc.

Also Beierlein's Men's Shop, Rainbow Cafe, Ruby's Variety, Scarff Motors, Gosney Motor Parts, Ken Schoenfeld Furniture, Shaughnessy & Co., Jack Sprenger Insurance, Sunset Laundry & Cleaners, Thornton's Men's Shop, Warren's Office Equipment, Weaver's TV & Appliances, Webster Automotive, Yourglich Bros. Chevron Service, Value Stores, Thriftime Drugs, Willner's Department Store, Auburn Industrial Committee, Ben Franklin Store, Cavanaugh Hardware, Claude's Sporting Goods, Massey's Food Center, Don's Repair, Doxon & Son, Earl's Broiler, Auburn Trailer Sales, Dr. C. A. Landgren, Harry O. Lieske, Lightle Funeral Home, Modern Cleaners, Nelson's Grocery, J. C. Penney Co., Pete's Service, Rail Cigar Store, Hoyt Motors, Kasper's, Kennedy's, and Robert E. Gaines General Refrigeration Co.

SUBMERGED LANDS ACT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Louisiana [Mr. WILLIS] is recognized for 60 minutes.

Mr. WILLIS. Mr. Speaker, today members of the Louisiana delegation introduced legislation to correct the decision of the Supreme Court in the case of the *United States* v. *Louisiana, Texas, Mississippi, Alabama, and Florida,* handed down in May 1960 (80 Sup. Ct. 961), and to make it conform with the intent of Congress as expressed in the Submerged Lands Act of May 22, 1953. Identical bills have been introduced by members of the Alabama and Mississippi delegations.

In the case referred to the Court awarded a seaward boundary of three leagues, or approximately 10½ miles, to Texas on the west and to Florida on the east, but only 3 miles to the three States in between, Louisiana, Mississippi, and Alabama. It was like cutting off the three middle fingers of your right hand. Unless this decision is promptly corrected, it is bound to raise very troublesome questions and create all manner of domestic and foreign confusion.

The clarifying legislation we propose is very simple. It is simply an equal gulf boundary bill. It would do simple justice and establish a uniform boundary of 3 leagues for all five Gulf Coastal States. That is all there is to it. I have added a facsimile of our joint bills as an appendix to my remarks.

To lawyers the decision is very hard to read and understand. To everyone it is difficult to follow because it proceeds in the wrong direction; it cuts against the grain; it runs against commonsense.

In order to understand the broad problem, I think for the record it would be appropriate for me to review this whole controversy from the time of the decision of the Supreme Court in the California case in 1947 to the time of the decision of May 1960, above referred to. As is always the case with legislation, my views may have to be modified in some respects during and after the hearings. But let us begin, as President Kennedy so adroitly put it in his inaugural address.

1. THE FIRST DECISIONS

From the time of the founding of our Republic until the decision of the Supreme Court in the California case in 1947, the States, relying on numerous previous decisions of Federal and State courts, asserted ownership of the so-called tidelands. That they had the right so to do was frankly admitted by both the executive and judicial branches of our Government. For example, in his veto message of the second tidelands bill passed by Congress in 1952, President Truman acknowledged that "even so careful and zealous a guardian of the public interest as the late Secretary of the Interior, Harold Ickes, at first assumed that the undersea lands were owned by the States."

Senate Report No. 1592 states:

The facts are conclusive that at least prior to 1937 the policy of the executive departments of the Government has consistently been to recognize State ownership of the submerged lands, whether inland or not, within the territorial jurisdiction of the States.

And the Supreme Court itself, in the California case admitted that in previous decisions it had "used language strong enough to indicate that the Court then believed that States not only owned tidelands and soils under navigable inland waters but also owned soils under all navigable waters within their territorial jurisdiction, whether inland or not." It must be remembered at all times, however, that the Court did not undertake to say how far out the claims of the States extended, whether 3-miles, 10½ miles, or any other distance.

Nevertheless, the Court went on to say that as a matter of fact those previous decisions dealt only with ownership of lands beneath inland waters and not with ownership of lands beneath the open sea. The Court then said it had never passed on the last question before and held that the United States, rather than the individual States, possessed paramount rights to the soil beneath the open sea adjacent to the coast and to the mineral resources thereunder, as distinguished from the soil and minerals beneath inland waters.

It is needless to say that there was a widespread feeling that the decision was just as wrong as a 2-foot yardstick or to point out that the Court itself admitted later on that it had been "severely criticized" about it. The important thing is that Congress passed the Submerged Lands Act to correct the decision and I now propose to show that the Court failed to give effect to the act of correction.

2. THE SUBMERGED LANDS ACT

The pertinent parts of sections 3, 2, and 4, as finally agreed to, provide as follows:

SEC. 3. (T)itle to * * * the lands beneath navigable waters within the boundaries of the respective States * * * are hereby * * * vested in and assigned to the respective States.

SEC. 2. (T)he term "boundaries" includes the seaward boundaries of a State * * * as they existed at the time such State became a member of the Union, or as heretofore approved by Congress * * * (B)ut in no event shall the term "boundaries" * * * be interpreted as extending from the coastline more than 3 geographical miles into the Atlantic Ocean or the Pacific Ocean, or more than 3 marine leagues into the Gulf of Mexico.

SEC. 4. The seaward boundary of each original coastal State is hereby approved and confirmed as a line 3 geographical miles distant from its coastline * * * Any State admitted subsequent to the formation of the Union which has not already done so may extend its seaward boundaries to a line 3 geographical miles distant from its coastline * * * Any claim heretofore or hereafter asserted * * * so to extend its boundaries is hereby approved and confirmed, without prejudice to its claim, if any it has, that its boundaries extend beyond that line. Nothing in this section is to be construed as questioning or in any manner prejudicing the existence of any State's seaward boundary beyond 3 geographical miles if it was so provided by its constitution or laws prior to or at the time such State became a member of the Union, or if it has been heretofore approved by Congress.

It is most important to note at the outset, however, that several significant changes in draftsmanship were made before the final provisions above quoted were agreed to. For example, the primary concern of Congress all along was to restore the title of the States within their historic boundaries. It was not until the House hearings were closed that an amendment was made to define boundaries in terms of miles or leagues into the open seas.

(A) RESTORATION OF TITLE WITHIN STATE BOUNDARIES

The original plan was to restore title within historic State boundaries, without specifying any distance. For example, the House report on the bill, H.R. 5992, filed April 21, 1948, states:

[T]he aforementioned bills (were) introduced in the Congress to preserve the status quo as it was thought to be prior to the California decision * * * to confirm and establish the rights and claims of the 48 States, long asserted and enjoyed with the approval of the Federal Government, to the lands and resources beneath navigable waters within their boundaries.

Without spelling out the extent of State boundaries. And the Senate report on Senate Joint Resolution 13, filed March 27, 1953, states:

The purpose of this legislation is to write the law for the future as the Supreme Court believed it to be in the past—that the States shall own and have proprietary use of all lands under navigable waters within their territorial jurisdiction.

Again without fixing a specific limit.

(B) THE 3 MILES AND 3 LEAGUES PROVISION

Throughout the long hearings and debates Congress took the consistent view that all the Atlantic and Pacific Coast States had a boundary of three miles. Thus one of the first House reports on the subject—No. 927, 79th Congress, 1st session—said that the States' boundaries "in the case of the coastal States is in no instance less than 3 miles from the coast line." And Senator Cordon, one of the managers of the bill, said on the Senate floor, "There conceivably cannot be a State whose boundary did not go 3 miles at sea."

It was likewise recognized, however, that the Gulf Coast States were entitled to claim more than 3 miles. For instance, while dissenting on other grounds, Mr. Justice Douglas frankly said:

The gulf presents peculiar problems due to its shallow water. The shallowness of its waters is well documented and our Government was well aware of this condition.

And in the majority opinion the Court took notice of "repeated assertions" that "Congress had made exceptions to the 3-mile policy purportedly based on and shallowness of waters in the gulf and the alleged Spanish custom of claiming 3 leagues of territorial waters." Furthermore, the congressional reports and debates are replete with additional affirmative documentations along this line. Finally, Senator ANDERSON, an ardent opponent of the legislation, readily conceded that the historic boundaries along the gulf were different than those along the Atlantic and Pacific coasts.

The fact of the matter, as clearly shown in the hearings and debates, is that the opponents of the bill were fearful that Gulf Coastal States might be able to claim more than 3 leagues. And it was in the light of this situation that the opponents of the legislation proposed the above-quoted language of section 2 to the effect that:

[I]n no event shall the term "boundaries" . . . be interpreted as extending from the coastline more than 3 geographical miles into the Atlantic Ocean or the Pacific Ocean, or more than 3 marine leagues into the Gulf of Mexico.

Since 3 marine leagues is the equivalent of approximately 10½ miles, I will refer to distances in terms of 3 miles and 10½ miles, for the sake of easier reading.

(C) THE DUAL PURPOSE OF SECTION 4

As in the case of sections 2 and 3, important changes in draftsmanship were made in the course of the consideration of section 4 and before its final adoption, as quoted in full at the beginning of this discussion. For example, the original purpose of section 4 was to "approve and confirm" the title of all coastal States as a line 3 miles from coast, with the understanding, however, that the approval and confirmation was to be "without prejudice"—expressed in the third sentence—to the right of the Gulf Coastal States to establish their claim beyond 3 miles but not over 10½ miles.

Later on, however, the last sentence was added to section 4 in order to affirmatively establish the right of a Gulf Coastal State to a boundary of not over 10½ miles "if it was so provided by its constitution or laws prior to or at the time such State became a member of the Union," and so forth.

(D) PROPER CONSTRUCTION OF THE ACT

In light of this short legislative history, I think the following to be a proper construction of the act as a whole:

The purpose of sections 2 and 3 was to permit a Gulf State to establish a boundary of from 3 miles and up to 10½ miles if it can prove that such a boundary "existed at the time such State became a member of the Union or (was) heretofore approved by Congress."

On the other hand, the original purpose of section 4 was to "confirm" a 3-mile boundary to all coastal States. According to the third sentence of that section, if a Gulf State claimed more, the mere confirmation of 3 miles was without prejudice to its rights to establish its claim in accordance with the criteria of sections 2 and 3; that is, if it can prove that a greater boundary existed at the time of admission. Here the key word is "prejudice" and the idea was not to prejudice the rights of the Gulf States to prove their claim in accordance with section 2. Then the last sentence was added and the key word in that sentence is "questioning." The purpose was to enjoin everyone, including the courts, not to "construe" section 4 "as questioning or in any manner prejudicing the existence" of a gulf boundary of beyond 3 miles "if it was so provided by its constitution or laws prior to or at the time of admission, or if it has been heretofore approved by Congress." Stated differently, the "existence" of the boundary of a Gulf State beyond 3 miles was not to be questioned or in any manner prejudiced, and consequently was deemed ipso facto to be proven, "if it was so provided by its constitution or laws prior to or at the time of admission."

A careful reading of the statute clearly shows therefore, that the intent of Congress was to permit a Gulf Coastal State to establish a boundary of beyond 3 miles but not over 10½ miles, in three alternate ways. A Gulf Coastal State could establish such a boundary, first, if it "existed at the time such State became a member of the Union," or, second, if it was "heretofore approved by Congress", or third, "if it was so provided by its constitution or laws prior to or at the time such State became a member of the Union."

The basic purpose of the statute as a whole was to permit latitude in proving historic gulf coastal boundaries. The term "historic boundaries" was stressed throughout the hearings and debates and was used in the same breath with treaties, maps, various actions and acts of ownership and long usage by the States, and recognition of State title by the Federal Government. And the statute contemplated admission of all such evidence of historic events in support or as an aid to the construction of a State constitutional or statutory provision, as well as acts of Congress. As pointed out hereafter, however, in the decision handed down in May 1960, the Court rejected the third alternative provision of the Submerged Lands Act, above referred to, and not content with that, it refused to give effect to evidence of historic events of the type suggested later on under the subheading "Supporting Evidence."

(E) SYNOPSIS OF THE ACT

Accordingly, the Submerged Lands Act handled the tidelands problem and the Supreme Court decision in the original California, Texas, and Louisiana cases in the following manner:

1. The act provides for an outright confirmation to all the Coastal States (Pacific, Atlantic, and Gulf) of a boundary 3 geographical miles from their coastlines.

2. The 3-league provision was inserted for the benefit of and applies only to the Gulf Coastal States.

3. A Gulf Coastal State can establish a boundary of over 3 miles and up to 10½ miles if it "existed at the time such State became a member of the Union," or was "heretofore approved by Congress," or "if it was so provided by its constitution or laws prior to or at the time such State became a member of the Union."

4. Full effect must be given to historic events and evidence of the type suggested later under the subheading "Supporting Evidence" in support or as an aid to the construction of a State's constitutional or statutory provisions, as well as acts of Congress.

5. Gulf Coastal States cannot claim more than 10½ miles.

6. It must be kept in mind also that all State boundaries, whether 3 miles or 10½ miles, must be measured from coastlines, defined as follows:

"(c) The term 'coastline' means the line of ordinary low water along that portion of the coast which is in direct contact with the open sea and the line marking the seaward limit of inland waters."

7. Finally, special attention is called to the fact that the question of fixing or laying out of coastlines was not before the Court and remains an open one.

3. THE NEW DECISION

Shortly after the passage of the Submerged Lands Act in 1953, the United States filed suit against Louisiana, Texas, Mississippi, Alabama, and Florida. The suit was brought directly before the

Supreme Court instead of a district court. The United States asked the Supreme Court to decide that the Government is entitled to possession of and full dominion over the so-called tidelands outside of the 3-mile limit and that the Gulf States cannot claim ownership of anything beyond 3 miles, despite the provisions of the act. Louisiana moved to have the case transferred to a district court in order to enable it to present evidence of its claim to 10½ miles, as contemplated by the act, but the motion was denied. In May 1960 the Court rendered its decision awarding a gulf boundary of 10½ miles to Texas on the west and to Florida on the east, but only 3 miles to the States in between, Louisiana, Mississippi, and Alabama.

4. ANALYSIS OF THE DECISION AND ITS ERRORS

After reciting its conception of the issues and the position of the respective parties, the Court proceeded to examine the provisions of the statute on its face.

The Court started out by rejecting the contention that a Gulf State was entitled to a 3 leagues boundary by showing that such a boundary was so provided for by its constitution or laws prior to or at the time of admission. The effect was to wipe out the provisions of the last sentence of section 4. "Rather," said the Court, "the measure of the grant in excess of 3 miles is made to depend entirely upon the location of a State's original or later congressionally approved maritime boundary, subject only to the 3 leagues limitation of the grant."

Having struck down the third alternative requirement, the Court turned next to the question of how to satisfy the two alternative requirements of the act to the effect that in order to establish a boundary of 10½ miles a Gulf State must prove that such a boundary either existed at the time of admission or was heretofore approved by Congress. It made a critical analysis of the different contentions of the Government on the one hand and those of the States on the other concerning the meaning of the term "at the time" within the meaning of section 2. In my opinion, it is important to note that the Court actually rejected the suggested interpretations of both the Government and the States in this respect. As pointed out later, the chief and primary position of the Government was that upon admission to the Union all State boundaries had to conform to an alleged 3-mile foreign policy, and that irrespective of greater preadmission boundaries, no State boundary could exceed 3 miles subsequent to admission. It accordingly advanced the specious argument that the term "at the time" of admission should be construed to mean "subsequent to" that time. The Court's conclusion on this point was crisp and decisive:

> In short, if the term is to be given content it must be read as referring either to some time before or after the instant of admission, or to both times.

The Court then looked at section 4 but only as an aid to construction or as an explanation or clarification of the term "at the time" as used in section 2. It completely ignored or at least did not even refer to the sentence before last. And in this as in the above instance, the Court did not adopt the views of either the Government or the States but proceeded to announce its own interpretation of the provision of the last sentence as follows:

> It [the provision of the last sentence] does not define the grant, but at most describes the claims protected from prejudice by section 4 in terms of their most likely nature. A fair reading of the section does not point to the conclusion that claims of this nature were deemed to be self-proving.

The most likely nature theory was not discussed or even mentioned in any testimony, congressional report, debate, or argument before the Court. It was evidently evolved by the Court in chambers without giving either the Government or the States an opportunity to argue its fallacy. Certainly Congress meant something more than an expression of opinion as to the most likely way a case might be proved. The function of Congress is to make laws and not to express opinions, and by attributing such a function to Congress the Court rewrote the law of Congress.

In fact, as pointed out, the Court did not even construe the statute as a whole, but discussed only part of it, and the Court rejected the interpretation suggested by both the Government and the States. It must follow, therefore, that the construction placed by the Court on the statute as a whole necessarily came as a surprise to both the Government and the States. How then could the Government defend the decision at the new hearings?

(A) THE COURT'S OUTLINE OF LEGISLATIVE HISTORY

On the theory that the statute was inconclusive on its face in the above respects and in respect to our foreign policy, the Court proceeded to review the legislative history of the Submerged Lands Act. It indulged in a lengthy discussion of who had written and said what about the long controversy, instead of giving full effect to the act, as written, and divided the dissertation on legislative history into three parts:

First. Confirmation of all boundaries at 3 miles.

Second. Boundaries beyond 3 miles.

Third. The question of executive policy respecting the 3-mile limit.

The more I read the decision the more I become convinced that the last question—part 3 above—should have been disposed of at the very beginning of the decision and that by disposing of it at this point the Court put the cart before the horse. I am very serious about that contention and I would like to outline the reasons for my positon in this respect.

(B) THE GOVERNMENT'S TWO MAIN POINTS

The executive policy argument of the Government ran like this. A State's seaward boundary cannot be greater than our national boundary. Our national boundary was never greater than 3 miles. Therefore, no State boundary can exceed 3 miles, and if the act granted more it would raise international questions and would violate this country's consistent foreign policy.

Replying to the Government's argument, the States generally denied that our national boundary had ever been fixed or frozen at a rigid 3-mile limit. They pointed out, however, that any assumed adherence to a 3-mile limit along the Atlantic and Pacific did not apply to the gulf; that France and Spain had in fact claimed and held more along the gulf, and that such boundaries existed since preadmission times and continued to be the boundaries after admission.

The Government counted that upon admission State boundaries had to conform with our country's 3-mile limit, as a matter of foreign policy, and that, therefore, even assuming greater prior or preadmission boundaries under France and Spain, or as territories, or as a republic in the case of Texas, the Gulf States boundaries could not exceed 3 miles subsequent to admission. Accordingly, at the very outset of the case the whole thrust of the Government's position was that the term "at the time" of admission should be construed to mean "subsequent to" that time. In my opinion that argument was absurd and the Court said as much is a more polite way.

It was only after discussing collateral issues and delving into legislative history that the Court finally returned to and came to grips with the matter of alleged international questions and our country's alleged foreign policy. The Court should have disposed of that issue at the threshold, because legislative history had little if anything to do with it. The Court, however, finally and properly disposed of the proposition in the following language:

> The power to admit new States resides in Congress. * * * [F]rom [that power] springs the power to establish State boundaries. * * * [T]here is no question of Congress' power to fix State land and water boundaries as a domestic matter.

Here is the odd and startling result when the two-pronged argument of the Government is brought together in proper focus. The first main point of the Government was that the phrase "at the time" of admission meant "subsequent to" the time of admission. The Court sharply rejected that argument. The second main point was that to permit the establishment of a gulf boundary of anything over 3 miles would raise international questions and would violate our country's consistent foreign policy. The Court struck down that argument. This, of course, was a major blow to the Government's entire case.

If the Government's two main contentions had prevailed it would have won the entire case. But the Government lost out on both points. And the odd and startling result is that Louisiana, Alabama, and Mississippi lost, and Texas and Florida won, but on grounds other than those advanced by either the Government or the States.

(C) THE COURT'S FORMULA AND TREATMENT OF LEGISLATIVE HISTORY

I will now proceed to examine the ground rules established by the Court as the basis for its decision and to show that such ground rules are wholly out of

harmony and completely inconsistent with those established by the Congress itself, as expressed in the Submerged Lands Act.

The Court having held that the establishment of a gulf boundary of over 3 miles was a domestic matter, the only remaining question was the kind and character of evidence required in order to prove that such a boundary existed at the time of admission. The determination of the question depended on the provisions of sections 2, 3, and 4, and that in turn was a matter of statutory construction. In other words: What did Congress say, and what did the written language mean?

In discussing the statute on its face, the Court bypassed all legal issues and reserved or relegated them to a review of legislative history. In fact, I strongly emphasize that in discussing the act on its face the Court did not give effect to any of the provisions under review, as written by Congress. The upshot was that such meaning as the Court did give to each and every such provision was the result of its own interpretation of legislative history instead of a proper construction of the language employed by Congress.

Many divergent views are expressed in committee hearings, congressional reports and debates. To be sure, these may be consulted as an aid in arriving at the intent of Congress. But to overemphasize the practice or to use legislative history to give meaning to each major provision of an act of Congress is something else. I think that what was done in this case was both unusual and improper. As a precedent, it is a wide-open invitation for the courts not to construe but to make laws.

Well, what was the Court's idea of legislative history?

The first major premise was that the act did not fix any boundary in excess of 3 miles, but required that "a State would have to establish the existence of such a boundary in judicial proceedings." The act requires no such thing. For example, the Federal Government certainly could have agreed that the situation in any particular State satisfied the several alternative requirements of the act with respect to the existence of a boundary in excess of 3 miles at the time of its admission. The most that could be said was that Congress realized that litigation could, or even probably would, result. Of course, standing by itself this legislative interpretation was innocuous but one realizes its full import when it is tied down to what follows.

The second legislative finding was that "The Submerged Lands Act does not contain any formula to be followed in the judicial ascertainment of State boundaries." For the life of me I cannot see the need for any magical formula to prove the alternate requirements of the act concerning the existence of a boundary at the time of admission. I have never seen Congress pass a law and then spell out the rules of evidence to govern its interpretation in case of litigation. That presents simply a matter of the application of the rules of evidence. The rule is that the more ancient the ultimate fact to be proved, the more liberal the rules of evidence, especially where the memory of man runneth not to the contrary. Under this rule the courts, long ago, evolved the Ancient Documents Rule making it unnecessary to prove the authenticity of documents after a long period of time. The rule is especially applicable in boundary disputes. As pointed out by Justice Black in his dissenting opinion, the Senate committee report cited cases admitting collateral evidence, such as use and possession, to prove ancient boundaries. And so the legislative history of the Submerged Lands Act is the reverse of what the majority relied on. Here the Supreme Court first refused to transfer the case to a lower trial court for disposition in accordance with usual practice and procedure. It then held that a State boundary can only be established in judicial proceedings and finally it proceeded to develop its own formula and fashioned hidebound rules wrapped up in a package as tight as a boiled egg.

The third legislative finding was that "it could hardly be contended that congressional action surrounding the event of admission was not relevant to the determination of present boundaries." Indeed, it cannot but it will be seen that relevancy becomes something else when all the elements of the so-called formula are set along side of one another.

The fourth legislative finding was that "the event of admission is a vital circumstance in ascertaining the location of boundaries which existed 'at the time' of admission within the meaning of the Submerged Lands Act." Here we see that a relevant factor becomes a vital one; and still later it becomes the only relevant inquiry.

The fifth legislative finding was that "the States should be 'restored' to the ownership of submerged lands within their present boundaries determined, however, by the historic action taken with respect to them jointly by Congress and the State." There is no doubt that all the States involved relied on both State and congressional action, and in that sense the establishment of boundaries depended on joint State and congressional action, but only as part of their case.

All of the foregoing was bad enough but the clincher came in the actual application of the so-called formula or ground rules devised by the Court for reasons of its own in the interpretation of the Submerged Lands Act. At the very beginning of the decision of the particular case of Texas the Court said:

> For reasons already discussed, we consider that the only relevant inquiry is what boundary was fixed for the State of Texas by virtue of the congressional action admitting it to the Union in accordance with the terms of the joint resolution of [annexation].

And in deciding the Louisiana, Alabama, and Mississippi cases, the Court said that they "must be judged by the same standards." The deadly net result was that innumerable acts of ownership and possession, long acquiescence, as well as concessions and affirmative admissions of the title of the States by the Government in effect became irrelevant. This was not only contrary to jurisprudence in boundary disputes in general but in this particular case was in direct contradiction to both legislative history and intent of Congress, clearly contemplating the utmost relevancy of such evidence.

And such legislative history and congressional intent is spread throughout the testimony, congressional reports, and debates. In fact, part of it is to be found in the long footnote quotation by the Court from my own examination of Secretary of Interior McKay, and my statement on the floor. It will be seen from that footnote that I specifically brought out that just as in an examination of title by a lawyer every link in the chain must be considered, together with all maps and collateral material which help to interpret the deeds; so in connection with historic boundaries all treaties, maps, historic documents, claims, ownership and control of Spain and France, and so on, must be considered to help interpret joint State-Federal action in establishing such boundaries.

To be sure, the Court condescended to review some of the evidence of ownership, and so forth, relied on, but only after deciding against Louisiana, and only as an opportunity to obstinately and doggedly brush it all aside.

(D) ORIGINAL AND POST-CIVIL WAR CONSTITUTIONS

Louisiana, Mississippi, and Alabama, of course, relied on provisions of their State constitutions and congressional acts of admission. In the case of Louisiana, the Court did not consider the entire provision of our constitution of 1812, and the act of Congress admitting Louisiana to statehood and defining State boundaries. It only considered the closing part, winding up with, "thence, bounded by the said gulf, to the point of beginning, including all islands within 3 leagues of the coast."

As will be brought out at the new hearings, the entire provision of our 1812 constitution, our laws as they existed prior to and at the time of admission, and the act of admission, clearly established a 3-league boundary. And such a boundary becomes even more evident in the light of all supporting evidence.

Similar language was employed in the original admission statutes of Mississippi, Alabama, and Florida. The Southern States seceded from the Union at the commencement of the Civil War, and were readmitted after that conflict.

In adopting new constitutions as a condition of readmission, Louisiana, Mississippi and Alabama used their original admission boundary description. In Florida's new constitution, however, the original gulf boundary was more precisely described as being 3 leagues from land. In that connection the Court said:

> We cannot know for sure whether all or any of the Congressmen or Senators gave special attention to Florida's boundary description.

Nevertheless, Florida won her case on the specific ground that "Congress approved a 3-league boundary for Florida after its admission into the Union and before passage of the Submerged Lands Act."

It is interesting to note, however, that Florida, Louisiana, and Alabama came back into the Union pursuant to the same readmission act of June 25, 1868, and it is quite certain that if Louisiana, Alabama, and Mississippi had drawn their new constitutions as Florida did, their gulf boundary would have been approved by Congress following the Civil War, and thus would have won their present case, too.

Mr. Justice Harlan, who wrote the majority opinion in the Texas, Louisiana, Mississippi, and Alabama cases, dissented from the majority opinion written by Mr. Justice Black in the Florida case. His dissent was based on the fact that in his opinion the real purpose of the act of June 25, 1868, was to readmit the States to representation in Congress; that Congress had given no consideration to any change; actually did not change and consequently did not approve Florida's 3-league boundary. I think it would have been more accurate for him to say, and that he would have been on solid ground if he had said, at least for the purposes of this case, that while Florida's new constitution employed more precise language, the expression "bounded by the gulf, including islands 3 leagues from coast"—read in proper context and supported with abundant evidence of acts of ownership, possession, and so forth—meant the same thing as a boundary "3 leagues from coast," and that such was the reason that Congress paid so little attention to the boundaries of Florida, Louisiana, and Alabama in the Boundary Act of 1868. And, in my opinion, it was his failure so to read the original State constitutions and acts of admission, and to give effect to such evidence, that caused him to decide against Louisiana, Alabama, and Mississippi and forced him to dissent in the Florida case. Of course, some of the constitutions of the Gulf States, both before and after the Civil War, spoke in terms of 3 and others in terms of 6 leagues, measured either from coast or land, but that difference is now wholly unimportant because the Submerged Lands Act prohibits a gulf boundary of more than 3 leagues from coast.

(E) SUPPORTING EVIDENCE

And I am as sure as a lawyer can ever be that under a well-established and unbroken line of jurisprudence in boundary controversies that the Court erred in not giving effect and proper weight to the peculiar situation along the gulf and to acts of ownership and possession, long acquiescence, as well as concessions and admissions of the title of the States by the Government. These will be developed in full at the hearings but I give a brief resumé of some of them.

First. I have already pointed out that Senator ANDERSON and other ardent opponents of the legislation, and Mr. Justice Douglas, who dissented on other grounds, recognized that the pecular situation along the gulf coast, based on shallowness of waters and Spanish law and custom, and so forth, justified the position of the Gulf States that they were entitled to claim a boundary of over 3 miles. In fact, it is very interesting to note that the majority opinion not only recognizes the forceful "repeated assertions" of the Gulf States to that effect but did not affirmatively dispute them. Instead, basing the adverse ruling against Louisiana on the narrow construction of the act, as herein outlined, the majority opinion hedged on this point by saying, "We need not decide whether the United States ever claimed 3 leagues of territorial waters along the entire gulf coast, which could in a sense be considered to constitute a national boundary, or whether, if it did, Louisiana would have been entitled to extend its own boundary to that distance." This phase of the case will be fully developed at the new hearings.

Second. Numerous treaties, read in context with appropriate historic events, show beyond doubt that preadmission boundaries under France and Spain were not less than 3 leagues, and that such were the State's gulf boundaries at the time of admission. In Louisiana's case, instead of construing them as a whole in order to arrive at the true claims, foreign policy and custom of France and Spain the Court held in effect that, to be relevant, each treaty on its face had to refer specifically to gulf water boundary.

Third. Numerous old maps likewise show pre- and post-admission gulf boundaries at not less than 3 leagues.

Fourth. Predicated on their ownership at the time of admission, the Gulf States exercised exclusive civil and criminal jurisdiction and passed, administered and enforced laws and regulations affecting the life, liberty, and property of their citizens in these areas.

Fifth. Specifically, these States passed and enforced laws to regulate and conserve fish, shrimp, oysters, and wildlife in these areas. Some of the Louisiana laws in this respect go back almost 100 years.

Sixth. Louisiana was the first State in the Union to grant oil, gas, and mineral leases on submerged lands far out in the gulf, to develop a system of conservation laws and to encourage orderly development of these resources in offshore waters.

Seventh. Not only has the States' possession, dominion, and sovereignty over these areas been open and notorious, but it is coupled with the fact that for more than a century the Federal departments and agencies not only acquiesced in but unequivocally recognized the States' claims to such areas.

Eighth. Thus, in recognition of the rights of Louisiana and other States, the Federal Government took the position that it could not and would not grant such leases because it had no right, title, or interest in and to these areas.

Ninth. In many instances the Government itself deemed it necessary to acquire title from these States before attempting to exercise any power of its own.

Tenth. At the request of the Federal executive department, the States deeded to the United States portions of their submerged lands. And as early as 1855, at the request of the Federal Government, the Legislature of Louisiana passed an act to authorize the Governor in certain cases to relinquish to the United States title to and jurisdiction over sites for lighthouses far out into the gulf.

Eleventh. Many years ago the States of Texas, Louisiana, Mississippi, Alabama, and Florida, in their sovereign capacity and as owners of these areas, entered into the Gulf States marine fisheries compact for the purpose of promotion and better utilization of fisheries in the Gulf of Mexico. And the Federal Government, recognizing the claims of these States, gave congressional approval to this compact.

(F) INCONSISTENCIES AND CONTRADICTIONS

The Court not only failed to give effect to the foregoing supporting evidence but applied different rules of interpretation in the case of Texas, on the one hand, and those of Louisiana, Mississippi, and Alabama on the other.

For example, as above indicated, in the case of Louisiana the Court held that to be relevant each treaty had to refer to the specific Louisiana water boundary. On the other hand, 19 pages of the Texas decision are devoted to a discussion of background history and treaties, but this discussion centered around land boundaries and not water boundaries. Of course, it was highly proper to construe these treaties as a whole. Indeed, only a few paragraphs refer to water boundaries and then only to express these thoughts:

> We are unable to find in the congressional debates either on the 1844 treaty or the 1845 annexation resolution a single instance of significant advertence to the problem of seaward boundaries. Furthermore, a series of other events manifest a total lack of concern with the problem.
>
> The foregoing circumstances make it abundantly plain that at the time Texas was admitted to the Union, its seaward boundary, though expressly claimed at 3 leagues in the Texas 1836 Boundary Act, had not been the subject of any specific concern in the train of events leading to annexation.
>
> There is, indeed, a strong argument that the "properly," "rightfully," and "adjustment" clauses of that resolution (of annexation) should be read as applying only to the land boundaries disputed with Mexico.

The Court nevertheless concluded:

> However, in light of the fact that the language employed in the resolution is of general applicability, we should hesitate to limit its effect by reading into it such an additional unexpressed test respecting the extent of Texas' boundary. We think that its language must be taken as applying to Texas' maritime boundaries as well as to its land boundary.
>
> Being based on the 3-league provision of the 1836 Texas Boundary Act, which itself denotes a territorial boundary, the obvious and commonsense meaning of the analogous treaty (of Guadalupe Hidalgo) provision is that it separates the maritime territory of the United States and Mexico.

At another point in the decision the Court expressed a truism, applicable in this or in any other situation, that one factor standing alone is insufficient to make out a case. But it was the very failure of the Court to consider all appropriate factors in the light of the whole picture and its failure to use the same commonsense that it employed in the

Texas case that caused it to decide against Louisiana, Mississippi, and Alabama.

In his dissenting opinion in the Florida case, Mr. Justice Harlan properly cited jurisprudence to the effect that "a newly admitted State, in the absence of an expressed fixative of its boundary by a congressional act of admission or an articulated rejection of its preadmission boundary, may, I think, rely on a presumed congressional purpose to adopt whatever boundary the political entity had immediately prior to its admission as a State."

Again, it was his failure to apply that jurisprudence when speaking for the majority that caused him to decide against these States.

In deciding the Louisiana case, Mr. Justice Harlan undertook to read the mind of LaSalle when he first claimed Louisiana for France in 1862 and to say that this explorer's southward claim "as far as the Mississippi's mouth in the sea, or Gulf of Mexico, about the 27th degree" of parallel "did not indicate an intent to claim to that parallel." Yet, in his dissenting opinion in the Florida case he interpreted the case of *New Mexico* v. *Colorado* (267 U.S. 30) to mean that "The Court held that the location of the boundary was fixed by the events of admission in accordance with a survey of the 37th parallel which had been theretofore made, even though it might not have been a correct survey."

In deciding the Louisiana case, Mr. Justice Harlan went so far as to say that, "Taking—some of the foregoing circumstances—as proved, they do not have the effect urged by Louisiana." Yet, elsewhere in the opinion he cited a case to the effect that a statute construed "in the light of the Indians' historic use of these waters as fishing grounds" was sufficient to include "waters and waterbed, as well as the islands."

(G) THE WATER BOUNDARY

If there is one proposition that is certain beyond peradventure of doubt it is that all Gulf States always had some kind of water boundaries. That proposition was affirmatively stated by the legislative and executive branches, as well as by the judicial branch in the past, and by all Government agencies; by all witnesses, all congressional reports, all the debates, and all Members of Congress, both the proponents and the opponents of the legislation; by all facts of history, the conduct of all acts of foreign policy, in peace and in war, in periods of neutrality and belligerency, during times of blockades, embargoes, and at all other times.

For instance, in the Government's brief it is stated, "the United States, of course, has never denied that the boundary of Louisiana includes water areas." And in the case of *Louisiana* v. *Mississippi* (202 U.S. 1), it was, of course, recognized that Louisiana's south boundary is "a water boundary that extends to the open sea or Gulf of Mexico," and includes "the deep water sailing channel line as a boundary."

In order that there could be no question about it, the Court appended an illustrated diagram to the opinion itself. Look at it. Look at it and see for yourself.

The fact of the matter is that the real concern of the opponents of the legislation was the fact that the Gulf States, for reasons previously outlined, might be justified in claiming more than 3 leagues, and it was they who proposed a limitation to that distance.

Now, since the Louisiana constitution and act of admission spoke in terms of 3 leagues, and since the boundaries of the State and the United States must coexist, the Court found itself in a dilemma. And contrary to the arguments of both the State and the Government, the Court resolved the whole matter by throwing caution, history, statutes, jurisprudence and affirmative actions to the wind and holding that neither France, nor Spain, nor Louisiana, nor Mississippi, nor Alabama, nor the United States itself ever had an original gulf water boundary. This is fantastic.

5. THE PROPER RULING

I have already given my opinion on what the proper, fair, and reasonable ruling should have been. I now give the views of Mr. Justice Black and Mr. Justice Douglas.

Mr. Justice Black said the following:

In *United States* v. *California* (332 U.S. 19) and the cases which followed it, this Court held that the States of California, Texas, and Louisiana did not own or have title to the offshore lands they claimed. If we were now to hold that these States must prove technical title as of the early 1800's in order to satisfy the Submerged Lands Act and that they have succeeded in doing so, we would in effect be overruling our prior cases.

"The Gulf States, * * * were not satisfied with 3 miles but claimed that special circumstances entitled them to 3 leagues (about 10½ miles) or more. They urged, among other things, that claims of the Gulf States and their predecessors in title had always been more expansive than claims of coastal States in other parts of the country; that when admitted to the Union their constitutions contained definitions which, properly interpreted, described boundaries extending 3 to 6 leagues seaward; that the Gulf States had not only claimed these more expansive boundaries, but had always exercised possessory and ownership rights over these marginal lands and their products at will without regard to any 3-mile limitation; and that historically the United States had never questioned any of their claims until disputes arose regarding oil leases during the late 1930's. Moved by these arguments, strongly supported by evidence and concessions, Congress did not limit its grant to the Gulf States to 3 miles of submerged lands, but granted a belt extending all the way to each State's 'boundaries' * * * as they existed at the time such State became a member of the Union * * * but in no event * * * more than * * * 3 marine leagues into the Gulf of Mexico" (43 U.S.C. 1301(b)).

Congress has thus repeatedly emphasized its desire to have the States rights in these submerged lands determined not under technical rules but, as the Senate committee said, in accordance with equitable principles and high standards of justice. To point out specifically what it meant, that committee referred to three similar cases of this Court. One, which is illustrative, was *Indiana* v. *Kentucky* (136 U.S. 479). That case involved a boundary dispute between Indiana and Kentucky. The crucial question was the determination in 1890 of the location of the Kentucky boundary when Kentucky became a State in 1792. That same kind of backward-looking determination of boundaries is involved here with reference to the Gulf States. In the Indiana-Kentucky case, as here, there were no satisfactory markets, and testimony of living witnesses was deemed to be of little value. There was much evidence in the Indiana-Kentucky case, however, that Kentucky had exercised authority over the disputed territory since it first became a State and that Indiana had never challenged the boundary or the authority of Kentucky. Emphasizing the great value of that evidence this Court said: "This long acquiescence in the exercise by Kentucky of dominion and jurisdiction over the island is more potential than the recollection of all the witnesses produced on either side. * * * It is a principle of public law universally recognized, that long acquiescence in the possession of territory and in the exercise of dominion and sovereignty over it is conclusive of the Nation's title and rightful authority." 136 U.S., at 510. The Court went on to quote the following from *Rhode Island* v. *Massachusetts* (4 How. 591, 639), "For the security of rights, whether of States or individuals, long possession under a claim of title is protected. And there is no controversy in which this great principle may be invoked with greater justice and propriety than in a case of disputed boundary." 136 U.S., at 511.

Mr. Justice Douglas was of the opinion that the boundaries of all Gulf Coastal States should be limited to 3 miles. It is enlightening to point out, however, that Justice Douglas, who never lacks for language to express his ideas and who is recognized as a good word carpenter, strongly maintained that Louisiana, Alabama, and Mississippi had made out as good a case as had Texas and Florida. His views in that respect are as follows:

If we acted today with the precision and meticulous care which is demanded in title disputes, we could not, I think, say that the United States in the Treaty of Guadalupe Hidalgo recognized or approved the Texas claim that the territory of Texas extended 3 leagues from the shore.

Yet if we are to decide these cases by substandards (lessening the requirements of proof as we should do it, Congress intended to grant whatever the parties fairly claimed), then I agree with Mr. Justice Black that the discrimination in favor of Texas and against Louisiana, Alabama, and Mississippi is quite unjustified.

If the southeast corner of Texas was 3 leagues off shore, it is difficult for me to see how the southwest corner of Louisiana was not at the same point. From the beginning the United States and Spain fixed their corner west of the Mississippi "on the Gulf of Mexico, at the mouth of the River Sabine in the sea" (S. Stat. 252). If we move the Texas boundary out 3 leagues, it is hard to see why Louisiana's does not accompany it. It has long been recognized that a part of Louisiana's border is "a water boundary" that extends "to the open sea or Gulf of Mexico," *Louisiana* v. *Mississippi* (202 U.S. 1, 43), and includes "the deep water sailing channel line as a boundary" (Id. at 44).

If we were to require the degree of proof of ownership which is ordinarily required in title disputes I would agree that neither Louisiana, Alabama, or Mississippi has met the burden of proof. But if standards and requirements as lax as those used to grant Texas 3 leagues from shore are sufficient for her, they should be sufficient for those other three States.

The heart of the Texan claim is that the United States and Mexico recognized that there was a 3-league maritime belt which each would respect and that this was done in recognition of the validity of the claims contained in the 1836 statute of Texas. This belt was called a boundary; but as I have tried to demonstrate it was not a territorial claim but only a demarcation of zones where the parties' respective law enforcement activities would be recognized and approved. The gulf presents peculiar problems due to its shallow coast. The shallowness of its waters is well documented and our Government was well aware of this condition in 1848. These are the persuasive facts behind the creation of the 3-league belt by the Treaty of Guadalupe Hidalgo and by Mexico in the other treaties concerning the gulf which she negotiated with other nations.

If the policy of measuring the zone of the United States as 3 leagues into the gulf off the shore of Texas is to give Texas property rights to the submerged lands in that zone, the beneficiaries of that concern should be all our Gulf States. At best the language used to describe the seaward territories of Louisiana, Alabama, and Mississippi is ambiguous. The words "to the Gulf of Mexico * * * including all of the islands" within certain designated leagues of the shore can reasonably mean that the boundary line is marked by the islands. There is difficulty in that construction. Yet it is for me no more difficult than the method we use to give Texas a territorial claim in the same belt. All the States on the gulf should be given the same benefit of the doubts that have been resolved in favor of Texas.

I might point out that a plat prepared by the Commissioner of the General Land Office in 1844 does in fact delineate a Louisiana, Mississippi and Alabama gulf boundary line, commencing at the southeast corner of the Texas gulf boundary, thence proceeding east as contended for by these States and as suggested by Mr. Justice Douglas. I am informed that other maps along that line are probably in the possession of the Government, and I intend that they shall be made available at the hearings.

I am satisfied that the foregoing views, along with consideration of the supporting evidence to be adduced at the hearings will convince any reasonable Member of this body that Louisiana, Mississippi and Alabama are entitled to relief.

6. THE NARROW ISSUES AND PROPOSED LEGISLATION

Practically all of the serious and troublesome issues have now been eliminated. The concern of the opponents about so-called exaggerated gulf boundaries has been removed by the not-more-than-3-league provisions put in the bill at their suggestion. The fears of our Government about international questions and violation of foreign policy have been set at rest by the Supreme Court itself. Unfortunately, however, by awarding gulf boundaries of 10½ miles to Texas on the west and to Florida on the east and by reducing those of Louisiana, Mississippi, and Alabama to 3 miles in between, the decision itself is bound to raise very troublesome domestic and foreign questions and to create all manner of confusion; and all of which is additional reason for prompt corrective action by Congress.

The only remaining narrow issues were stated by Mr. Justice Black, as follows:

As Congress indicated, it is time that the problem be solved, the title be quieted and the controversy be stilled. In my judgment to interpret this act in a way which grants the land to Texas and Florida and withholds it from the other Gulf States simply prolongs this costly and disquieting controversy. It will not be finally settled until it is settled the way Congress believes is right, and I do not think Congress will believe it right to award these marginal lands to Texas and Florida and deny them to the other Gulf States.

Our proposal accomplishes that result and nothing more. In other words, we are proposing a simple and minor clarification of the Submerged Lands Act to carry out the original intent of Congress. And in view of the removal of all the original vexatious problems on the one hand, while creating new ones on the other, the narrowness of the issues, and justice of our cause, I think we have the right to expect the support of a fair Government.

A BILL TO AMEND THE SUBMERGED LANDS ACT TO ESTABLISH THE SEAWARD BOUNDARIES OF THE STATES OF ALABAMA, MISSISSIPPI, AND LOUISIANA AS EXTENDING THREE MARINE LEAGUES INTO THE GULF OF MEXICO AND PROVIDING FOR THE OWNERSHIP AND USE OF THE SUBMERGED LANDS, IMPROVEMENTS, MINERALS, AND NATURAL RESOURCES WITHIN SAID BOUNDARIES

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Submerged Lands Act (43 U.S.C. 1312) is amended by inserting "(a)" immediately after "SEAWARD BOUNDARIES.—" and by adding at the end thereof the following new subsections:

"(b) Notwithstanding any other provision of this Act, the seaward boundaries of the States of Alabama, Mississippi, and Louisiana into the Gulf of Mexico are hereby approved and confirmed as a line three marine leagues distant from their coastlines.

"(c) The United States of America hereby conveys, releases, and relinquishes unto the States of Alabama, Mississippi, and Louisiana all right, title, and interest of the United States to the lands, improvements, minerals, and natural resources beneath navigable waters within their respective boundaries as herein established and vests in each of said States the right and power to manage, administer, lease, develop, and use the said lands, improvements, minerals, and natural resources within their respective boundaries."

SEC. 2. The amendment made by the first section of this Act shall take effect as of May 22, 1953.

PRESIDENT'S AGRICULTURAL MESSAGE OF MARCH 16, 1961

The SPEAKER pro tempore. Under the previous order of the House the gentleman from Iowa [Mr. SCHWENGEL] is recognized for 30 minutes.

Mr. SCHWENGEL. Mr. Speaker, because of my great interest in the farm economy and because I represent a farm area that believes in the fundamental American philosophy of freedom and because I represent a farm population that is alert to the modern trends and transitions of our times and because I represent a people who are not afraid of changes and new ideas, I have waited long with great interest for a report from the White House that might point the way to some solutions to the problems that are confronting us in this very difficult time for agriculture and, for that matter, for the entire population of our country.

On March 16, the President sent his message to us on the agriculture question and I had hoped that he would come forward with some brandnew ideas that were consistent with the pioneer traditions of any new frontier, with some new ideas on how to solve the surplus farm problem. But, to my almost complete amazement, I find that the President's message contains no new ideas on how to solve the farm problem.

As I read the message and as I studied the President's approach as outlined in his statement, I came to the very definite conclusion that it was basically the Poage supply control and direct payment scheme of last year, which you recall was soundly defeated in the House of Representatives with the help of at least 100 Democratic Members of the Congress.

The President's message seems to be suggestive of a broad supply management type of legislation that would contain many of the elements of the old discredited Brannan plan, including the compensatory payments idea.

The commodity by commodity approach envisioned by the President in his message, at least as I understood it, would involve national marketing orders, compensatory payments, comprehensive supply control management—and of all things, quotas in pounds, bushels, and bales.

The principle put forth by the President would allow each of some 200 commodity segments of agriculture to actually write legislation that might well disregard the rights of all other producers and the rights of the general public as well.

To me this seems like an amazing proposal to circumvent the Congress. And, if we adopt this philosophy, it could very well be a new idea in government but I would hesitate to want to put the title "New Frontier" with it, because it would not be consistent with anything I understand as the pioneer spirit that was so evident in the early frontier days as truly new frontiers.

If we adopt this philosophy of government for agriculture, Mr. Speaker, we must recognize it for labor, we must grant the same rights to commerce, and probably for that matter if we adopt this principle every trade association in America would have the claim or right to resolve their problems by this same method. We should remember that today there are recognized trade associations in the number of over 2,000. It is not hard to imagine what would happen if we adopted that philosophy. So I suggest to my colleagues that they think seriously on resolving our problems by using this approach.

The suggestion is that if the Congress does not like what the association has brought forward, we have a veto power and the proposal to give that veto power to only one branch of Congress is indeed

amazing. It might have some merit, but it certainly would not be consistent with the philosophy of government as we know it. The suggestion is that we give the veto power to only one branch of the Congress, and, as I think of this idea, I cannot imagine what the thinking was of those people who gave birth to that idea.

In my opinion, this would be abrogating our responsibility as Congressmen, as representatives of the people, because it has always been considered that we should represent the public interest first, the interest of the people we represent second, and the political party we represent third. That would be thrown out of the window. This, in my opinion, is a complete violation of all the concepts of the responsibility of Congress that have been established throughout the years of our Government and the history of our Nation.

It is clear as I read the recommendation and understand this approach that Congress would have absolutely no part in writing farm legislation. It seems to me, then, it would be reduced to a subject very little lower than that of a rubber stamp.

Mr. Speaker, this approach seems almost unbelievable and inconceivable. It is hard for me to think that agricultural leaders who have gained so many advantages through the years, who have helped in so many ways to add to the economic prosperity of our country, who have developed a capacity to produce beyond that of any other country and who have benefited so much under the freedoms and liberties that have been ours as Americans, would even ask for, to say nothing of applauding, this kind of approach to resolving the farm problem.

I might point out, Mr. Speaker, what the President asked for in his recommendation, has not been done for labor. In fact, the labor bill that was written by labor, which was passed upon and debated here in the Congress a couple of years ago, was soundly defeated, and I, along with most Members of this Congress, voted against that.

We have not granted this privilege to schoolteachers or to any other profession, and I am quite sure all of the great educators, especially those who are in the field of political science, would decry this kind of an approach to the problem.

Most certainly throughout history those words have had great influence on legislation. We have not granted them solutions for the problem as they saw it. And the President himself has made recommendations on taxes that are seriously being challenged by the truckers today, who would very much like to write their own version of legislation that they think is needed to resolve the interstate road problem and the financing of the interstate road problem. We certainly have not done this for the Armed Forces; in fact, we are very jealous of our own civil rights and our own responsibilities to control the Army rather than let the Army control us, and it is my contention that we should ever protect our own rights, our civil rights, to control the Army, and never let it have the power to control us and all Americans.

We have not done what is being asked for here for the postal clerks. We have taken the public interest into consideration in legislating for all the broad field of commerce, and this is the reason for the regulatory laws that deal with monopolies and utilities. We have not done this for our retired people who, I believe, have some real claim when they say to us that their position needs to be recognized by the Congress; rather, we have done for them what we felt could be done and was consistent with good fiscal policy.

So, Mr. Speaker, I think if we adopt this philosophy, we would be entering into a sort of class legislation that will get us into real trouble. And it is for that reason that I am taking the floor today to warn the Members of the Congress about the dangers of this kind of an approach to the solution of the farm problem.

Mr. Speaker, I am not so old but what I can remember the days when we had the old NIRA. This was an experiment which is very comparable to what is being suggested here, and so that the Members may better understand what I am talking about I have a brief summary that I ask unanimous consent be placed in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

THE NATIONAL INDUSTRIAL RECOVERY ACT

(Quotations from Fainsod, Gordon, "Palamountain Government and the American Economy" third edition, 1959)

The national industrial recovery bill proposed by President Roosevelt on May 17, 1933, provided for the establishment of industry codes of fair competition by truly representative industrial groups or associations. Codes were to be approved by the President through a new agency constituted at his direction. He might modify code provisions in order to protect consumers, competitors, employees, or the public interest. Violations were to be punishable by fine, and also subject to FTC cease and desist orders, regardless of whether the firm concerned had participated in formulation of the code. If an industry failed to submit a code of its own accord, the President might impose one after notice and hearing. In extreme cases, he might subject an industry to a licensing requirement, no unlicensed firm being permitted to operate. The President might also enter into or approve voluntary agreements among industrialists, or labor organizations, or both.

Codes, licensing requirements, and agreements were all to be exempted from the antitrust laws for the 2-year duration of the act. Every code and agreement was to guarantee employees "the right to organize and bargain collectively through representatives of their own choosing" and to outlaw "yellow dog" contracts. There were also to be provisions concerning wages, hours, and working conditions; maximum hours and minimum wages were to be fixed by collective bargaining wherever possible, but otherwise could be prescribed by the President. All code provisions were to be subject to cancellation or modification at any time, again at the President's discretion.

Although "unfair competition" was undefined, and might presumably include any practices disfavored by the majority of an industry, it was generally agreed to include labor "sweating." In the eyes of labor leaders, the prize provision of the NIRA was section 7, which guaranteed the right of union organization. Once organized, they felt, labor would be assured of sharing in industry's gains from cartelization.

In the Senate, industry did gain one further concession in a new clause giving the President power to limit imports when necessary to render code provisions effective. Thus foreign as well as domestic competition could now be prevented. Special regulation for the oil industry was also provided.

President Roosevelt cast about for a speedier technique of promoting work sharing and wage increases than the necessarily elaborate formulation of semipermanent codes. A solution was found in the NIRA provision for voluntary agreements. At the end of July, under the impetus of a promotional campaign comparable only to a national election or a war-bond drive, over 2 million agreements were negotiated directly between the President and the individual employers.

This President's reemployment agreement (blanket code) protected labor standards and collective bargaining. Neither acceptance of the agreement nor compliance was required by law. Widespread acceptance, however, was secured by the distribution of "Blue Eagle" signs and labels and by a nationwide campaign for consumer boycotts of nonparticipating firms.

Code provisions were of two basic varieties. Those dealing with trade practices were drafted by trade associations or other industry representatives. But as a condition of approval, the NRA required not only the mandatory labor provisions of section 7(a), but also wage, hour, and child-labor regulations on the general lines of the PRA blanket code not to use child labor, to reduce the workweek to 40 hours for white-collar and 35 hours for other workers, to maintain specified wage minima ($12 to $15 per week for white-collar workers and 30 to 40 cents per hour for others).

Labor disputes and disagreements over section 7(a) were major factors in the decline of business confidence in the NRA in 1934–35. Although officially denominated codes of fair competition, NRA codes were, of course, not limited to outlawing trade practices previously considered unfair at common law or under the antitrust acts. They included anything an industry desired which it could persuade the NRA to grant * * * the basis for business support of the NRA was permission for market controls. Such controls generally took the form of direct or indirect limitations on pricing, with less frequent attempts at production control. As NRA officials slowly became hostile to these provisions, business as a whole lost interest in the act.

From the start, the NRA disfavored explicit price fixing. Nevertheless, most of the early codes limited individual firms' discretion in setting prices. In a few cases, machinery was authorized for the direct fixing of price minima. They included bituminous coal, lumber and timber products, and petroleum; in these cases conservation of natural resources was one alleged justification. In cleaning and dyeing, printing, and a few other localized industries with innumerable small units, similar provisions were established in order to outlaw ruinous competition. Over 200 codes also authorized temporary fixing of minimum prices.

Complete regulation of output, like direct minimum price fixing, was sanctioned by the NRA almost exclusively for natural resource industries. Some other codes sought to limit production indirectly by restricting inventories or weekly hours of plant operation. A larger group restricted long-term investment by forbidding acquisition of new machinery or entry of new units into the industry without special authorization. Other more or less common provisions affecting market condi-

tions included basing point systems, limitations of marketing areas, and attempts to favor one or another distributive channel.

The sudden and widespread reorganization of industrial habits engendered by the NIRA upset the preexisting balance of commercial advantage and disadvantage in thousands of individual cases. Complaints from the losers, and from those dissatisfied with their gains, flooded the NRA and Congress.

When Congress convened in 1935, it had to face squarely the question of NIRA extension * * * the legislative process was suddenly cut short by the Supreme Court's sweeping Schechter decision, handed down on May 25, 1935.

A unanimous Court declared the NIRA unconstitutional on two grounds: (1) That it delegated legislative power to the President without adequate standards to guide him in its exercise; and (2) that it invaded the field of intrastate commerce reserved to the States.

The act became law on June 16, 1933. The code-making process was completed by February 1934. NRA approved 557 basic codes, 189 supplementary, and 19 jointly with Agricultural Adjustment Administration.

Mr. SCHWENGEL. Mr. Speaker, this approach offered by the President seems to ask us to vote for a proposition that will recognize what is good for the commodity group, and that in this instance would be the farmer first, and what is good for the political party second and what is good for the country third, rather than the proposition that I referred to earlier, that is sound and consistent with good government, and that is that we consider here the welfare of our country first, the welfare of the people we represent second, and our political party third.

Now, Mr. Speaker, believing as I do that when we criticize we should also have some constructive suggestions, I want to point out that on the 16th of January I introduced a bill calling for a vastly expanded conservation reserve program. On January 3 I made a speech on that subject and pointed out that this program is in the public interest and good for all America, because conservation of our natural resources, especially the soil, is good for all of the people and because this bill authorizes taking out at least 80 million acres of land it will have a salutary effect on what is taking place in our farm economy today. Also it is a voluntary program and therefore consistent with the best traditions of American liberty and freedom as we know it.

I pointed out—and I reiterate for emphasis—that the philosophy of this approach was and is endorsed by every major farm organization in America. Further, I pointed out that the Republican Party in its convention in Chicago endorsed the idea; and, while the Democratic Party did not endorse it in their convention, there was no apparent opposition to this idea in any phase of their proposed program for agriculture for America. Indeed, there were many Democratic Members of the Congress and many other political leaders who privately and publicly endorsed the idea brought forward by my bill of January 16, H.R. 2736, and a refined version of this bill which I introduced later, H.R. 4267, which I introduced February 3.

Mr. Speaker, also I want to point out that every major farm organization in America has endorsed this approach to a solution, or at least a partial solution, of the very difficult but important farm problem that needs our attention.

Mr. Speaker, here is a positive approach. Here is a program that is good for America and for posterity. Here is a program—and I reiterate—that all farm organizations and every farmer I have talked to agree is a logical and a good solution for the farmer and for all of America.

MEDICAL RESEARCH

Mr. CAREY. Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. FOGARTY] may extend his remarks at this point in the RECORD and may include extraneous matter and tables.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FOGARTY. Mr. Speaker, it has been my pleasure to appear before the Congress on many occasions to discuss a variety of matters that are intimately related to improving the health and welfare of the people of America. During the 14 years that I have been deeply concerned with health and welfare matters, I have been privileged to observe substantial increases in the support of medical research. These were made possible by the broad appreciation held by the American people for the economic as well as the human gains that will accrue from adequately supported medical-research programs.

I might add that I think that these tax-supported research programs have certainly fulfilled the expectations which brought them into being. Research programs of the National Institutes of Health, and research and training activities supported in hundreds of institutions throughout the country through grants-in-aid, have accomplished a great deal and certainly have paved the way for many more future conquests of chronic disorders.

As a result of the gains in medical knowledge and techniques, many of our citizens are now surviving illnesses which once might have been inevitably fatal. Yet some of these illnesses still leave devastating effects that account for serious handicaps in speech and hearing for a large segment of our population. Some infections that medical science can now curb with antibiotics and other drug agents often take their toll in other ways, including deafness. More people are surviving certain forms of stroke, only to be robbed of their ability to speak. A reduction in infant mortality has produced an increasing number of children suffering with communication defects.

Just as it is a challenge to prolong life through greater medical knowledge, so must we marshal our efforts in the direction of widening opportunity for the disabled and the handicapped. Besides mobilizing the facilities of medical research to safeguard our citizens' health and welfare, we must acknowledge needs in related areas—rehabilitation and training.

I have introduced today a measure which is of increasing importance and urgency—a proposal which will insure that the growing proportion of persons handicapped by impaired hearing and speech receive the education and rehabilitation that is their right and that will allow them to be more productive members of our society. This legislation proposes the creation of a program of grants-in-aid to support the training of teachers of the deaf, and to supply advanced training to speech pathologists and audiologists. The importance of meeting these needs cannot be underestimated.

For a moment, I would like to direct your attention to this special group of our citizens—8 million in all—who suffer some degree of hearing or speech handicap. Many of these are children, who from birth have been unable to hear the voices of loved ones, or to communicate with others in meaningful speech. Other young people in need of help have been born with cleft palates, are stutterers, or have speech or hearing problems associated with cerebral palsy or mental retardation. Many adults have suffered speech losses as the result of laryngectomy, or have asphasia following a stroke. These impairments are naturally closely associated with severe problems of social isolation and communication for the affected. However, not all their problems are necessarily insurmountable.

Fortunately, about 80 percent of these 8 million are fully capable of education and rehabilitation if the necessary teachers and therapists were available. Yet, it has been estimated that at present not one in five children of school age who need the help of a speech correctionist or hearing therapist is at present receiving this attention. If these children are to attain their rightful places in society, our pitifully inadequate supply of teachers and specialists trained to work in the field of speech and hearing must be remedied. The bill which I am introducing would make this possible.

A recent report has estimated that we need at least 20,000 speech pathologists and audiologists to effectively diagnose, train, and aid in the rehabilitation of the millions handicapped by speech and hearing disorders. It is indeed disheartening to find that only 2,500 certified speech pathologists and audiologists are now available to cope with this growing national problem, just more than 10 percent of the number needed. The number of graduates last year in speech pathology and audiology totaled 563; this year 777 are expected to complete their academic preparation. Reliable sources estimate that to fill the pressing needs, we should have at least 1,500 adequately trained persons entering these fields each year.

The proposal before you represents an important step toward meeting these tremendous needs by making a minimum of funds available to aid in the training of specialized therapists and

teachers. The current deficit of personnel in these areas is so great, and the number of children and adults who desperately need their help is increasing so rapidly, that it will take at least 10 years of concerted action to even partially remedy the need. For this reason, the proposed legislation provides for a program of grants-in-aid to continue for 10 succeeding years, to be initiated at the beginning of the next fiscal year. For the first 2 years, the amount requested for these grants is only $2 million a year, certainly a small amount to remedy an urgent problem which has too long been neglected.

To support the training of teachers for the deaf, the bill calls for a program of grants-in-aid to be awarded to public and nonprofit institutions which are accredited for the training of teachers of the deaf. Such institutions would then use the grants to support the costs of courses and to establish and maintain scholarships. Approval of the grants will be the responsibility of an advisory committee, comprising 12 qualified members, established in the Office of Education. The committee members are to be appointed for 4-year terms by the Commissioner of Education with the approval of the Secretary of Health, Education, and Welfare.

To encourage and facilitate the training of speech pathologists and audiologists, the bill would establish a program of grants-in-aid to assist public and nonprofit institutions in providing such specialized education and in improving their present courses for training. These grants would be made only to institutions which offer programs enabling students to qualify for advanced certificates. The grants may be used to assist in covering the cost of courses of graduate training and study leading to the master's or doctor's degree, and in establishing and maintaining graduate fellowships. Such grants-in-aid would be approved by an advisory committee of 12 members, to be established in the Office of Vocational Rehabilitation.

The bill further provides that the operation of both of these programs be reviewed periodically by each of the advisory committees to insure that the programs are fulfilling their intended purposes. Recommendations relating to the operation and administration of the program, together with any recommendations for additional legislation, would be referred to the Secretary of Health, Education, and Welfare for transmittal to the Congress.

In presenting this legislation, I have attempted to focus attention on a serious problem which exists today and to show that it is a serious one. In my opinion, and in the opinion of those who work in this area, the need for persons who are adequately equipped to aid the audiologically handicapped is becoming critical. The lack of trained therapists is greatly hindering the rehabilitation of a large proportion of our handicapped but useful work force. With our help, a large number of these persons can become gainfully employed, taxpaying citizens. If no help is forthcoming, many must depend on our State and community agencies for support, and represent a never-ending financial burden to both family and community.

It may surprise you to consider that those afflicted with speech and hearing problems comprise 20 percent of our population. These handicapped people are not geographically limited to one section or region of the country—they come from all strata of our society and from all age groups. Their training and rehabilitation represents a national problem which can be dealt with only on a national level. Although many of the States have programs for rehabilitation and training of people with speech and hearing defects, they are unable to cope with the total problem. We can no longer avoid facing this serious issue, for the problem is becoming critical. The relatively small amount of money proposed to initiate a program which will benefit so many people is sure to pay dividends, both in human happiness and economic productivity.

Consider for a moment how essential the ability to communicate easily and quickly is to all of our activities of daily living. The loss of even some measure of these important sensory abilities represents a formidable handicap to the individual in his efforts to achieve a normal, satisfactory, and self-sufficient way of life. Certainly all of us have friends or relatives who are affected directly or indirectly by hearing or speech problems. The increasing proportion of those afflicted with speech and hearing handicaps will be prohibited from assuming their rightful roles in their communities if help is withheld. Can we afford to neglect them any longer? I think not.

I have mentioned that heartening research progress in these disorders has occurred in the past decade. However, a new consideration has arisen as a result of this progress. Specifically, we are becoming aware that our medical knowledge of the disorders of hearing and speech is progressing beyond our capacity for applying that knowledge at a level where the individual may benefit. To apply the fruits of research at the clinical level, the number of professionally trained teachers, speech pathologists, and audiologists must be immediately and substantially increased.

Fortunately, times have changed considerably since the days when handicapped children were looked upon as "marked" and shunned or mistreated. In talking with a number of therapists concerning their work, however, I have been told that a lag or inaccuracy in diagnosing children with hearing losses can sometimes have a disturbingly similar effect. Time and time again a child considered to have a behavior disorder or even to be mentally deficient—and treated accordingly—has, on careful examination, turned out to be suffering from a marked hearing or speech disorder. Other youngsters, regarded as shy or inattentive, are permitted to drift increasingly away from the world of reality. Prompt treatment of these helpless children by trained audiologists and speech pathologists is essential if they are to take their rightful places in a world of sound and hearing, rather than remain confined to their silent uncommunicative worlds.

Treated with understanding, fitted with rehabilitation aids, and enrolled in a course of training that will help him to develop or redevelop the ability to communicate, a deaf child or adult can develop happily and "roundly" as a person. One of the worst aspects of the handicap in the past—isolation through the inability to communicate—can be eased considerably through careful and sympathetic training. The success with which a handicapped child or adult is able to break down the barriers of isolation depends directly upon the skill, the understanding, and the professional training of his teacher.

I urge you to consider this problem carefully and to consider the solution which is now proposed. I urge you to think how these measures might lessen some of the painful social and emotional adjustments that befall those who cannot hear or speak. Their handicaps, understandably, foster feelings of helplessness, lack of equal employment opportunity, and lack of acceptance in other ways. Many more might win their rightful place in society as useful, happy citizens, through our willingness to make funds available to facilitate their education and training.

Today we are often reminded that our progress as a Nation is largely dependent on our progress in education. Surely every child who has the ability to learn has a right to an opportunity to learn. Unless a mental defect also exists, speech and hearing defects do not impair nor change a child's mental faculties. On the other hand, a handicapped child whose education is neglected is robbed of the opportunity to develop his mental capacities properly.

I sincerely hope that each of my colleagues will give this matter his fullest consideration and lend his voice to the insistence that the necessary steps be taken to remedy this situation. It is only just, it is only humane, and it is within the American democratic spirit that we help those handicapped by speech and hearing disorders to help themselves.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MOSHER (at the request of Mr. HALLECK), for March 21, on account of official business representing Science and Astronautics Committee at inspection of Plum Brook Reactor Facility at Sandusky, Ohio.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. WILLIS, for 1 hour, today.

Mr. SCHWENGEL (at the request of Mr. LATTA), for 30 minutes, on March 21.

Mr. BOW (at the request of Mr. LATTA), for 30 minutes, on March 22.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. HOLIFIELD and to include extraneous matter.

Mr. MULTER (at the request of Mr. CAREY) and to include extraneous matter and tables.

Mr. MORRIS (at the request of Mr. CAREY) and to include extraneous matter and tables.

Mr. RODINO (at the request of Mr. CAREY) and to include extraneous matter, notwithstanding it will exceed two pages of the RECORD and is estimated by the Public Printer to cost $202.50.

(The following Members (at the request of Mr. CAREY) and to include extraneous matter:)

Mr. FISHER.

Mr. CELLER.

Mr. FALLON.

Mr. ZABLOCKI.

(The following Members (at the request of Mr. LATTA) and to include extraneous matter:)

Mr. WESTLAND.

Mr. BARRY.

Mr. ROUSSELOT.

Mr. LIPSCOMB.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1822. An act to adjust the amount of funds available for farm operating loans made pursuant to section 21(b) of the Bankhead-Jones Farm Tenant Act, as amended.

ADJOURNMENT

Mr. CAREY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 55 minutes p.m.), the House adjourned until tomorrow, Wednesday, March 22, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

696. A letter from the Secretary of the Air Force, transmitting a draft of a proposed bill entitled "A bill to validate certain payments in settlement of unused accrued leave heretofore made to certain members of the Army and the Air Force"; to the Committee on Armed Services.

697. A letter from the Assistant Secretary of Defense (Installations and Logistics), relative to the amount of funds appropriated to the Department of Defense which have been obligated or contracted to be spent with small business concerns and with other business firms for the month of December 1960, pursuant to Public Law 85–536; to the Committee on Banking and Currency.

698. A letter from the Comptroller General of the United States, transmitting a report on review of supply management activities of the Marine Corps Air Facility, Iwakuni, Japan, Department of the Navy; to the Committee on Government Operations.

699. A letter from the Assistant Secretary of the Navy (Installations and Logistics), relative to a proposal by the Department of the Navy to transfer a non-self-propelled water barge (YWN–72) to the territory of the Virgin Islands of the United States, pursuant to title 10, United States Code, section 7308; to the Committee on Armed Services.

700. A letter from the Comptroller General of the United States, transmitting a report on the audit of the abaca fiber program, administered by General Services Administration (GSA), for the fiscal year ended June 30, 1960 (H. Doc. No. 116); to the Committee on Government Operations and ordered to be printed.

701. A letter from the Attorney General, transmitting a draft of a proposed bill entitled "A bill to amend title 28, United States Code, with respect to fees of U.S. marshals"; to the Committee on the Judiciary.

702. A letter from the Secretary of Commerce, transmitting a draft of a proposed bill entitled "A bill to authorize an additional Assistant Secretary of Commerce"; to the Committee on Interstate and Foreign Commerce.

703. A communication from the President of the United States, relative to urging enactment of legislation for the proposed National Cultural Center in Washington so that the plans may proceed promptly; to the Committee on Public Works.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMPSON of New Jersey: Joint Committee on the Disposition of Executive Papers. House Report No. 181. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. MADDEN: Committee on Rules. House Resolution 229. Resolution for consideration of H.R. 3935, a bill to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in commerce or in the production of goods for commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes; without amendment (Rept. No. 182). Referred to the House Calendar.

Mr. MILLS: Committee of conference. H.R. 4806. A bill to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes (Rept. No. 183). Ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LANE: Committee on the Judiciary. H.R. 1320. A bill for the relief of Edward P. Wall; with amendment (Rept. No. 174). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 1397. A bill for the relief of Arthur B. Tindell; with amendment (Rept. No. 175). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 1424. A bill for the relief of Benjamin E. Campbell; with amendment (Rept. No. 176). Referred to the Committee of the Whole House.

Mr. LIBONATI: Committee on the Judiciary. H.R. 1887. A bill for the relief of Helen Tilford Lowery; without amendment (Rept. No. 177). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 2354. A bill for the relief of Mr. Louis Fischer, Feger Seafoods, and Mr. and Mrs. Thomas R. Stuart; with amendment (Rept. No. 178). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 5178. A bill for the relief of the Reynolds Feal Corp., New York, N.Y., and the Lydick Roofing Co., Fort Worth, Tex.; without amendment (Rept. No. 179). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H.R. 2993. A bill to confer jurisdiction on the U.S. Court of Claims to hear, determine, and render judgment on the claim of Paul Bernstein against the United States; with amendment (Rept. No. 180). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDONIZIO:

H.R. 5736. A bill to amend section 9 of the Federal Reserve Act, as amended, section 18(d) of the Federal Deposit Insurance Act, and section 5155 of the Revised Statutes, as amended, and for other purposes; to the Committee on Banking and Currency.

H.R. 5737. A bill to provide that no member of the Board of Directors of the Federal Deposit Insurance Corporation shall hold any other public office or position and for other purposes; to the Committee on Banking and Currency.

By Mr. BERRY:

H.R. 5738. A bill to make permanent the temporary provisions of Public Laws 815 and 874, 81st Congress, which relate to Federal assistance in the construction and operation of schools in areas affected by Federal activities, and for other purposes; to the Committee on Education and Labor.

By Mr. BOW:

H.R. 5739. A bill to provide for a National Portrait Gallery as a bureau of the Smithsonian Institution; to the Committee on House Administration.

H.R. 5740. A bill to establish a National Armed Forces Museum Advisory Board of the Smithsonian Institution, to authorize expansion of the Smithsonian Institution's facilities for portraying the contributions of the Armed Forces of the United States, and for other purposes; to the Committee on House Administration.

By Mr. DENT:

H.R. 5741. A bill to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals; to the Committee on Education and Labor.

By Mr. FASCELL:

H.R. 5742. A bill to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963; to the Committee on Government Operations.

By Mr. FOGARTY:

H.R. 5743. A bill to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to make available to individuals suffering speech and hearing impairments the specially trained speech pathologists and audiologists needed to help them overcome their handicaps; to the Committee on Education and Labor.

By Mrs. KEE:

H.R. 5744. A bill to provide for a program of civil works in economically distressed areas; to the Committee on Public Works.

By Mr. GEORGE P. MILLER:

H.R. 5745. A bill to provide for the disposition by the Secretary of the Interior of lands within abandoned and forfeited railroad rights-of-way, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. PERKINS:

H.R. 5746. A bill to provide that in determining the amount of retired pay, retirement pay, or retainer pay payable to any enlisted man, all service shall be counted which would have been counted for the same purposes if he were a commissioned officer; to the Committee on Armed Services.

H.R. 5747. A bill to amend the Civil Service Retirement Act to increase from 2 to 2½ percent the retirement multiplication factor used in computing annuities of certain employees engaged in hazardous duties; to the Committee on Post Office and Civil Service.

By Mr. RHODES of Pennsylvania:

H.R. 5748. A bill to provide for a National Portrait Gallery as a bureau of the Smithsonian Institution; to the Committee on House Administration.

By Mr. STRATTON:

H.R. 5749. A bill to provide for the filing of bonds by packers to secure the performance of their obligations with respect to purchases in commerce of livestock; to the Committee on Agriculture.

By Mr. WALTER:

H.R. 5750. A bill to amend section 1651 of title 28, United States Code, so as to require the concurrence of not less than five Justices in the granting of writs of certiorari by the Supreme Court; to the Committee on the Judiciary.

H.R. 5751. A bill to amend the Subversive Activities Control Act of 1950 so as to require the registration of certain additional persons disseminating political propaganda within the United States as agents of a foreign principal, and for other purposes; to the Committee on Un-American Activities.

By Mr. CAHILL:

H.R. 5752. A bill to provide that the Secretary of the Army shall acquire additional land for the Beverly National Cemetery, N.J.; to the Committee on Interior and Insular Affairs.

By Mr. CELLER:

H.R. 5753. A bill to provide that the district courts shall be always open for certain purposes, to abolish terms of court, and to regulate the sessions of the courts for transacting judicial business; to the Committee on the Judiciary.

H.R. 5754. A bill to carry into effect a provision of the Convention of Paris for the Protection of Industrial Property as revised at Lisbon, Portugal, October 31, 1958; to the Committee on the Judiciary.

H.R. 5755. A bill to amend title 10, United States Code, to authorize the Secretary of Defense, the Secretaries of the military departments, and the Secretary of the Treasury to settle certain claims for damage to, or loss of, property, or personal injury or death, not cognizable under any other law; to the Committee on the Judiciary.

By Mr. HARRISON of Wyoming:

H.R. 5756. A bill to amend title 23 of the United States Code to extend to July 1, 1963, the period within which certain agreements relating to outdoor advertisements may be entered into by the Secretary of Commerce and the States; to the Committee on Public Works.

By Mr. JOHNSON of California:

H.R. 5757. A bill to amend section 111, title 23 of the United States Code, relating to the use of and access to rights-of-way on the Interstate System; to the Committee on Public Works.

By Mr. LANKFORD:

H.R. 5758. A bill vesting in the American Battle Monuments Commission the care and maintenance of the original Iwo Jima Memorial on Mount Surabachi, Iwo Jima volcanic islands, Pacific Ocean area; to the Committee on Foreign Affairs.

By Mr. LIBONATI:

H.R. 5759. A bill to amend the Immigration and Nationality Act so as to provide that the base year for determining any quota shall be 1950, to provide that the unused annual quota of any quota area be made available for use in quota areas where the annual quota is oversubscribed, and for other purposes; to the Committee on the Judiciary.

By Mr. MARTIN of Nebraska:

H.R. 5760. A bill to revise the boundaries of the Scotts Bluff National Monument, Nebr., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MOORHEAD of Pennsylvania:

H.R. 5761. A bill to authorize the Administrator of the Housing and Home Finance Agency to assist State and local governments and their public instrumentalities in planning and providing for necessary community facilities to preserve and improve essential mass transportation services in urban and metropolitan areas, and for other purposes; to the Committee on Banking and Currency.

By Mr. MORRISON:

H.R. 5762. A bill vesting in the American Battle Monuments Commission the care and maintenance of the original Iwo Jima Memorial on Mount Surabachi, Iwo Jima volcanic islands, Pacific Ocean area; to the Committee on Foreign Affairs.

H.R. 5763. A bill to provide retirement eligibility for certain Federal employees serving in the Canal Zone whose rates of compensation are adversely affected due to any international commitment, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MURPHY:

H.R. 5764. A bill to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to make available to individuals suffering speech and hearing impairments the specially trained speech pathologists and audiologists needed to help them overcome their handicaps; to the Committee on Education and Labor.

By Mr. TAYLOR:

H.R. 5765. A bill to authorize the purchase and exchange of land and interests therein on the Blue Ridge and Natchez Trace Parkways; to the Committee on Interior and Insular Affairs.

By Mr. WHALLEY:

H.R. 5766. A bill to amend the Fair Labor Standards Act of 1938, to increase the minimum wage provided for therein to $1.15 an hour; to the Committee on Education and Labor.

By Mr. ALFORD:

H.R. 5767. A bill to amend section 3574 of title 39, relating to night work compensation; to the Committee on Post Office and Civil Service.

By Mr. ANFUSO:

H.R. 5768. A bill to establish a Department of Public Relations; to the Committee on Government Operations.

By Mr. ASPINALL:

H.R. 5769. A bill to extend the purchase program for beryl ore under the Defense Production Act of 1950 to include other forms of beryllium ore; to the Committee on Banking and Currency.

By Mr. ROGERS of Colorado:

H.R. 5770. A bill to extend the purchase program for beryl ore under the Defense Production Act of 1950 to include other forms of beryllium ore; to the Committee on Banking and Currency.

By Mr. CHENOWETH:

H.R. 5771. A bill to extend the purchase program for beryl ore under the Defense Production Act of 1950 to include other forms of beryllium ore; to the Committee on Banking and Currency.

By Mr. BARING:

H.R. 5772. A bill to amend the Fair Labor Standards Act of 1938 to increase to 50 cents per hour the minimum wage applicable to physically handicapped workers employed in sheltered workshops and to provide for periodic increases beginning January 1, 1963; to the Committee on Education and Labor.

By Mr. BENNETT of Florida:

H.R. 5773. A bill to extend the temporary provisions of Public Laws 815 and 874, 81st Congress, for 4 years, and to amend Public Law 874 to provide for counting children of members of the Armed Forces for certain purposes, where such members are overseas; to the Committee on Education and Labor.

By Mr. DANIELS:

H.R. 5774. A bill to prevent the use of stopwatches, work measurement programs, or other performance standards operations as measuring devices in the postal service; to the Committee on Post Office and Civil Service.

By Mr. DAVIS of Tennessee:

H.R. 5775. A bill to provide tax equity through the taxation of cooperative corporations and to provide tax credits for recipients of dividends from genuine cooperatives; to the Committee on Ways and Means.

By Mr. DENT:

H.R. 5776. A bill relating to certain inspections and investigations in metallic and nonmetallic mines (excluding coal and lignite mines) for the purpose of obtaining information relating to health and safety conditions, accidents, and occupational diseases therein and for other purposes; to the Committee on Education and Labor.

By Mr. EVINS:

H.R. 5777. A bill to amend the Renegotiation Act of 1951 to provide for the recapture by the United States of excessive profits made under defense contracts with the Tennessee Valley Authority and the Federal Aviation Agency; to the Committee on Ways and Means.

By Mr. FULTON:

H.R. 5778. A bill to amend title 38 of the United State Code in order to provide a 1-year period during which certain veterans may be granted national service life insurance; to the Committee on Veterans' Affairs.

H.R. 5779. A bill to amend the Immigration and Nationality Act so as to provide that the base year for determining any quota shall be 1950, to provide that the unused annual quota of any quota area be made available for use in quota areas where the annual quota is oversubscribed, and for other purposes; to the Committee on the Judiciary.

By Mrs. GRANAHAN:

H.R. 5780. A bill to amend title 39 of the United States Code to establish certain promotion benefits for postal field service employees; to the Committee on Post Office and Civil Service.

H.R. 5781. A bill to amend title 39 of the United States Code to effect a change in organizational relationships of the key position of foreman, mails (KP-21)—level 7; to the Committee on Post Office and Civil Service.

H.R. 5782. A bill to provide an allowance for work clothing for certain postal field

service employees; to the Committee on Post Office and Civil Service.

H.R. 5783. A bill to amend title 39 of the United States Code to establish an improved system of longevity steps for postal field service employees, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. HORAN:

H.R. 5784. A bill to provide a program of tax adjustment for small business and for persons engaged in small business; to the Committee on Ways and Mean.

By Mr. HORAN (by request):

H.R. 5785. A bill to establish a national cemetery at Spokane, Wash., on lands which formerly constituted George Wright Air Force Base; to the Committee on Interior and Insular Affairs.

By Mr. KEITH:

H.R. 5786. A bill to provide for the establishment of Cape Cod National Seashore; to the Committee on Interior and Insular Affairs.

By Mr. MOORE:

H.R. 5787. A bill to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of interstate enterprises engaged in retail trade, and to increase the minimum wage under the act to $1.25 an hour; to the Committee on Education and Labor.

By Mr. PERKINS:

H.R. 5788. A bill to amend section 9(b)(3) of the National Labor Relations Act so as to eliminate the provision thereof prohibiting the certification, as bargaining representative of persons employed as guards, of a labor organization which admits to membership, or is affiliated with an organization which admits to membership, employees other than guards; to the Committee on Education and Labor.

By Mr. ROGERS of Texas:

H.R. 5789. A bill to amend title 28 of the United States Code to require that all decisions of the Supreme Court shall be participated in by the full Court, and that any vacancies or absences in the membership of the Court shall be temporarily filled by circuit judges; to the Committee on the Judiciary.

By Mrs. ST. GEORGE:

H.R. 5790. A bill to establish a cropland adjustment program; to the Committee on Agriculture.

By Mr. WICKERSHAM:

H.R. 5791. A bill to amend title 38 of the United States Code in order to provide a 2-year period during which certain veterans may be granted national service life insurance; to the Committee on Veterans' Affairs.

By Mr. BOGGS:

H.R. 5792. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. COLMER:

H.R. 5793. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. McSWEEN:

H.R. 5794. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. HÉBERT:

H.R. 5795. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. MORRISON:

H.R. 5796. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. PASSMAN:

H.R. 5797. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. THOMPSON of Louisiana:

H.R. 5798. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. WILLIS:

H.R. 5799. A bill to amend the Submerged Lands Act to establish the seaward boundaries of the States of Alabama, Mississippi, and Louisiana as extending 3 marine leagues into the Gulf of Mexico and providing for the ownership and use of the submerged lands, improvements, minerals, and natural resources within said boundaries; to the Committee on the Judiciary.

By Mr. ANFUSO:

H.R. 5800. A bill to authorize appropriations to the National Aeronautics and Space Administration for special research and development; to the Committee on Science and Astronautics.

By Mr. COAD:

H.R. 5801. A bill to extend rural mail delivery service; to the Committee on Post Office and Civil Service.

By Mr. HOFFMAN of Michigan:

H.R. 5802. A bill to amend chapter 53 of title 10, United States Code, to provide for the prompt notification to members of the Armed Forces of any indebtedness they may have to the United States arising out of overpayments of pay and allowances; to the Committee on Armed Services.

By Mr. KING of Utah:

H.R. 5803. A bill to authorize appropriations to the National Aeronautics and Space Administration for special research and development; to the Committee on Science and Astronautics.

By Mr. MULTER:

H.R. 5804. A bill to prescribe a national policy with respect to the acquisition and disposition of proprietary rights in scientific and technical information obtained and inventions made through the expenditure of public funds; to establish in the executive branch of the Government a Federal Inventions Administration to administer in the public interest the proprietary rights of the United States with respect to such information and inventions; to encourage the contribution to the United States of inventions of significant value for national defense, public health, or any national scientific program; and for other purposes; to the Committee on the Judiciary.

By Mr. POWELL:

H.R. 5805. A bill to amend the National Defense Education Act of 1958 to establish a program for training members of the Peace Corps; to the Committee on Education and Labor.

By Mr. RODINO:

H.R. 5806. A bill to make available to children who are handicapped by deafness the specially trained teachers of the deaf needed to develop their abilities and to make available to individuals suffering speech and hearing impairments the specially trained speech pathologists and audiologists needed to help them overcome their handicaps; to the Committee on Education and Labor.

H.R. 5807. A bill relating to the Italian American War Veterans of the United States, Inc., and the status of that organization under certain laws of the United States; to the Committee on Veterans' Affairs.

H.R. 5808. A bill to provide a deduction for income tax purposes, in the case of a disabled individual, for expenses of transportation to and from work; and to provide an additional exemption for income tax purposes for a taxpayer or spouse who is physically or mentally incapable of caring for himself; to the Committee on Ways and Means.

By Mrs. SULLIVAN:

H.R. 5809. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for income tax purposes of certain expenses incurred by the taxpayer for the education of a dependent; to the Committee on Ways and Means.

By Mr. ZABLOCKI:

H.R. 5810. A bill granting the consent of Congress to a Great Lakes Basin compact, and for other purposes; to the Committee on Foreign Affairs.

By Mr. DAVIS of Tennessee:

H.J. Res. 325. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. DOWDY:

H.J. Res. 326. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. DOWDY (by request):

H.J. Res. 327. Joint resolution designating the week of May 14–20, 1961, as Police Week and designating May 15, 1961, as Peace Officers Memorial Day; to the Committee on the Judiciary.

By Mr. EVINS:

H.J. Res. 328. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. FENTON:

H.J. Res. 329. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. RYAN:

H.J. Res. 330. Joint resolution proposing an amendment to the Constitution of the United States to repeal the 22d amendment thereto; to the Committee on the Judiciary.

By Mr. FULTON:

H.J. Res. 331. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. BARRY:

H. Con. Res. 200. Concurrent resolution to establish a date for adjournment of Congress; to the Committee on Rules.

By Mr. LANE:

H. Con. Res. 201. Concurrent resolution expressing the sense of Congress that all of our U.S. naval shipyards and facilities be maintained on a fully manned operational basis performing essential Navy or other Department of Defense work in the interest of our national defense, and that the President of the United States be urged to instruct the Secretary of Defense to take all necessary steps to insure this end, including the immediate cancellation and withdrawal of any and all instructions or orders issued or contemplated by the Department of the Navy incompatible with this purpose; to the Committee on Armed Services.

By Mr. GEORGE P. MILLER:

H. Con. Res. 202. Concurrent resolution expressing the sense of Congress that all of our U.S. naval shipyards and facilities be maintained on a fully manned operational basis performing essential Navy or other Department of Defense work in the interest of our national defense, and that the President of the United States be urged to instruct the Secretary of Defense to take all necessary steps to insure this end, including the immediate cancellation and withdrawal of any and all instructions or orders issued or contemplated by the Department of the Navy incompatible with this purpose; to the Committee on Armed Services.

By Mr. POFF:

H. Con. Res. 203. Concurrent resolution favoring action to exclude Cuban Government representatives from membership on the Inter-American Defense Board; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. BREEDING: Memorial of the Kansas State Legislature notifying the U.S. Army Chief of Engineers of the desire of the Kansas Legislature relative to water supply features in Milford Reservoir and other authorized reservoir projects; to the Committee on Public Works.

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to imports of livestock and livestock products; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Georgia, memorializing the President and the Congress of the United States relative to a resolution requesting Congress to propose an amendment to the U.S. Constitution, and for other purposes; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of Montana, memorializing the President and the Congress of the United States relative to requesting the issuance of a license by the Federal Power Commission for the construction and operation of dams and hydroelectric facilities at Buffalo Rapids Sites Nos. 2 and 4 in Lake County and Sanders County, Mont.; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Legislature of the State of New York, memorializing the President and the Congress of the United States relative to the construction of a deepwater canal linking Lakes Erie and Ontario; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Pennsylvania, memorializing the President and the Congress of the United States relative to urging Congress to reestablish a Civilian Conservation Corps; to the Committee on Education and Labor.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States to oppose national preservation acts; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States to provide adequate facility for the crossing of the Colorado River in the vicinity of Hite, Utah; to the Committee on Public Works.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States relative to requesting the enactment of legislation regulating importing of lead and zinc; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of Utah, memorializing the President and the Congress of the United States to provide legislation designed to afford adequate protection for domestic industry in the field of international trade; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ABBITT:

H.R. 5811. A bill for the relief of Harry L. Watson; to the Committee on the Judiciary.

H.R. 5812. A bill for the relief of James E. Silver; to the Committee on the Judiciary.

By Mr. HEALEY:

H.R. 5813. A bill for the relief of Joseph A. Simon; to the Committee on the Judiciary.

By Mr. LESINSKI:

H.R. 5814. A bill for the relief of Bessie Kour; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H.R. 5815. A bill for the relief of Tai Ju Seo and Il Ra Han Seo; to the Committee on the Judiciary.

By Mr. GEORGE P. MILLER:

H.R. 5816. A bill for the relief of Margaret Barker; to the Committee on the Judiciary.

By Mr. OLSEN:

H.R. 5817. A bill for the relief of Shi-Kuang Yao; to the Committee on the Judiciary.

By Mr. WALTER:

H.R. 5818. A bill for the relief of Mrs. Catherine M. Halenar; to the Committee on the Judiciary.

By Mr. FULTON:

H.J. Res. 332. Joint resolution to authorize the appointment of General of the Army Douglas MacArthur as General of the Armies of the United States; to the Committee on Armed Services.

PETITIONS, ETC.

Under clause 1 of rule XXII,

100. The SPEAKER presented a petition of L. B. Thomas, city clerk, Pomona, Calif., relative to urging support and approval of legislation to allow municipal corporations to acquire Federal surplus property, which was referred to the Committee on Government Operations.

EXTENSIONS OF REMARKS

Wiley-Dodd Interview on Communism

EXTENSION OF REMARKS
OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Tuesday, March 21, 1961

Mr. WILEY. Mr. President, communism continues to be the No. 1 threat to our security. For the future, we can expect that the growing power, economically, as well as militarily, of the Soviet bloc, will present an even greater threat, not only to the security of the United States, but to the survival of freedom in the world.

To cope with such broad-scope dangers, we need realistic policies at home and abroad.

Recently, I was privileged to discuss highlights of the Communist challenge—particularly as these relate to our internal security—with the distinguished vice chairman of the Senate Internal Security Subcommittee, the Honorable THOMAS J. DODD, in a radio-television program. I ask unanimous consent to have excerpts of the interview printed in the CONGRESSIONAL RECORD.

There being no objection, the excerpts were order to be printed in the RECORD, as follows:

WILEY-DODD URGE GREATER CITIZEN ACTION PROGRAM TO COMBAT COMMUNISM

Senator WILEY. The Nation—now and in the future—must keep alert to guard against threats to its security at home and abroad. On global and domestic fronts the Communists—deadly enemies of freedom—pursue their goal of world conquest. How? By aggression, subversion, sabotage, infiltration. What tactics do they use? All kinds: Open and secret, legal and illegal, ethical and unethical, humanitarian and genocidal.

Confronted by this great, and growing, threat to our survival, we need a strong security system, internally and externally, to parry, and counter, the deadly thrusts of this enemy at the heart of America. In the face of a Red enemy, constantly probing for weak spots in our system, however, we need to further strengthen our internal security efforts, as well as to be better educated about, and armed against, overall Communist threats to our security.

At this time, we are privileged to welcome to the program the Honorable THOMAS DODD, vice chairman of the Internal Security Subcommittee of the U.S. Senate. Welcome, TOM.

Senator DODD. Thank you, Senator WILEY. I consider it a privilege to join you in a discussion of threats to our internal security. Only if the public is aware of, and alert to, these dangers, can we take the necessary steps to protect our Nation and way of life.

Senator WILEY. Is there any doubt in your mind that communism, at home and abroad, is the No. 1 threat to our security?

Senator DODD. None at all.

Senator WILEY. What about the U.S. Communist Party? According to estimates, it has a membership of about 25,000 members.

Senator DODD. In my judgment, that's an extremely rough estimate. The Reds, as you well know, operate in spy-like fashion. Consequently, it is extremely difficult to get a clear picture of the party and its activities. Organized in 1919, the Reds, working openly and secretly, have agitated for strikes, riots, social unrest, and demonstrations, such as

the riots last year against the House Un-American Activities Committee hearings in San Francisco. In addition, they have engaged in espionage, sabotage, subversion, and other acts that threaten our security.

Senator WILEY. In your judgment, are U.S. Communists closely tied to the apron strings of Moscow?

Senator DODD. In any sound assessment, the Communist Party U.S.A. must be considered an arm of world communism. Allied with this increasingly powerful international conspiracy, it is especially dangerous.

Senator WILEY. You feel, then, that the U.S. Reds, ready to take orders from Moscow, would rise up against the United States, if they might be successful?

Senator DODD. Yes. The evidence was best presented by Gus Hall, the No. 1 U.S. Communist. When asked the question: "And are you willing to take up arms and overthrow the constituted authorities?" he answered: "When the time comes, yes."

In these five simple words lie the deadly promise of communism.

Senator WILEY. Recognizing this grave threat, we, naturally, need to keep our laws up to date for greater security.

Senator DODD. As a member and former chairman of the Senate Judiciary Committee, Senator, you have long exhibited a deep concern about the Red dangers; and have forthrightly supported efforts to strengthen our laws, law enforcement agencies and judicial system.

You well recall, of course, the acts of Congress dealing with the Communist menace? These include:

1. The Voorhis Act of 1940, requiring that any organization in the United States engaged in political activity and subject to foreign control would be required to register with the Attorney General of the United States.

2. The Smith Act of 1940, prohibiting the teaching and advocacy of overthrowing the Government by force or violence, and also membership in such an organization with knowledge of this purpose; and

3. The Internal Security Act of 1950, requiring that any Communist organization or front register its members, disclose its finances, and label its propaganda as Communist.

Senator WILEY. Through the years, also several States—and rightly so—have established special committees to investigate subversive activities and recommend necessary legislation. This helps, I believe, to focus public attention on—and more effectively deal with—the dangers of communism at home.

Senator DODD. I am seriously concerned, however, with a serious shortcoming in our efforts to deal legally with this danger to our security. For the most part, laws relating to internal security are based on past experience, rather than on anticipation of future problems. The Communists—on the other hand—are long-range conspirators, planning far into the future. Consequently, we cannot always be sure that legislation, in itself, will guarantee the internal security of the Nation.

Senator WILEY. That is true. Recognizing this situation, we must make greater efforts to gear our laws—including the updating of existing statutes, and the writing of new ones—to the future, not the past.

Senator DODD. In addition to Federal and State action, there is also a real need for alertness, and a willingness to act, at the local community level. The private citizen—individually, and through his civic, labor, religious, education, business, cultural, and other organizations can do much to thwart the aims of communism and strengthen our free system.

Senator WILEY. I agree. The expulsion from the CIO in 1949 and 1950, of 11 Communist-dominated unions, for example, represents one of the worst setbacks ever inflicted on the United States Communist Party.

YOUTH—MAJOR TARGET OF REDS

We must be alerted to the great effort of communism, also, to reach, and convert the youth—not only of the United States, but of the world.

Senator DODD. Very definitely, Senator WILEY. The successful Communist exploitation and manipulation of youth and student groups throughout the world today is a major challenge which free world forces must meet and defeat. Recent events clearly reveal that world communism has launched a massive campaign to capture and maneuver youth and student groups.

The vigor and vitality of such groups constitutes an explosive force. Channeled into proper outlets, it can accomplish immeasurable good for a peace-and-progress world. Manipulated into destructive channels, however, this force can create chaos. Overall, the capture of the youth of the world is a major goal of Communist strategy. We must therefore, take more effective measures to prevent our youth from being taken in by innocent-looking, but often dangerous, lures thrown out by the Reds.

Senator WILEY. Overall, an effective security system requires teamwork—and dedicated cooperation efforts—between citizens and their local, State, and Federal law-enforcement agencies.

Let me say, however, that I don't believe in witch hunts; or in creating a climate of fear in which people jump at shadows. To the contrary: I am confident that by effective, vigilant law enforcement—and maximum cooperation of our citizens—we can minimize the Communist threat to our internal security, and catch and punish violators of laws.

Now, TOM, do you have any recommendations for more effective "citizen action" to combat the menace of communism?

Senator DODD. As an individualist—like yourself, Senator WILEY—I naturally respect the rights of each citizen to interpret his civic, patriotic responsibility according to his own conscience.

Nevertheless, I believe there are definite steps which would, if taken, better enable us to cope with the Red menace. These include greater efforts to (1) educate our citizens to the true nature, dangers, and tactics of United States and international communism; (2) dedicate ourselves more completely to the ideas and ideals of freedom; (3) support efforts to further improve our free society; (4) exercise the right to vote—electing representatives who would enable us to progress in the right direction, but also effectively fight against our enemies; (5) imbue in our citizens a great realization that we are in a battle of survival against communism; apathy could be fatal; and (6) strengthen our efforts to eliminate bigotry, prejudice, hate—all blights on our national integrity.

Senator WILEY. I concur wholeheartedly.

As vice chairman of the Senate Internal Security Subcommittee, you are doing a vigorous, splendid job.

Now, as we discussed earlier, communism in this country cannot be isolated from the world conspiracy. Would you give us a brief look—from your vantage point—at the global horizons on which communism threatens the survival of freedom.

Senator DODD. Currently, there are an estimated 36 million Communists working in 86 countries around the world. Overall, they control about 1 billion people, and vast land and natural resources. Witness the activity of the Communists in Cuba, Laos, Africa, South America, and elsewhere on this globe. Day by day, the Reds are attempting to further expand and mobilize this empire into a machine to take over the world.

As a ranking minority member on both the Judiciary and Foreign Relations Committees, you, Senator WILEY, have had long experience in fighting this menace to freedom at home and abroad. How do you evaluate the situation?

Senator WILEY. From experience—and the facts of life in the 1960's—I can say this: Winning the battle against communism will not be easy. The challenge will require a total effort by our own people—and those of our allies. The actions will involve further strengthening our jet-missile-nuclear-space defense—to serve as a deterrent against would-be aggressors; bolstering the free world alliances—economically and politically, as well as militarily; stepping up our offensive on the ideological battlefront; finding realistic solutions to our economic problems to better enable our free enterprise system to meet the production-line challenge of the Communist system; and, above all, revitalizing in our citizens the patriotic, moral, and spiritual dedication to the cause of freedom.

Even with an all-out effort to combat communism, however, we can expect a long, difficult struggle.

Senator DODD. You're right, Senator WILEY. Failing to alert our people and dedicate the necessary resources to protecting freedom would spell grave dangers for our future. If we mobilize—in effort, spirit, and resources—however, I am confident that we can, and will, win the battle.

Senator WILEY. Now, TOM, I want to express my gratitude for your taking time out of your busy schedule to join me in a discussion of a topic of deep interest to my home folks in Wisconsin. Thank you very much.

Byelorussian Independence Day

EXTENSION OF REMARKS

OF

HON. GLENARD P. LIPSCOMB

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1961

Mr. LIPSCOMB. Mr. Speaker, March 25 will be a day of deep significance and importance to Byelorussians and their friends everywhere. On that day, 43 years ago, Byelorussia was proclaimed an independent state.

Byleorussia's existence as an independent state unfortunately was short lived. However, the strong spirit of its people which won that independence goes on. This spirit has existed over the course of many centuries and it is still strong and firm today.

Byelorussians can proudly boast of their long and glorious history, which antedates the history of Russia. Though that country early in modern times became a part of Russia and many attempts were made to eradicate all Byelorussian tradition and distinctive national traits, the Byelorussian people have never been willing to forgo and forget their national and individual identity. They have always wanted to regain their freedom and independence, and for centuries set political independence for their national goal. They obtained that goal in 1918.

In that year, when the decrepit czarist regime in Russia was no more, and the new Communist regime there was still in its infancy, the Byelorussians regained their freedom and proclaimed

their independence by establishing the Byelorussian National Republic. At the time it was hoped that some 10 million Byelorussians, having become sovereign in their historic homeland and masters of their own destiny, would be allowed to enjoy the fruits of freedom in peace. Their subsequent history however took a sad and tragic turn.

Early in 1921, before the Byelorussians had sufficient time to consolidate and strengthen their government, Communists attacked and overran the country, thus putting an end to the independent Byelorussian National Republic. Since that time little is heard of the country or of its people. Today, and for more than four decades, these sturdy and stouthearted Byelorussians have been suffering under the ruthless regime of Communist totalitarian tyranny maintained by the Kremlin. These people, even under the worst of tyrannies, have not given up their hope for freedom and independence. They still ever fervently cherish that noble ideal, and at this 43d anniversary of the independence day, all of us in the free world wish them strength and fortitude in their struggle against Communist tyranny.

Major League Baseball for San Juan, P.R.

EXTENSION OF REMARKS
OF
HON. EMANUEL CELLER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. CELLER. Mr. Speaker, last week, I sent a letter to Commissioner of Baseball Ford C. Frick proposing that organized baseball give consideration to the establishment of a major league baseball franchise in San Juan, P.R.

I proposed that San Juan either be added as one of the new franchises in the two major leagues or that it be part of a new third major league. Aside from the advantage this would create for baseball in general, I know of no better way to enhance Latin American cordial relations than to establish firmly in one of our neighboring countries to the south of us a new baseball team embraced within either of our big leagues. This may be difficult of achievement but it is not impossible.

I also mentioned some of the many talented baseball players in our present major league teams who have come from Puerto Rico and indicated that the distance between Puerto Rico and many of the existing cities in the major leagues is no longer a serious factor in view of this jet-propelled age.

The text of my letter is as follows:

MARCH 16, 1961.

DEAR COMMISSIONER FRICK: A most interesting proposal has been suggested to me recently that I wish to call to your attention. This proposal has my heartiest endorsement.

The proposal is to accord a major league baseball franchise to the Latin American city of San Juan, P.R. Aside from the advantage this would create for baseball in general, I know of no better way to enhance Latin American cordial relations than to establish firmly in one of our neighboring countries to the south of us a new baseball team embraced within either of our big leagues. This may be difficult of achievement but it is not impossible. Baseball in Puerto Rico is a most popular sport. Evidence of the intense joy that Puerto Ricans derive from baseball may be seen any weekend at the Yankee Stadium, where great numbers of Puerto Ricans, residents of the city of New York, are cheering on their favorites.

Puerto Rico has supplied many talented baseball players to our present league teams. To mention some outstanding in the sport, we have: Hi Bithorn, Chicago Cubs; Luis Rodriquez Olmo, Dodgers; Luis Canena Marquez, Pirates; Carlos Bernier, Pirates; Ruben Gomez, Giants; Roberto Clemente, Pirates; Vic Power, Cleveland; Nino Escalera, Cincinnati; Orlando Cepeda, Giants; Jose A. Pagan, Giants; Terin Pizarro, Milwaukee. Luis Tite Arroyo is probably one of the mainstays of the Yankee pitching staff.

The distance between Puerto Rico and many of the larger cities may no longer be deemed a factor in this jet propelled age. Puerto Rico has a huge baseball-hungry population. It is also a warm weather city where baseball may be played the year round.

I am informed that a number of public spirited Puerto Ricans would be willing to join a group of Americans to finance such a team in Puerto Rico and I am advised that the Puerto Rican Government has been approached on this matter, and its Administrator of Parks, Senor Monagas, made the following statement:

"This department (Commonwealth of Puerto Rico Public Parks and Recreation Administration) will provide (if assurances by either major league is given that a franchise will issue to a San Juan club) for the use by the new major league San Juan club, a stadium with a seating capacity of not less than 50,000 persons.

Each of the two major baseball leagues has already expanded as a result of public pressure from 8 to 10 teams in as many cities. These four new cities are all in the continental U.S.A. I am also informed that telegraphic advices were given to you and Messrs. Giles and Cronin, National and American League baseball presidents, under date of November 29, 1960, that San Juan would welcome officially a franchise in either league.

I would even heighten my baseball sights. I would envisage the possibility of a team in Tokyo, Japan, or in Mexico City, Mexico. Baseball has inspired the youth of Japan and Mexico and teams have been organized all over those countries. I also refer to Panama, Venezuela, Nicaragua—all of which have many baseball teams. I omit Cuba because of present conditions there, though there is a great reservoir of baseball talent in Cuba. It is interesting to note that even Dictator Castro realizes the importance of baseball by expressing his willingness to grant exit permits to Cuban major league players to enable them to participate in organized baseball in the United States during the coming season.

One of the best ways to create amity and accord and understanding between the countries is by mutual sport contests.

If, for any reason, a new San Juan team could not be fitted into the regular playing schedule of the big leagues, it might be well to ponder a third league of cities partly in and partly out of continental United States.

As was stated to me in a memorandum submitted to me by Mr. M. A. Krisel to show the interplay of sports in general and baseball in particular and their influences upon the various languages of the world, I quote Prof. Mario Pei, in his "The Story of Language," page 165:

"Sports and games penetrate the language to the same extent that they are penetrated by it. The English tongue is replete with sporting terminology which has overrun its bank ('hit-and-run drivers,' 'to pinch hit for someone,' 'to hit below the belt,' 'to jump the gun,' 'to be on the inside track,' 'to be in the chips', 'to be behind the eight ball,' 'it isn't cricket,' 'according to Hoyle'). 'Trump' and 'ten-ace,' 'pawn' and 'checkmate' have international figurative currency. Baseball and its terminology have probably done more to bring the meaning of the American way of life home to the Europeans, Latin Americans and Japanese than any form of direct cultural propaganda. Beisbol and jonron ('home run') are as familiar to the Mexicans as their native corrida and matador, and Latin American crowds have learned to cry 'Maten al arbitro' with the same gusto with which Yankee Stadium fans shout, 'Kill the umpire'."

Sincerely yours,

EMANUEL CELLER,
Chairman.

Republican Problems

EXTENSION OF REMARKS
OF
HON. CHET HOLIFIELD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. HOLIFIELD. Mr. Speaker, I have recently noted in the press several articles describing the plans of the Republican National Committee to undertake a series of extensive research projects to try to discover why the Republican presidential candidate carried only 14 of the 40 U.S. cities of over 300,000 population last November. According to these reports, Mr. Ray C. Bliss, Ohio GOP chairman, is heading up a special task force established for this purpose.

At the risk of being presumptuous, I would suggest to our Republican friends that they can avoid time, costly research, field studies, and complex statistical analyses in the effort to find an answer to this perplexing question. The Republican researchers need only to examine the dismal record of their own party in Congress on those issues which vitally affect the Nation's city dwellers.

Of course, I realize the difficulty which they have always encountered in any attempt to look at voting records from an objective basis. I am therefore taking the liberty of supplying them with the statistical record of GOP votes in the House and Senate from 1947 to 1960 on legislation directly affecting the well-being of urban residents. It clearly shows the lack of GOP concern on such issues as housing and slum clearance, inflation, highways and airport construction, small business, the need of depressed areas, and the extension of minimum wage coverage and unemployment compensation benefits.

I would hope, Mr. Speaker, that in the cold light of postelection soul searching now going on in Republican ranks, the top Republican Party policymakers would prevail upon their congressional

leaders to make substantial improvement in their party's urban legislative record by voting to support President Kennedy's constructive and realistic proposals in this important area. Only in this way can the GOP lay the foundation to make possible any effective appeal to city dwellers for support of Republican residential candidates in the future.

The analysis of GOP versus Democratic votes on urban issues follows:

Type of urban issue	1947–52						1953–60					
	Senate			House			Senate			House		
	Number of votes	Percent for—		Number of votes	Percent for—		Number of votes	Percent for—		Number of votes	Percent for—	
		Democrats	Republicans		Democrats	Republicans		Democrats	Republicans		Democrats	Republicans
1. Promotion of slum clearance and home financing	19	85	42	25	80	37	34	80	29	23	86	34
2. Legislation to curb inflation	40	83	34	27	81	39	4	81	26			
3. Legislation for highway and airport construction	8	70	29	2	99	82	11	93	37	9	85	58
4. Legislation to assist small business	9	75	44	3	84	36	7	75	12	3	92	66
5. Legislation to assist depressed areas							9	83	24	4	76	24
6. Expand minimum wage and unemployment compensation	6	64	47	7	69	28	20	72	30	10	78	53

Sugar

EXTENSION OF REMARKS
OF
HON. THOMAS G. MORRIS
OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. MORRIS. Mr. Speaker, in pointing out some of the difficulties of our domestic sugar industry, I think the following facts and figures might be of interest. For example, the latest information available with regard to new producer data shows that in 1960 some 5,338 farmers requested 189,442 acres to grow sugarbeets. However, only 1,243 participated in the allotted new acreage of 17,282. In other words, 23 percent of the applicants received 10 percent of the requested acreage. Even these figures do not show the true picture. Many farmers who would have liked to get into production did not ask for any acreage because from past experience only a small amount has been made available.

New producer data, 1960

State	Number of requests	Acres requested	Shares established	Acres established
California	794	41,609	51	1,279
Colorado	282	6,408	147	1,828
Idaho	845	14,896	147	798
Illinois	7	168	7	168
Iowa	4	220	4	165
Kansas	63	2,930	3	90
Michigan	257	3,607	257	3,607
Minnesota	887	54,780	39	1,372
Montana	113	2,846	54	809
Nebraska	218	6,172	103	1,368
Nevada	7	383	6	110
New Mexico	4	300	4	100
North Dakota	251	13,928	7	230
Ohio	116	1,873	116	1,773
Oregon	59	1,212	31	248
South Dakota	11	322	7	190
Texas	155	10,780	6	18
Utah	103	1,191	103	734
Washington	911	20,563	46	368
Wisconsin	83	1,821	83	1,821
Wyoming	168	3,433	22	206
Total	5,338	189,442	1,243	17,282

In contrast to the above where the domestic industry has been prevented from increasing their production, below are some figures which point out how our Government has encouraged the expansion of sugar-producing areas outside of this country. I do not want to imply that I am opposed to some of the investments that are being made to improve production in these countries, but I do feel that our domestic producers should have at least an equal right to expand and grow in this important commodity.

EXPORT-IMPORT BANK

In 26 years they have issued 45 credits in the amount of $50,753,192 to sugar production and processing.

PHILIPPINES

Mar. 28, 1957	$731,000

DEVELOPMENT LOAN FUND

Bolivia:	
1959	2,500,000
1961	1,750,000

Haiti: Applications were considered and approved in 1960 for $3,000,000, however, this was canceled in 1961. Another application has been received in February of this year for $3,000,000.

Guatemala: An application has been received for $5,592,000. This has been referred to the Export-Import Bank.

INTERNATIONAL COOPERATION ADMINISTRATION

A large number of their loans are for general agriculture developments, and actual figures of support for sugar programs were not supplied. However, the following countries have had sugar developments of some sort involved in their programs.

Vietnam: Various training programs from 1955 to 1959.

Tunisia: 1959.

Indonesia: Technical production, experimental plots, 1959.

Iran: June 1952 until March 1957—$635,000 to expand a plant. February 1953 until March 1956—$931,000, two plants.

Sudan: Survey in 1959.

Taiwan: Support to improve refining equipment 1952–53, 1954, 1955.

INTER-AMERICAN DEVELOPMENT BANK

Bolivia in a $10 million global credit received $1,800,000 to increase by 50 percent a sugar processing plant.

Argentina has applied for a global credit of $800,000 to be used in sugar development.

Haiti has requested a global credit of $4 million and if approved, part of the money would go to double the production of an existing sugar plant.

Honduras has presented an application, part of which is to increase a sugar plant daily capacity by 40 percent.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

They have been making agriculture loans for several years, some of which have gone into sugar production. However, figures were not available showing actual support of sugar.

INTERNATIONAL FINANCE CORPORATION

Tanganyika: June 2, 1960, $2,800,000 for sugar development.

Congressional Recess

EXTENSION OF REMARKS
OF
HON. ROBERT R. BARRY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. BARRY. Mr. Speaker, 13 Senators, headed by Senator McGEE, of Wyoming, have introduced an excellent recommendation which should be seriously considered by the House. They suggest in Senate Concurrent Resolution 16 that

Congress take its long recess in the summer instead of the early winter so that Members may go on vacation with their families.

I am today introducing an identical House concurrent resolution to give the House the opportunity of discussing this question. I think this proposal would increase the efficiency of the Congress and I urge that it be seriously studied.

Senator McGEE said that when the children are out of school during July, August, and September, Congress is usually in session, preventing Members from leaving with their families. Then, when Congress adjourns late in August or early September, the children are getting ready to go back to school and a Member who wishes to return to his State must leave his family here.

To take care of any emergencies, the resolution would permit the leaders to call Congress back during the summer recess if necessary.

Since the end of the war it has become a fact of life that Congress is in session 9 or 10 months each year. The procedure of recessing during summer months would in no way change this. It would merely shift the period of our time off to a different season to make it possible to do some living with our families, our children—and I hasten to add, grandchildren.

A Proposed National Highway Week

EXTENSION OF REMARKS
OF
HON. GEORGE H. FALLON
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. FALLON. Mr. Speaker, we in America are especially well pleased in the number of freedoms we enjoy in a world from which too many freedoms have disappeared in recent years. One of the greatest freedoms our people have is their freedom of mobility, made possible by the development of the Nation's highways.

A national system of highways in America has made it possible for us to move about with ease. Because of our highways, our people are granted greater choice in where they shall live, where they shall work, and where their businesses and industries shall be established.

Indeed, the importance of what has already been done in building the Nation's highways is readily translatable in terms of increased gross national product.

Forty-five years ago, in 1916, this Congress enacted our first Federal Aid Highway Act. Periodically we have reviewed the matter of Federal responsibility in coordinating highway construction programs across the land. As the highways made possible by the Federal-State roadbuilding partnership unfolded, linking North to South and East to West, new opportunities were brought to our people for traveling. The residents of the central portions of these United States are separated from the Atlantic or Pacific Ocean by little if any more than 2 days' travel over good highways. Only 50 years ago, their forebears lived out their lives without seeing either of these great bodies of water, because travel was too expensive or travel time too great. The Rocky Mountains, our magnificent national parks, the Grand Canyon, the Great Lakes—all the wonders of America—have all been brought closer to our families by the roads we have built.

Because of better roads, our national resources are more accessible. The output of our factories, and the products of our farms are more easily moved to the consumer, and in better condition, because of highways. Our national defense has been made more secure by the roads we already have.

But, Mr. Speaker, with all that has been done, roadbuilding has not kept up with America's needs for more and better highways. The Federal-Aid Highway Act of 1956 provides for construction and improvements on our interstate defense highways, and roadways subsidiary to that system to meet our traffic needs 14 years from now. The benefits of the roads already built extend to all our people. The need for an orderly continuation of the road building program is urgent.

In view of the tremendous contributions good roads make to our better living standards and to the prosperity of our Nation, I propose, through the introduction of House Concurrent Resolution 198, to call the public's attention to the importance of highways through the establishment of National Highway Week this year from May 21 to May 27.

Mr. Speaker, I urge every Member of this body to support favorable action on this resolution.

National Defense Scholarships for Higher Education

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. MULTER. Mr. Speaker, on January 3, 1961, I introduced H.R. 805, to provide for a college scholarship program.

Last week the Special Subcommittee on Education of the House Education and Labor Committee held hearings on the subject.

The following is my statement before that subcommittee:

STATEMENT OF HON. ABRAHAM J. MULTER, CONGRESSMAN OF NEW YORK, BEFORE THE SPECIAL SUBCOMMITTEE ON EDUCATION OF THE HOUSE EDUCATION AND LABOR COMMITTEE, MARCH 17, 1961

Mr. MULTER. Mr. Chairman, I am pleased to have this opportunity to present a statement on behalf of my bill, H.R. 805, to amend the National Defense Education Act of 1958 to provide for national defense scholarships for college and university study. In my opinion, the enactment of this bill and the establishment of scholarships would provide the very much needed measure of assistance for many thousands of our capable young people who desire to go on to college or university study but for whom the cost of attending college is beyond their family income possibilities.

You are undoubtedly familar with the various reports indicating the cost of attending college. More recent information such as that reported by the U.S. Office of Education indicates that the mean total current expenditure for publicly controlled institutions—1960–61—is $1,300; for privately controlled institutions the estimate is $2,100. These estimates include expenditures for tuition and required fees, room rent and board, clothing and other current needs. If we consider the tuition costs alone of colleges and universities, we may observe that the increase for publicly controlled institutions since 1949–50 is around 86 percent while for privately controlled institutions the percentage increase is 91 percent. The estimated expenditures in 1960–61 for students in public colleges for room rent and board alone totals about $434 with tuition and fees totaling $225. This leaves the average student very limited funds for clothing, books, transportation and other expenditures. I would like to insert a table showing college costs based upon the U.S. Office of Education information. [See tables.]

There are many persons who argue against a program of Federal scholarships for assistance to capable and deserving high school graduates. They argue that if a student has motivation toward college he will be able to make it somehow. Others speak of the possibility of students working their way through college. I would agree with the fact that there are certainly rewarding benefits to the student who is able to work his way through college. I would agree also that a large number of capable students lack adequate motivation from home and school which would direct them toward college or university study. It is interesting to note, however, the following comment in a report by the U.S. Office of Education on the retention and withdrawal of college students:

"* * * No single reason for discontinuance could be identified as most important, although the inference that the financial factor predominated is supported by its high rating importance in combination with other high ranking factors having financial implications such as enlisting for military service by men and taking a full-time job by women. Significantly greater importance was assigned to the financial factor by students who transferred to less expensive institutions or dropped out after the first year than by dropouts from the institution of first registration during the first year." [1]

This study also gives some attention to the general income range of families of students who continue their studies to graduate. It reported:

"* * * The median annual income of parents of nongraduating students was $437 less than that of parents whose children graduated. * * * the chances are 97 to 100 that the dropouts during or at the end of the first registration period would have a lower median family income than dropouts during the remainder or at the end of the first school year." [2]

I would like to call attention to table 3 which presents a breakdown of major sources of student incomes for higher education, 1952–53. Scholarships were reported to contribute only 4.8 percent of the total student income. The mean amount of scholarships received by students totaled about $310. Other sources of stu-

[1] U.S. Office of Education. "Retention and Withdrawal of College Students." U.S. Government Printing Office, 1957. Various pages.
[2] Ibid.

dent income such as family financial support, and the term-time and summer earnings of the students themselves contributed significantly larger percentage totals to the source of income. Yet when we give close attention to the matter, we are able to see that there are few families within the income range which can contribute substantially to the college education of more than one child. Moreover, the summer earnings and term-time earnings of students are seriously curtailed by the ability of the student to find employment in off-campus businesses which usually pay considerably higher wages than most on-campus employment affords.

Let us consider the question of student earnings more closely. The Office of Education reported that in 1952–53 the mean amount earned by students in term-time earnings and summer employment was $413 and $395 respectively. The earnings of women students was considerably below those of the male students and totaled about one-half the amount of the male students' earnings. W. Bradford Craig, in his book "How to Finance a College Education" has reported:

"Students, as a group, financed from their own earnings over one-fourth of their budgets during a recent year. Most of the moneys came from earnings during the school year, the remainder from summer employment. More than a third of all students who attend college earned some money during vacations; the average amount of such earnings was $395. A still larger proportion worked part time while attending college. Three-fifths of all students—two-thirds of the men and one-half of the women—earned money during the school year. Their average earnings were $468 and $265 respectively." [3]

Indeed, resourcefulness and willingness to work to meet the cost of attending college reflects the high value which many of our young people place upon a college education. On the other hand, I would raise several questions: (1) How many of our institutions of higher education are located in communities which offer off-campus employment to young men and women in terms sufficient to enable them to meet the majority of their costs of attending college? (2) How many of our best students pursuing studies such as the exact sciences are able to meet the physical and mental demands of a full schedule with lecture and laboratory courses while, at the same time, working a sufficient number of hours to make significant earnings? In this time of the history of our Nation, when we are stressing the value of an education and emphasizing excellence in all endeavor I would question seriously those who maintain that student scholarship aid is not needed to help individuals in the plight such as I have just pointed out.

We know, of course, that the National Defense Education Act of 1958, which my bill, H.R. 805, would amend to include scholarships, established under title II, a national student loan program. This program has been enthusiastically hailed by students, parents, and administrators of institutions of higher education as a positive step forward in meeting student financial needs. I join with those who praise the success of the student loan program. I fully acknowledge that for a large number of students a college loan adequately meets their needs. For an equally large number of students, however, the possibility of a loan debt to be repaid upon completion of college studies is forbidding.

In some instances, students are pursuing a course of study which will continue into graduate study before they are adequately prepared to make a significant contribution to the field. We well know that the specialization of today requires college and graduate study in many fields, but especially in areas such as mathematics, science, and modern foreign language. Moreover, many students have elected areas of study which require considerable preparation but which afford very small returns upon this educational investment. Teaching, unfortunately, is still one of the professional areas which pays low salaries in comparison with the required preparation and study. Since the NDEA contains a forgiveness clause for individuals teaching in public elementary or secondary schools, I should perhaps have used some other professional area for my example, but I think the point is clearly made. There are other circumstances, of course, such as an individual's obligation in many instances to contribute a substantial part to the family support upon completion of college studies, or the responsibilities he may wish to take for a family of his own—all of which remove the use of a loan for higher education from the realm of possibility of many capable students.

I have mentioned the value of an education in these times of modern technology and complications in human relationships both within and without our Nation. Also, I have spoken of the need for emphasis upon excellence in all endeavor. Both of these factors, in my opinion figure very highly in the total consideration of the need for scholarship assistance to larger numbers of our young people.

The value of an education cannot, of course, be evaluated in terms of dollars and cents. Yet, we know that there is abundant evidence to support the fact that the well-educated worker enjoys measurable advantages over the worker with little formal education. He earns more; he suffers less from unemployment; he is more likely to find work in high prestige occupations and he returns a greater proportion of his earnings to those things which afford a cultural uplift for the total community. Everyone familiar with the direction and trends of the Nation's manpower needs is well aware of the shift toward the employment of those persons with greater levels of formal education and training. A recent study showing incomes according to years of school completed by persons 14 years or more of age indicates that men and women with college training are enjoying a substantially higher median income than those with lesser education. It has been pointed out, for example, that in 1959, professional and technical workers had completed an average of 16.2 school years and had an average family income of $7,788. Proprietors and managers, exclusive of farmers, had completed 12.4 school years and the family income for this group was $7,012. Clerical and sales workers had completed 12.5 years of school: the median family income of clerical workers was $5,692; that of sales workers was $6,268. Skilled workers had completed 11 years of school and had a median family income of $6,018. Semiskilled workers had completed 9.9 years of school and had a median family income of $5,157. Unskilled workers had completed 8.6 years of school, and the median family income of this group was $4,089.

Education increases the personal income of the individual. Increases in our national income and product register the collective impact of the producing and earning ability of a better educated people.[4]

Moreover, in these times when we are very much concerned with unemployment we must give serious attention to the relationships between education and unemployment. As one report indicates: Unemployment of workers is closely related to the amount of education the workers have had. The relationship is, of course, inverse. In March 1959, 8.5 percent of the workers in the labor force with less than high school graduation were unemployed, compared with 4.8 percent of the high school graduates and 2.4 percent of workers with some college experience.[5]

President Kennedy has recently called attention to the need for the reeducation of many individuals who are now contributing to the total unemployment scene of the Nation.

But the value of an education and the demands of the day which call for greater numbers of persons with high degrees of skills, training, and education cannot be understood in terms of the financial picture alone. We must, of course, consider the needs within the Nation for an increasingly more educated populace if we would continue to provide in America an example for the free world as to how an educated people move freedom forward. Speaking of education as our ultimate weapon, Mr. Neil McElroy has said:

"Our recognition of the university as a major source of our national vitality affirms a dependence that has long characterized free societies. From the days of the Greek philosophers, democracies have known that their effectiveness depended on citizen knowledge. Representative government in its own interest has built or has encouraged the building of educational institutions to spur the individual to test his own capacities—and to help him understand his responsibilities to the community as a whole.

"So we come to this inescapable conclusion: that education is and will be—the key to success or failure for each of [the] competing ideologies.

"If our educational system functions at or near its optimum, our Nation will thrive and grow. If we allow that system to fail to achieve its potential, we must expect to decline as a free society." [6]

Higher education in America will suffer a serious blow if we do not act now to provide financial assistance in the form of national scholarships to the many capable students who need such aid for college and university study. Moreover, without an adequate Federal scholarship program to meet the needs of large numbers of our high school graduates, such as I propose in H.R. 805, we will be failing to live up to the goal of providing for every individual, regardless of economic condition, the maximum opportunity to study and to develop to his maximum potential.

I have taken time to comment in great detail upon many of the phases of the present-day demand for higher education for larger numbers of capable persons. I consider such considerations to be essential if we would realistically evaluate the national need for a scholarship program, and if we would enact such a scholarship proposal which will accomplish a meaningful mission. I certainly do not consider that the proposed bill, H.R. 805, will suddenly transform all uninspired students into eager applicants for college or university study. What I do propose is the establishment of national defense scholarships for persons determined by State commissions to be in need of financial assistance to continue education at an institution of higher education.

H.R. 805 is not a complicated bill. There is no barrage of mumbo-jumbo. It would establish national defense scholarships through an amendment to the already established and enthusiastically received National Defense Education Act. In the main the bill would provide for scholarships of $500 to students during each academic year

for 4 years. There is a provision which allows students in special need, as reviewed by the State commissions, to receive an additional amount not to exceed $500 per academic year.

As I have indicated, persons receiving scholarships would be selected by State commissions on the basis of objective tests and other measures of aptitude and ability to pursue study leading to a bachelor's degree successfully. In keeping with the specialized national needs for individuals in science, mathematics, or modern foreign languages, which is the general frame of reference of the NDEA, the bill would provide for special consideration of those with superior capacity or preparation in these areas.

The proposal is not overpowering in its appropriations of allotments. It would authorize that there be appropriated for the fiscal year ending June 30, 1961, and for each of the 2 succeeding fiscal years the sum of $17,500,000. Allotments to the States are to be in the ratio of the State's population between the ages of 18 and 21 and the total population of all the States between such ages. What I am proposing is assistance to individuals which leads ultimately to the total welfare of the Nation. In view of the many ramifications of problems in costs and expenses of higher education today, and the need for a more highly educated citizenry, I hope that this committee will favorably report H.R. 805.

I hope the committee will amend my bill so as to have it cover students in colleges which require 5 years instead of 4 years of attendance for certain of the sciences and engineering courses, as well as medical and dental students who have successfully completed their premedical or predental collegiate work.

TABLE 1.—*Major items of students' mean current expenditures: 1952–53 actual and 1960–61 estimated expenditures*

Major item	Publicly controlled institutions		Privately controlled institutions	
	1952–53 [1]	1960–61	1952–53 [1]	1960–61
Mean total current expenditure	$1,120	$1,300	$1,674	$2,100
Tuition and required fees	151	225	546	863
Room rent	102	116	146	165
Board (regular meals)	270	318	301	354
Clothing (including footwear)	130	135	149	155
All other current expenditures	467	506	532	563

[1] Data for 1952–53 are computed from tables 3 and 4 of "Costs of Attending College" by Ernest V. Hollis and Associates: Bulletin 1957, No. 9, Office of Education, U.S. Department of Health, Education, and Welfare. Estimates for 1960–61 are based on the U.S. Department of Labor, Bureau of Labor Statistics, consumer price indexes and the increase in mean institutional fees since 1953.

TABLE 2.—*Comparison of the mean annual tuition and required fees of 196 representative colleges and universities: 1949–50 and 1959–60*

Type of institutions	Number of institutions	Mean tuition and required fees		Increase	
		1949–50 [1]	1959–60 [2]	Amount	Percent
All institutions	196	$249	$464	$215	86
Publicly controlled	120	112	194	82	73
Privately controlled	76	465	890	425	91
Publicly controlled:					
Universities	69	138	240	102	74
Liberal arts colleges	19	80	129	49	61
Teachers colleges	17	89	171	82	92
Technological institutes	5	142	221	79	56
Junior colleges	10	18	30	12	67
Privately controlled:					
Universities	57	457	885	428	94
Liberal arts colleges	14	439	810	371	85
Technological institutes	5	626	1,148	522	83

Centennial Anniversary of the Unity of Italy, 1861–1961

EXTENSION OF REMARKS

OF

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1961

Mr. RODINO. Mr. Speaker, 100 years ago this month the Italian Risorgimento—the dream of Dante and Garibaldi—was at long last accomplished.

Last Thursday I was honored to be one of those present at the stirring observance of this momentous event which took place in the State Department auditorium.

Gathered to honor the State of Italy, as well as to pay tribute to Italian-American friendship, were the President of the United States, the Vice President, the Speaker, and numerous other Members of Congress and prominent U.S. officials. Among those representing Italy were the Italian Ambassador, H. E. Manlio Brosio, and Prof. Gaetano Martino, the chief of the Italian mission to the United States.

Keynote of this centennial ceremony was the great and indestructible bond which exists between the United States and the State of Italy. On this historic occasion we saw a rededication to our traditional ties, to our mutual respect for each other's culture and civilization, and to our united effort for the survival of freedom.

Mr. Speaker, under unanimous consent, I wish to insert at this point in the RECORD the speech of the President of the United States; the messages sent by the Honorable Giovanni Gronchi, the President of the Republic of Italy, and the Honorable Amintore Fanfani, President of the Council of Ministers of the Republic of Italy; the address of the Honorable Gaetano Martino; and the opening remarks of Representative Anfuso, chairman of the American Honorary Committee for the Centennial Celebration:

REMARKS OF THE PRESIDENT OF THE UNITED STATES AT THE CENTENNIAL CELEBRATION OF THE 100TH ANNIVERSARY OF ITALIAN UNIFICATION, NEW STATE DEPARTMENT AUDITORIUM, WASHINGTON, D.C., MARCH 16, 1961

Congressman Anfuso, Your Excellency, the Vice President, Mr. Speaker, Ambassador Dr. Gaetano, Mr. Secretary, Senator Pastore, distinguished Members of Congress, ambassadors, and ladies and gentlemen, many of us who are here today are not Italian by blood or by birth, but I think that we all have a more than passing interest in this anniversary. All of us, in a large sense, are beneficiaries of the Italian experience.

It is an extraordinary fact in history that so much of what we are, and so much of what we believe had its origin in this rather small spear of land stretching into the Mediterranean. All in a great sense that we fight to preserve today had its origins in Italy, and earlier than that in Greece. So that it is an honor as President of the United States to participate in this most important occasion in the life of a friendly country, the Republic of Italy.

In addition, it is one of the strange facts of history, that this country of ours, which is important to Western civilization, was opened up first by a daring feat of navigation of an Italian, Christopher Columbus. And yet this country was nearly a century old when modern Italy began.

So we have the old and the new bound together and inextricably linked—Italy and the United States, past, present, and we believe, future.

The Risorgimento which gave birth to modern Italy, like the American Revolution which led to the birth of our country, was the reawakening of the most deeply held ideals of Western civilization: The desire for freedom, for protection of the rights of the individual.

As the doctor said, the state exists for the protection of those rights, and those rights do not come to us because of the generosity of the state. This concept which originated in Greece and in Italy I think has been a most important factor in the development of our own country here in the United States.

And it is a source of satisfaction to us that those who built modern Italy, received part of their inspiration from our experience here in the United States—as we had earlier received part of our inspiration from an older Italy. For although modern Italy is only a century old, the culture and the history of the Italian Peninsula stretches back over two milleniums. From the banks of the Tiber rose Western civilization as we know it, a civilization whose traditions and spiritual values gave great significance to Western life as we find it in Western Europe and in the Atlantic Community.

And to this historic role of Italian civilization has been added the strengthening in the life of this country of millions of Italians who came here to build their homes and who have been valued citizens—and many of their most distinguished citizens sit on this platform today.

These ancient ties between the people of Italy and the people of the United States have never been stronger than they are today, and have never been in greater peril. The story of postwar Italy is a story of determination and of courage in the face of a huge and difficult task. The Italian people have rebuilt a war-torn economy and nation, and played a vital part in developing the economic integration of Western Europe.

Surely, the most inspiring experience of the postwar era: Italy has advanced the welfare of her own people, bringing them hope for a better life, and she has played a significant role in the defense of the West.

As we come to this great anniversary in 1961, we realize that once again new and powerful forces have arisen which challenge the concepts upon which Italy and the United States have been founded. If we are to meet this new challenge, we—Italy and the United States—must demonstrate to our own people and to a watching world, as we sit on a most conspicuous stage, that men acting in the tradition of Massini and Cavour and Garibaldi and Lincoln and Washington, can best bring man a richer and fuller life.

This is the task of the new Risorgimento, a new reawakening of man's ancient aspirations for freedom and for progress, until the torch lit in ancient Torino one century ago guides the struggle of men everywhere—in Italy, in the United States, in the world around us.

MESSAGE BY THE HONORABLE GIOVANNI GRONCHI, PRESIDENT OF THE REPUBLIC OF ITALY

To the CHAIRMAN,
American Honorary Committee for the Italian Centennial, Washington, D.C.

MR. CHAIRMAN: I am happy to address, through your courtesy, the good wishes and greetings of the Italian people, as well as my own, to the American Committee for the Italian Centennial and to all those—Americans and Italians—who have participated with such spontaneous enthusiasm in the celebration on American soil of this day which has such lofty significance for the history of my country.

I address my gratitude particularly to the President of the United States, who has consented to attend these ceremonies, as well as to the Members of Congress, the Governors, the mayors, the educational and cultural institutions, the public and private officials, to the numerous committees from all over America who joined in commemorating our anniversary.

The great American Nation, which has such a high sense of liberty, recognized in the events that 100 years ago led to the unity of the Italian people the selfsame yearning for independence which led to the birth of the United States.

Thus, the tribute being paid in America to our Risorgimento, whose anniversary is being celebrated throughout Italy with great solemnity, is a new expression of the spirit which increasingly binds the peoples of our two countries in their determination to enhance, both now and in the future, the values of a free civilization. At the same time, these observances which unit Americans and Italians underscore those sentiments of confident friendship which opened the doors many years ago in the constructive contributions of Italians to life in the United States.

Please accept, Mr. Chairman, the gratitude of the Italian people and of myself and kindly convey it to all those who in response to the committee's appeal are today celebrating this joyful anniversary of our national unity.

GRONCHI.

MESSAGE BY THE HONORABLE AMINTORE FANFANI, PRESIDENT OF THE COUNCIL OF MINISTERS OF THE REPUBLIC OF ITALY

To the CHAIRMAN,
American Honorary Committee for the Italian Centennial, Washington, D.C.

MR. CHAIRMAN: We, in Italy, are deeply moved by the thought that on March 16 the centennial of the unification of Italy will be observed in the city of Washington for the first time in a foreign country.

It is highly significant that the United States, whose own history is based upon the respect of freedom and a sense of independence, so promptly realized the import of that long and hard struggle which led to Italian unity 100 years ago, through strife and suffering, through the deep beliefs of our people, the sacrifice and martyrdom of the brave, the able and patient efforts of our leaders.

I believe the reason for this understanding lies in the similarity of historic events, in the common struggle for the same goals and in the active participation of Americans and Italians in the development of both countries. All this stirred in the hearts of the people of the United States the memory of the years when the new Italy was born and a friendship was started, which never died.

The warm American participation in the observance of our centennial adds to the many ties already existing between our two countries a new bond which strengthens their determination to persist in the defense of the common ideals of the two nations.

I am therefore extremely happy to convey the greetings and the appreciation of the Italian Government, as well as my personal thanks, to you, Mr. Chairman, to the American Committee for the Italian Centennial and to all those—Americans and Italians—who joined in the observance of this solemn anniversary in your country.

I wish particularly to extend my grateful respects to the President of the United States, who graciously consented to honor the ceremony with his presence, to the diplomatic corps, the Members of Congress, the Governors, the mayors, the various institutions, committees, and personalities that in Washington and all over America are celebrating our centennial.

I am happy to express my heartfelt thanks and those of the Italian Government to them all.

A. FANFANI.

ADDRESS OF PROF. GAETANO MARTINO, CHIEF OF THE ITALIAN MISSION TO THE UNITED STATES

Mr. President, Mr. Chairman, honored guests, ladies, and gentlemen, I am greatly honored to speak of the political birth of my country as a modern nation in a ceremony made so solemn by the participation of the President of the United States of America. I wish to assure you, Mr. President, that your presence here will be profoundly felt by all Italians and will increase their love for your country. They admire the United States as the country where human endeavor has brought its most important contribution to the civil and moral progress of the peoples and where the greatest effort is being made to guarantee the continuity of that progress in the uncertain and perilous present. No doubt, Mr. President, this ceremony—attended by the highest representatives of the American Nation—will contribute to the deepening and strengthening of friendly relations between the United States and Italy.

One hundred years ago in Turin the Kingdom of Italy was proclaimed in the first Parliament elected by the majority of the Italians. That proclamation marked the birth of the Italian state which included in its political structure, shaped on democratic patterns, all Italians, living on the soil of Italy.

It is true that the Venetian region was still under Austrian domination, and that the new nation was born without its capital which could only be Rome. But already in 1861 the liberation of the Venetian region and the annexation of Rome appeared inevitable as events were soon to show. The first occurred in 1866 and Rome was annexed in 1870. Our final war of independence in 1915–18, which was part of the First World War, made it possible at last to restore to the Italian family the peoples of Italian language, culture and spirit still remaining under Austrian domination.

What we call Risorgimento is the political movement which through revolutions and wars led Italy to the conquest of its national freedom and independence. It cannot be understood historically without recalling that it stemmed from that great fountainhead of ideals, sentiments and moral values which were the substance of the "age of enlightenment" of the 18th century.

The moral and political forces which emerged from the enlightenment stimulated the fundamental historical events of the American and French Revolutions, and of the Italian and European Risorgimento. After a silence of more than a century, Italy once again took its place in the cultural life of the 18th century Europe and celebrated its spiritual resurgence which was to become a political rebirth as Napoleon's victories brought to our land the wind of liberty. The immediate comparison with the more modern and civilized forms of life adopted by the French and partially introduced into Italy made the Italians feel the full impact of their centuries-old ills. They were the ills of poverty, ignorance, fear, the servility of the weak, the corruption and abuse of power of the rulers.

The problem of national independence could then be stated in terms that were no longer theoretical but which held a promise of solution since the old refractory and absolutist nations had demonstrated their complete backwardness and inefficiency in the face of the French conquests.

On the concrete political ground there were two ways to free and unify our nation: through a popular uprising which, following the American and French examples could have ousted the princes from their creaking thrones and defeat Austria; or through an action undertaken by one of the states of the peninsula having sufficient power and prestige to enable it to achieve the same results. Only the state of Piedmont could do this.

The first path was chosen by Mazzini, the second by Cavour.

Giusseppe Mazzini maintained that independence must be the fruit of revolt—not a gift from above—and that therefore Italian unity must be achieved exclusively by popular revolutionary forces. Inspired by the same ideals as your Founding Fathers, Mazzini held that national states can be founded only on the people, by the people and for the people. He affirmed the preeminence of the duty of human solidarity in domestic affairs as well as in the international life of the peoples. He thus intimately linked

the destiny of resurgent Italy with that of a resurgent Europe by founding the two associations known as young Italy and young Europe. Mazzini conceived the Italian problem as one aspect of the general European problem. Old Europe and old Italy were to die together. In their place the new Europe and the new Italy were to rise together. The constitutional formula of "United States of Europe" which, like your own, at that time was disseminated throughout Europe in the works of the French Victor Hugo and Michel Chevalier, the German Johannes Sartorious, the English Richard Cobden, found in Mazzini the staunchest supporter. The European ideal was transformed into political action.

With the crushing of the European revolution, a new political situation developed in Italy. In it Camillo Benso di Cavour directed the movement of the Risorgimento toward final achievement, with his genius and daring. After having accomplished a widespread reform of political, social, and administrative life of the Piedmont, and after having placed it in vanguard of civil progress which attracted the surprise and admiration of Europe, Cavour distinguished himself by engaging in the liveliest of diplomatic activity. Dealing with the great powers with skill he succeeded in securing for Piedmont a leading role on the European scene, by forming alliances now with France, now with England. If he was able to bring an end to Austrian domination of Lombardy by securing the aid of France, it was with tacit English solidarity that the *Piemonte* and the *Lombardo*—the two ships carrying the thousand from Scoglio di Quarto to the Sicilian coast—could slip quietly through Mediterranean waters.

However, despite the fact that he worked with the instruments of crude politics which do not admit sentimentalism, he remained steadily loyal to those moral values and principles of the enlightenment redeveloped and reinvigorated in the new century. It was his firm conviction that the unity of his country must benefit not only Italians but all of humanity. His conscience was the conscience of the most cultured and civilized Europe and he looked upon its unity as the inevitable future of a Christian Europe. Few political leaders possessed his conception of rational freedom: only Jefferson, Lincoln, Gladstone could be cited as supporters of the same liberal ideals. These ideals inspired also his suggested solution of the problem of the church-state relations through the ingenious formula of "a free church in a free state." It gave Italy a long period of religious peace while it enhanced the spiritual force of the church.

I cannot refrain from mentioning two other outstanding leaders to whom Italy owes its unity: Giuseppe Garibaldi and Victor Emmanuel the Second. The name of Garibaldi has been always celebrated not only in Italy, but in the Americas where he lived and fought for many years. It was mainly Garibaldi's daring that evoked the sympathy and support of public opinion in Europe and America for our national cause. He fought for all the oppressed against all oppressors. The generosity of his actions earned him a place among the champions of human ideals. Your poets and ours unanimously greeted him as the new Washington and glorified his name. It gives us pleasure to think of him at the moment when, concluding his victorious campaign, he handed over to Victor Emmanuel the Second the half of Italy he had liberated. Refusing to accept honor and gains he returned with his poncho and red shirt to his native island to cultivate the bleak earth. He had presented the King with a generous gift; the hands receiving it were equally generous. Victor Emmanuel the Second had also given fully of himself and his kingdom to Italy. He had kept his selfless pledge in the darkest and most difficult hours.

The ideals of the apostles of our national unity are now once more, lighting our path after the tragedy of a war brought on by a minority which had seized power by violence and deceit.

We have perfected the institutions that guarantee freedom. We have increased the opportunities and means to give everyone security. We have rebuilt everything that was destroyed: we have created an atmosphere of industriousness in our country. Nevertheless, we are more sensitive to what remains to be done than to what we have accomplished.

The unification of Italy, as I said, is only a phase of the broader historical and political cycle whose philosophy centered on the enlightenment and on its unshakable faith in the rights of man. These rights—as you, Mr. President, wisely said in your inaugural address—do not derive from the State, but from God's hands, and the State can and must only guarantee them against all attempts of subversion.

That historical cycle is now far from being concluded. We have precise duties in the process of its completion. Italy's duties can be outlined both in the domestic and the international field. In the area of domestic policy we are pledged to restore confidence and hope in the millions of our fellow citizens who still believe that justice should be sought outside the democratic system. We must win them back to democracy and eliminate the reasons which can explain—though not justify—their present attitude, a cause of concern for us all. These reasons are connected with certain conditions of poverty which time thus far has not permitted us to remove, as well as with the survival of habits acquired during the many centuries of our painful serfdom. To discharge this duty of redemption and civil education the model used by Cavour is still valid. It suggests application of the policy of the juste milieu, the right middle of the road, which proved so fruitful not only in our country, but in yours as well.

On the international scene, it is our duty to move ahead, with renewed vigor along the path pointed out by Mazzini. In the last 15 years Italy, not only participated in all organizations dedicated to the pursuit of world peace, but kept itself in the forefront of the struggle for the unification of Europe. As Foreign Minister of my country, I had myself the privilege of playing a role, which was not minor, in the creation of the two new European communities: The Economic Community and Euratom. But we are still far from our goal. It is therefore urgent and vital to speed up our movement for unity, closely coordinating our efforts with those aimed at the achievement of the Atlantic unity. A unified Europe is only a part of that broader unity of the Atlantic world which started taking shape in the fields of culture and ideals three centuries ago and which substantiated our common conception of the world centered on conscience and ethics. This unity took political shape in 1949, when the Atlantic Alliance was built. Thence a new Risorgimento started: We all have a leading role in this rebirth, you Americans and we Europeans, as keepers and bearers of the message of the "age of enlightenment."

Mr. President, ladies and gentlemen, we must further strengthen the ties of our unity. This is necessary not only to face the challenge of our common enemies, but principally to enrich and guard the spiritual and moral patrimony handed down to us by our forefathers, which we want to pass on to our children. Only by tightening our bonds we will be able to make our future worthy of our past. Only by uniting more closely can we secure the triumph of our ideals and allow our peoples to dedicate themselves in full serenity to deeds of peace: only thus can we fulfill the wish expressed by your poet, John Whittier, in some of his verses addressed to our reborn Italy:

"Fold the flags of war, and lay its sword and spear to rust away, and sow its ghastly fields with flowers."

REMARKS BY CONGRESSMAN VICTOR L. ANFUSO, ITALIAN CENTENNIAL CELEBRATION, MARCH 16, 1961

It is a great honor for me to have been singled out by my colleagues on the American Honorary Committee to be the chairman of this historic event. It is my pleasure to welcome you.

It is of particular significance for me, since I came to this country as an immigrant from Italy at the tender age of 9. Little did I dream then that some day this immigrant boy would preside at a celebration of this sort in Washington, where the President and other great leaders of this Nation would gather to pay tribute to my ancestral homeland on the centennial anniversary of its unification as a single, strong nation.

I am deeply grateful this morning, as never before, to this wonderful country of ours for the unlimited opportunities which I and millions of other Americans of Italian extraction have received. This is a feeling which only immigrants and the children of immigrants can fully appreciate.

The President of the United States has played a significant role in these celebrations. I have had the honor and the privilege to know the President ever since I first came to Congress in January 1951, when I served with him in the House of Representatives. I remember the kindly guidance he gave me then—and I shall never forget his encouraging assistance on several projects which I proposed to the Congress in those days.

This association continued also after he had moved over to the U.S. Senate, and it is best exemplified by the fact that after I had introduced the resolution on the centennial observance of Italian unification and brought it to the attention of Mr. Kennedy, he immediately introduced it in the Senate. May I quote just a brief remark made by Mr. Kennedy at the time he introduced the resolution on July 13, 1959, when he said:

"The concurrent resolution expresses our pleasure in receiving the invitation (to participate in the observance) and testifies to our admiration for the contributions this great nation has made to our common ideals of freedom and independence. It is fitting and proper that we recognize in this fashion the progress and achievements of the people of Italy during the past century."

During this entire decade that I have been privileged to know Mr. Kennedy, I have always found him to be an admirer of Italy and of its achievements in the annals of culture and civilization. Likewise, he has a keen appreciation of the contributions of Americans of Italian descent toward the upbuilding of America and its way of life.

It is to a certain extent an irony of history that, as Italy was reborn as a united nation, the United States was on the threshhold of facing its greatest test for survival. As the guns were stilled in Italy, and Garibaldi was going back to his beloved island of Caprera with a bag of bean seeds on his shoulder, the guns of Fort Sumter on this side of the Atlantic were rumbling. Italy's Risorgimento, which means rebirth as a nation, was being accomplished.

And speaking of Garibaldi, I take particular pleasure in greeting here this morning the grandson of that great patriot, Gen.

Ezio Garibaldi, and also his granddaughter, Mrs. Giuseppina Ziluca. May I ask them to take a bow.

Today there exist strong bonds of friendship between the United States and Italy. The bonds joining our two nations are, in my estimation, stronger and deeper than those resulting from a military pact or an economic program. They are the bonds of faith and confidence in one another, of mutual respect and understanding between two great peoples, of genuine friendship and reciprocal contributions.

The bridge of understanding between the people of the United States and the people of Italy was not constructed overnight. It is a process which is at least as old as the United States, and in fact goes back to our earliest days when small but significant numbers of Italians joined the waves of early explorers and settlers who came to these shores. They and succeeding generations of Italian immigrants, who settled in this land, have made lasting contributions to our American heritage over the long centuries. The imprint of their contributions on American life and civilization is visible all around us.

We live in a crucial time in the annals of human affairs which requires utmost unity in the ranks of the free nations. The future survival of democratic America and of the whole free world depends, in large measure, on reinforcing our bonds of cooperation with nations like Italy, and on the creation of working partnerships with such nations in every endeavor which could serve the best interests of mankind.

It is not for me to spell out in detail how this partnership between our two nations is to be created, nor is this the time and the place to do so. Suffice it merely to indicate that we have the beginnings of it in several ways: the fact that Italy has been willing to give as much as she receives; the fact that Italy has made available to us areas for the establishment of military bases; Italy's significant role in NATO; Italy's strategic position in the Mediterranean in relation to Europe, Africa, and the Middle East; and Italy's ancestral ties in Latin America.

Our partnership can be extended and deepened in other ways through many new ideas and bold action. Instead of working alone in certain areas, where our help has been misunderstood, let us invite the participation of partnership nations like Italy—if such participation will bring about better understanding and more fruitful results. The possibilities are unlimited. This, too, may in time prove to be a "new frontier" in our international relations.

It is, therefore, only fitting and proper that we choose this occasion to rededicate ourselves to the same ideals which triumphed over a hundred years ago. In this era of the New Frontier, let us, in the words of our beloved President, pray that the future years will prove to be the years when the tide came in—when America, together with a strong and united Italy and a free world, moved forward again.

Tax Reform Is a Must

EXTENSION OF REMARKS
OF
HON. O. C. FISHER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. FISHER. Mr. Speaker, the need for tax reform in this country was never more urgent than it is today. The present hodgepodge system of patchwork in our tax concepts, filled with loopholes and contradictions, must be repaired.

Joseph A. Pechman, Brookings Institute economist, told the House Ways and Means Committee back in 1959 that "if all the eroding features of the tax law had been eliminated, the tax base would have been $59 billion larger than it actually was in 1957, and the revenues that were collected on 1957 incomes could have been raised with rates that were one-third lower in every taxable income bracket."

President Kennedy has pointed to the imperative need for tax reform. That need was recognized by former President Eisenhower. It was repeatedly referred to during the last presidential campaign. The necessity being self-evident, it is up to the Congress to do something about it.

Many proposals have been offered. The gentleman from Florida [Mr. HERLONG] and the gentleman from Tennessee [Mr. BAKER] have both introduced tax reform bills. They did so in the last Congress. Other Members have done likewise. In 1959 I introduced a companion bill, H.R. 4584. This year I have reintroduced that bill as H.R. 5529. These bills, I am sure, are not foolproof but they are steps in the right direction. They propose positive relief from unrealistic rates and they contain the elements of incentive-producing reforms.

Our system is so out of kelter with realities that it has been cited by Soviet Premier Khrushchev as evidence that we fail to use incentives to increase production to the extent that they are used in Soviet Russia. I would not concede that, but it does give us something to think about.

There are other areas of needed tax reform, including effective taxation of cooperatives and mutual finance companies to insure more substantial equity with ordinary taxable enterprise. Something needs to be done in the field of estate taxation to remove the present inducement to leave property in trust extending over many years, together with a reduction in rates. And there are loopholes that need to be closed.

PENDING BILLS

Under the pending reform bills to which I have referred, over a 5-year period individual rates would be compressed downward with reductions of over 50 percent in the middle brackets and the top rate coming down from 91 to 47 percent to coincide with the new top rate of corporate tax under the legislation. The first-bracket rate, applied to the lower income people, would be reduced from 20 to 15 percent, giving all individual taxpayers a minimum tax reduction of 25 percent.

This proposal has received substantial support from all over the country. It is not just a tax relief bill. It has a goal to achieve—that of permitting the more rapid accumulation of new capital out of current income, and moderating the tax destruction of capital already accumulated. The distinguished chairman of the Committee on Ways and Means, Mr. WILBUR MILLS, has been quoted as saying: "Taxes are too high, and at present rates have a strong tendency to blunt incentives and stifle economic growth."

We hear a lot these days of the New Frontier and the need to encourage economic growth. It is said we are suffering from economic roadblocks that stifle and retard our capabilities. If so, then let us treat the disease and not the symptoms. It is believed that the pending legislation would undoubtedly bring about the achievement of higher economic growth, improvement of jobs, and creation of better jobs. This will encourage new businesses to start. It will help control inflation through greater production and productivity. It will serve to strengthen our economic system and our position of leadership, prestige, and influence in the free world.

In fact, at this time when our foreign trade balance is unfavorable, when we are finding it increasingly difficult to compete in the world markets in areas which we have dominated for generations, it becomes increasingly necessary that we get our economic house in better order. And a genuine reform of our income tax structure is, in my judgment, a prime requirement.

WOULD BENEFIT LOW INCOME GROUP

From the standpoint of our own citizens, those now in the lower income levels have perhaps the most to gain from increase in the flow of capital into the expansion of industry and the resultant improvement of old jobs and creation of better jobs.

I am convinced that under the present law income tax rates climb too steeply and are much too high for the good of our economy and the well-being of our citizens.

Moreover, the proposed reform will inevitably pave the way to greater and more consistent reduction in the Federal debt. And it can be expected to ease the pressures that cause inflation. The inflation of this era essentially reflects a greater demand from all sources for the combined product of economic activity than can be provided by capital formation under present tax rates. The constant upward pressure on interest rates which we have witnessed in recent years is simply a reflection of the inadequacy of new savings to do all of the things which all of our citizens want done to enhance their economic well-being. Stated differently, a greater rate of new savings is the only route to greater rates of increased production and productivity, which in turn are the means to better satisfaction of competing demands on the economy while dampening inflationary pressures. This is the view of competent economists.

After all, the bulk of income taxes in this country are paid by the great middle class who earn from $4,000 to $25,000 a year. And the tax burden is very heavy for many of them to carry. A family man earning $4,500 a year now works 22 days a month, on an average. Taxes, visible and invisible, take one-third of what he produces. Of course,

every citizen has an obligation to contribute his own fair share to pay for the legitimate functions of government. But when it goes beyond the range of being a fair share, that taxpayer finds his money which he earned being used by others who do not earn it.

It must have been that thought which prompted the late Senator Bob Taft to say: "You can socialize just as well by a steady increase in the burden of taxation beyond the 30 percent we have already reached as you can by Government seizure. The very imposition of heavy taxes is a limit on a man's freedom."

Let us hope, Mr. Speaker, that the Congress will face up to this problem. Just doing something about exemptions will not suffice. Doing something about loopholes, although important, will not suffice. The entire structure must be overhauled. There must be an increase in depreciation—tailored to those industries considered essential to national survival. They must be able to modernize their equipment. It is said that one-third of the Nation's plant and equipment is obsolete. Some $6 to $8 billion is drained off each year from industry which is actually needed for survival and to make the Nation grow.

As one man put it—taking this money is like harvesting corn or wheat before it is mature.

Industry should be able to deduct for basic research. Incentive capital should not be siphoned off by taxation. Such capital could be made to earn more revenue for the country than it provides in taxes, if it is invested in growth under favorable conditions.

TAX REDUCTION CALLS FOR REDUCED SPENDING

Mr. Speaker, tax reform such as I have outlined will be possible only if we can reduce Federal expenditure. More than just a balanced budget is needed if this reform is to be fully meaningful. It has been said, and I think correctly, that balancing the budget at too high a level will not by itself solve our inflation problem nor our growth problem. Taxes would have to remain high to finance that budget, even though reduced taxes might result in more income. The simple fact is that it is not necessary to reduce essential spending—such as that for defense which at all costs must be maintained, water and soil conservation, flood control, veterans' benefits, and things of that kind—but it is necessary to reduce nonessential spending and waste.

In the long run we will be able to reduce the debt only if we have a flourishing and growing economy. For that purpose tax rate reform is essential and the sooner we get it the better our chances will be for sustained long-term debt reduction.

REDUCED RATES AND MORE INCOME

The fact is that every time we have reduced rates in the past our economy has been stimulated to produce more revenue than before. That was true back in the 1920's and it was true after the 1947 reduction. Take West Germany for example. In that country the economic growth has been so rapid under moderate incentive-producing tax levels, that not long ago it became necessary to raise taxes so as to apply the brakes and siphon off more of the earnings and take the edge off their boom. A year ago it was reported that investment capital gains in West Germany had increased 12 percent in 1 year.

Mr. Speaker, it is imperative that the Congress reexamine this tax problem. We are operating today with an outmoded tax philosophy. It will be recalled that the "Communist Manifesto" by Karl Marx and Frederick Engels, lists the No. 2 objective of communism for overthrowing capitalism: "A heavy progressive or graduated income tax." If we are to retain the income tax system, then let us make it realistic and fair. Let us remove the inequities that restrict growth. Let us tailor our income tax structure and make it consistent with the incentives that contribute to economic growth under the free enterprise system.

Pacific Northwest Being Threatened With a Loss of Its Low-Cost Power

EXTENSION OF REMARKS
OF
HON. JACK WESTLAND
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. WESTLAND. Mr. Speaker, the Secretary of Interior on March 9, 1961, appointed a five-man departmental task force to study the feasibility of a high-voltage transmission line between the Pacific Northwest and California. On the same day in another press release he said he has approved recommendations to proceed with surveys and design work on an all-Federal transmission line to distribute electricity from northern California to southern California.

The recommendation as approved would allow construction now of lines from the Trinity River project in northern California so they could be converted to a 500-kilovolt transmission line to Tracy, Calif., with the possible future use as a section of the proposed Pacific Northwest-California intertie to be studied by the task force.

Mr. Speaker, it appears to me the Pacific Northwest again is being threatened with a loss of its low-cost power. Back in April 1959, I warned that a clever move to rob the Pacific Northwest and the State of Washington of low-cost power was underway. I again repeat this warning with the added emphasis that the California interests now apparently have a champion in the Nation's Capital.

A task force made up of persons in the Department of Interior, it seems to me, would be subservient to the Secretary who appointed them. The term "task force" has the connotation of being a group especially selected to promote an interest or to get a particular job done. Members of this task force include Charles L. Luce, Bonneville Power Administrator; Morgan Dubrow, Washington office manager of the Bonneville Power Administration; Bernard Goldhammer, BPA commercial operations officer; Hugh P. Dugan, regional director of the Bureau of Reclamation; and Milton A. Case, general engineer in the assistant secretary's Washington office. A study group consisting of disinterested persons outside the Department, on the other hand, is a different proposition.

But, Mr. Speaker, is a study of this kind necessary? It would be surprising if it is needed in light of the fact that Mr. Luce has stated the Pacific Northwest will have a power shortage by 1965. Also, since March 1953 there have been studies of one sort or another. The Federal Power Commission reported the feasibility of 230-kilovolt intertie between Oregon and its neighbor to the south. Later Bonneville found that a 230-kilovolt line was feasible and advisable, but a larger line was not. Only one study, authorized by the Governor of California and paid for by California taxpayers, supported a high-voltage intertie, and its recommendation was based on numerous hypotheses.

The Secretary of the Interior said on March 9 that the estimated cost of federally constructed Trinity lines would be $28,800,000. I cannot understand the need for this huge outlay of taxpayers' money when the Bureau of Reclamation has been offered a contract for wheeling power over existing lines at one-half mill a kilowatt-hour.

Advocates of such an intertie between the Pacific Northwest and California first talked about dump power. But they knew and still know that if they can get a federally owned line into California, they will get firm power. Once the foot is in the door, there will be no way to close it. Also, it is conceivable that the principle of a nationwide grid could be established, whereby, this Chamber could be lighted by electricity from the Pacific Northwest.

Mr. Speaker, I am not opposed to the possible sale of surplus seasonal power to California or other States if the sale would result in lower power costs for the Pacific Northwest, but I believe a high load federally constructed line would inevitably lead to the transmission of firm power from Bonneville to California. Full integration, ideal as it might seem in terms of engineering principles, could result economically to the detriment of the Pacific Northwest in terms of increased regional power costs, retarded industrial growth, and fewer new payrolls.

We in the Pacific Northwest need our Bonneville power for future growth. We need our present industries and we want to expand them. We want new industries to come to our great Pacific Northwest. Mr. Speaker, I intend to fight to keep our power from being turned over to California and other regions.

The Nation Magazine and the Committee on Un-American Activities

EXTENSION OF REMARKS
OF
HON. CLEMENT J. ZABLOCKI
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. ZABLOCKI. Mr. Speaker, the March 18 issue of the Nation magazine contained an editorial entitled "The Issue, Mr. Speaker," which commented on the Supreme Court decisions in the Wilkinson and the Braden cases, and on the House vote on the appropriations for the Committee on Un-American Activities.

Under leave to extend my remarks, I wish to place in the RECORD the text of that editorial, as well as the text of my letter to the Nation, replying to some statements contained in it. I believe that these two articles will prove of interest to the membership of this body:

[From the Nation, Mar. 18, 1961]

THE ISSUE, MR. SPEAKER

A day before the House of Representatives voted, 412 to 6, an increased appropriation for the Committee on Un-American Activities, the Supreme Court divided 5 to 4 in the Braden and Wilkinson cases. If the eloquent dissent of Justice Black had been the majority opinion, the Court would in effect have abolished the HUAC. Yet the impression prevails that since the HUAC received the nearly unanimous approval of the Congress, it must enjoy the nearly unanimous approval of the Nation. The Supreme Court is not, of course, an elected body, and divisions in it do not necessarily reflect national divisions; nevertheless, the San Francisco Chronicle hazards the opinion that this time the Court seems to mirror the split in the country.

By any reckoning, the Court's division on the issue is a more accurate mirror of national opinion than the vote in Congress. Reports from close observers confirm the view that a hundred or more votes would have been registered against the appropriation if a secret ballot had been used. It is a matter of serious concern when Members of Congress fail to vote their convictions on an issue of this importance. The remedy, of course, is for citizens who favor abolition to concentrate their attention on Congressmen who might have been expected to vote against the appropriation, but did not. "What is it about public office," inquires the Madison Capital Times, "that makes men so timid? Where were Representatives REUSS, JOHNSON and ZABLOCKI?" (liberal members of the Wisconsin delegation who failed to join their colleague, Representative ROBERT KASTENMEIER, in opposition to the appropriation). This is the right question to ask. The time has come to call the roll on those Members of Congress who, in conversation and correspondence, over teacups and cocktail glasses, agree that the HUAC should be abolished and then fail to vote their convictions. This year's best speech in the HUAC debate was delivered by Representative THOMAS ASHLEY, Democrat of Ohio:

"All of us are keenly aware that the forces of communism are unswervingly dedicated to the destruction of this and other free nations. But surely we are aware, too, that communism is not the only threat to our liberty. The individual freedoms guaranteed in the Bill of Rights can be lost or diluted through our own action or inaction, and if this is allowed to happen by our own hand, the loss of liberty is no less than if imposed by an alien adversary.

"Are we ready and willing to defend our individual freedoms in the House of Representatives as we are on the battlefield? I believe this is the issue, Mr. Speaker."

MARCH 20, 1961.

Mr. CAREY MCWILLIAMS,
Editor, the Nation,
New York, N.Y.

DEAR MR. MCWILLIAMS: I was surprised to read your editorial of March 18, entitled "The Issue, Mr. Speaker." It is outstanding not only for its poor logic, but also for its disregard for the laws of mathematics. Inasmuch as my name appears in it, I feel compelled to comment on it.

First, the Supreme Court and the U.S. House of Representatives acted on two entirely separate and distinct issues.

To review the issues involved:

The Supreme Court, on the one hand, ruled on the issue whether Wilkinson unlawfully refused to answer a question pertinent to a matter under inquiry before a subcommittee of the Committee on Un-American Activities. The question involved was, "Are you now a member of the Communist Party?" The majority of the Supreme Court held that the question was pertinent and that the refusal to answer it was unlawful. A similar issue was involved in the Braden case.

The House of Representatives, on the other hand, was deciding, in effect, whether the Committee on Un-American Activities should continue its operations within budgetary limitations recommended by the House Administration Committee. The decision was overwhelmingly in the affirmative.

In my opinion, you cannot in logic compare the two decisions, and further, as you have done in your editorial, try to infer from that comparison the public sentiment with respect to the Committee on Un-American Activities. Your conclusion is pure poppycock.

Second, in asserting that "a hundred or more" Representatives voted against their convictions in supporting the appropriation for the Committee on Un-American Activities, you have, in a reckless fashion, impugned the honesty and the motives of almost every Member of the House of Representatives. In doing this, you have resorted to the very same tactic which you find objectionable when used by others.

Third, even if your allegations were true, and if in a secret ballot a hundred or more Representatives would have voted against the appropriation of funds for the Committee on Un-American Activities, the vote in the House still would have been 3 to 1 in support of the committee's work. While the two—as I have already mentioned—are not comparable, I believe that even such a 3 to 1 House vote would indicate a more accurate mirror of national opinion than the 5 to 4 vote of the Supreme Court on the above-mentioned cases.

Fourth, since you saw fit to include my name—at least by placement—within the group of Congressmen who, in your opinion, failed to vote their convictions, I would like to set the record straight: I did vote my conscience and conviction and I believe that my vote is in harmony with the opinion of the majority of the people whom I have the privilege to represent.

I have, in the past, criticized some of the methods used by the Committee on Un-American Activities, and I intend to speak against any abuse of legislative power. At the same time, I believe that the committee's legislative accomplishments, and its work in exposing the methods and the true aims of the Communist movement, warrants its continuation. I intend, therefore, to continue to support the legitimate work of that committee.

Your cooperation in printing this reply will be appreciated.

Yours sincerely,
CLEMENT J. ZABLOCKI,
Member of Congress.

"Operation Abolition"

EXTENSION OF REMARKS
OF
HON. JOHN H. ROUSSELOT
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, March 21, 1961

Mr. ROUSSELOT. Mr. Speaker, a great many charges have been raised against the film "Operation Abolition," and many of my constituents have expressed deep interest in knowing the facts behind this film. I have, therefore, prepared a study which I believe is a straightforward answer to these charges. Under unanimous consent, I include this study in the RECORD.

CHARGES AND FACTUAL ANSWERS CONCERNING THE HOUSE COMMITTEE ON UN-AMERICAN ACTIVITIES FILM "OPERATION ABOLITION"

1. Charge: The demonstrators were not Communist inspired and Communist led.

Fact: (a) George Christopher, mayor of San Francisco, quoted from the San Francisco Examiner, May 18, 1960: "The mayor said that in his opinion last Friday's riot was Communist directed and that for the most part, unknowing and misguided students were innocent pawns of trained Communist agitators skilled in crowd control tactics."

(b) J. Edgar Hoover, quoted from "Communist Target, Youth": "It is vitally important to set the record straight on the extent to which Communists were responsible for the disgraceful and riotous conditions which prevailed during the House Committee on Un-American Activities hearings. It is vitally important that not only the students involved in that incident, but also students throughout the Nation whom Communists hope to exploit in similar situations, recognize the Communist tactics which resulted in what experienced west coast observers familiar with Communist strategy and tactics have termed the most successful Communist coup to occur in the San Francisco area in 25 years.

(c) Judge Albert A. Axelrod, presiding judge at the San Francisco municipal court where those arrested at the riots appeared, made the following statement quoted on page A2 of the Washington Post, December 25, 1960: "I very definitely agree with the view of FBI Director J. Edgar Hoover that the city hall riot of last May 13 was instigated by Communist subversives."

(d) To clarify his position, which had been distorted in some quarters, Mayor Christopher made the following statement in his office on January 18, 1961: "Known Communists, and I repeat this emphatically, known Communists were in the lead of this demonstration. The students were dupes who joined some of these causers of agitation, believing it is an innocent and harmless expression of civil liberties, not realizing that while they are doing this they are at

the same time violating every precept of the liberties they profess to cherish."

2. Charge: The San Francisco police were brutal in their handling of the students. No witnesses have been produced who can verify that the rioters provocated the physical conflict.

Fact: (a) J. Edgar Hoover, as quoted from "Communist Target, Youth": "One of the judges in a municipal courtroom in the city hall ordered the mob dispersed because the noise made it impossible for him to hold court. When an attempt was made to carry out the order, the crowd responded by throwing shoes and jostling the officers. An officer warned that fire hoses would have to be used if the crowd did not disperse, but the crowd, instigated by Communists who had maneuvered themselves into strategic positions, became more unruly. One of the demonstrators provided the spark that touched off the flame of violence. Leaping a barricade that had been erected, he grabbed an officer's night stick and began beating the officer over the head. The mob surged forward as if to storm the doors, and a police inspector ordered the fire hose turned on. At a party meeting on the night of May 20, 1960, Archie Brown (Editor's note: Archie Brown is second in command of the Communist Party in California) disclosed how the party intended to use a followup campaign with campus students as the target. He stated that the party planned to emphasize 'police brutality' as a rallying cry to attract sympathy of student groups."

(b) Dave Hope, reporter, stated in an article on January 25, 1961, in the Oakland Tribune: "I was there. I was in the committee room, in the hallway, on the rotunda. I mingled with the demonstrators, watched the picket lines." On the following day in the Oakland Tribune in another riot article, he said, "I didn't hear any orders, but I did hear the police ask, even beg, the students to be quiet and to leave the city hall. All through the morning the police were polite and courteous. Even when the mob's mood turned ugly after the noon recess, and the hose was brought out, the students were warned repeatedly for a period of at least 10 minutes before the water was turned on. That didn't happen until one student grabbed an officer's night stick and slugged him with it." It has been claimed that no one was ever charged for this, however, that is dead wrong. Hope went on to say, "Robert J. Meisenbach, a University of California student who was then living in Berkeley, was arrested and charged with assault. His trial is still pending, now set for March 6."

(c) In the January 25 article, Hope went on to say, "Police were careful not to use excessive force. When two or three officers carry out one person, they're being gentle. The party never gets rough until it's man for man. So there was no chance for martyrdom and this was disappointing. Martyrs must above all else be dignified. You can't be a martyr when soaking wet you're skidded unceremoniously down a flight of stairs on the part of your anatomy that should have been spanked more frequently in your childhood."

(d) The San Francisco Chronicle, Saturday, May 14, 1960, in a lead article on page 1, reported that eight policemen and four students were injured. By the ratio of injuries it would appear that the so-called "brutality" was felt more by the police than the students.

3. Charge: The film is edited, distorted, out of sequence and deliberately slants the facts.

Fact: (a) Obviously, the film is edited, as is every film ever made. Three days of hearings, including the interviews of 46 witnesses cannot be shown in a 45-minute film without editing and omission of most of the material. One thing is certain—the film does not show anything which in fact did not occur during the period of the hearings.

(b) If, as has been claimed, there had been religious students present who wore armbands to distinguish them from the other protestors, the bands would have been visible in the film. For certainly, the films scanned the crowd in a most comprehensive way and any armbands present could not have been deleted from the film.

(c) There are two errors in the film: One, Harry Bridges is shown leaving the city hall and the accompanying editorial comment says this was shortly before the riots. In fact, he arrived shortly after the rioters had been cleared by the use of fire hoses. The important fact is that Harry Bridges was there. Two, a sequence taken on Saturday was included in the Thursday sequence. David Hope stated in the Oakland Tribune, January 25, 1961, "* * * It is astonishing that no more serious mistakes were made in putting the film together and drafting the commentary."

(d) Mayor Christopher, in his statement of January 18, 1961, summed up by saying, "The pictures I believe speak for themselves. They are true. They are authentic. They tell the real story and, of course, at the same time, they are most unfortunate, to say the least."

4. Charge: The hearing room was unfairly "stacked" with those sympathetic to the committee.

Fact: (a) J. Edgar Hoover, in "Communist Target, Youth," stated, "Approximately 25 percent of the spectators in the room were individuals under subpena and their friends, relatives, attorneys, and sympathizers. This group applauded and cheered the antics of Brown and Brodsky and booed, hissed, and ridiculed the committee at every opportunity."

(b) Seven Baptist ministers from the San Francisco Bay area, who were in attendance at the hearings, issued a joint statement which was printed on May 17, 1960, in the publication of the Foothill Baptist Church, 1530 Foothill Boulevard, Oakland, Calif., which stated, in part: "We sat in the rear of the room (hearing room) on a raised platform where we could easily observe the proceedings, right in the midst of the student demonstrators. We studied the crowd carefully for hours and could easily discern which were the masterminds of the mob riots. It is our certain conviction that this indefensible demonstration against law and order was conceived, planned and directed by a few hard-core Communist agitators who were carrying out their textbook orders on insurrection with classic success."

These statements, as well as the film sequences taken within the hearing room, make it all too plain that, if anything, too many persons actively opposed to the Committee on Un-American Activities were inside the hearing room.

5. Charge: Sheriff Carberry of San Francisco stated, "There was no act of physical aggression on the part of the students."

Fact: The above quotation was attributed to Sheriff Carberry by Paul Jacobs in his article attacking the film which was published in the November 24, 1960, issue of the Reporter magazine. On December 6, 1960, Sheriff Carberry issued the following statement concerning the above quote:

"I did not make that statement. I do not know the author of the article, Paul Jacobs, and have never spoken to him and have never been interviewed by him.

"I was on the scene on Thursday and Friday (May 12 and 13) up to luncheon time when I went for a luncheon conference with the chairman of the committee, Mr. WILLIS. The disorders took place during the luncheon and I was in no position to know anything about them.

"I did not make that statement."

6. Charge: The film fails to name non-Communist groups by whom the protest against the committee was endorsed.

Fact: No one disputes that assertion. The important fact here is that those who were part of the rioting group responded to the orders and directions of known, identifiable Communists. Furthermore, the HCUA might have been subject to justifiable criticism, if in the course of naming and identifying the known Communists who are shown in the film, the names of other, non-Communist groups and persons were mentioned. The HCUA showed admirable and patriotic restraint in not identifying those groups so that the groups could not be subjected to "guilt by association."

7. Charge: Judge Axelrod, presiding judge of the San Francisco municipal court where the rioters were brought, stated: "I am convinced that they (the rioters) are not engaged in subversive activities nor in spreading subversive propaganda."

Fact: In a news article in the December 25, 1960, Washington Post, dateline San Francisco, December 24, 1960 (AP), Judge Axelrod is quoted as saying, "At no time did I condone their conduct. A single sentence (ed.: the one quoted above in the charge) from my decision, quoted out of context, created that false impression. * * * " After the sentence quoted above, the judge went on to say, "However, they chose the wrong means to accomplish their purpose and let themselves become victims of those who profit by creating unrest, riots and the type of conduct which is outlawed by the penal code section I have quoted. As the result, they were arrested, fingerprinted, and photographed, and their efforts achieved a directly opposite result."

8. Charge: The film used to make "Operation Abolition" was obtained by the HCUA improperly and before the private TV stations which took the film could view it. Also, no credit lines are given. Furthermore, the sale of this film by a private firm is in violation of the copyrights of the stations which took the films.

Fact: (a) The film was obtained by subpena, which is the normal legal way that evidence is obtained by any investigatory body or court of law. The TV people who took the film made no objections to this procedure. A copy of the film was made by Video Productions, Inc., Washington, at the request of the HCUA and quickly returned to the stations.

(b) No credit lines were placed on the film because the film was presented as an official document of the HCUA to be submitted to the Congress. In such cases, credit lines are not normally included, for the document is officially authenticated by the presenting committee and not by a private individual or firm.

(c) No copyright infringement suits have been filed against Video Productions, Inc., nor are any planned, so far as is known.

9. Charge: The film must be inaccurate because of all the furor and controversy that it has created.

Fact: Dave Hope, writing in the Oakland Tribune of January 25, 1961, sums it up: "From the audience reaction (to the film) I would say it is extremely effective and that is why extraordinary effort is made to discredit it. Few people have seen Communists in action. Here they are shown when called before the hearing, screaming imprecations, insults, and contempt at a committee of the U.S. Congress. Almost maniacal in their challenge to law and order, they present an ugly picture that cannot be adequately described in words but becomes all too vivid in the film. For those who took part in the riot and their apologists, the film is just too accurate, too revealing. That's why it is so bitterly attacked."

SENATE

WEDNESDAY, MARCH 22, 1961

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

Archbishop Vasili, of the Byelorussian Autocephalic Orthodox Church, Brooklyn, N.Y., offered the following prayer:

In the name of the Father, and the Son, and the Holy Ghost. The most high and eternal God.

This prayer we make to Thee on this anniversary of the declaration of independence of Byelorussia, whose freedom was suppressed with brute, godless force, whose millions of martyrs before Thy throne cry to Thee: Exercise Thy justice, restore our freedom and the freedom of all oppressed peoples.

In this solemn hour we beseech Thee, our God and Father, be gracious unto us, for Thou art great and doest wondrous things. Thou art our God alone, full of grace and truth, glory and majesty.

Merciful God, Thou hast blessed the people of this country, for Thou loveth righteousness, and hateth wickedness. Thou hast preached freedom on this earth, and made it the foundation of life for men. Bless the leaders and lawgivers of this country, strengthen their hearts with Thy grace, as they strive for Thy truth and freedom everywhere, for all suffering and oppressed peoples.

We humbly bow our heads before Thee, our God and Saviour, and faithfully implore Thee: Accept this, our prayer; bless the United States of America and Byelorussia.

May Thy glorious name, our God and Redeemer, reign and shine in our hearts and be blessed now and forever. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, March 21, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on March 21, 1961, the President had approved and signed the act (S. 451) to authorize the distribution of copies of the CONGRESSIONAL RECORD to former Members of Congress requesting such copies.

FOREIGN AID—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 117)

The VICE PRESIDENT. The Chair lays before the Senate a message from the President of the United States on foreign aid. The Chair is informed that the message has been read in the House, and, without objection, it will be printed in the RECORD at this point and referred to the Committee on Foreign Relations.

The message was referred to the Committee on Foreign Relations, as follows:

To the Congress of the United States:

This Nation must begin any discussion of foreign aid in 1961 with the recognition of three facts:

1. Existing foreign aid programs and concepts are largely unsatisfactory and unsuited for our needs and for the needs of the underdeveloped world as it enters the sixties.

2. The economic collapse of those free but less-developed nations which now stand poised between sustained growth and economic chaos would be disastrous to our national security, harmful to our comparative prosperity and offensive to our conscience.

3. There exists, in the 1960's, a historic opportunity for a major economic assistance effort by the free industrialized nations to move more than half the people of the less-developed nations into self-sustained economic growth, while the rest move substantially closer to the day when they, too, will no longer have to depend on outside assistance.

I

Foreign aid: America's unprecedented response to world challenges has not been the work of one party or one administration. It has moved forward under the leadership of two great Presidents—Harry Truman and Dwight Eisenhower—and drawn its support from forward-looking members of both political parties in the Congress and throughout the Nation.

Our first major foreign aid effort was an emergency program of relief—of food and clothing and shelter—to areas devastated by World War II. Next we embarked on the Marshall plan—a towering and successful program to rebuild the economies of Western Europe and prevent a Communist takeover. This was followed by point 4—an effort to make scientific and technological advances available to the people of developing nations. And recently the concept of development assistance, coupled with the OECD, has opened the door to a united free world effort to assist the economic and social development of the less-developed areas of the world.

To achieve this new goal we will need to renew the spirit of common effort which lay behind our past efforts—we must also revise our foreign aid organization, and our basic concepts of operation to meet the new problems which now confront us.

For no objective supporter of foreign aid can be satisfied with the existing program—actually a multiplicity of programs. Bureaucratically fragmented, awkward and slow, its administration is diffused over a haphazard and irrational structure covering at least four departments and several other agencies. The program is based on a series of legislative measures and administrative procedures conceived at different times and for different purposes, many of them now obsolete, inconsistent and unduly rigid and thus unsuited for our present needs and purposes. Its weaknesses have begun to undermine confidence in our effort both here and abroad.

The program requires a highly professional skilled service, attracting substantial numbers of high caliber men and women capable of sensitive dealing with other governments, and with a deep understanding of the process of economic development. However, uncertainty and declining public prestige have all contributed to a fall in the morale and efficiency of those employees in the field who are repeatedly frustrated by the delays and confusions caused by overlapping agency jurisdictions and unclear objectives. Only the persistent efforts of those dedicated and hard-working public servants who have kept the program going, managed to bring some success to our efforts overseas.

In addition, uneven and undependable short-term financing has weakened the incentive for the long-term planning and self-help by the recipient nations which are essential to serious economic development. The lack of stability and continuity in the program—the necessity to accommodate all planning to a yearly deadline—when combined with a confusing multiplicity of American aid agencies within a single nation abroad—have reduced the effectiveness of our own assistance and made more difficult the task of setting realistic targets and sound standards. Piecemeal projects, hastily designed to match the rhythm of the fiscal year are no substitute for orderly long-term planning. The ability to make long-range commitments has enabled the Soviet Union to use its aid program to make developing nations economically dependent on Russian support—thus advancing the aims of world communism.

Although our aid programs have helped to avoid economic chaos and collapse, and assisted many nations to maintain their independence and freedom—nevertheless it is a fact that many of the nations we are helping are not much nearer sustained economic growth than they were when our aid operation began. Money spent to meet crisis situations or short-term political objectives while helping to maintain national integrity and independence has rarely moved the recipient nation toward greater economic stability.

II

In the face of these weaknesses and inadequacies—and with the beginning of a new decade of new problems—it is proper that we draw back and ask with candor a fundamental question: Is a foreign aid program really necessary? Why should we not lay down this burden which our Nation has now carried for some 15 years?

The answer is that there is no escaping our obligations: our moral obligations as a wise leader and good neighbor in the interdependent community of free nations—our economic obligations as the wealthiest people in a world of largely poor people, as a nation no longer dependent upon the loans from abroad that once helped us develop our own economy—and our political obligations as the single largest counter to the adversaries of freedom.

To fail to meet those obligations now would be disastrous; and, in the long run, more expensive. For widespread poverty and chaos lead to a collapse of existing political and social structures which would inevitably invite the advance of totalitarianism into every weak and unstable area. Thus our own security would be endangered and our prosperity imperiled. A program of assistance to the underdeveloped nations must continue because the Nation's interest and the cause of political freedom require it.

We live at a very special moment in history. The whole southern half of the world—Latin America, Africa, the Middle East, and Asia—are caught up in the adventures of asserting their independence and modernizing their old ways of life. These new nations need aid in loans and technical assistance just as we in the northern half of the world drew successively on one another's capital and know-how as we moved into industrialization and regular growth.

But in our time these new nations need help for a special reason. Without exception they are under Communist pressure. In many cases, that pressure is direct and military. In others, it takes the form of intense subversive activity designed to break down and supersede the new—and often frail—modern institutions they have thus far built.

But the fundamental task of our foreign aid program in the 1960's is not negatively to fight communism: Its fundamental task is to help make a historical demonstration that in the 20th century, as in the 19th—in the southern half of the globe as in the north—economic growth and political democracy can develop hand in hand.

In short we have not only obligations to fulfill, we have great opportunities to realize. We are, I am convinced, on the threshold of a truly united and major effort by the free industrialized nations to assist the less-developed nations on a long-term basis. Many of these less-developed nations are on the threshold of achieving sufficient economic, social and political strength and self-sustained growth to stand permanently on their own feet. The 1960's can be—and must be—the crucial "decade of development"—the period when many less-developed nations make the transition into self-sustained growth—the period in which an enlarged community of free, stable, and self-reliant nations can reduce world tensions and insecurity. This goal is in our grasp if, and only if, the other industrialized nations now join us in developing with the recipients a set of commonly agreed criteria, a set of long-range goals, and a common undertaking to meet those goals, in which each nation's contribution is related to the contributions of others and to the precise needs of each less-developed nation. Our job, in its largest sense, is to create a new partnership between the northern and southern halves of the world, to which all free nations can contribute, in which each free nation must assume a responsibility proportional to its means.

We must unite the free industrialized nations in a common effort to help those nations within reach of stable growth get underway. And the foundation for this unity has already been laid by the creation of the OECD under the leadership of President Eisenhower. Such a unified effort will help launch the economies of the newly developing countries "into orbit"—bringing them to a stage of self-sustained growth where extraordinary outside assistance is not required. If this can be done—and I have every reason to hope it can be done—then this decade will be a significant one indeed in the history of freemen.

But our success in achieving these goals, in creating an environment in which the energies of struggling peoples can be devoted to constructive purposes in the world community—and our success in enlisting a greater common effort toward this end on the part of other industrialized nations—depends to a large extent upon the scope and continuity of our own efforts. If we encourage recipient countries to dramatize a series of short-term crises as a basis for our aid—instead of depending on a plan for long-term goals—then we will dissipate our funds, our good will and our leadership. Nor will we be any nearer to either our security goals or to the end of the foreign aid burden.

In short, this Congress at this session must make possible a dramatic turning point in the troubled history of foreign aid to the underdeveloped world. We must say to the less-developed nations, if they are willing to undertake necessary internal reform and self-help—and to the other industrialized nations, if they are willing to undertake a much greater effort on a much broader scale—that we then intend during this coming decade of development to achieve a decisive turnaround in the fate of the less developed world, looking toward the ultimate day when all nations can be self-reliant and when foreign aid will no longer be needed.

However, this will not be an easy task. The magnitude of the problems is staggering. In Latin America, for example, population growth is already threatening to outpace economic growth—and in some parts of the continent living standards are actually declinging. In 1945 the population of our 20 sister American Republics was 145 million. It is now greater than that of the United States, and by the year 2000, less than 40 years away, Latin American population will be 592 million, compared with 312 million for the United States. Latin America will have to double its real income in the next 30 years simply to maintain already low standards of living. And the problems are no less serious or demanding in the other developing areas of the world. Thus to bring real economic progress to Latin America and to the rest of the less-developed world will require a sustained and united effort on the part of the Latin American Republics, the United States, and our free world allies.

This will require leadership by this country in this year. And it will require a fresh approach—a more logical, efficient and successful long-term plan—for American foreign aid. I strongly recommend to the Congress the enactment of such a plan, as contained in a measure to be sent shortly to the Congress and described below.

III

If our foreign aid funds are to be prudently and effectively used, we need a whole new set of basic concepts and principles:

1. Unified administration and operation: A single agency in Washington and the field, equipped with a flexible set of tools, in place of several competing and confusing aid units.

2. Country plans: A carefully thought through program tailored to meet the needs and the resource potential of each individual country, instead of a series of individual, unrelated projects. Frequently, in the past, our development goals and projects have not been undertaken as integral steps in a long-range economic development program.

3. Long-term planning and financing: The only way to make meaningful and economical commitments.

4. Special emphasis on development loans repayable in dollars, more conducive to businesslike relations and mutual respect than sustaining grants or loans repaid in local currencies, although some instances of the latter are unavoidable.

5. Special attention to those nations most willing and able to mobilize their own resources, make necessary social and economic reforms, engage in long-range planning, and make the other efforts necessary if these are to reach the stage of self-sustaining growth.

6. Multilateral approach: A program and level of commitments designed to encourage and complement an increased effort by other industrialized nations.

7. A new agency with new personnel, drawing upon the most competent and dedicated career servants now in the field, and attracting the highest quality from every part of the Nation.

8. Separation from military assistance: Our program of aid to social and economic development must be seen on its own merits, and judged in the light of its vital and distinctive contribution to our basic security needs.

IV

I propose that our separate and often confusing aid programs be integrated into a single administration embracing the present Washington and field operations of—

A. The International Cooperation Administration (ICA) and all its technical assistance (point 4) and other programs.

B. The Development Loan Fund (DLF).

C. The food-for-peace program (Public Law 480) in its relations with other countries, while also recognizing its essential role in our farm economy.

D. The local currency lending activities of the Export-Import Bank.

E. The Peace Corps, recognizing its distinctive contribution beyond the area of economic development.

F. The donation of nonagricultural surpluses from other national stockpiles of excess commodities or equipment.

G. All other related staff and program services now provided by the Department of State as well as ICA.

The fieldwork in all these operations will be under the direction of a single mission chief in each country reporting to the American Ambassador. This is intended to remove the difficulty which the aided countries and our own field personnel sometimes encounter in finding the proper channel of decisionmaking. Similarly, central direction and final responsibility in Washington will be fixed in an administrator of a single agency—reporting directly to the Secretary of State and the President—working through Washington directors for each major geographical area, and through the directors of the constituent resource units whose functions are drawn together in each national plan; a development lending organization, food for peace, the Peace Corps, and a unit for technical and other assistance stressing education and human resources—initiating a program of research, development and scientific evaluation to increase the effectiveness of our aid effort; and in addition, the Secretary of State will coordinate with economic aid the military assistance program administered by the Department of Defense, the related operations of the Export-Import Bank, and the role of the United States in the Inter-American Fund for Social Progress and activities of international organizations.

Under the jurisdiction of both the Secretary of State in Washington and the Ambassadors in the field, foreign aid can more effectively play its part as an effective instrument of our overall efforts for world peace and security. The concentration of responsibilities and increased status will both require and attract high-caliber personnel. Programs such as the Peace Corps and food for peace, far from being submerged, will be used more effectively and their distinctive identity and appeal preserved—and food for peace will continue to be based on availabilities determined by the Department of Agriculture.

But I am not proposing merely a reshuffling and relabeling of old agencies and their personnel, without regard to their competence. I am recommending the replacement of these agencies with a new one—a fresh start under new leadership.

V

But new organization is not enough. We need a new working concept.

At the center of the new effort must be national development programs. It is essential that the developing nations set for themselves sensible targets; that these targets be based on balanced programs for their own economic, educational, and social growth—programs which use their own resources to the maximum. If planning assistance is required, our own aid organization will be prepared to respond to requests for such assistance, along with the International Bank for Reconstruction and Development and other international and private institutions. Thus, the first requirement is that each recipient government seriously undertake to the best of its ability on its own those efforts of resource mobilization, self-help, and internal reform—including land reform, tax reform, and improved education and social justice—which its own development requires and which would increase its capacity to absorb external capital productively.

These national development programs—and the kind of assistance the free world provides—must be tailored to the recipients' current stage of development and their foreseeable potential. A large infusion of development capital cannot now be absorbed by many nations newly emerging from a wholly underdeveloped condition. Their primary need at first will be the development of human resources, education, technical assistance and the groundwork of basic facilities and institutions necessary for further growth. Other countries may possess the necessary human and material resources to move toward status as developing nations, but they need transitional assistance from the outside to enable them to mobilize those resources and move into the more advanced stage of development where loans can put them on their feet. Still others already have the capacity to absorb and effectively utilize substantial investment capital.

Finally, it will be necessary, for the time being, to provide grant assistance to those nations that are hard pressed by external or internal pressure, so that they can meet those pressures and maintain their independence. In such cases it will be our objective to help them, as soon as circumstances permit, make the transition from instability and stagnation to growth; shifting our assistance as rapidly as possible from a grant to a development loan basis. For our new program should not be based merely on reaction to Communist threats or short-term crises. We have a positive interest in helping less-developed nations provide decent living standards for their people and achieve sufficient strength, self-respect and independence to become self-reliant members of the community of nations. And thus our aid should be conditioned on the recipients' ability and willingness to take the steps necessary to reach that goal.

To meet the varied needs of many nations, the new aid administration will have a flexible set of tools, coordinated and shaped to fit each national development program: the grant or sale—for either local currency or dollars with special repayment terms—of surplus foods, equipment and other items; technical assistance; skilled manpower from the Peace Corps; development grants; transitional, sustaining or emergency grants; development loans repayable in local currency; and development loans repayable in dollars, with special terms of repayment that will meet the needs of the recipient country. These tools will be coordinated with the activities of the Export-Import Bank, and with loan and investment guarantees to private enterprise.

The instrument of primary emphasis—the single most important tool—will be long-term development loans at low or no rates of interest, repayable in dollars, and designed to promote growth in those less-developed nations which have a real chance for ultimate self-reliance but which lack the ability to service loans from normal lending institutions. The terms of repayment will vary from as long as 50 years for those countries just starting on the road to development, to a much shorter period of time for those countries that are nearing the stage of self-sufficient growth.

Such long-term loans are preferable to outright grants, or "soft loans" repayable in local currencies that are of little benefit to the American taxpayer. The emphasis on low or interest-free loans is not designed to undercut other institutions. The objective is to rely on flexibility in the repayment period and the requirement of ultimate dollar repayment for insuring strict accountancy while meeting individual needs in an area not met by suppliers of capital on normal terms.

Lending on these terms is not normal banking practice. We are banking on the emergence over coming years and decades of a group of independent, growing, self-reliant nations.

VI

A program based on long-range plans instead of short-run crises cannot be financed on a short-term basis. Long-term authorization, planning and financing are the key to the continuity and efficiency of the entire program. If we are unwilling to make such a long-term commitment, we cannot expect any increased response from other potential donors or any realistic planning from the recipient nations.

I recommend, therefore, an authorization for the new aid agency of not less than 5 years, with borrowing authority also for 5 years to commit and make dollar repayable loans within the limits spelled out below. No other step would be such a clear signal of our intentions to all the world. No other step would do more to eliminate the restrictions and confusions which have rendered the current foreign aid program so often ineffective. No other step would do more to help obtain the service of top-flight personnel. And in no other way can we encourage the less-developed nations to make a sustained national effort over a long-term period.

For, if we are to have a program designed to brighten the future, that program must have a future. Experience has shown that long-range needs cannot be met evenly and economically by a series of 1-year programs. Close consultation and cooperation with the Congress and its committees will still be essential, including an annual review of the program.

And we will still need annual appropriations of those amounts needed to meet requirements for which dollar repayable loans would be unsuitable. These appropriations should be available until spent in order to avoid any wasteful rush to obligate funds at the end of a fiscal year.

The new continuity and flexibility this kind of long-term authority will bring cannot help but result in more productive criteria, a greater effort on the part

of the developing nations, greater contributions from our more prosperous allies, more solid results and real long-run economy to the taxpayers. The new emphasis on long-term plans and realistic targets will give both the Congress and the Executive a better basis for evaluating the validity of our expenditures and progress.

VII

A long-term program and borrowing authority, even though limited, will enable us to demonstrate the seriousness of our intentions to other potential donors and to the less-developed world. Over the next 5 years, the economic program here proposed, together with an expanded food-for-peace program as recommended in my agricultural message, and project loans by the Export-Import Bank, will constitute direct U.S. economic assistance activity of considerable magnitude.

It will, however, take time to institute the new concepts and practices which are proposed. Thus, during this initial year, while we will need to make the necessary long-term commitments for development lending, it is unnecessary to ask the Congress for any additional funds for this year's program.

Consequently, while the funds requested by my predecessor will be sharply shifted in terms of their use and purpose, I am asking the Congress for a total foreign aid budget of new obligational authority no greater than that requested in the rockbottom budget previously submitted ($4 billion) despite the fact that the number of new nations needing assistance is constantly increasing; and, though increasing such authority for nonmilitary aid while reducing military assistance, this budget provides for a level of actual expenditures on nonmilitary aid no greater than reflected in the previous budget—$1.9 billion. These figures do not, of course, reflect Public Law 480 operations.

In deciding on this program, I have also carefully considered its impact on our balance of payments. We are now putting maximum emphasis, in both our development lending and grant aid programs, on the procurement of goods and services of U.S. origin. As I pointed out in my message on the balance of payments, under present procedures not more than 20 percent of foreign economic aid expenditures will affect our balance of payments. This means that approximately $2 billion out of the requested $2.4 billion in economic aid will be spent directly for goods and services benefiting the American economy.

This is important. For not only do we have the highest gross national product, both total and per capita, of any country in the world, thus making clear both our obligations and our capacity to do our full part, but we are currently underutilizing our great economic capacity because of economic recession and slack. Less than 80 percent of our industrial capacity is now in use, and nearly 7 percent of our labor force is unemployed. Under these circumstances cutbacks in the foreign aid program would be felt not only in loss of economic progress and hope abroad but in loss of markets and income for business, labor, and agriculture at home.

In short, this program will not in whole or in part unbalance the previous budget in any fashion. Its impact on our balance of payments will be marginal. And its benefits for our domestic economy should not be overlooked.

The $4 billion previously requested for fiscal year 1962 will be reallocated under this new program as follows:

Military assistance will be reduced from the $1.8 billion requested to $1.6 billion, as discussed below.

Economic assistance, with a much greater portion going to development loans, a small increase in development grants, and a reduction in sustaining grants, will total $2.4 billion.

Of this, $1.5 billion will be contained in the usual annual appropriation of new obligational authority to finance the part of the program that is not suitable for dollar development loans: Grants for education, social progress and institutional development, the Peace Corps, and sustaining aid; $900 million will be available for long-term low or interest-free development loans to be repaid in dollars, financed through an authorization of public debt borrowing authority which would also provide no more than $1.6 billion for each of the succeeding 4 years. Also to be made available for such loans under the new system of full coordination will be the unappropriated dollar funds now coming in in repayment of the principal and interest on certain previous loans to foreign governments—United Kingdom, ECA, GARIOA, and others—but not the Export-Import Bank.

VIII

The economic programs I am recommending in this message cannot succeed without peace and order. A vital element toward such stability is assurance of military strength sufficient to protect the integrity of these emerging nations while they are advancing to higher and more adequate levels of social and economic well-being.

I shall therefore request the Congress to provide at this time $1.6 billion for provision of military assistance. This figure is the amount required to meet the U.S. share in maintaining forces that already exist, and to honor firm existing commitments for the future.

I am frank to say that we cannot now say with precision whether this amount will meet the minimum level of military aid which our basic security policy might demand this year. The emergence of new crises or new conflicts may require us to make an even greater effort.

However, while I have mentioned in this message the amount to be allocated to military assistance, those funds, while coordinated with the policies of the new Agency, will not be administered by it and should not be included in its appropriation. In order to make clear the peaceful and positive purposes of this program, to emphasize the new importance this administration places on economic and social development quite apart from security interests, and to make clear the relation between the military assistance program and those interests, I shall propose a separate authorization for military assistance with appropriations as part of the Defense budget. Moreover, to the extent that world security conditions permit, military assistance will in the future more heavily emphasize the internal security, civil works and economic growth of the nations thus aided. By this shift in emphasis, we mean no lessening of our determination to oppose local aggression wherever it may occur. We have demonstrated our will and ability to protect free world nations—if they so desire—from the type of external threat with which many of them are still confronted. We will not fall short on this.

IX

The levels on which this new program is based are the minimum resulting from a hard reappraisal of each type of assistance and the needs of the less-developed world. They demonstrate both to the less-developed nations and to the other industrialized nations that this country will meet its fair share of effort necessary to accomplish the desired objective, and their effort must be greater as well. These are the rockbottom minimum of funds necessary to do the job. To provide less would be wasteful, perhaps more wasteful, than to provide more. Certainly it would be wasteful to the security interest of the free world.

But I am hopeful that the Congress will not provide less. Assistance to our fellow nations is a responsibility which has been willingly assumed and fashioned by two great Presidents in the past, one from each party—and it has been supported by the leaders of both parties in both Houses who recognized the importance of our obligations.

I believe the program which I have outlined is both a reasonable and sensible method of meeting those obligations as economically and effectively as possible. I strongly urge its enactment by the Congress, in full awareness of the many eyes upon us—the eyes of other industrialized nations, awaiting our leadership for a stronger united effort—the eyes of our adversaries, awaiting the weakening of our resolve in this new area of international struggle—the eyes of the poorer peoples of the world, looking for hope and help, and needing an incentive to set realistic long-range goals—and, finally, the eyes of the American people, who are fully aware of their obligations to the sick, the poor and the hungry, wherever they may live. Thus, without regard to party lines, we shall take this step not as Republicans or as Democrats but as leaders of the free world. It will both befit and benefit us to take this step boldly. For we are launching a decade of development on which will depend, substantially, the kind of world in which we and our children shall live.

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 22, 1961.*

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, informed the Senate that, pursuant to the provisions of section 1, Public Law 86–719, the Speaker had appointed, on the part of the House, the

following members from private life of the U.S. Citizens Commission on NATO: Mr. W. L. Clayton, of Texas, Mr. George J. Feldman, of New York, Mr. Hugh Moore, of Pennsylvania, Mr. Ralph D. Pittman, of the District of Columbia, Mr. Donald G. Agger of Maryland, Mr. Eric Johnston, of the District of Columbia, Mr. Adolph W. Schmidt, of Pennsylvania, Mr. Oliver C. Schroeder, Jr., of Ohio, Mr. Burr S. Swezey, Sr., of Indiana, and Mr. Morris Forgash, of New York.

The message announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes.

The message also announced that the House had passed the following bills and joint resolution in which it requested the concurrence of the Senate:

H.R. 484. An act to amend section 1502 of title 38, United States Code, to provide vocational rehabilitation to certain veterans in need thereof to overcome the handicap of a disability incurred in or aggravated by active service after World War II and before the Korean conflict, or after the Korean conflict;

H.R. 1258. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes;

H.R. 4363. An act to amend Public Law 86–272 relating to State taxation of interstate commerce;

H.R. 4469. An act to amend the Subversive Activities Control Act of 1950 so as to provide that no individual who willfully fails or refuses to answer, or falsely answers, certain questions relating to subversive activities, when summoned to appear before certain Federal agencies, shall be employed on any merchant vessel of the United States or within certain waterfront facilities in the United States;

H.R. 4539. An act to amend section 723 of title 38 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes;

H.R. 5189. An act to amend the Internal Revenue Code of 1954 to exempt from tax income derived by a foreign central bank of issue from obligations of the United States;

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended; and

H.J. Res. 124. Joint resolution to provide for amending section 3 of the Puerto Rican Federal Relations Act (64 Stat. 319), as amended (64 Stat. 458).

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 307. An act to authorize certain beach erosion control of the shore in San Diego County, Calif.;

S. 449. An act to extend the time in which the Outdoor Recreation Resources Review Commission shall submit its final report;

S. 1028. An act to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959"; and

S. 1116. An act to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 848. An act to amend section 1502 of title 38, United States Code, to provide vocational rehabilitation to certain veterans in need thereof to overcome the handicap of a disability incurred in or aggravated by active service after World War II and before the Korean conflict, or after the Korean conflict; and

H.R. 1258. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes; to the Committee on Labor and Public Welfare.

H.R. 4363. An act to amend Public Law 86–272 relating to State taxation of interstate commerce;

H.R. 4539. An act to amend section 723 of title 38 of the United States Code to provide for immediate payment of dividends on insurance heretofore issued under section 621 of the National Service Life Insurance Act of 1940 which has been converted or exchanged for new insurance under such section, and for other purposes;

H.R. 5189. An act to amend the Internal Revenue Code of 1954 to exempt from tax income derived by a foreign central bank of issue from obligations of the United States; and

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended; to the Committee on Finance.

H.R. 4469. An act to amend the Subversive Activities Control Act of 1950 so as to provide that no individual who willfully fails or refuses to answer, or falsely answers, certain questions relating to subversive activities, when summoned to appear before certain Federal agencies, shall be employed on any merchant vessel of the United States or within certain waterfront facilities in the United States; to the Committee on the Judiciary.

H.J. Res. 124. Joint resolution to provide for amending section 3 of the Puerto Rico Federal Relations Act (64 Stat. 319), as amended (64 Stat. 458); to the Committee on Interior and Insular Affairs.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Committee on Finance was authorized to meet during the session of the Senate today.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business, to consider the nomination on the calendar.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce:

Frank P. Briggs, of Missouri, to be Assistant Secretary for Fish and Wildlife, Department of the Interior;

John W. Bush, of Ohio, to be an Interstate Commerce Commissioner;

William H. Tucker, of Massachusetts, to be an Interstate Commerce Commissioner;

Capt. Donald M. Morrison, Capt. Ned W. Sprow, Capt. Irvin J. Stephens, and Capt. James A. Alger, Jr., for promotion to the permanent rank of rear admiral in the U.S. Coast Guard; and

Edwin K. McCaffrey, and sundry other persons, for permanent appointment in the Coast and Geodetic Survey.

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs:

Ralphael M. Palewonsky, of the Virgin Islands, to be Governor of the Virgin Islands.

The VICE PRESIDENT. If there be no further reports of committees, the nomination on the calendar will be stated.

PEACE CORPS

The Chief Clerk read the nomination of Robert Sargent Shriver, Jr., of Illinois, to be Director of the Peace Corps.

Mr. DIRKSEN. Mr. President, Sargent Shriver comes from Illinois. He has served with distinction, as I think is agreed by all, as president of the Chicago Board of Education. He has been named Director of the Peace Corps.

Although I recognize there is some controversy about the Peace Corps as a function, I believe, however, that Sargent Shriver will bring to it a sense of dedication and diligence and a deft touch. If this kind of an operation can succeed at all, certainly it can succeed under his direction and management; and I completely approve this nomination.

Mr. MANSFIELD. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. MANSFIELD. I wish to join the distinguished minority leader in what he has said just now; and I wish to join him in expressing the hope that with the creation of this Corps, the choice of applicants will be very selective, and

that there will not be brought into the Corps anyone who will think of it as a joyride, or will come in because he may get a trip at governmental expense, or will come in because he is only emotionally involved. The Corps does give us an opportunity, of course, to make effective use of the idealism and good will that has always flourished in this country. Those who are selected for this organization will, in effect, be ambassadors, each in his own right, to represent our country overseas.

So, Mr. President, on the basis of conversations had with Mr. Shriver and the testimony taken before the Foreign Relations Committee, I am hopeful that he will be very selective and very careful, so that we shall obtain the most competent young and old Americans in this Corps, which can do so much good, but if not directed correctly, could do us considerable harm.

Mr. DIRKSEN. Mr. President, in view of the gracious remarks of the majority leader, I might amplify a little further: I have had rather extended meetings with Sargent Shriver, and we have discussed in great detail this entire matter.

I believe he is mindful of the dangers involved, and believes that they can be surmounted. After all, this is not a new operation, in the sense that a comparable type of work has been going on in this country and in other countries, as well, by the Society of Friends, commonly known as the Quakers; the United Brethren; the Mormons; and international voluntary services, all of whom have been active in this field over a long period of time in what I think is a rather comparable effort. The emphasis has been in the creature field—on health, medical care, housing, shelter, food, and the prevention and cure of disease. Of course, the people can readily understand those things.

This work does require training, indoctrination, and certain skills; and the success of the program will be measured in large degree, I believe, by the kind of training those in it receive. That training is to be given, as I understand, insofar as possible, at a number of universities during the summer season, when those facilities will not be in use by the universities themselves.

I am informed that there will be thorough screening, and that every effort will be made to insure that those who do go abroad will have the necessary skills, in order to be able to render efficient service.

I did mention at the time of my discussions with Mr. Shriver that, if necessary, we could follow the general line laid down by the President in his message, when he spoke of this as something of a pilot program. To be sure, the Executive order issued on March 1 will be supplemented by a request for legislation and funds; but there will be an effort to examine carefully the entire matter and to make sure that it is soundly based.

I would also emphasize one other thing: The Peace Corps as an entity is actually in being today. Perhaps that has been forgotten. I am not insensible of the fact that no one other than the headquarters staff has been selected. But the Peace Corps has been established by an Executive order; and funds have been transferred, insofar as that could legally be done, from some of the functions in the mutual security program. So it can be stated that this function is definitely launched and is in being; and from here on it will now have to have the necessary implementation.

Mr. MANSFIELD. Mr. President, I agree with the distinguished minority leader in what he has said. The Corps has been established, and has been established on a legal basis.

I hope the experience of foundations, church groups, missionary groups, and the like will be taken into consideration. I hope the prerequisite will not always be a college diploma, because there are many experienced retired people who can make significant contributions, and there are many of our young farmers—for example, those in the 4–H field—who likewise can make great contributions.

Mr. Shriver has been very forthright, candid, and honest in expressing his views. He is fully aware of the difficulties. I know he will be discreet and careful, and I can think of no better choice for this particular position than this gentleman from the State of Illinois.

Mr. McGEE. Mr. President, I should like to take this opportunity to express deep satisfaction at the nomination of R. Sargent Shriver as Director of the Peace Corps and wish him every possible success in this imaginative and challenging program which has been undertaken by the Kennedy administration.

Mr. Shriver brings to this task a dedication and a fresh and vigorous approach that has come to characterize all the nominations of the President. Mr. Shriver's willingness to accept this post, with no consideration of personal remuneration to himself and with an awareness of the staggering amount of work to be accomplished to make the Peace Corps a success, is a tribute both to the man and to the concept of the Corps.

The objectives of the Peace Corps have caught the imagination and fired the hopes of all America and a large portion of the free world, and I am confident that if future recruits and servants of the Corps possess the abilities and enthusiasm of its Director, Mr. Shriver, they will be extraordinarily successful in making the Peace Corps program a chief instrument of this country's efforts to bring peace and harmony to the world.

At a later date I shall have more to say on the Peace Corps as it develops. It has fired the imaginations of so many of our youth and kindled the hopes of even more to such an extent that we may find it necessary to move faster and on a much broader scale than presently envisioned.

The VICE PRESIDENT. The question is, Will the Senate advise and consent to the nomination?

Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The VICE PRESIDENT. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

APPOINTMENTS BY THE VICE PRESIDENT

The VICE PRESIDENT. The chair wishes to announce the appointment of the following persons on the U.S. Citizens' Commission on NATO:

Mr. Charles William Engelhard, Jr., of New Jersey, Mr. Elmo B. Roper, Jr., of Connecticut, Mr. Douglas Wynn, of Mississippi, Mrs. Edith S. Sampson, of Illinois, Mr. Alex Warden, of Montana, Mr. Christian A. Herter, of Massachusetts, Mr. William F. Knowland, of California, Mr. Ben Regan, of Illinois, Mr. David Rockefeller, of New York, and Dr. Francis S. Hutchins, of Kentucky.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following communication and letters, which were referred as indicated:

PROPOSED SUPPLEMENTAL APPROPRIATIONS, RAILROAD RETIREMENT BOARD, AND SOCIAL SECURITY ADMINISTRATION (S. DOC. NO. 22)

A communication from the President of the United States, transmitting proposed supplemental appropriations for the Railroad Retirement Board, in the amount of $24 million, and for the Social Security Administration, in the amount of $30 million, for the fiscal year 1961 (with an accompanying paper); to the Committee on Appropriations and ordered to be printed.

SETTLEMENT OF UNUSED LEAVE OF CERTAIN MEMBERS OF THE ARMED FORCES

A letter from the Secretary of the Air Force, transmitting a draft of proposed legislation to validate certain payments in settlement of unused accrued leave heretofore made to certain members of the Army and the Air Force (with an accompanying paper); to the Committee on Armed Services.

REPORT ON REVIEW OF CERTAIN ASPECTS OF BUREAU OF INDIAN AFFAIRS PROGRAM

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of certain aspects of the program for the termination of Federal supervision over Indian affairs, Bureau of Indian Affairs, Department of the Interior, dated March 1961 (with an accompanying report); to the Committee on Government Operations.

AMENDMENT OF ACT RELATING TO ESTABLISHMENT OF A REGISTER IN DEPARTMENT OF COMMERCE OF CERTAIN MOTOR VEHICLE OPERATORS' LICENSES

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the act approved July 14, 1960 (74 Stat. 526), relating to the establishment of a register in the Department of Commerce of certain motor vehicle operators' licenses (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

AMENDMENT OF TITLE 28, UNITED STATES CODE, RELATING TO FEES OF UNITED STATES MARSHALS

A letter from the Attorney General, transmitting a draft of proposed legislation to amend title 28, United States Code, with respect to fees of United States marshals (with an accompanying paper); to the Committee on the Judiciary.

REPORT OF ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS ENTITLED "MODIFICATION OF FEDERAL GRANTS-IN-AID FOR PUBLIC HEALTH SERVICES"

A letter from the Chairman, Advisory Commission on Intergovernmental Relations, Washington, D.C., transmitting, pursuant to law, a report of that Commission entitled "Modification of Federal Grants-in-Aid for Public Health Services," dated January 1961 (with an accompanying report); to the Committee on Labor and Public Welfare.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Iowa; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION 18

"Joint resolution ratifying a proposed amendment to the Constitution of the United States of America relating granting representation in the electoral college to the District of Columbia

"Whereas both Houses of the 86th Congress of the United States of America by a constitutional majority of two-thirds thereof, made the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"'JOINT RESOLUTION PROPOSING AN AMENDMENT TO THE CONSTITUTION OF THE UNITED STATES GRANTING REPRESENTATION IN THE ELECTORAL COLLEGE TO THE DISTRICT OF COLUMBIA

"'*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within 7 years from the date of its submission by the Congress:

"'"ARTICLE—

"'"SECTION 1. The District constituting the seat of the Government of the United States shall appoint in such manner as the Congress may direct:

"'"A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the 12th article of amendment.

"'"SEC. 2. The Congress shall have the power to enforce this article by appropriate legislation".': Therefore be it

"Resolved and enacted by the General Assembly of the State of Iowa:

"SECTION 1. Ratification. That the said proposed amendment to the Constitution of the United States of America as set forth herein be and the same is hereby ratified and consented to by the State of Iowa and by the General Assembly thereof.

"SEC. 2. Certification. Be it further resolved and enacted, that the certified copies of this enactment and resolution be forwarded by the Governor of this State to the Secretary of State of the United States at Washington, D.C., and to the Presiding Officers of each House of the Congress of the United States.

"W. L. MOOTY,
"President of the Senate.
"HENRY C. NELSON,
"Speaker of the House.
"CARROLL A. LANE,
"Secretary of the Senate.

"Approved March 17, 1961.

"NORMAN A. ERBE,
"Governor."

A resolution of the Senate of the State of New Jersey; to the Committee on the Judiciary:

"SENATE RESOLUTION OF THE STATE OF NEW JERSEY

"Whereas the New Jersey Civil War Centennial Commission, on March 9, 1961, adopted the following resolution; and

"Whereas the Civil War, the greatest internal crisis through which this Nation has passed, was fought at tremendous sacrifice to preserve and to amplify the fundamental law of our land, as set forth originally in the Bill of Rights; and

"Whereas the perpetuation of this Union was guaranteed therewith forever; and

"Whereas the sons of both North and South have subsequently fought side by side for human freedom, justice, and the dignity of the individual among people everywhere; and

"Whereas the Civil War Centennial period has been conceived as a period for commemorating these basic American ideas above all; and

"Whereas the National Civil War Centennial Commission has scheduled its fourth national assembly on the dates of April 11 and 12, 1961, in the city of Charleston, S.C.; and

"Whereas the National Civil War Centennial Commission is a creature of the Congress of the United States; and

"Whereas custom and/or law in the city of Charleston forbids equal hospitality to members of the Negro race; and

"Whereas a national assembly under these conditions would abrogate the fundamental law of our land and the fundamental concepts of human decency and the fundamental guarantees of civil liberties under the New Jersey Constitution; and

"Whereas Mrs. Madaline A. Williams, a member of the Negro race, is a duly appointed member of the New Jersey Civil War Centennial Commission; and

"Whereas Mrs. Williams has served as an elected member of the Essex County delegation of the New Jersey General Assembly, and is currently serving in the elective post of Essex County Register: Now, therefore, be it

"Resolved, That this commission cannot in good conscience, under its sworn obligations, participate in the fourth national assembly; and be it further

"Resolved, That members of all other State Civil War centennial commissions be urged to call upon their respective congressional delegations to demand that the fourth national assembly, as presently conceived, be canceled forthwith as an act of responsible national statesmanship and scheduled for a later date in a location which will respect the fundamental constitutional rights of persons of all races and creeds; and be it further

"Resolved by the Senate of the State of New Jersey, That the foregoing resolution adopted by the New Jersey Civil War Centennial Commission is approved; and be it further

"Resolved, That the secretary of the senate provide the New Jersey Civil War Centennial Commission with a copy of this resolution attested by him in order that the said centennial commission may forward copies hereof to the other State Civil War centennial commissions; and be it further

"Resolved, That the secretary of the senate forward copies of this resolution attested by him to the U.S. Senators from New Jersey and the Members of the House of Representatives from the several congressional districts of New Jersey."

A resolution adopted by the 12th annual conference of the California Society of the American Institute of Park Executives, at Monterey, Calif., favoring the enactment of legislation similar to the Civilian Conservation Corps and the works project program, in order to relieve unemployment; to the Committee on Labor and Public Welfare.

The petition of D. B. Eberhart, of Los Angeles, Calif., relating to the naming and status of the State of Hawaii; to the Committee on Interior and Insular Affairs.

By Mrs. SMITH of Maine:

A joint resolution of the Legislature of the State of Maine; to the Committee on the Judiciary.

"RESOLUTION OF STATE OF MAINE

"Joint resolution to commemorate the establishment of uniform weights and measures

"Whereas the first weights and measures law was enacted by the Congress of the United States 162 years ago on March 2, 1799; and

"Whereas the establishment of uniform weights and measures assisted the infant country by promoting commercial relationships among the States and between this country and the outside world; and

"Whereas the system of uniform weights and measures, thus established, made possible the development of the United States into one of the giant powers of the world; and

"Whereas weights and measures laws in Maine have established consumer business confidence so that all may share the benefits of mass production and handling of commodities; and

"Whereas the week of March 1 to 7 has been set aside to recognize the service of weights and measures and the officials who enforce the laws: Now, therefore, be it

"Resolved, That the Senate of Maine, the House concurring, hereby request that officials of the State and municipalities, business and commercial agencies, and citizens throughout Maine join in appropriate observance of that week, to the end that the general understanding of weights and measures principles may be enhanced and that cooperation among all interests concerned in or affected by weights and measures administration may be encouraged and promoted; and be it further

"Resolved, That a copy of this resolution be sent to the President of the United States, the Secretary of Commerce, the Director of National Bureau of Standards, the Governor of Maine, the Maine Members of Congress and the Maine commissioner of agriculture.

"HARVEY R. PEASE,
"Clerk of the House of Representatives.
"CHESTER T. WINSLOW,
"Secretary of the Senate."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations, without amendment:

S.J. Res. 66. Joint resolution to amend the joint resolution providing for membership

and participation by the United States in the Inter-American Children's Institute (Rept. No. 84).

By Mr. ANDERSON, from the Committee on Interior and Insular Affairs, with amendments:

S. 107. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes (Rept. No. 83).

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SCOTT:

S. 1405. A bill for the relief of Aram Fayda and his wife, Elena Fayda; to the Committee on the Judiciary.

By Mr. SCOTT (for himself and Mr. CLARK):

S. 1406. A bill to provide for the establishment of national cemeteries in the State of Pennsylvania; to the Committee on Interior and Insular Affairs.

By Mr. McNAMARA (for himself and Mr. HART):

S. 1407. A bill to amend the Civil Service Retirement Act to provide for the inclusion of certain additional types of compensation within the meaning of the term "basic salary" for the purposes of such act; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. McNAMARA when he introduced the above bill, which appear under a separate heading.)

By Mr. YOUNG of Ohio:

S. 1408. A bill to establish and prescribe the functions of a U.S. Department of Aeronautics and Space, and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. YOUNG of Ohio when he introduced the above bill, which appear under a separate heading.)

By Mr. KEATING (for himself, Mr. BRIDGES, and Mr. HRUSKA):

S. 1409. A bill to provide that each member of the bar of the highest court of a State or of a Federal court shall be entitled to practice before administrative agencies of the United States; to the Committee on the Judiciary.

(See the remarks of Mr. KEATING when he introduced the above bill, which appear under a separate heading.)

By Mr. CARLSON:

S. 1410. A bill to amend title II of the Social Security Act to permit an otherwise qualified disabled widow to receive widow's insurance benefits thereunder even though she has not attained retirement age; to the Committee on Finance.

By Mr. CLARK (for himself and Mr. JAVITS):

S. 1411. A bill to amend the National Defense Education Act; to the Committee on Labor and Public Welfare.

By Mr. FULBRIGHT (for himself and Mr. McCLELLAN):

S. 1412. A bill to authorize the Administrator of General Service to convey certain land situated in the State of Arkansas to the city of Fayetteville, Ark.; to the Committee on Government Operations.

By Mr. ROBERTSON:

S. 1413. A bill to amend section 19 of the Federal Reserve Act and section 18 of the Federal Deposit Insurance Act to remove the authority to limit the rate of interest on time deposits of foreign governments and international financial institutions; to the Committee on Banking and Currency.

By Mr. HUMPHREY (for himself, Mr. BUSH, Mr. BYRD of Virginia, Mr. ENGLE, Mr. JAVITS, and Mr. KUCHEL):

S. 1414. A bill to facilitate the discovery and recovery by the States of unclaimed personal property in the custody of Federal agencies, and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. HUMPHREY when he introduced the above bill, which appear under a separate heading.)

By McGEE (for himself and Mr. HICKEY):

S. 1415. A bill to declare a national policy on conservation, development, and utilization of natural resources, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. KEATING:

S.J. Res. 67. Joint resolution proposing an amendment to the Constitution of the United States granting to citizens of the United States who have attained the age of 18 the right to vote; to the Committee on the Judiciary.

(See the remarks of Mr. KEATING when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTION

STUDY FOR A DETERMINATION OF POLICY ON NATIONAL CEMETERIES

Mr. SCOTT (for himself, Mr. CLARK, Mr. MOSS, Mrs. SMITH of Maine, Mr. RANDOLPH, and Mr. McGEE) submitted the following resolution (S. Res. 113); which was referred to the Committee on Interior and Insular Affairs:

Resolved, That the Senate Committee on Interior and Insular Affairs, or any duly authorized subcommittee thereof, is authorized under sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to national cemeteries with a view to establishing and effectuating a uniform national policy with respect to the establishing and maintaining of such national cemeteries.

SEC. 2. For the purposes of this resolution the committee, from the date on which this resolution is agreed to until January 31, 1962, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants: *Provided*, That the minority is authorized to select one person for appointment, and the person so selected shall be appointed and his compensation shall be so fixed that his gross rate shall not be less by more than $1,200 than the highest gross rate paid to any other employee; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1962.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $50,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

PROPOSED AMENDMENT OF CIVIL SERVICE RETIREMENT ACT

Mr. McNAMARA. Mr. President, on behalf of my colleague, the junior Senator from Michigan [Mr. HART], and myself, I introduce for appropriate reference, a bill to amend the Civil Service Retirement Act. The bill would provide for the inclusion of certain additional types of compensation within the meaning of the term "basic salary" for the purposes of the act.

Under the present law, premium pay, such as allowances, bonuses, overtime pay, and so on, are not taken into consideration for retirement purposes, even though they form an integral part of the employees' pay.

It is a matter of simple equity that we should figure our civil servants' retirement pay on the basis of their actual gross pay, and not on the basis of some theoretical basic salary.

On behalf of the junior Senator from Michigan and myself I express a sincere hope that the Post Office and Civil Service Committee will give speedy consideration to the provisions of this bill.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1407) to amend the Civil Service Retirement Act to provide for the inclusion of certain additional types of compensation within the meaning of the term "basic salary" for the purposes of such act, introduced by Mr. McNAMARA (for himself and Mr. HART), was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

A DRAMATIC SURGE FORWARD IN THIS MISSILE AND SPACE AGE OF CHALLENGE

Mr. YOUNG of Ohio. Mr. President, Americans should applaud President Kennedy's action in assigning to the Air Force the major responsibility for the development of space weapons. It is the first step in eliminating waste, duplication, and inefficiency in our space program. Undoubtedly billions of taxpayers' dollars will be saved, as a result.

Mr. President, Secretary McNamara and Deputy Defense Secretary Gilpatric are to be congratulated on their forthright action. It is encouraging to know that at long last we have an administration which is not afraid to cut through redtape and the innumerable obstacle courses set up by leaders of various services of our Armed Forces each time it appears that their individual empires are threatened.

Many more millions—in fact, billions—of dollars could be saved by uniting all space programs under one authority, thereby eliminating the multiplicity of overlapping agencies which have left our missile, rocket, and space development more tangled than a landlocked octopus.

In some instances the Soviet Union has planned, developed, and placed into operation a missile within the same period of time we completed planning a comparable one.

The Army has its Ordnance Missile Command. The Air Research and Development Command conducts Air Force experimentation, and the Office of Naval Research is in charge of Navy programs.

Under these are many separate and individual committees working independently of one another.

In addition, we have a multiplicity of civilian space agencies. Under them are a dozen research advisory committees on which military personnel serve, and then more than 30 working committees in the Department of Defense on which National Aeronautics and Space Administration members serve.

In short, we have confusion heaped upon confusion, agency upon agency, committee upon committee. Truly, this is a case in which too many bakers spoil the pie.

Mr. President, our need for a unified space program is one of the most serious problems facing the Nation today. We have permitted ourselves to lag behind the Soviet Union in certain aspects of this vital new space age of challenge.

As a result, this Nation has suffered a severe setback, not only in our military potential but also with the hundreds of millions of people in the uncommitted nations of the world. To them the man on the moon is more and more coming to resemble the Russian bear rather than Uncle Sam.

We are only beginning to catch up with, much less to overtake, the Soviet Union in many aspects of space and missile development. The reason for this sad state of affairs is not because it is beyond our capability to do so, but because the previous administration never finally made up its mind it was urgent and imperative that we do so immediately.

If we do not act quickly to bring our space and missile programs under one authority, we shall continue to be enmeshed in a multiplicity of agencies, and the missile lag between us and the Soviet Union will widen.

As we move forward in this fascinating new field of human endeavor, it becomes apparent that it is not only in the area of military objectives that we are losing ground for failing to unify our efforts.

A staff report of the Senate Committee on Aeronautical and Space Sciences released a few months ago, stated:

> The general problem of worldwide communications involves a complex and interrelated set of economic and political as well as technical considerations. Thus any plans require reevaluation of broad national policies in the field of communications. At the present time, such policies do not appear clearly defined. Moreover, the mechanism for establishing policy is unclear.

Mr. President, this report calls for greater coordination between various agencies interested in science and technology, in economics, in diplomacy, in Government industry relationships, and in the exercise of regulatory authority of the Federal Government. It goes on to state:

> This matter becomes of particular importance to the Congress because of the large number of agencies now having cognizance or jurisdiction over various aspects of either communications or space research and operations, and of the unusual degree of coordination this involves.

Among these agencies, Mr. President, are the Department of State, the Department of Defense, the Army, the Navy, the Air Force, the National Aeronautics and Space Administration, the Bureau of the Budget, the Federal Communications Commission, the boondoggling Office of Civil and Defense Mobilization, the U.S. Information Agency, and many others.

This report strongly indicates that we must accelerate our research programs and methods of coordination between various interested Government agencies if we are to keep abreast and move ahead of the Soviet Union in the peaceful uses of outer space.

Perhaps the most telling point made by this study is the recommendation that the executive branch without delay examine elements of public policy concerned with communications specifically as related to: "The identification of central Federal authority for communication policy."

Mr. President, although this excellent study deals specifically with the use of outer space for communications purposes, it is indicative of the multiplicity evident everywhere in our space programs.

Gen. Bernard A. Schriever, Chief of the Air Research and Development Command, testified before our subcommittee of the Committee on Aeronautical and Space Sciences, that authority for direction at the operating management level is not clearly defined because of the division between various services. He testified that the Army, Navy, and Air Force and various civilian agencies, in effect are competing against each other. Then it necessarily follows taxpayers pay and pay and sweat and sweat.

This recent action by President Kennedy will greatly help to correct this unfortunate situation and save taxpayers money. However, there is much more streamlining to be done.

The missile and space race is one we must win if we are to stop Communist military and economic domination of the world. Our space and missile program cost approximately $6 billion last year. The cost will climb rapidly in future years. It is estimated that if the present grave world situation continues we shall be spending between $20 and $25 billion annually before the end of the decade.

We have an abundance of scientific talent and we have the pioneering spirit to take leadership in this age of challenge. Congress has provided and will continue to provide the money. However, we must eliminate duplication and waste in the present program.

Our civilian space and aeronautical science program should be unified under one authority with the creation of a new Cabinet official; Secretary of Aeronautics and Space. Great Britain already has a Ministry of Space and Atomic Research with Cabinet status.

The creation of this department will not only lower costs and increase efficiency, but also give proper recognition and status to the challenging new space age.

Therefore, Mr. President, I introduce, for appropriate reference, a bill to create a Department of Aeronautics and Space which will have Cabinet status. With its adoption, I believe we can look forward to an end to the waste and duplication of effort as well as to a dramatic surge forward in the race for space supremacy.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1408) to establish and prescribe the functions of a U.S. Department of Aeronautics and Space, and for other purposes, introduced by Mr. YOUNG of Ohio, was received, read twice by its title, and referred to the Committee on Government Operations.

ADMISSION TO PRACTICE BEFORE FEDERAL ADMINISTRATIVE AGENCIES

Mr. KEATING. Mr. President, on behalf of Senator BRIDGES, Senator HRUSKA, and myself, I introduce, for appropriate reference, a bill to permit members of the bar of the highest court of a State or Federal court to practice before administrative agencies of the United States.

Attorneys wishing to practice before many Federal agencies are often confronted with formidable obstacles. The agencies' rules vary widely and make it extremely difficult for an attorney from outside of the District of Columbia to appear and present matters.

In the case of nonlawyers, additional requirements, qualifications, and investigations may be justified. However, this would not appear to be appropriate for an attorney who must show evidence of his good moral character and educational requisites, and pass a rigorous examination to be admitted to the bar of his home State. Upon admission to the bar, the attorney is subject to continued surveillance by the bench, fellow members of the bar, and the public with whom he must deal.

After consulting with the Director of the Office of Administrative Procedure in the U.S. Department of Justice, I find that only nine departments and other administrative agencies of the Government require an attorney to file an application for admission to practice. Thirty-one other administrative agencies do not require an attorney to follow such a procedure for admission to practice, which raises a question in my mind as to whether formal admission procedures really are necessary or in the best interest of the public.

Some proponents of formal admission requirements to practice before Federal agencies state that this is a method to insure proper discipline among members of the bar engaged in matters before these agencies. It may be that disciplinary actions, where necessary, are more appropriately and properly effected by the bar to which an attorney is admitted. However, there is nothing in the bill which would preclude agencies from disciplining an attorney or any other person who practices before them.

The Hoover Commission stated that at least $300,000 a year could be saved

by the Treasury Department alone by eliminating some of its formal procedures for admission of attorneys. The admission of attorneys to practice in other agencies may not be as costly. However, the staff work and correspondence required to process formal applications certainly is substantial.

Uniform rules for admission to practice before Federal agencies are one step in the direction of helping to clear the maze of complex and often unnecessary rules or procedures that have developed within our Federal agencies. The Department of Justice in conducting its study of this problem has recommended that the agencies drop the formal admission requirements and adopt a uniform rule making any one who is a member of the bar of the Supreme Court of the United States or of the highest court of any State eligible to practice before them.

Since this recommendation was made, I am informed by the Office of Administrative Procedure of the Department of Justice that only two Federal agencies have seen fit to adopt the proposal. My proposal is essentially the same as the recommendation of the Department of Justice and would be mandatory for all agencies and departments except the Patent Office. The Patent Office is excepted because of the very technical nature of the practice before this agency.

When it is considered that in many cases it is easier to be admitted to practice before the Supreme Court of the United States than it is for an attorney to be recognized by Federal administrative agencies, the need for this bill becomes apparent. It is absurd to bar from practice before a Federal administrative agency attorneys who are considered qualified to present cases before the highest court of a State or the Supreme Court of the United States.

Mr. President, I ask unanimous consent to have the text of this bill printed in the RECORD at this point.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 1409) to provide that each member of the bar of the highest court of a State or of a Federal court shall be entitled to practice before administrative agencies of the United States, introduced by Mr. KEATING (for himself and Senators BRIDGES and HRUSKA), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, any person who is a member in good standing of the bar of the highest court of a State or possession of the United States, or of the District of Columbia, shall be entitled to practice before any department, board, bureau, or administrative agency of the United States, other than the Patent Office, without the necessity of making application therefor or of showing any other qualifications.

PROPOSED REPEAL OF THE "AFFIDAVIT OF DISBELIEF" REQUIREMENT OF THE NATIONAL DEFENSE EDUCATION ACT

Mr. CLARK. Mr. President, on behalf of myself and the senior Senator from New York [Mr. JAVITS], I introduce, for appropriate reference, a bill to amend the National Defense Education Act to eliminate the discriminatory affidavit requirement from that act. The bill would not change the NDEA requirement that each student applying for Federal loans take a loyalty oath.

The bill we introduce today is designed to strike out of the National Defense Education Act a section which has seriously weakened the effectiveness of that act and given offense to countless members of the academic community in all parts of the country. That section is 1001(f)(1), which states that no person shall receive funds under the act unless he has filed an affidavit certifying "that he does not believe in, and is not a member of and does not support any organization that believes in or teaches, the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods."

Our objections to the affidavit of disbelief are these:

First. It is unnecessary. Section 1001(f)(2) requires all beneficiaries of the act to take a standard loyalty oath of allegiance to the Government. This bill does not change that requirement. Why should a student be required to swear that he is loyal as well as that he is not disloyal? Severe criminal laws exist for use against those who teach or advocate the violent overthrow of the Government, whether or not they have applied for benefits under the Education Act.

Second. It is ineffective. No convinced Communist would hesitate to take either the oath or the affidavit.

Third. It defeats the purpose of the act. While the disloyal person would not hesitate to take it, some intelligent conscientious young people, of the very kind the act is designed to help, have refused to participate in the defense education program because of this requirement. A number of the finest institutions of higher education in the country, in all regions, public and private, sectarian and nonsectarian, have refused to accept any funds because of section 1001(f)(1), and the list of these institutions is growing.

Fourth. It is discriminatory. Businessmen who receive Government loans or contracts, farmers who receive Government subsidies, veterans and their dependents who receive Government pensions—none of them have to file sworn statements that they do not believe in organizations which believe in the overthrow of the Government. Only students are required to do so. And not all students—only those from poor families who are obliged to borrow funds to complete their education.

For these reasons, and many more, we urge the early passage of our bill to repeal the affidavit of disbelief.

We are confident that the bill in its present form has the support of the overwhelming majority of the college and university students and teachers in the United States, and that it merits and will attract a majority of votes in the Senate.

According to the latest information available from the Office of Education, 27 colleges and universities have declined to participate in or have withdrawn from the student loan program because of the disclaimer affidavit requirement. In addition, there are scores of colleges in all parts of the country whose presidents, boards of directors, faculties, and student bodies have stated their opposition to the affidavit. College and university associations and associations of college teachers and students representing virtually all of the Nation's higher education community have stated their disapproval of the disclaimer affidavit.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1411) to amend the National Defense Education Act, introduced by Mr. CLARK (for himself and Mr. JAVITS), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

UNCLAIMED PERSONAL PROPERTY ACT

Mr. HUMPHREY. Mr. President, I introduce on behalf of myself and Senators BUSH, BYRD of Virginia, ENGLE, JAVITS, and KUCHEL, for appropriate reference, a bill to facilitate the discovery and recovery by the States of unclaimed personal property in the custody of Federal agencies.

This bill is similar to S. 1846 which I introduced in the 86th Congress.

By way of background on this measure it should be stated that the National Association of Attorney Generals at its 1956 conference established a committee on escheats which was directed to draft a bill to facilitate States in the discovery and recovery of unclaimed property in custody of officers, departments, and agencies of the United States.

The U.S. Government possesses large sums of moneys—credits—and some tangible property remaining unclaimed by owners whose identities or whereabouts have not been determined. There is no such thing as Federal escheat, except in the District of Columbia and in those territories where the power has not been delegated. The States wherein unknown or missing owners last resided have a clear legal right to acquire possession of unclaimed funds and property. Systematic recovery, however, has been impracticable for want of information enabling the discovery of assets.

In order to facilitate the recovery by the States of such unclaimed funds and property, the committee on escheats drafted and requested the introduction of the bill which I am offering today. This bill would provide means whereby information relating to unclaimed funds and property shall be determined and

reported by the United States to the individual States whenever State law provides means whereby the Government shall be, first, held harmless against all claims including claims of true owners and second, compensated for the costs of search and report.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 1414) to facilitate the discovery and recovery by the States of unclaimed personal property in the custody of Federal agencies, and for other purposes, introduced by Mr. HUMPHREY (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Government Operations.

EIGHTEEN-YEAR-OLD VOTE

Mr. KEATING. Mr. President, as long as I have been in the Congress, I have urged that 18-year-olds be given the right to vote.

Again this year, I introduce my proposed amendment to the Constitution to bring this about. I send the amendment to the desk and ask unanimous consent that it be appropriately referred and that it be printed at the conclusion of my remarks.

Mr. President, I need not detain the Senate with a discussion of the many reasons for this amendment. All of us are well aware of them.

I would like instead to call attention this morning to a letter from Miss Bonnita Foy Dimitry of Rochester, N.Y., which was printed on February 3 of this year in the Rochester Times-Union. Miss Dimitry, better than I, speaks for the 18-year-olds. I am not qualified to speak for this fortunate group, but, oh, how I wish I were.

Miss Dimitry points out that she is 18 years old and that she has a responsible position in a bank; that she plans to marry; that she pays taxes; and that she believes she should have the right to vote. She goes on in a very forceful and thoughtful manner to present her arguments for this measure.

She points out that not only should 18-year-olds be permitted to vote, but they should also be accorded a number of other rights and privileges not presently made available to them. She ends up by urging that the Congress "give our young men and women a chance to show the stuff they're made of."

Mr. President, on behalf of Miss Dimitry and the men and women 18 to 20, I respectfully urge that we grant this request. I also ask unanimous consent that Miss Dimitry's letter be printed at this point in the RECORD prior to the text of the joint resolution.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the Rochester Times-Union, Feb. 3, 1961]

ASKS VOTE FOR 18-YEAR-OLDS

Should the voting age be lowered? Let me voice a loud "Yes."

I am 18, hold a responsible position in a bank, plan to marry this spring and pay taxes.

Putting aside all the old arguments for lowering the voting age, which, I believe, are all very sound, I should like to add my own pet reason: Why if 18-year-olds are allowed to assume the responsibilities of citizenship are they not allowed to assume the privileges?

We can get married, have children, drink, drive cars, pay taxes, and yet we are considered too young to vote. The greatest privilege of any American is denied us.

Public schools spend 13 years training us to take our place in society, be leaders, individualists, and responsible; and yet society then refuses us for 3 years. Why? Our names on papers are worthless, we can't even buy a dish on time without an older person's OK. We are allowed to support the Government, but are allowed to have no say in it. Is this fair?

For those skeptics who say we're not mature enough to cast a vote, let me point out that one State in our Union had the courage to try it.

How many men and women of legal age bother to vote? Yet here we are with a whole generation of fresh, young minds with sound ideas, and I might add judgment, denied the freedom so coveted by us and neglected and abused by our more favored elders.

Give our young men and women a chance to show the stuff they're made of.

BONNITA FOY DIMITRY.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S.J. Res. 67) proposing an amendment to the Constitution of the United States granting to citizens of the United States who have attained the age of 18 the right to vote, introduced by Mr. KEATING, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE—

"SECTION 1. The right of citizens of the United States, who have reached the age of eighteen years, to vote shall not be denied or abridged by the United States or by any State on account of age. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislature of three-fourths of the several States within seven years from the date of its submission to the States by the Congress."

AMENDMENT OF THE FAIR LABOR STANDARDS ACT OF 1938—AMENDMENT

Mr. WILLIAMS of New Jersey. Mr. President, I submit an amendment intended to be proposed by me, Senators CLARK, HUMPHREY, MCCARTHY, and JAVITS to the bill (S. 1122) to amend the Fair Labor Standards Act, 1938, as amended, to provide for minimum wages for certain persons employed in agriculture, and for other purposes. This bill is now pending before the Senate Committee on Labor and Public Welfare.

The proposed amendment is to correct a technical error in S. 1122 as introduced. The error concerns the number of man-days of hired farm labor used by an employer to determine whether he is covered by the bill. The number of man-days of hired farm labor specified in the bill, as introduced, is 2,244, whereas the number of days which should have been specified is 560. The provision in question is contained in S. 1122, on page 2, lines 24 and 25.

This technical amendment will make the relevant portion of the bill beginning on page 2, line 22, and continuing through the period in line 7, page 3, read as follows:

(4) if such employee performs hired farm labor for an employer who during any one of the four preceding calendar quarters used more than five hundred and sixty man-days of hired farm labor, such employee shall be paid by his employer (i) not less than 75 cents an hour during the first year following the effective date of this paragraph, (ii) not less than 85 cents an hour during the second year following such effective date, (iii) not less than $1 an hour during the third year following such effective date, and (iv) thereafter, not less than the rate prescribed in paragraph (1) of this subsection.

The interested administrative agencies have been informed of this technical defect and will submit their reports on the basis of a 560 man-day of hired farm labor as the test of employer coverage. Members of Congress and others interested in the bill should also make their reviews and evaluations of the measure on the basis of 560 man-days instead of 2,244 man-days.

I ask unanimous consent that the amendment be printed in the RECORD.

The VICE PRESIDENT. The amendment will be received, printed, and appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment was referred to the Committee on Labor and Public Welfare, as follows:

On page 2, lines 24 and 25, strike out "two thousand two hundred and forty-four man-days of hired farm labor" and insert in lieu thereof "five hundred sixty man-days of hired farm labor".

ADDITIONAL COSPONSORS OF BILLS

Mr. HUMPHREY. Mr. President, on behalf of the Senator from Indiana [Mr. HARTKE], I ask unanimous consent that the names of the Senator from Maine [Mrs. SMITH], the Senator from West Virginia [Mr. RANDOLPH], the Senator from Utah [Mr. MOSS], the Senator from Alaska [Mr. GRUENING], and the Senator from Pennsylvania [Mr. CLARK] be added as cosponsors of the following bills to amend the provisions of title X of the Social Security Act pertaining to the blind, which was introduced by the Senator from Indiana on February 9, 1961—S. 904, S. 905, S. 906, S. 907, and S. 908. I also ask unanimous consent

that the name of the Senator from Washington [Mr. JACKSON] be added as a cosponsor of S. 908.

The VICE PRESIDENT. Without objection, it is so ordered.

NOTICE OF MEETING OF THE AMERICAN GROUP, INTERPARLIAMENTARY UNION

Mr. KEATING. Mr. President, at the request of Representative COOLEY, of North Carolina, president of the American group of the Interparliamentary Union, I desire to announce that the American group of the Interparliamentary Union will hold a meeting on Tuesday, March 28, in room F-39 of the Capitol at 9 o'clock in the morning. All Members interested are urged to attend the meeting.

NOTICE OF HEARING ON NOMINATION OF JOHN M. KELLY TO BE ASSISTANT SECRETARY OF THE INTERIOR

Mr. ANDERSON. Mr. President, I announce that on Monday next, March 27, 1961, at 9:30 o'clock in the morning, in the room of the Committee on Interior and Insular Affairs, room 3110, New Senate Office Building, a hearing will be held on the nomination of John M. Kelly to be Assistant Secretary of the Interior.

I ask unanimous consent to have printed in the RECORD a biographical résumé sent to me by Mr. Kelly.

There being no objection, the résumé was ordered to be printed in the RECORD, as follows:

BIOGRAPHICAL RÉSUMÉ OF JOHN M. KELLY

Age: 46 years. Born October 1, 1914, Chelsea, Mass.

Married: Esther Elizabeth Ladenburg, Fremont, Nebr., December 29, 1938.

Children: Joseph, 20; Patricia, 17; Mary Ann, 13; Michael, 11.

Son of James B. Kelly (retired, 43 years, Bureau of Customs, Department of the Treasury) and Elizabeth B. Kelly, Boston, Mass. One of a family of two sons and four daughters.

Education: Public schools, Everett, Mass. Bachelor of science in mining engineering, New Mexico, School of Mines, 1936; professional degree of petroleum engineer, 1939, New Mexico School of Mines.

EMPLOYMENT RECORD

September 1945 to Present: Consulting mining and petroleum engineer and geologist; independent oil producer in New Mexico; president, Elk Oil Co., wholly owned family business; mineral adviser to the New Mexico State Land Office.

February 1945–September 1945: Production superintendent, Great Western Drilling Co., New Mexico and Texas.

May 1941–February 1945: State geologist of New Mexico; member, director, and executive secretary, New Mexico Oil Conservation Commission; director of the New Mexico Bureau of Mines and Mineral Resources; coordinator of mines in New Mexico, War Production Board; member, National Council of Petroleum Regulatory Authorities, Petroleum Administration for War.

March 1937–May 1941: Petroleum engineer, in charge of oil conservation and engineering in southeastern New Mexico for the Lea County Operators Committee, a voluntary oil conservation group.

September 1936–March 1937: Mine chemist, American Metal Co., Terrero, N. Mex.

May 1936–September 1936: Mining engineer, Rosedale Gold Mines, Ltd., Rosedale, N. Mex. and Globe, Ariz.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I wish to call to the attention of the Senate the fact that there is no business pending on the calendar, and I express the hope, which I know is joined in by the distinguished Senator from Illinois, the minority leader [Mr. DIRKSEN], that the committees should, in their wisdom, and at their discretion, act as expeditiously as possible in reporting vital measures, so we can act on them on the floor.

I repeat, there is no business as of now on the calendar as reported to the Senate by any committee.

Mr. DIRKSEN. Mr. President, if the majority leader will yield——

The VICE PRESIDENT. Does the Senator yield?

Mr. MANSFIELD. I yield.

Mr. DIRKSEN. We discussed the matter at some length yesterday. I must confess there is a difficulty which is measured somewhat by the calendar and somewhat by the element of human energy. A majority of the load of proposed legislation has been placed on the Committee on Labor and Public Welfare. We have had hearings on the minimum wage bill.

We must wait for many exhibits to be incorporated in the record and for the galley proofs to be returned before the committee can have an executive session and then proceed to mark up the bill. The hearings on the Federal aid to education bill closed yesterday, as I understand. There has been a great abundance of testimony, and it will take quite some time to digest it. In addition, we have put an unusual burden on the minority clerks of that committee, because other hearings were running concurrently upon rather important matters.

I can understand the majority leader's desire to get those portions of the President's program to the floor as quickly as possible, and I have assured him, for myself, and also for my colleagues, that we will do our best to expedite action and get them to the floor as quickly as possible, even though our views may not be in accord with the views of the majority on the committee. But I reaffirm the general approach that we have taken; namely, that we shall not obstruct; that, if we feel we must, we shall modify where we can; that we shall oppose if we feel we must on the basis of principle; but never will we be arbitrary or cause obstruction merely from the standpoint of a hostile attitude, because we believe that the proposals in the President's program merit the very best of consideration, and when we have made our case, we shall cheerfully abide the results.

Mr. MANSFIELD. May I say, in reply to the minority leader, that he has been most cooperative and understanding. I have discussed this matter with him. It is our intention to have the Senate recess or adjourn over from time to time, so the committees, and most especially the Labor and Public Welfare Committee, can catch up on the tremendous amount of work which they have undertaken, and lessen the burden which is theirs at the present time.

PROBLEMS OF THE DOMESTIC TEXTILE INDUSTRY

Mr. BRIDGES. Mr. President, it was regrettably impossible for me to be on the floor of the Senate yesterday afternoon to hear the splendid presentation by the senior Senator from Rhode Island [Mr. PASTORE] on the problems of the domestic textile industry. However, having studied his remarks in the CONGRESSIONAL RECORD, together with the comments of other Senators, I wish to announce my wholehearted agreement with the recommendations of the Senator from Rhode Island.

Because of my very close interest in the problems of the domestic textile industry, I am well aware of the time and effort which the senior Senator from Rhode Island has devoted to this situation. I wish to commend him for his penetrating analysis of the present situation and for his constructive remedial recommendations.

I believe that the Senator from Rhode Island has covered the situation very well, and therefore I shall not attempt at this time to spell out in detail my complete views on the subject. However, I would like to stress for the benefit of the Senate one particular recommendation which in my estimation is deserving of the thoughtful consideration of every one of us.

I refer to the proposal to institute quotas on textile mill products, by category, and by country. This is vital. It is the sincere hope of the senior Senator from New Hampshire that such a procedure will be forthcoming in the near future.

We have studied and discussed the effects of ever-mounting imports on our textile industry for too long a time. The time for decision is long past due. I submit that if the recommendations presented here yesterday by the Senator from Rhode Island are not implemented very shortly, we shall find the rate of textile imports accelerating to a

point where it will choke those remaining textile plants which have managed thus far to survive.

The sentiment was expressed here yesterday—and the Senator from New Hampshire concurs—that international trade is a reality and that it probably will expand. Nonetheless, we cannot let the rate of expansion in the field of textile imports go completely unchecked while this country's manufacturers continue falling by the wayside. In my opinion, a flexible quota system is the best method of allowing imports to expand in proportion to the natural growth of the domestic market without driving our domestic textile industry into bankruptcy.

This is a problem, Mr. President, which cries out for an effective solution. Action is needed now, and I, for one, vigorously support the proposals suggested here yesterday by the Senator from Rhode Island.

UNEMPLOYMENT PROBLEMS

Mr. BRIDGES. Mr. President, columnist David Lawrence had an interesting and informative article in the March 16 edition of the New York Herald Tribune. The article, entitled "Administration Called Lax About Tax Depreciation," calls attention to the past failure of the pump-priming measures of the New Deal era to lessen the staggering unemployment of those years. We all know that unemployment under the Franklin Roosevelt administration continued at unprecedented heights right up to World War II.

All the pumps that the Democrats could prime with billions of our dollars—and they primed many a pump—did not alleviate the depressing unemployment situation of those New Deal years.

Mr. Lawrence states in his article, "the same failure to recognize the importance of encouraging the capital-goods industries is manifest under the present administration." He goes on to say that "while members of the President's Cabinet are going around the country making speeches lamenting the unemployment problems they inherited from the preceding administration, they are not doing anything themselves to cure the fundamental trouble."

As for fiscal policy, Mr. Lawrence cites the fact that:

> The Eisenhower administration was blocked again and again by the Democratic majority in Congress, especially on the very vital question of meeting the competition of high interest rates abroad.

He further states that—

> If the Democratic Congress had permitted the Treasury to sell long-term bonds at higher interest rates, this would have avoided excessive borrowing on short term with inflationary effects. In the longer run this would have helped to stabilize prices, increase investor confidence in long-term bonds and thereby promote lower interest rates.

Mr. President, this is a well-reasoned, objective assessment of the present New Frontier approach, or, I should say, nonapproach, to the present unemployment problems. There is much talk from the President's Cabinet. There are the same old pumps being primed—and it looks like the same priming that failed before. The only difference is we cannot use the same money again. It was spent and is gone; the new pumps call for new money for the old priming.

Mr. President, I commend this article to all the New Frontier pump primers as required reading, and ask unanimous consent that it be inserted at this point in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TODAY IN NATIONAL AFFAIRS: ADMINISTRATION CALLED LAX ABOUT TAX DEPRECIATION

(By David Lawrence)

WASHINGTON, March 15.—The current recession is supposed to be touching bottom, and signs of an upturn are being noted even as antirecession measures of various kinds have yet to be considered by Congress. But the real question before the country is what is going to be done to prevent the recession that seems sure to come after the brief period of economic recovery which lies ahead.

This is but another way of saying that the Kennedy administration, despite its large number of economic advisers, has failed to come to grips with the basic cause of the present recession and the certain cause of more recessions to come.

Experience, it would appear, should have taught a lesson. The United States was in the midst of a worldwide depression in the 1930's but failed to emerge—as did the rest of the world—until the outbreak of World War II. This created a demand for capital goods in America and finally cut down the unemployment. Pump priming for 7 years had cost the taxpayers of America billions of dollars, but it was in vain, as the number of unemployed throughout the New Deal remained higher than at any other time in American history—in fact, much higher than it is today.

METHOD CALLED QUESTIONABLE

The same failure to recognize the importance of encouraging the capital-goods industries is manifest under the Kennedy administration. While members of the President's Cabinet are going around the country making speeches lamenting the unemployment problems they inherited from the preceding administration, they are not doing anything themselves to cure the fundamental trouble. The Eisenhower administration was blocked again and again by the Democratic majority in Congress, especially on the very vital question of meeting the competition of high interest rates abroad. Today, the Federal Reserve Board is being permitted to buy long-term bonds at a discount, and this is supposed to be another way of achieving the same objective sought 2 years ago. But it really is a questionable device.

Actually, if the Democratic Congress had permitted the Treasury to sell long-term bonds at higher interest rates, this would have avoided excessive borrowing on short term with inflationary effects. In the longer run this would have helped to stabilize prices, increase investor confidence in long-term bonds, and thereby promote lower interest rates.

While tens of billions of dollars could be borrowed this year by business for industrial projects in this country—for replacement of plant and modernization of machinery—such spending is being held up. The two main reasons for this are that long-term interest rates are too high and the administration and Congress have failed to do anything about laws covering the tax-depreciation allowances.

Meanwhile, vast sums that could be put to work in creating jobs are not being invested in new plant or equipment. This means that a start is not being made toward the efficiency necessary to bring about lower prices. Steel, coal, railroads, and other forms of transportation, machine tools, and the heavy-goods industries generally would be aided, and "structural unemployment" would be greatly reduced.

NO ACTION ON TAXES

The Kennedy administration has been in office nearly 2 months but nothing has been done to assure a change in tax-depreciation allowances. It takes a lot of time for businessmen to draw up plans and arrange financing. Valuable time has been lost already through the dilatory way the Kennedy administration has been dealing with the problem of growth.

A look at what has happened in recent years is enlightening. In postwar years, the figures show that, when capital spending has been high, unemployment has been low. What is needed is not just more capacity, and industry, but better capacity, especially to offset high labor costs.

The preceding administration secured in 1954 some improvement in the tax law governing depreciation, and, though this was relatively slight, it did stimulate investment for a while. In 1956, for instance, investment spending rose 22 percent on top of a 7 percent gain in 1955. Unemployment dropped from 3,600,000 to 2,800,000.

FELT IN LATER YEARS

The full effect of this spending was felt in succeeding years. Indeed, some of it aided the profit picture of the heavy-goods industries in 1960. As interest rates, however, began to skyrocket in early 1960, and as businessmen started to worry about what a Democratic administration would do, the tendency arose to abandon many plans for capital spending.

A wait-and-see attitude still prevails today. For despite all the talk of antirecession measures, the basic need—encouragement of capital spending—has not been met. Lots of things were being said only a few months ago about the importance of increasing the national output and raising the rate of national growth, but, oddly enough, no bills have been reported by any committees of Congress to attain these particular objectives.

NEW STUDY PRODS UNITED STATES ON POLICY TOWARD INDIANS

Mr. WILEY. Mr. President, presently there are pending before the Interior and Insular Affairs Committee two bills, S. 869 and S. 870, sponsored by the junior Senator from Wisconsin [Mr. PROXMIRE] and myself. The measures relate to the termination of Federal control over the Menominee Indian Tribe in Wisconsin.

I sincerely hope the committee will find it possible to consider these proposals in the very near future. The objective is to assure adequate time and opportunity for the tribe to get its economic house in order, as well as to cope with serious social, educational, sanitation, and other problems arising out of termination.

In accordance with previously passed legislation, the tribe has made a realistic effort to fulfill its obligations and to meet deadlines in creating machinery for handling of tribal assets. However, it is important to give them a fair chance to finish a well-begun job.

Unfortunately, the history of U.S. termination policy is spotted with incidents in which there was no adequate

foundation for termination of Federal control over American Indians. As a result, there have been forced sales, wasteful exploitation of Indian lands and assets, and other disastrous events.

A newly published study provides more evidence of the need for good judgment in the formulation of termination plans for Indians throughout the country. The study, I believe, deserves the consideration both of the Bureau of Indian Affairs in the Interior Department and of the Congress.

Recently, the Christian Science Monitor published an article by Kimmis Hendrick, entitled "New Study Prods United States on Policy Toward Indians." Reflecting the need for realism and responsibility in this field, I ask unanimous consent to have the article printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Mar. 20, 1961]

NEW STUDY PRODS UNITED STATES ON POLICY TOWARD INDIANS

(By Kimmis Hendrick)

LOS ANGELES.

One more study of the American Indian's situation adds weighty testimony that this Nation's biggest service to the first Americans should be encouragement for them to participate fully in determining their future.

This newest study covers 4 years of research by a distinguished citizens' group established in 1957 by the Fund for the Republic. Named "A Commission on the Rights, Liberties, and Responsibilities of the American Indian," its chairman is Meredith O. Wilson, president of the University of Minnesota.

In general, the report based on the commission's study covers no new ground. It makes recommendations which have been urged by other groups, Indian and non-Indian, time and time again. Its importance may be the support it gives such recommendations just at this time when the new Kennedy administration is reexamining American Indian policy.

PARTICIPATION STRESSED

On one of the major questions of American policy—the stand taken in 1953 by the U.S. House of Representatives favoring termination of Federal trusteeship over Indian lands—the commission comes out strongly for Indian participation.

Termination now has been carried out in a number of cases, the commission notes, without Indians being adequately informed.

Such instances, the commission charges, have threatened the whole tribal and legal system on which Indian reservation life rests. It has brought about the forced sale and wasteful exploitation of Indian lands. It has left taxation problems undefined and unanswered. It has allowed the Federal Government to escape its recognized or stated obligations to educate Indians to improve their lands, and to provide them with health and welfare services.

Full participation of Indians in any negotiations aimed at termination, the commission declares, should be made the prerequisite by Congress to acceptance of any termination plans.

It notes that the whole matter of terminating Federal trusteeship for Indian lands involves the readiness of Indians themselves to take over these lands, to develop them properly and profitably, and to make their lands the basis for future economic and social stability.

"American policy, if it is to succeed," the commission says, "must aim at helping Indians to prepare themselves in advance of termination for self-reliant living in whatever is their prevailing social and economic framework."

This position resembles similar stands taken by virtually every organization of Indians and non-Indians deeply concerned with justice to the Indian peoples. It rejects the efforts made in various instances by the U.S. Indian Bureau to hurry through termination agreements, at the risk of failure to obtain general understanding by the Indians affected of what was involved.

Although critical of Indian Bureau policies in numerous particulars, the commission recommends the Bureau's continuance for the present.

Says the commission, "The primary function of the Bureau should be an affirmative one; always to counsel and assist the Indian, not to control or regiment him. It should offer him technical advice and other help in the initiation and execution of plans for developing and managing his natural resources, for expanding his economic opportunities for operating his government, and for bettering his living conditions."

ADVISORY BOARD URGED

To this end, the commission recommends that the Bureau establish a special division staffed with competent economists, planners, and community analysts. It also proposes the establishment of an Indian advisory board of distinguished citizens, appointed to report to him regularly on the state of tribes. Called a program of Indian citizens, the commission has copies available to all who ask for it at the commission's headquarters in Albuquerque, N. Mex., or the Fund for the Republic offices in New York and in Santa Barbara, Calif. The full study is to be published later this year.

Besides Mr. Wilson, commission members are W. W. Keeler, vice president of Phillips Petroleum Co.; Karl N. Llewellyn of the University of Chicago; Arthur M. Schlesinger of Harvard University; and Charles Sprague, editor and publisher of the Salem (Oreg.) Statesman. The commission's first executive director was William A. Brophy, succeeded by Dr. S. D. Aberle.

SHOE IMPORTS

Mr. WILEY. Mr. President, yesterday I commented in relation to the need for some kind of action respecting the woolen industry. Today I received a letter from a member of the Sheboygan shoe industry which shows that last year 120 million pairs of shoes were imported into the United States. The impact upon the domestic shoe industry was very serious.

I am hopeful that the whole problem, including the one which was referred to by the Senator from New Hampshire [Mr. BRIDGES] will have early consideration by an appropriate committee, so we can ascertain just what the answer to the problem is.

I think probably one of the answers is the adoption of quotas. Certainly, when we are thinking of the expenditure of some $4 billion in foreign assistance, as proposed in the President's message, we had better start thinking about assisting our own people. I sincerely hope there will be a thoroughgoing inquiry into the question, with the aim of protecting our own people.

MENOMINEE TERMINATION AMENDMENTS

Mr. PROXMIRE. Mr. President, a few days ago the distinguished Commission on the Rights, Liberties, and Responsibilities of the American Indian, sponsored by the Fund for the Republic, submitted its report, "A Program for Indian Citizens," based on a 3-year study of Indian problems. The report is of special significance because one member of the commission is Mr. W. W. Keeler, who heads President Kennedy's special task force in the Department of the Interior on Indian Affairs.

The report criticizes the policy of terminating the Federal status of American Indian tribes, pointing out that termination might be doing the Indians more harm than good. An article by Mr. David Halberstam in the New York Times of March 16, 1961, states:

> The report [of the commission] criticized the "hasty manner" in which termination was being implemented. It charged that "termination" as it was being applied threatened to bring about disruption of the Indian's tribal and legal systems, the forced sale and wasteful exploitation of Indian lands, inequitable taxation, and abandonment by the Federal Government of educational, medical, and roadbuilding and other services without first establishing other sources of support for such services.

At a press conference following the release of the report, Mr. Keeler commented:

> Termination has been a retarding influence on the Indian people.

Such high level recognition of this viewpoint has been welcomed among Indians in all parts of the country.

I shall ask unanimous consent that the section of "A Program for American Citizens" which deals with termination—pages 5–14—be printed at the close of my remarks. I shall also ask consent that Mr. Halberstam's article in the New York Times of March 16 be printed after my remarks.

These comments on the policy of terminating the Federal status of American Indians have a very special and immediate significance for the Menominee Indian Tribe of Wisconsin. To them, termination is not a vague problem located at some point in the distant future. Their termination date has been set for April 30 of this year, just 5 weeks from now.

For some weeks a delegation from the Menominees, consisting of Mr. Jerome Grignon and Mr. Al Dodge, have been here in Washington to express the view of the tribe, established by unanimous resolution, that they will not be able to terminate successfully. The most serious and obvious problem, which the delegates have documented very thoroughly, is the lack of a firm financial basis for the tribal community.

The need to provide education, local government, and welfare services will impose a considerable financial burden on the tribe after termination. The present condition of the tribe's lumbering operations, which have been their main source of revenue, is such that it

is most unlikely that adequate funds will be available to carry that burden.

A survey by a management consulting firm indicates that extensive modernization and development is needed to make the lumber operations competitive. To accomplish this will take time and money. I believe the Federal Government has an obligation to be certain that the tribe can be self-supporting, to insure that its living standards will not decline, before severing the Federal connection.

I have received a copy of a letter from Mr. George Kenote, the Bureau of Indian Affairs representative with the tribe and himself a Menominee, addressed to the attorney general of Wisconsin, describing the present economic prospects of the tribe. It provides an up-to-date summary of the cost and revenue position that the tribe is now in. In his letter Mr. Kenote states:

> We need time to get the corporation better established and on its feet so that it can better support these local government costs. Initially (the timber operations are) almost the total source of funds. It is in community services where continued Federal assistance is imperative to prevent the creation of another totally distressed area.

In an earlier letter to Tribal Delegate Jerome Grignon, Mr. Kenote said:

> I think you should stress that this effort is not trying to defeat termination, but is rather trying to program it under reasonably sound procedures.

It is in this spirit that the tribe has asked that their Termination Act be amended. At their request I introduced two bills, S. 869 and S. 870, which would give the Secretary of the Interior authority to postpone their termination, and which would make other revisions in the tribe's termination program. The text of the amendments submitted by the tribe may not be precisely what is needed, but it is their hope that consideration will be given to these and other proposals which would insure a satisfactory, workable basis for successful termination.

I ask unanimous consent that the article from the New York Times of March 16, the excerpt from the commission's report dealing with termination, and the letter from Mr. George Kenote to the attorney general of Wisconsin, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES IS CAUTIONED ON INDIAN PACTS—FUND FOR REPUBLIC REPORT URGES SLOWDOWN IN POLICY OF ENDING WARD STATUS

(By David Halberstam)

WASHINGTON, March 15.—A Fund for the Republic Commission on the American Indian recommended today that the Federal Government go slow in termination of treaties with Indian groups.

The report, which was made here today, was considered significant because one of the members of the commission also heads President Kennedy's special task force on Indian affairs.. He is W. W. Keeler, a vice president of the Phillips Petroleum Co., and a principal chief of the Cherokee Indians.

Mr. Keeler, who is a special consultant to the Secretary of the Interior on reorganizing the Bureau of Indian Affairs, told a news conference that the Kennedy task force also believed that "termination has been a retarding influence on the Indian people."

Termination, a policy designed to remove the Indians as wards of the Federal Government was instituted in 1953 by the Eisenhower administration, which wanted to make Indians full citizens. The Eisenhower administration contended that it provided adequate safeguards for protection of Indians' rights.

SPEAKS FOR COMMISSION

Mr. Keeler acted as spokesman for the Commission on the Rights, Liberties and Responsibilities of the American Indian, which the Fund for the Republic established in March 1957.

Other members of the group which spent 4 years in studying the problem, are:

Dr. C. Meredith Wilson, president of the University of Minnesota, chairman; Karl N. Llewellyn, professor of jurisprudence at the University of Chicago; Arthur M. Schlesinger, Sr., emeritus professor of history at Harvard, and Charles Sprague, editor and publisher of the Salem (Oreg.) Statesman.

The Fund for the Republic report said the termination policy might be doing the Indians more harm than good. It also contained criticism of the Bureau of Indian Affairs, charging that it employed a legalistic approach that had frustrated the Indians, the public and bureau employes.

The report criticized the hasty manner in which termination was being implemented. It charged that termination as it was being applied threatened to bring about disruption of the Indian's tribal and legal systems, the forced sale and wasteful exploitation of Indian lands, inequitable taxation and abandonment by the Federal Government of educational, medical, roadbuilding, and other services without first establishing other sources of support for such services.

TERMINATION

INTRODUCTION

House Concurrent Resolution 108,[1] adopted in 1953, sent the word "termination" spreading like a prairie fire or a pestilence through the Indian country. It stirred conflicting reactions. To some it meant the severing of ties already loose and ineffective. Others welcomed it as a promise of early sharing in the tribal patrimony. Many outsiders realized that it provided a first step toward acquiring Indian resources. In the great majority of Indians, however, it aroused deep fears for the future. The action of Congress accompanied by the phrase "as rapidly as possible," sounded to them like the stroke of doom.

Resolution 108 was cast in terms granting Indians their rights and prerogatives as American citizens. Its stated purpose was to free them from Federal control and supervision, end their wardship, and make them subject to the same laws and entitled to the same privileges as other citizens.

Indians, however, were, in fact, already citizens by Federal law, they had all the rights possessed by their white neighbors. The term wards applied to them was, and had for a long time been, misleading. Except for the Federal prohibitions against selling alcoholic liquor to Indians, repealed in 1953, they were subject to no greater Federal control or oversight of their persons than any other citizens; they paid State and Federal taxes the same as non-Indians, unless specifically exempted by treaty agreement or statute. Most of the exemptions applied only to real estate or income from trust property. The property the Government held in trust for them was supervised as in any other trust, although some claimed that the Government's management was not effective. The restrictions and the trusts, however, had not been imposed by the Government but, by and large, had resulted from covenants made by the Indians with the United States in the form of treaties, agreements, statutes, and policies designed to protect them from losing their land and to assure the right of self-government, the inalienability and immunity from taxes of their land, and the service which the United States provided.

Termination is not a new goal; but the word itself has remained a loose one without definite meaning. It may signify any one or all of the following:

A relaxation of unnecessary Federal supervision over the government and business of Indian tribes and less control over the leasing and use of trust allotments of individuals.

The rapid destruction of a tribal government that has operated for generations, thereby uprooting complex Federal, tribal and State relationships which are defined in hundreds of treaties, statutes, and court decisions.

The forced sale of a substantial part of the tribal land and the dissolution of the trust on all allotments of members of terminated tribes.

---

[1] House Concurrent Resolution 108, 83d Congress, 1st session:

Whereas it is the policy of Congress, as rapidly as possible, to make the Indians within the territorial limits of the United States subject to the same laws and entitled to the same privileges and responsibilities as are applicable to other citizens of the United States, to end their status as wards of the United States, and to grant them all of the rights and prerogatives pertaining to American citizenship; and

Whereas the Indians within the territorial limits of the United States should assume their full responsibilities as American citizens: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is declared to be the sense of Congress that, at the earliest possible time, all of the Indian tribes and the individual members thereof located within the States of California, Florida, New York, and Texas, and all of the following named Indian tribes and individual members thereof, should be freed from Federal supervision and control and from all disabilities and limitations specially applicable to Indians: The Flathead Tribe of Montana, the Klamath Tribe of Oregon, the Menominee Tribe of Wisconsin, the Potowatamie Tribe of Kansas and Nebraska, and those members of the Chippewa Tribe who are on the Turtle Mountain Reservation, North Dakota. It is further declared to be the sense of Congress that, upon the release of such tribes and individual members thereof from such disabilities and limitations, all offices of the Bureau of Indian Affairs in the States of California, Florida, New York, and Texas and all other offices of the Bureau of Indian Affairs whose primary purpose was to serve any Indian tribe or individual Indian freed from Federal supervision should be abolished. It is further declared to be the sense of Congress that the Secretary of the Interior should examine all existing legislation dealing with such Indians, and treaties between the Government of the United States and each such tribe, and report to Congress at the earliest practicable date, but not later than January 1, 1954, his recommendations for such legislation as, in his judgment, may be necessary to accomplish the purpose of this resolution.

The subjecting of all tribal and trust-allotted land to State taxation regardless of the ability of the Indians to pay.

The applying of general State criminal and civil laws to Indians in place of Federal and tribal laws suited to their special needs.

The abandonment by the United States of education, medical and hospital treatment, roadbuilding, and other functions, and of technical and administrative services and guidance to Indians in the management of their own affairs, without giving any assurance that the necessary services will be available from other sources as they are to other citizens.

A violation of the expressed or implied obligations of treaties and agreements between the United States and a tribe for exemption from taxation, self-government, and performance of Federal services without these changes having had the unqualified consent of the tribe.

The termination laws enacted since 1954 produced or were capable of effecting all of these consequences.

Basically, the Government had undertaken obligations and insured benefits affecting all the tribes under the treaty and commerce clauses of the Federal Constitution. The complex tribal relations with the United States, with the States in which the reservations lay as well as with adjacent communities and other tribes were, all of them, dependent upon the permanency of what the United States had guaranteed. Even legal specialists can have no full comprehension of the tangle of readjustments involved in the concept "termination." Neither they nor the tribes can foresee what measures will be required to make sure that obligations now resting on the United States will somehow be fulfilled. What Indians fear therefore is a transitional period (not the first they have experienced) in which treaties will be breached and solemn agreements ignored, their land, tribal and allotted, lost, and necessary public services furnished by the United States withdrawn, without being replaced by others from the States.

Repeatedly in the past, congressional action in such matters has cost the United States large sums in the later settling of claims or in defending lawsuits. Error or oversight in a termination today may tomorrow call for the payment of unanticipated indemnities.

The Indian whose interest does not coincide with termination, whether or not he senses the difficulties, would usually not willingly substitute for Government by his tribe a control by an individual State, one which would subject him and his community to unfamiliar civil and criminal laws frequently enforced in tribunals where impartial justice has not been given because of discrimination, lack of understanding or sympathy. He could not be sure that the State would recognize the existing obligations of the United States or provide equal services. And, in any case, State legislators could not be expected to fit their legal system to the customs and hopes of Indians, who form a minority of the citizenry.

Since Resolution 108 was adopted by Congress, eleven basic termination laws have been passed to implement it. While the six termination laws enacted in 1954 emphasized their purpose of ending Federal supervision over Indian property and terminating the services furnished Indians by the United States because they are Indians, they, in fact, abolished the home-rule governments of Klamath, Menominee, Paiute and other tribes, forced the sale of large amounts of land, including forest areas, of the Klamath Tribe, and made both tribal and allotted trust land taxable by the States.

Since 1950 the major controversy in Indian affairs has been whether the United States should follow a program of pressing for prompt termination of tribes without the consent of their members. This appeared to be the goal until September, 1958, when Secretary of the Interior Fred A. Seaton, in a radio broadcast in Flagstaff, Ariz., stated that none would be terminated without the consent of its members.

From the date of Seaton's speech until 1961, confusion has existed, the Secretary seeming to espouse one policy and the Bureau of Indian Affairs another. All the time, moreover, Joint Resolution 108, stating the policy of Congress, has been in effect.

Termination aroused protests from Indians, State legislators, and interested citizens. The number and vigor of the outcries and the difficulties encountered in trying to put the enactments into effect somewhat cooled the ardor of the terminationists. Though the full consequences of these measures cannot yet be estimated, it became evident that termination instead of being a simple process entails countless problems. The upheaval among the Indians would be not unlike that caused by superimposing the laws of New York on New Mexico with its different needs, people, cultural and legal heritage.

What alarmed the tribesmen also threatened many whites with financial losses. Notable examples are the stores of the Menominee forest in Wisconsin and the Klamath forest in southern Oregon.

The Menominee Act jeopardized the continued existence of the tribal forest, one of the last unspoiled timber areas in the northern Midwest. Wisconsin, recognizing the importance of keeping this resource intact so that it could yield perpetually, took measures to acquire it for the State in the event of a sale.

The Klamath Forest, containing approximately 590,000 acres of tribally owned commercial timberland, the finest stand of Ponderosa pine in the West, is located in southern Oregon. Under the management of the Indian Service, the annual cut was limited, looking to sustaining the yield of the forest permanently. The forest on the Klamath Indian Reservation supplies raw material to the principal industries of the Klamath Basin.

When the program prescribed under the original termination act was studied, it was realized that carrying it out would not only be disastrous to the interests of the Indians, but gravely injurious to the economy of the whole region.

The management specialists appointed by the Federal Government estimated, in 1956, that the act would require the sale of almost 3 billion feet of sawtimber in a period of 1 year, within an economic area in which the sawmill production was 350 million feet a year.

To throw so large a volume on the market all at once would have resulted in a forced disposal. Bidding would have had to be on a wholesale basis, at figures far below those being realized on current sales of small lots of timber. The buyers would be tempted to hurry the cut of their timber and market it as rapidly as possible to recoup their investment and save on interest and taxes. The resulting flooding of the lumber market would depress prices for other producers and lower the revenues to the Government from the sale of timber on its nearby national forest lands by approximately $50 million. When this large acreage was denuded of its growth, lumber mills would be short of logs, the community would suffer from loss of employment and the profits of forest products. The buyers, under very limited State reforestation restrictions, could abandon the cutover lands, exposing them to damaging erosion and impairing the watershed. Realization of these factors aroused community and industry leaders, conservationists, and the Indians themselves to demand amendments to the law which would protect the financial interest of the Indians and safeguard the economic well-being of the area.

The act had to be changed in a number of ways. One amendment required the tribal timber to be divided into units and offered for sale only to buyers who would agree (on penalty of forfeiting the purchase) to manage the forest according to sustained-yield procedures so as to furnish a continuing supply of timber and conserve water, soil, and trees.

On those conditions only 1 of the 11 units offered has been obtained by a private buyer. The other 10 units, under the altered law, will be acquired by the United States on April 1, 1961, at a cost of nearly $69 million. The same amendment provided that the United States also had to take over the Klamath Marsh in order to preserve it as a vital part of the migratory-bird flyway and a source of the Williamson River. The cost of the marsh was $476,000.

The consequences of the Klamath Termination Act (Public Law 587, 83d Cong.) had obviously not been adequately weighed either by the Department of the Interior or by Congress; hence four successive changes in the basic measure proved necessary.

The law and its amendments, taken together, furnish an example (not the only one in Indian history) of ill-considered and unsuccessful attempts to deal (in an all-inclusive measure) with Indians irrespective of their special way of life, their location, and property holdings. It also demonstrates that no termination of tribes, especially those with large properties, should ever be deemed merely an Indian problem. It is inevitably a national problem, one upon the solution of which depends the welfare of people both near and far.

In still another sense termination offers no pat answer to the Indian problem, for the Indians themselves remain. They remain mostly where they were and as they were. For the Government to act out of a sense of frustration and of haste to rid itself of the vexing questions involved in administering Indian affairs is bound to ensure failure. American policy, if it is to succeed, must aim at helping Indians to prepare themselves in advance of termination for self-reliant living in whatever is their prevailing social and economic framework. As this is accomplished tribe by tribe, termination will follow and follow from the Indians' own desire. Termination so conceived will be an act of statesmanship in the best American tradition.

Hon. JOHN W. REYNOLDS,
Attorney General of Wisconsin,
Madison, Wis.

DEAR MR. REYNOLDS: Your letter of February 15, 1961, requests that Mr. Jerome Grignon furnish data concerning the earnings of the lumber, logging and sawmill operations over the past 2 years, and what the anticipated earnings will be as of May 1, 1961. Mr. Grignon has been in Washington since mid-January and reports that he has not seen your letter. In view of the scheduled meeting of the Menominee Indian Study Committee on March 16, 1961, this will attempt to answer some of the questions raised for the committee's information.

Since we are now operating in fiscal year 1961, the data for fiscal years 1959 and 1960 are reported. During the years 1953 through 1958, the average annual total profit held at $559,700—somewhat over the $550,000 annual average used for study purposes. During 1959 the annual cut dropped from a 6-year average of 20,400,000 board feet to 16,158,000, and total profit went down to $373,595. In 1960 the cut went back to 19,701,000, and, in spite of an inventory shrinkage of 1,800,000,

the total profit went back to $529,330. An interim operating statement for the first half of 1961 reflects an operating loss of $35,896, mostly in lumber. Stumpage profit on 7,001,000 board feet of timber cut during the same period recovered the operating loss and reflected a total profit for the period of $111,830. We are informed that the total log cut for 1961 may approach 17,000,000 by May 1, 1961, but that sales has not improved sufficiently to predict an operating profit.

As of December 31, 1960, book inventories reflected $1,556,000 in saleables, and a cash account of $1,804,266 (after a stumpage payment in November of $465,000). From this balance, a somewhat lesser stumpage payment may or may not be made for timber cut since July 1, 1960. Also from this balance, the corporation must advance sufficient funds in direct taxes to run local government and other services. We hope to hold the line at $400,000 for government and community services, but direct relief payments, extra medical charges, sanitarium and institutional care and chargebacks, now so conspicuous, may drastically raise the estimate. It is in these matters where our greatest problem arises. We need time to get the corporation better established and on its feet so that it can better support these local governmental costs. Initially, it is almost the total source of funds. It is in community services where continued Federal assistance is imperative to prevent the creation of another totally distressed area.

As requested there are enclosed several copies of the summary of the so-called Mater report on the engineering and industrial survey recently completed by the Mater Engineering Co. of Corvalis, Wash.

We note that you already have a copy of the analysis of Menominee bills in Congress by Mr. Frederic Sammond. S. 870 and H.R. 4444 concern themselves with the Federal charter idea. There is enclosed herewith a sufficient number of my memorandum to Jerome Grignon on the Federal charter idea for use of the Menominee study committee. As indicated by Senator PROXMIRE, it must be acknowledged that the bills are not in their best form. Because of the urgency of the situation they were introduced as starters so that some real attention might be paid the Menominee situation. We hope that this information will be helpful in understanding the objectives proposed.

GEORGE W. KENOTE.

THE NEW STRUGGLE TO CONTROL THE RAILROADS

Mr. METCALF. Mr. President, scores of railroads throughout the country are now planning to merge or to consolidate their properties. With each new announcement of a proposed consolidation other railroads are reported to begin new discussions for other mergers on the ground that they will be forced to take such action to protect their interests in the event that the other merger proposal goes through.

Clearly, we have today in progress the greatest movement by railroad management to scramble and to carve up our great railroad network that has occurred since the financial titans fought for control of railroad properties prior to the turn of the century. In my opinion, it is already obvious that the present merger movement stems mainly from a desire by certain financial interests to strengthen their earnings power on their investments, rather than from a well thought-out and long-range plan to bring about consolidations which will preserve competition and best serve the needs of the American public for railroad services.

It is interesting to note, for example, that although the report submitted this year by the special study group of the Senate Interstate and Foreign Commerce Committee points out that mergers are most needed in so-called official territory, where the combination of weaker railroads might, in some instances, help improve the financial structure of financially unsound carriers, not one of the mergers now pending before the Interstate Commerce Commission involves railroads in this area. Rather, pending merger proposals involve railroads which are among the most prosperous carriers in the Nation.

In such circumstances, it is clear that Congress should take a good hard look at pending proposals for railroad merger, nearly every one of which has run into strong opposition from other railroads which would be left in a weakened competitive position if the proposed consolidations are authorized. Prominent spokesmen for management in the railroad industry itself have arisen to oppose the present unplanned and haphazard merger movement which has developed among financial interests controlling certain carriers.

In addition, because the so-called economies of mergers depend largely upon the elimination of services and the laying off of railroad workers, my office has received many protests not only from railroad employees but also from representatives of local communities and business establishments who fear that they will be deprived of essential rail services in connection with pending mergers. At a time when our Nation is making a major effort to stimulate the economy and to provide the means for new growth and economic progress, I believe that this side of the merger story is particularly important and should be fully investigated before any railroad merger is approved.

I therefore ask unanimous consent to include in the RECORD at this time the statement issued by the Railway Labor Executives' Association.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The following resolution on unemployment was adopted by the Railway Labor Executives' Association, representing the 23 standard railroad labor organizations, at its February meeting in Miami Beach, Fla.:

President Kennedy has acted with responsible dispatch during the first month in office to face up to our present most immediate national problem, the scourge of spreading unemployment. This refreshing concern over finding ways of aiding the distressed and taking steps to lessen the impact of the recession which has been waging for several months is commendable. Nevertheless, it is already clear that additional action by Congress and the administration is imperative.

The unemployment situation is growing worse. Figures just released indicate that 5½ million of our citizens are now without jobs while an additional 2 million workers are being employed only part time. Moreover, many of those unemployed have been without work so long that they have exhausted even the extended unemployment benefits voted by Congress in 1958 and 1959. Such a situation reflects economic waste of a magnitude that seriously retards all efforts to spur the national economy as a whole. Even more important from our viewpoint, it indicates an extent of human want and suffering which cannot long be tolerated in today's world.

Railroad workers and their families have felt the brunt of unemployment in recent years. Railroad employment today stands at the lowest level since 1890. Over 400,000 railroad jobs have disappeared since December 1955. Average employment on the railroads has been lower each year, and there have been three particularly sharp drops which have meant unusually severe suffering and economic dislocation for railroad workers and their families.

In the 1957–58 recession, railroad employment dropped 210,000 in 10 months, from August 1957 to May 1958. In 1959, there was another loss of 80,000 jobs in the period from June to October. Last year, between June and December, there was another drop of 75,000 jobs. We point out that the unemployed status of at least 1 out of every 15 jobless workers today can be attributed to the 400,000 lost job opportunities which have been eliminated in the railroad industry over the last 5 years.

An estimated 200,000 of the 700,000 employees now remaining in railroading are threatened with unemployment in the near future as the result of pending proposals for mergers and consolidations of railroad properties. To allow this to proceed would transform many railroad communities throughout the Nation into new depressed areas and further stem the national program for economic recovery.

The railway labor unions pledge their full support to President Kennedy and his administration in working to attain measures needed to halt the recession and turn the tide toward a New Frontier of renewed prosperity and progress. We urge the Members of Congress to enact legislation necessary to attain this goal.

Because we believe that the long-range national interest, as well as the self-interest of the workers in the railroad industry, clearly demands a halt to the approval of additional railroad mergers at the present time, the railroad labor unions urge the President and the Congress jointly to take immediate action directing the Interstate Commerce Commission to hold up approval of all pending proposals for railroad mergers or consolidations until their effect upon the national economy has been fully examined. To permit an additional 200,000 railroad workers to be dumped on the unemployment rolls is indefensible.

THE LAO LEGACY

Mr. GRUENING. Mr. President, it should by now be more than evident to those who wish to know the truth, that President John F. Kennedy has inherited from the preceding administration problems of the utmost gravity. The extremely partisan statements issuing from some representatives of the Republican camp do not reflect an objective-minded appreciation of this tragic fact. One of them refers to the first 2 months of John Kennedy's administration as "an era of good fooling." Another says that the Democrats should "throw away the crying towel and stop talking like Doomacrats." Another refers to the Kennedy-Johnson administration as a "do-nothing administration,"—although it has shown more

immediate and intense activity and concern for the national welfare than any in our history—and we have to go back to President Franklin Delano Roosevelt's brilliant 100 first days of the New Deal to find a similar determination, alertness, activity and concern. Still another opposition leader fears that the Democrats are "talking the country into an inferiority complex." Still another perpetrates the whimsy of referring to the Kennedy administration as "exercising no leadership." All this popgun sniping reflects neither a sense of the gravity of this heavy inheritance nor any feeling of associated responsibility for the source of much of this trouble, which lies in the unawareness during the preceding two Presidential terms of the steady deterioration of our position in the world and the growth of problems without formulation of adequate remedies.

I discussed some of these inherited problems in the Senate on January 17, 3 days before the new administration took office. I pointed out then that the country was going into a recession, which, during the campaign, the opposition party declared would not happen. That recession has become steadily aggravated in the succeeding weeks. More and more layoffs are taking place. Unemployment is mounting. Yet measures to steam this depression are being opposed by the majority of Republicans, and sniped at by their spokesmen.

I pointed out that the dollar was in peril, and that the belated efforts of the Eisenhower administration to stop the outflow of gold testified to that fact.

I pointed out that the free world was confronted by the gravest crises in southeast Asia, in Latin America, indeed at our own front door in the Caribbean, and in Africa—all legacies of what was done and what was not done by the outgoing administration.

Now, the steadily worsening inherited crisis in Laos is at our door, and it is a deadly serious situation. "Doomacrats" indeed. If anyone doubts the dilemma which faces President Kennedy, if anyone questions its tragic gravity—which was not of his making, but is a legacy from his predecessor—let him but read the dispatches which have reached headline proportions in our daily press. No one has pointed to this crucial dilemma more succinctly than that able columnist James Reston.

I ask unanimous consent that his article on the Laos crisis, from this morning's New York Times, be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WASHINGTON: "WHILE AMERICA SLEPT," BY JOHN F. KENNEDY

(By James Reston)

WASHINGTON, March 21.—President Kennedy is now up against a hard dilemma: Whether to intervene militarily in Laos, as President Truman did in Korea, or to risk the communization of at least part of that kingdom, as President Eisenhower did in French Indochina.

Both courses are naturally distasteful to the President. If he intervenes in that landlocked, mountainous jungle of southeast Asia, he will be charged politically with getting the country into a shooting war only a few short weeks after the Democrats returned to power.

Yet if he allows the Communist-planned, Communist-armed intervention in Laos to succeed, Thailand and the rest of southeast Asia will be open to Communist attack and Kennedy himself will start his relations with Moscow under the most severe psychological and strategic disadvantages.

This is a cruel choice to put before any administration, let alone one that has scarcely had time to discover where Laos is, and obviously Kennedy is going to try to find a third way out if he can.

With this in mind, Secretary of State Rusk, already a fairly tired man, is going to Bangkok Thursday night to discuss the crisis with the other members of the southeast Asia collective defense treaty.

Under this treaty, the United States, Britain, France, Australia, New Zealand, Pakistan, the Philippines, and Thailand agreed that Communist aggression by armed attack against the treaty area, which includes Laos, would endanger its own peace and safety. They also agreed to "act to meet the common danger" in the event of such Communist armed aggression.

Before deciding on any military intervention of its own, the United States wants to know what the others are prepared to do to avoid the Communist conquest of Laos. So far, though the United States is the only member of the treaty with no territory in the area, the others have left it to Washington to lead the opposition to Moscow's intervention.

This has caused more annoyance in official quarters here than anybody has been willing to state publicly. Thailand, for example, which is more threatened by Moscow's intervention in Laos than any of the SEATO treaty members, has had virtually nothing to say about the matter publicly.

Accordingly, Mr. Rusk will have the first opportunity to raise with the allies in Bangkok a question which has increasingly troubled the Kennedy administration—namely, whether the allies—and particularly those with more direct interests in the area than the United States—are going to act to meet the common danger or merely expect Washington to take all the risks involved.

Two things have puzzled the high officials of this Government who have been conferring constantly with President Kennedy on the Laos situation in the last 2 weeks. The first is why Moscow—which is far from southeast Asia—rather than Communist China—which has a common frontier with Laos—has led the Communist intervention. The second is why Moscow has continued to supply its friends in Laos after the repeated warnings of the United States to Premier Khrushchev personally.

There has been some speculation here that Moscow feared that a Pelping intervention in Laos might lead to a wider invasion that would involve India and perhaps lead to a major war.

However, Khrushchev has shown little restraint even after U.S. Ambassador Llewellyn Thompson called on him with a plan to neutralize Laos and made clear that a Communist conquest of that country might have the most serious repercussions. Even after that, a considerable quantity of arms from Moscow landed in Laos.

It was for this reason that Secretary Rusk repeated the warnings to Soviet Foreign Minister Gromyko here last Saturday and certain precautionary but nonprovocative movements of U.S. naval and air forces were ordered.

Everybody is being tested in this one. Khrushchev is testing Kennedy by provoking a crisis in an area strategically disadvantageous to the West, over a country which at least some of the allies do not think is worth the risk of war.

Kennedy is testing both the Russians and the allies by playing it cool and bold as usual.

The only ones not being tested are the American people. The President is telling them very little. Their chips are on the table, but they are sleeping away, blissfully unaware of the risks and choices being discussed by the man who once wrote "While England Slept."

ACCLAIM FOR PRESIDENT KENNEDY'S YOUTH CONSERVATION CORPS PROGRAM

Mr. GRUENING. Mr. President, yesterday, I had occasion to comment on the splendid pending proposal of President Kennedy to establish a Youth Conservation Corps and inserted in the RECORD an article from the New York Times which outlined these plans.

Those who saw the work of its predecessor body, the CCC, as I did, after the depression days of the late twenties and early thirties, realize from personal observation how valuable this work was and can be. In Alaska, the CCC enrollees built trails, shelter cabins, cleared away obstructions, planted trees, checked soil erosion, and did all sorts of work which needed to be done but did not fit into any other category of either Federal, State, or private activity.

As a cosponsor of the previous Youth Conservation Corps bill, which was passed by the Senate in the 86th Congress, I welcome the President's support of this measure which will again come before the Congress, and let us hope, this time for passage, not merely by the Senate but also by the other body, where in the 86th Congress it failed to pass.

There is an excellent editorial in the New York Times this morning on this subject, and I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CCC TO YCC

Three years ago almost to the day Senator HUBERT H. HUMPHREY and Representative JOHN A. BLATNIK, of Minnesota, introduced into the Congress a proposal for a 10-year management and development program for the conservation of America's natural resources. A major feature of their plan was establishment of a Youth Conservation Corps, modeled on the old Civilian Conservation Corps of New Deal days, one of the most highly successful and generally admired innovations of the Roosevelt era.

The Humphrey-Blatnik proposal in its entirety, which would have rehabilitated the badly depleted natural resources of the Nation, was estimated at the time to cost about $1.2 billion a year over a 10-year period or, as Mr. HUMPHREY pointed out, for the entire decade one-fifth of the cost of the defense program for 1 year. However, nothing of a comprehensive nature was done, and there the matter rested.

Now the Kennedy administration has revived the Youth Conservation Corps part of the plan, under stimulus of the excellent report issued in January by its Natural Resources Advisory Committee headed by Representative FRANK E. SMITH, of Mississippi. Establishment of a YCC alone will not solve the problem, but it is an important and progressive step.

With the 9-year experience (1933–42) of the CCC to guide it, the proposed YCC would

employ some 150,000 boys aged 17 through 19 for 1 year's outdoor manual labor ranging from construction of check dams to planting of trees, and covering the whole range of national park, forest, water and soil conservation activities. The estimated labor cost would be some $400 million annually; and we can think of few ways in which such a sum could be better spent.

The amount of work required to be done in restoring this country's natural resources staggers the imagination—yet it must be done sooner or later; and the longer it is put off, the more expensive it will become. Three years ago Senator HUMPHREY estimated that only a third of the Nation's farmlands were yet protected by soil-conservation measures; that 50 million acres of forest land needed replanting and another 275 million improvement; that two-thirds of our western grazing land was suffering from erosion. These figures are still substantially the same.

In the spirit of the CCC almost a generation ago, the YCC today can be a tremendous force for the conservation of resources and the useful employment of American youth in the 1960's.

APPRAISAL OF THE FIRST 2 MONTHS OF THE KENNEDY ADMINISTRATION

Mr. DIRKSEN. Mr. President, there was published in the Wall Street Journal this morning a very timely editorial which summarizes the first 2 months of the present administration. I believe it is worthy of incorporation in the RECORD, and I ask unanimous consent to have it printed.

The PRESIDING OFFICER (Mr. METCALF in the chair). Is there objection to the request of the Senator from Illinois?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TWO MONTHS

Since we Americans dearly love anniversaries, it's natural that this week should see a burst of appraisals of the Kennedy administration's first 2 months in office. But what is interesting is that most of the commentators don't seem to know quite what to make of it.

The comments we have seen from the liberals are, by and large, approving, although mingled with some uncertainty as to whether the President will carry through with the programs he's promised. Curiously, the comments from the more conservative minded are also, by and large, approving, although mingled with some uneasiness that the President might carry through with the program he's promised.

In short, after 2 months in office President Kennedy has not developed in the public mind a clear-cut image of his political philosophy, in the sense that the people had a clear impression of Roosevelt, Truman, and Eisenhower.

Now this would be quite unremarkable—2 months is a very short time—except that everybody is impressed with this administration's amazing vigor. In those 2 short months the President has sent some 30 messages to Congress, as well as a score of predrafted bills. He has held a press conference every week but one, touching on more than 100 subjects. There have been almost 30 messages to foreign governments and more than a dozen public speeches. All this ought to add up to something.

If it does not, we suggest that it's because there is often a wide difference between what the President says and what he puts into concrete proposals. The puzzle, if any, is which represents the true course of the new administration.

When Mr. Kennedy speaks on budget policy—especially when he speaks informally, as at a press conference—he shows a deep regard for prudent financial management; he pledges that none of his proposals of themselves will unbalance the budget. Yet the specific proposals already made would add billions to both budget spending and deficit.

It would be hard to find a more thoughtful statement on our foreign economic problems than the President's diagnosis that they grow out of excessive spending overseas. Yet again, the specific proposals promise no decrease in the Government's outpouring abroad; the outpourings would even be enlarged under the Latin American program.

In the realm of welfare legislation, the President's language has been exceedingly restrained. He speaks with none of the wild phrases of the Democratic platform; what he puts forward he puts forward quietly, almost tentatively. Yet when you look inside all the welfare packages, add up all their contents, there is hardly anything left out.

It is true, of course, that up to now the President does not appear to be pushing any of these new proposals very hard. His programs for education, housing, agriculture, and the rest sometimes sound as if somebody had just gathered up all the ideas that have been kicking around, dumped them into one package, and then simply tossed them out on the table for Congress and the country to pick over. The programs may be controversial, but the absence of table-thumping from the White House has so far kept any of them from blowing up into a real controversy.

Now it may be that this restraint reflects the fact that the President himself is not rabidly enthusiastic about these extensions of the welfare state and the role of Government in the management of private and local affairs. Anyway, this interpretation has given rise to the misgivings of the extreme liberals who complain the President does not fight for these programs, and the relief of those who last November feared he would.

Sometimes we don't know what to make of it all, either. Still, if the country adopts only what has already been proposed for action, we shall have a Government budget bigger by billions. Labor will depend on the Government for both its jobs and its wages. The farmer will yield complete control of agriculture to the Government. And all of us will look to the Federal Government to send us to school when we are young, give us our shelter when we are middle-aged and take care of us when we are old.

Well, perhaps this administration will prove more conservative than its prospectus. But you sure couldn't prove it by the prospectus.

THE URGENT NEED FOR QUOTAS TO CONTROL LOW-WAGE IMPORTS OF TEXTILES AND APPAREL

Mr. DIRKSEN. Mr. President, I have a statement from the National Association of Wool Manufacturers with respect to the urgent need for quotas to control low-wage imports of textiles and apparel. This subject was roundly discussed and occupied most of the time of the Senate yesterday. The statement has particular reference to wool products, and I ask unanimous consent that so much of it as can be reproduced in the RECORD be printed as a part of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DANGER AHEAD—CLEAR AND PRESENT—THE URGENT NEED FOR QUOTAS TO CONTROL LOW-WAGE IMPORTS OF TEXTILES AND APPAREL

(In 1957, the "danger ahead" symbol was used by the wool textile industry in its case before the Office of Defense Mobilization, based on the belief wool textile imports were threatening national security. ODM agreed wool textiles are essential but said imports did not threaten security. Since 1957 the upward surge of textiles and apparel imports has continued, converting "danger ahead" to "danger clear and present.")

To All Americans:

The U.S. textile industry and its chief customer, the apparel industry, are big—in combination or alone. Together they employ over 2 million production workers—more than any single U.S. manufacturing industry—and have an annual payroll of about $7 billion. Textiles and clothing are basic necessities and the two industries have made Americans, civilian and military, the best clothed people in the world.

The textile industry also supplies a vast array of household products and industrial goods. It is the primary consumer of U.S. cotton, wool and manmade fibers, and huge amounts of other materials and services.

The importance of the industries to the owners, employees and the economy is evident. But there is still another even more vital factor—national security—which in today's perilous world, means national survival. Concerning defense essentiality, the Office of Civil and Defense Mobilization said as recently as January 30, 1959: "On this point there need be no equivocation. The OCDM regards the textile industry as an essential industry and considers it an essential part of the Nation's mobilization base."

You may ask, "So what?" Just this: The essential textile industry has been seriously damaged by rapidly rising imports. Now imports of apparel are mounting, compounding the injury to textile mills and posing a serious threat to U.S. clothing producers. The two industries and their 2.2 million employees are fighting for survival and they generally believe the Government, in the national interest, must establish textile and apparel quotas for each country exporting these products to the United States, with the quotas divided into product categories to prevent concentration in any particular type of goods.

The two industries solicit your support. Make their fight your fight to keep the United States self-sufficient in textiles and clothing under all conditions, in peace or in war.

This booklet highlights the import problem of the wool textile section of the U.S. textile industry.

Imports of wool cloth, principal product of the U.S. wool textile industry, jumped to an all-time record high in 1960, soaring 25 percent over 1959 as U.S. wool apparel cloth output dipped about 5 percent. Imports of other products of the industry also continued to climb in 1960: Wool yarns, highest since 1923; and wool tops (semimanufactured product from which worsted yarn is spun), at a 7-year peak. In addition, the influx of products made by the industry's customers, clothing manufacturers and knitters, also gained with imports of both woven clothing and knit items at the highest levels in at least 40 years.

WOOL CLOTH IMPORTS AT RECORD HIGH

(Chart not printed in RECORD.)

Principal sources, 1960:	*Percent*
Italy	42
Japan	27
United Kingdom	24

WOOL YARN

(Chart not printed in RECORD.)

Principal sources:	Percent
Japan	59
Belgium	24
France	9

WOOL TOPS

(Chart not printed in RECORD.)

Principal sources:	Percent
Uruguay	47
United Kingdom	31
South Africa	8

WOVEN APPAREL CLOTHS

(Charts not printed in RECORD.)

Production decline, 1946–60, 43 percent.

Number of establishments:	
1947	828
1954	654
1958	580
Loss	248

Production workers:	Thousands
1947	167
1954	82
1958	76
Loss	91,000

Broad looms: Decline, 1946–59, 53 percent.

Spinning spindles, worsted, woolen; decline, 1946–59, 62 percent.

HOURLY WOOL TEXTILE WAGE RATES

Quotas are required because tariffs, under present policy, fail to offset low foreign wages.

	Per hour
United States	$1.73
Britain	.54
Italy	.30
Japan	.14

Britain, Italy and Japan in 1960 supplied 93 percent of wool fabric imports here. Their wage rates do not even compare favorably with the present Federal minimum of $1 per hour, much less the proposed $1.25. Transplanted here intact, foreign mills would not be allowed to operate in interstate commerce under the Fair Labor Standards Act.

Wool apparel imports jump to 15,450,000 pounds.

(Charts not printed in RECORD.)

Duty paid value of 1960 wool product imports exceeded one-fourth billion dollars:

	Pounds (estimate)	Duty paid value (estimate)
Woven apparel cloth	28,350,000	$117,900,000
Yarns	5,600,000	19,500,000
Tops	4,870,000	7,300,000
Clothing of woven cloth	6,500,000	30,200,000
Knit items	8,950,000	75,400,000
Total	54,270,000	250,300,000

In terms of wool the 54,270,000 pounds of these imports equal nearly 50 percent of U.S. shorn wool output.

Growers recognize that U.S. mills are the only customers for domestic wool. Thus rising imports of wool in manufactured form hit domestic growers as well as mills and apparel plants. In addition, wool product imports run counter to the National Wool Act's aim to increase U.S. wool production. Recognizing wool as a strategic commodity, Congress passed the act as a measure of national security and to promote the economic welfare.

American-made textiles and apparel give Americans:

Quality equal or superior to that of textiles and apparel made anywhere.

Unmatched variety at prices to fit every purse.

New yarns, new fabrics, new finishes, new styles to meet the most exacting civilian, military, and industrial needs.

Efficiency of the U.S. textile and apparel industries is unchallenged but it is not sufficient to offset vastly lower wages and other costs in foreign plants. Tariffs, as applied under present U.S. trade policy, are inadequate safeguards. That is why, as stated earlier, the American industries believe the Government, in the national interest, must establish textile and apparel quotas for each country exporting these products to the United States, with the quotas divided into product categories to prevent concentration in any particular type of goods.

Further, the duties on goods within the quotas should be sufficient to prevent imports from selling in the U.S. market at less than cost of production in U.S. plants of high efficiency.

Employed Americans are the world's best customers.

MONTANA STATE SENATE EXPRESSES ITS GRATITUDE TO FORMER SENATOR JAMES E. MURRAY

Mr. MANSFIELD. Mr. President, since the retirement of my distinguished senior colleague, Senator James E. Murray, he has not been able to enjoy the days of leisure he so richly deserves because of a serious illness which has plagued him for the past several months.

Senator Murray has had a full life, with many varied accomplishments, and we wish him well, and anticipate that he will soon be on the road to recovery. The Senator is now convalescing at the home of his son, Judge W. D. Murray, in Butte, Mont. Butte is home to Senator Murray, and my colleague, the distinguished junior Senator from Montana [Mr. METCALF] and I hope that he is enjoying a visit with his many friends and associates.

The Montana State Senate passed Resolution 21 expressing its gratitude to Senator Murray for service rendered and wishing him a speedy recovery to robust health.

Mr. President, I ask unanimous consent that the text of the resolution be printed at the conclusion of my remarks in the CONGRESSIONAL RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE RESOLUTION 21

Senate resolution of esteem for former Senator James E. Murray, praying a speedy recovery from his serious illness

Whereas Senator James E. Murray has reached the end of a career of long and distinguished service to Montana in the Congress of the United States; and

Whereas Senator James E. Murray had been hospitalized in recent weeks by severe illness; and

Whereas the many friends of Senator James E. Murray are still mindful of the great achievements for which he was responsible: Now, therefore, be it

Resolved by the senate membership of Montana's 37th Legislative Assembly, That Senator James E. Murray has our full expression of gratitude for service rendered; that we wish him speedy recovery to robust health; and, therefore, be it further

Resolved, That copies of this resolution be submitted to James E. Murray, to the immediate members of his family, and to Montana's congressional delegation in the Congress of the United States.

TIM BABCOCK,
President of the Senate.

THE PRESIDENT'S FOREIGN AID PROPOSALS

Mr. KEATING. Mr. President, there is much to think about in the proposals on foreign aid just sent to the Congress by President Kennedy. A final evaluation will require careful study, but there are a few points that call for comment.

First, we all applaud the fact that President Kennedy is following along the lines emphasized by President Eisenhower before he left office. There is a real need for coordinated assistance from all free nations which have the wealth and industrial know-how to assist underdeveloped nations. The United States is—and I trust will remain—the leader of the free world, but there are other free world nations which must follow our leadership and contribute themselves more generously to the welfare of poorer countries.

Second, I am glad to see that we are going to concentrate our help on those nations which are ready to help themselves by sound internal fiscal policies and clear planning. There is no point in giving aid to those who do not know how to use it well.

I am somewhat more skeptical about the President's demand for a new agency to handle foreign aid. If there are already too many agencies, as the message indicates, I am not sure that creating a new one would do much good. It is more important to link the existing ones together and make sure that they coordinate than to start out afresh with more bureaucracy.

I am even more skeptical about the President's desire for appropriations to cover 5 years rather than 1. Careful, long-term planning is certainly needed. But if that planning is wisely done and practically oriented, there is no need to fear annual congressional reviews. The yearly congressional review of appropriations is nothing to be afraid of if—and this is apparently a big "if"—the planning has been done as it ought to be.

Finally, I should like to make another point that was not mentioned in the message—and I greatly regret that it was not. It seems to me important in planning and administering aid all over the world that we make an effort not to set up and encourage industries abroad that are directly competitive with American industries, or even with industries already flourishing in other countries. Textile plants are one example, and we could find many others. Indirect competition, of course, is inevitable, for America manufactures almost everything; but direct competition, if it creates unemployment here, and weakens American trade, will not benefit the free world as a whole. Similarly, if teaching Africans to grow coffee will create a depression in the coffee-growing countries of Latin America, then other possibilities should be studied first.

This consideration was not mentioned in the President's message, but it should certainly not be ignored.

GREEK INDEPENDENCE DAY

Mr. JAVITS. Mr. President, Saturday, March 25, will mark the 140th anniversary of Greek Independence Day, celebrating the successful war of independence against the old Ottoman Empire.

The people of Greece have jealously guarded their hard-won freedom which they achieved after 400 years of subjection to a conqueror's rule. The influence of Greek ideals of freedom, of Greek philosophy, literature, and arts helped fashion our early American democracy, and in the epochal struggle for independence that began in 1821 Americans stood side by side with the Greeks. After World War II, when Communist forces inspired a bloody civil war, the United States supported the legitimate Greek Government with a program of massive aid, thus providing the decisive factor in the defeat of the Communists. American aid has spurred the economic recovery of Greece and is helping the Greek people achieve a substantial measure of economic freedom. Today Greece is a pillar of the NATO defense against communism.

America's bond with the people of Greece is much more than a spirit of sympathy and understanding. Millions of our citizens can trace their ancestry back to this ancient land and still maintain blood ties there; other Americans are conscious of the bonds of history and tradition as well as the substantial contribution of Americans of Greek origin to our modern culture and economy. There is ample reason, therefore, to congratulate the people of Greece on this occasion.

BYELORUSSIAN INDEPENDENCE DAY

Mr. JAVITS. Mr. President, I am happy to join in the celebration of March 25 marking the 43d anniversary of the independence of the Byelorussian Democratic Republic. The long history of the determination of the Byelorussian people to be independent is punctuated by armed uprisings and constant sacrifice. They proclaimed their Republic in Minsk in 1917 but the period of independence was cut short by the Communist armies that swept over the territory and drove the government into exile.

During World War II, the Byelorussian people again proclaimed their independence, but the Kremlin's forces quickly stamped out this spark of liberty.

It is especially fitting that we pay tribute to the courage of these enslaved peoples at a time when the free world itself is being challenged by the Communist forces. These people of Byelorussia as well as all other peoples held captive behind the Iron Curtain reflect the indomitable spirit of men who are willing to fight and die for the right to be free.

PRESIDENT KENNEDY'S FOREIGN AID MESSAGE

Mr. JAVITS. Mr. President, President Kennedy's foreign aid message presents a perceptive and statesmanlike program in the best bipartisan tradition.

It properly demands implementation by unitary administration in Washington and in the field, and proposes most actively to follow through on the effort to get multilateral participation from the other industrial nations so auspicicusly begun in the Eisenhower administration.

The proposals to enable us to make long-term, 5-year commitments, to extend development loans, and to make them repayable in up to 50 years are vitally needed new initiatives which the Congress must heed. Conditioning our aid on the recipients' ability and willingness to undertake internal reform and self-help is hardheaded realism which justifies the requested authority to make long-term commitments.

The President's recognition of the foreign aid program's continuity through the administrations of President Truman and President Eisenhower and through support from both political parties is most gratifying and should help greatly to get the program enacted.

AWARD TO SENATOR GOLDWATER BY YOUNG REPUBLICAN CLUB OF LOYOLA UNIVERSITY, CHICAGO

Mr. DIRKSEN. Mr. President, on February 18, 1961, the distinguished Senator from Arizona [Mr. GOLDWATER] delivered an address to the Young Republican Club of Loyola University in Chicago.

This fine group of young Americans sought to show their appreciation by presenting to Senator GOLDWATER a plaque which was inscribed with the following tribute:

A TRIBUTE TO THE AMERICAN STATESMAN WHO IN THE YEAR 1960 MADE THE MOST SIGNIFICANT CONTRIBUTION TO THE POLITICAL EDUCATION OF AMERICAN COLLEGE MEN AND WOMEN, SENATOR BARRY M. GOLDWATER

Who has described lucidly the nature of the American political effort in his reasoned and convincing work "The Conscience of a Conservative."

Who has demonstrated the courage idealized in our statesmen by preferring honesty in expression to a cautious reticence in matters thought to be dangerously lacking in popular appeal or understanding.

Who has dedicated the whole of his energies to his country's cause, creating an understanding of our best interests, educating the Nation's younger people, speaking often, explaining thoroughly:

A benefit we acknowledge,
A privilege we will remember.
Our gratitude is offered.

Presented by the Young Republicans of Loyola University, Chicago, February 18, 1961.

VIEWS OF NORMAN THOMAS ON CHURCH-STATE RELATIONSHIPS

Mr. MORSE. Mr. President Mr. Norman Thomas who certainly deserves the title of elder statesman has written to me in my capacity as chairman of the Education Subcommittee of the Senate Committee on Labor and Public Welfare his views on the subject of proper church-state relationships.

Mr. Thomas states his position concisely and it is one which should be received with the respect that its lucidity and cogency deserves. His statement will appear in the hearing record on the bills relating to Federal aid to public elementary and secondary schools. However, because the subject is timely it is, in my judgment, most helpful to have a clear statement of a widely held position made available to a larger audience than that provided by necessarily curtailed press reports of the hearing.

I ask unanimous consent that the statement of Mr. Thomas be printed in the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT SUBMITTED BY MR. NORMAN THOMAS ON S. 1021 AND RELATED BILLS TO THE EDUCATION SUBCOMMITTEE OF THE SENATE COMMITTEE ON LABOR AND PUBLIC WELFARE, MARCH 20, 1961

Under a firm principle of separation of church and state both have fared well in America. Various religious denominations are far stronger here than are the established churches in Scandinavia and Great Britain. Under that principle we have built up a public school system which, whatever its faults, has been an incomparable agency in making us all Americans despite the great variety of our national and linguistic backgrounds. The one greatest defect in our system has been segregation in some States along lines of race and color, and that it is the settled policy to correct.

But now comes a well-organized drive to segregate our children permanently along lines of religion. There is no manner of doubt that that is the purpose of the Roman Catholic hierarchy's drive against the school bill recommended by our Roman Catholic President. The beginning of the drive is to demand loans to parochial and other private schools. The hierarchy will not accept a separate loan bill, as the President has suggested, which, if it passes Congress, can be tested in the courts for constitutionality without holding up a bill desperately needed for strengthening public education. The church wants no bill unless it gets its cut on loan funds and it will be aided by citizens willing to economize on taxes in the name of a phony sort of States rights. If the church succeeded on the basis of its present pleas the next step will be to demand of the several States and the Federal Government that its schools get a proportionate share of tax money heretofore devoted to public education which in no sense is irreligious but does prevent religious indoctrination at public expense.

This way lies disaster—an almost certain bitter split between secular and religious schools far worse than in Europe conditioned to perfunctory religious schools. Every little religious sect will, sooner or later, start its schools and demand tax money. Private schools segregated on lines of race and color will demand public funds. Private schools, heretofore supported by those who wanted them, will join in and the public schools will be left with those who rather consciously want no religious instruction. The cleavage between them and the other schools will be marked and bitter and will be bound to affect politics, local, State and Federal.

But, the Catholic argument runs, why shouldn't our tax money go to educate our

children the way we want? Because it is not the business of the State to provide all sorts and kinds of religious education. It is its business to provide good, nonecclesiastical education at public expense open to all. It should leave, as it does, plenty of time in the week for church training in formal religion through supplemental religious schools. It should allow in a democracy, as it does, the organization and support of private or independent schools by churches, experimental groups, and those desiring what some independent schools offer. But those who want this sort of thing should pay for it, which is no impossibility in our relatively affluent society.

There may be positive benefits to some children and to education in the existence of independent schools. The interaction between the public and the church and other independent schools may be mutually helpful. But not if they are fighting for funds; not if church pressure far more than today makes for religious segregation from the kindergarten on. In the name of one of the most valuable of American traditions and practices the principle of separation of church and state and its application to the education of our children must be protected. And that is as true in New York where Governor Rockefeller's political interests lead him to seek Catholic support by evasive aid to their colleges at the expense of proper appropriations to public schools as it is in the Nation.

OPERATION PAN-AMERICA—THE HIDDEN CATALYST?

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a very fine statement on Latin-American problems by T. Graydon Upton, of the Inter-American Bank. I wish to associate myself with Mr. Upton's observations.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

OPERATION PAN-AMERICA—THE HIDDEN CATALYST?

(A paper before the American Assembly, Pittsburgh, by T. Graydon Upton)

The people of Latin America await quick action by President Kennedy to counter deteriorating economic, political, and social conditions. But disillusionment and acceleration of negative trends will follow if a dramatic new frontier of the spirit cannot be established to complement increased economic assistance. The U.S. balance of payments and budgetary factors are a deterrent to a hemispheric Marshall plan, that panacea long envisioned by Latin Americans as a solution for all troubles. Foreign capital regardless of type or amount, can supply only a modest part of total development capital required, the greater share of which must be created in Latin America. And, indeed, there is no indication that the effect of either existing or new development assistance, by itself, can be sufficiently quick and sufficiently widespread in impact to counter effectively the negative influences. The solution of the problem must correspond to its nature, and its nature is basically internal in Latin America, as well as in the posture of the United States.

What is needed in this dilemma is the synthesis of a new element, the development of a countermystique to Castro, the rededication of the spirit of a highly spiritual and emotional people, which by its intensity will create reservoirs of capital of individual and group effect. And, indeed, such a new element is at hand, but its power and vitality has not been grasped, nor, except in a few isolated steps, has its concept been developed.

The negative factors: During many of the postwar years, a facade of good export earnings, increasing U.S. investment, and progress in industrialization, obscured the fact that Latin America, because of a coincidence of unfavorable economic and social factors, was an area urgently requiring U.S. attention. (While it is true that many of these negative factors exist in other less developed countries, in none of them are they to be found in such unhappy coincidence as in Latin America.) This facade was the more effective, because despite traditional hemispheric ties, cultural and language barriers contributed toward U.S. intellectual interest, primary foreign aid efforts, and key manpower, being directed first to less complex areas of the world with which "communication" in the sense of broad understanding, was more easily established.

In its predominantly tropical regions, Latin America has the most rapidly growing population of the world, and an even more rapid concentration of people in cities. The goal of meeting basic necessities for such unleashed human expansion presents for democratic Latin American governments an extremely difficult objective. Taking a long term view of the nature of the world population problem in less developed areas, Aldous Huxley said, "the probability of overpopulation leading through unrest to dictatorship becomes a virtual certainty." Although there is much difference between individual countries, the terms of trade of Latin America as a whole are steadily deteriorating, and the outlook for its exports is not good. Industrialization has proceeded rapidly in a number of countries and created a situation where ever-increasing amounts of imports, thus of foreign exchange, are required, and there is no margin for contraction in minimum living standards. Although there are some bright spots, in many countries debt ratios are increasingly unfavorable to normal loans, private investment has slowed down, and if social unrest spreads further there is danger of foreign and domestic decapitalization. After analyzing this problem at the inaugural session of the Committee of Twenty-one in Bogotá last September, President Lleras Camargo said, "If such is the trade situation, I would like to express my candid opinion that we are not facing a development problem, but are, rather, confronting a crisis unprecedented in the history of Latin America that cannot fail to undermine all its institutions and democratic systems."

The voice of Fidelismo and what it represents in social reforms and instigation to social revolution presents to the people an attractive alternative to that which they do not have. And this attraction rests not only on their unfulfilled needs, but on the vista of a single element not found in other less developed areas—the heritage of Hispanic culture reflected in large land holdings, maintenance of the practices of the 19th century capitalism in a mid-20th century social environment, a dependence on central government for tasks which communities elsewhere would undertake themselves, a frequent lack of ethical responsibility in official position, an antipathy to manual labor, and reoccurring abuse of the concept of strong individual leadership.

Such is the dark side.

The necessity of creating a new spirit: The coincidence and rapid development of negative factors make it essential that increased development assistance and stabilization of commodity prices be supported by a new moral ideology in Latin America. Large sums, when spent rapidly and without adequate planning and controls tend to be used wastefully, to flow toward existing sources of wealth (and then out of the country as capital flight), and to stimulate inflation, graft, and mishandling. In short, they may do little to alleviate social tensions for many years to come. On the other hand, careful planning and painstaking execution of industrial economic and social development projects to raise living standards on a significant scale, is slowed down by lack of all types of experienced technical, managerial, and administrative personnel. Meanwhile, time presses. Development loans, in their present handling are slow to bridge the gap, for during the long waiting period for consumers goods to be produced there is nothing tangible or spiritual to spur the hopes and ambitions of the people, and when, at long last the goods flow, an outmoded Latin American capitalism is a barrier to a wide attainment of economic benefits by the low income groups.

The promise of a redefined Operation Pan America. A new revolution of the spirit, a new mystique, a new catalyst, must possess certain inherent characteristics. It must be a Latin American movement, conceived and nurtured in Latin America. It must be dramatically presented, and thus capable of awakening enthusiastic acceptance (and not be allowed to die, then revived periodically, in isolated incidents, without coordination or followthrough). It must be broad in concept, so that individual objectives, such as multiple self-help housing, land reform, a new educational drive, common markets and other aspects of Pan Americanism, can be woven into it. And it must be capable of being sustained over a longer period.

Historically, great movements of the spirit stem from a great leader, who intuitively senses the readiness of a people for change, then builds on underlying social, spiritual, or national tensions to create a new social system, a new religious movement, or a great national party. And this in turn is achieved not only by the force of personality of the leader but by the vitality of the concept, and the effectiveness with which the best available techniques are used to arouse enthusiasm and to induce and maintain public acceptance for it.

While a new Simon Bolivar for Latin America cannot yet be identified, there does exist a concept with great potentialities—the concept of Operation Pan America. Operation Pan America is the creation of the Brazilian poet-politician, Augusto Frederico Schmidt, fathered by a widely acknowledged Latin American leader, Juscelino Kubitschek, and presented forcefully by Brazilian representatives at inter-American meetings. Operation Pan America has been accepted by Latin American governments, and by the United States. But the concept has lived only in conferences, in Schmidt's speeches, and in a relatively few isolated high-level messages and acts, of which the most outstanding was the Act of Bogotá and its concept of aided social evolution. At this fateful moment in Latin American relationships, Operation Pan America is only a smoldering ember, which has never turned to flame.

This failure is, perhaps, because in its original Brazilian presentation Operation Pan America was tied in with the establishment of Latin American goals in terms of per capita income and rates of economic growth, which created for the United States the problem that acceptance would commit it to massive expenditures impossible either to begin or to maintain. Thus the nascent fire of Operation Pan America has hardly survived a barrage of financial arguments, opposing economic concepts, and conference deadlocks. And in the process its power, within whatever financial framework may be possible, for awakening the spirit of the Americas, which was an essential part of Schmidt's concept, has been forgotten. Nor indeed could Operation Pan America be effectively launched without the utilization of imaginative planning, effective techniques of arousing human enthusiasm, and methods to insure its acceptance on a broad

scale, all of which require U.S. support and understanding. In short, the necessary catalyst of the dramatic and emotional factor has been overlooked.

Yet Operation Pan America has the vision and the potential symbolism of a sweeping hemispheric movement. It has a spiritual (if also materialistic) origin, and it has a broad scope. If properly moved, it is capable of building great enthusiasms and intense self-dedication. It can exercise a cohesive and unifying force in Latin America which in turn would create the human and spiritual capital of real progress. It is capable of drawing to it powerful Latin American leadership. And finally, the fortuitous timing factor inherent in the taking of office of new Presidents in Brazil—the great country where Operation Pan America was conceived, and in the United States, whose acceptance and support is prerequisite for success, and which itself is dedicated to establishing vital new frontiers, is particularly fortunate.

The form of Operation Pan America: It is not within the scope of this paper to provide a blueprint for a redefined Operation Pan America. ("Redefined" because of the need of a shift in emphasis from its original economic structures.) It could "bubble up" from the bottom, as individual civic groups and communities of interest in Latin America and the United States accept the theme and develop their own variations on it. But more effectively, it should come from the top, and here one can catch glimpses of a future pattern. One can visualize an address by the President of the United States, dealing only with Latin America, and in the inspiring framework of his inaugural words. One can foresee a meeting of the Presidents of the Americas to rekindle the fire. One can guess at the desirability of forming within the Organization of American States a specialized public relations staff to develop the public relations aspect of Operation Pan America both in detail of concept and execution, and by establishing techniques for widespread public acceptance in the cities, the towns, and the countryside of Latin America, and in the United States.

One can visualize that a new powerplant, financed perhaps by the Inter-American Development Bank, instead of passing from the popular mind with a press notice, will be greeted in ceremonies as a step in Operation Pan America—Project Power. There will be speeches not just by functionaries, but by foremen, technicians, and laborers, flags with the symbol of Operation Pan America and bands playing the new march of Operation Pan America. There will be a large model of the plant, and imaginative pictures of the new homes to be lighted, the new industries to be supplied, and displays of the new electric tools and new household equipment to be used. And there will be a formal dedication and blessing by the church in recognition of the spiritual values of the great movement of which the power project will become an additional symbol. Thus during the period of construction the project will be not just an unrecognizable physical structure, but will be immediately and continuously identified in the minds of the people as something vital to improve their life, and an essential part of all-pervasive Operation Pan America.

One can foresee not only scattered self-help housing projects, but a number of them initiated simultaneously in half a dozen cities throughout a country, with officials of department of public works devoting a first day of symbolic labor, with competition between housing teams, gold star rosters of number of dwellings completed, and prizes for the most effective team of supervisors. One can see, too, American companies in Brazil, all joining together to provide scholarships for a technical training center, dedicated under a new demonstration of the spirit of Operation Pan America—Project: Education. While on the college campuses of the United States the flag of Operation Pan America would symbolize that students of Latin America were receiving that particularly warm reception which the new spirit of the hemisphere had awakened. One might also visualize a Day of the Americas in both Latin America and the United States, where all citizens of the Americas would be invited to pledge for a practical, yet symbolic goal, chosen by the Presidents of the Americas. And the voice of America would speak vitally and forcefully in Latin America not as the Voice of America but as the voice of Operation Pan America.

In short, the present routine statistical handling of development in Latin America, punctuated occasionally by an uneconomic but emotionally stimulating prestige project, would be replaced by a new dramatization of development efforts in Latin America by all agencies, public and private, U.S., Latin American, and inter-American, tied together with the spiritual cement of Operation Pan America. And such dramatization would be carried forward in Latin America, and in the United States, under technical assistance in the human relations field, awakening in the process a sense of enthusiasm, self-dedication, and human capital, and enlisting new and imaginative leadership.

Conclusion: A great deal of economic planning is taking place for the development of Latin America, and with the reorganization of the Inter-American Economic and Social Council of the Organization of American States, a significant step forward has been taken in the sphere of consultation and confrontation of ideas between nations of the Americas, parallel to that which moved Europe forward after the war. Similarly, in the earlier formation of the Inter-American Development Bank, a hemispheric institution has been brought into being which is creating great interest in Latin America for its own multilateral role in development. And with the Act of Bogotá a constructive step has been initiated in the difficult concept of social overhead assistance and evolution of social institutions. There appears, in addition, little question but that further economic measures will be considered by the United States.

But no equivalent step has been taken in the sphere of the spirit, and no successful effort has been made to touch the imaginations and emotions of the peoples of the Americas and unite them for a common objective. Yet a vehicle is at hand for touching such imagination and such emotions. In a world where nations are rapidly building both good and evil houses of the spirit to facilitate achievement of national goals, Operation Pan America is unique in concept and of breathtaking potentiality. The interpretation presented here does not for one moment suggest the substitution of banners for development dollars. Operation Pan America can come to fruition only if the administration, fully supported by the Congress, will make a maximum effort in the financial and economic spheres, both to increase and make more effective economic and social development assistance. But man cannot live by bread alone. When the maximum economic and social effort is being made, it must touch not only creature necessities, but quick minds and high spirits. If a successful war is to be waged on underdevelopment in Latin America, it must have, for a sensitive, emotional, and upreaching people, the panoply of the dedication of a great cause. For only within the spirit of such dedication can the individual effort and sacrifice be called forth which are essential for success against such odds.

The concept of Operation Pan America provides the vehicle of the spirit. This unique opportunity for its implementation must be grasped, or the dream will be forever lost.

MALHEUR WILDLIFE REFUGE—SERVICE STOP FOR MIGRATING WATERFOWL

Mr. MORSE. Mr. President, in the February 1960 issue of the Northwest Ruralite, there appears an article entitled "Malheur Wildlife Refuge—Service Stop for Migrating Waterfowl." Because this article presents an excellent picture of one of the important services not too familiar to many of our citizens, provided by the Federal Government through the National Park Service, I thought it would be of interest to my colleagues. I ask unanimous consent, therefore, that the article to which I have alluded be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MALHEUR WILDLIFE REFUGE—SERVICE STOP FOR MIGRATING WATERFOWL

Out in the barren and still chilly sagebrush and rimrock country south of Burns, Oreg., a new life will soon spring forth to herald the coming of spring.

Sometime soon, usually around mid-March, the first calls of migrating snow geese are heard along the marshlands of the Malheur National Wildlife Refuge southeast of Burns. During the ensuing month or so the eastern Oregon skies will be thick with huge flocks of snow geese, whistling swans, Canada geese, mallards, pintails, widgeon, and sandhill cranes. For the Malheur refuge, the Nation's largest Fish and Wildlife Service establishment for migratory waterfowl, is a major service stop for the countless thousands of birds winging north in the spring. Some of the birds will stay to make their nests right on the refuge. Most of them, however, will continue farther north to nesting areas in Canada, Alaska, and even as far as Siberia.

Historically, the marshy lakes south of Burns—Malheur, Harney, and Mud—have long been stopping and nesting areas for birds en route along the Pacific flyway.

The first detailed writings on the subject, however, were recorded by a young Army lieutenant, Charles E. Bendire, who was stationed at Fort Harney, about 20 miles north of Malheur Lake. A U.S. Fish and Wildlife Service bulletin recalls that he wrote of the great migrations of ducks, geese, swans, sandhill cranes, pelicans, and other birds; of the colonies of nesting pelicans, grebes, cormorants, gulls, and terns; and the millions of ducks and geese that nested and reared young in the bordering swamps.

"After Bendire's time came the plume hunters to slaughter the swans, grebes, egrets and other birds for the millinery trade. This nefarious practice continued until the egrets were practically exterminated and the tern and grebe colonies greatly reduced in numbers. Fur trappers, likewise, reaped rich harvests—beavers, otters, mink, and muskrats being taken by the thousands.

"The early settlers shot ducks, geese and swans unrestrictedly, killing the birds for their feathers alone or for food. As settlement increased, dams were built in the nearby Silvies River and other streams flowing into the lakes and swamps to divert water for irrigating hayfields. The diverted water spreading over a large area caused an increase in the loss by evaporation * * * which resulted in a gradual shrinking of the marshes and a consequent decrease in waterfowl feeding and nesting grounds.

"This was the situation in 1908 when President Theodore Roosevelt established Malheur and Harney Lakes as the Lake Malheur Reservation as a preserve and breeding ground for native birds."

The area has been enlarged since then, now containing 184,000 acres, including Harney and Malheur Lakes, the old "Double O" Ranch, and the valley of the Donner und Blitzen River.

This is an area that changes slowly, if at all. Except for improvements to the refuge, the country remains much the same as it was when a trapping party led by Peter Skene Ogden traversed the area in 1826. One big change at the refuge headquarters, an idyllic oasis located about 32 miles southeast of Burns, is the recent advent of electricity supplied by the newly developed Harney Electric Cooperative.

Perhaps the most combustible era in the region's history was the Pete French era. There's a story here that seems to parallel the "Young West" stereotype. An enterprising Californian rides in in 1872, through hard work and almost ruthless leadership builds up a fabulous cattle empire, and then dies (in 1897) with the bullet from a rival's gun in his chest. The Peter French story is still a prime topic of conversation among oldtimers in the area, and has been a subject of fascinated study on the part of the manager of the Malheur National Wildlife Refuge.

The manager, a soft-spoken man named John Scharff, summarizes his studies on Pete French with the comment: "He had lots of ambition and considerable vision, but he was somewhat lacking in scruples. He was invariably the outstanding man present no matter whether he was on the dance floor, the rodeo arena or on a cattle drive. You could never be neutral about him—you had to be either all for him or bitterly against him." Of the several men who witnessed the shooting of Pete French, only one survives, a man named Frank "Chico" Chacarrategue, who now lives in Lovelock, Nev.

Last August Scharff observed his 25th anniversary of work with the refuge. He began in 1935 and has been manager since 1936. He has a staff of 13 who maintain the refuge, and carry on the various projects.

One project has been the banding of more than 50,000 ducks and geese since 1926. Reports have been received on 6,000 of these birds. About one-fourth were retrapped on the refuge or were taken in Oregon; more than half were killed in California; and the remainder were reported from Alaska, seven Provinces in Canada, all of the States west of the Mississippi River and even a few east of the river. Reports have also come from 14 Mexican States and from Honduras and Colombia.

Some 230 species of birds have been recorded at the refuge, and many of these are on display at the George M. Benson Memorial Museum, located at the refuge headquarters. For the average visitor, the museum assumes double importance, because it helps him to identify the birds he may see later in the field, and it's also the closest look he's likely to get at most birds. They're a bit shy and retiring by nature.

The refuge does welcome visitors, however, and provides several pamphlets and maps to direct the visitor to the main points of interest. Any visitor who drops in at the refuge during the next few months can't help but be enthralled by the fast-paced tempo of arrivals, departures, matings and nesting—nor is he likely to forget the image of the effortless flight of the snowy egret streaking across the marshlands, or the lumbering takeoff of the giant pelican (he looks like a flying boat taking off and you wonder if he'll be airborne before running out of water space).

PRESENTATION OF ADA AWARD TO REV. DR. MARTIN LUTHER KING

Mr. HART. Mr. President, early in February, former Senator Herbert Lehman, of New York, presented the annual ADA award to the Reverend Dr. Martin Luther King. In a moving speech outlining Dr. King's leadership and contributions to an unfinished task, Senator Lehman emphasizes the opportunity of our democracy to complete this task.

I ask unanimous consent that the text of Senator Lehman's speech be printed at this point in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY GOV. HERBERT H. LEHMAN ON PRESENTATION OF ANNUAL ADA AWARD TO REV. DR. MARTIN LUTHER KING

Those nations and those generations which produce true leaders of the people usually count themselves as fortunate. And indeed they are fortunate if such leaders are not only beloved and trusted by their people but also, in turn, deeply love and trust their people; leaders who also love truth and justice and virtue; leaders who love not only their own people—but all people—all humanity.

Such leaders are rare. Blessed are the times that produce them.

Such a leader—an apostle of tolerance and understanding—a statesman of deep faith in mankind as well as in God—is among us tonight—a rare, chosen and dedicated man—a young man already old in the uses of leadership—the Reverend Dr. Martin Luther King.

The qualities in Dr. King which I have mentioned are accompanied, above all, by an indomitable courage—a courage which has many times reached the heights of heroism. It is a courage of the flesh joined to a courage of the mind—a courage based on a bedrock of faith in the principles to which Dr. King is so deeply committed.

Dr. King has already written his name largely in the social history of our times. He was the innovator, the leader, and the voice of the trumpet who called forth from the faith and spirit of the individually weak people of Montgomery, Ala., a collective strength and zeal which defied and broke the gathered forces of prejudice and discrimination in that city.

Dr. King did not summon his followers to the barricades; he did not call upon them for acts of heroic violence. Instead he called upon them to pray and to love and to walk. "My feet are tired, but my heart is strong," said the nameless woman who walked the long miles to and from work in Montgomery, rather than ride on the segregated bus. And in the end, to the accompaniment of a world's wonder and admiration * * * the bus strike was completely won, by the plain people of Montgomery, and their inspired leaders the chief of whom is our honored guest here tonight.

There was pride among all the Negroes of America in the heroic achievement of victory in Montgomery. This pride was, in fact, shared by most Americans, regardless of color, for it was a mighty triumph for the human spirit—a victory of ideals over power, of nonviolence over naked force.

Since his first emergence on the national scene, Dr. King has broadened and deepened his leadership experience. He has, I am sure, known defeats as well as victories in his efforts these past 7 years; but the evidence is that both have served to enrich his spirit and his leadership.

He is a man of the church who has brought the church and its essential religious meaning into the daily lives of the people. He has translated faith into action, and action into faith. He has helped to arm faith with fervor and courage * * * and thus to conquer hate and those who would deny the dignity of the human soul and spirit.

I am sure that he is the first to be aware that the struggle for equality and for justice for every American, regardless of race, creed or color, is far from over. It has only begun. Each victory, small or large, marks but a new beginning—the emergence of a new front where more and more human beings may join in the struggle.

Most of us feel that we stand today in the possible dawn of a possible new era—an era of action, progress, and sure advance toward the common goals of mankind. Most of us have heard and felt the stirrings of the new and exciting spirit in Washington. It seems that this is to be an era led by the generation born after the first decade of this century had made its turn—by men and women neither responsible for nor involved in the holocaust of the First World War, but who did experience at first hand the horrors of the Second World War and who are not willing to contemplate a third.

This new generation knows that to avoid the third and undoubtedly final world war new initiatives are called for, and old patterns of diplomacy and power may need to be discarded. They know, too, that a fresh and vigorous start must be made on what President Kennedy has called the unfinished business of this generation—chief of which, in my judgment, and I hope in his, is the matter of human rights.

We have far to go to complete this unfinished business. Many difficult programs of action will be required of the executive departments; new legislative authority and supporting appropriations will be needed from Congress. The steadfast courage of the Federal courts must be matched henceforth by the executive and legislative branches, acting now in concert.

I have hopes that under the national leadership of President Kennedy we are going to move ahead speedily on all these fronts. But this does not minimize or reduce the need for the kind of inspired leadership that Dr. King has been providing or which, on an organizational level, the ADA has been providing.

We must not rely solely on what comes down from above. We shall have to push harder than ever from below, in order to encourage and to support leadership from above.

That is the prospect and the challenge that we of ADA face.

And that is also the burden of responsibility which you, Dr. King, must bear in the days and years ahead. You are of the generation which now has the reins of leadership. In paying you our tribute tonight, we anticipate that what you do in the times ahead will be of even greater service to the cause of humanity than what you have done hitherto.

I now read the citation for the award which is being given you.

MINIMUM-WAGE LEGISLATION

Mr. GOLDWATER. Mr. President, I ask unanimous consent that a series of editorials touching on the minimum-wage bill be printed in the body of the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Beckley (W. Va.) Post-Herald, Feb. 25, 1961]

MINIMUM-WAGE INCREASE HAS DANGEROUS ASPECTS

President Kennedy's urgings that Congress increase the hourly minimum wage in

interstate commerce is laudable insofar as it marks him as a gentleman of the best intentions. He wants to improve the lot of the ordinary citizen.

But in this case he seems to be following the pulsings of his heart rather than the dictates of his head. According to top economists, raising the minimum wage of workers, by 25 percent, will only add to the million already without jobs. It will have the effect of creating demands for more pay and/or shorter hours all up and down the line.

Next in order will be the export of industry and jobs to other parts of the world, to meet the competition from these other parts in the U.S. markets.

It runs true that the more recklessly our dollars are spent, without proportionate increases in production results, the cheaper they become, and the less competitive in not only domestic but world markets. Stable dollars can only be achieved through stable costs and prices, plus reduction of our towering national debt; and as debt reduction proceeds, the U.S. dollar will also be deflated, to become again the most valuable—most sought after—piece of money in the world.

And that's where it should be as the currency of the strongest and most progressive nation in the world.

The Kennedy urgings will doubtless come up against that kind of thinking in the Congress. But the question remains to whether there is among the 437 membership enough of that sort of sentiment to check inflation and to strengthen the dollar by both of the means suggested above.

In this connection the philosophy of Abraham Lincoln seems worth turning to:

"Property is the fruit of labor. Property is desirable—a positive good in the world. That some should be rich shows that others may become rich and hence is just encouragement to industry and enterprise. Let not him who is houseless pull down the house of another, but let him work diligently to build one for himself, thus by example assuring that his own shall be safe from violence. I take it that it is best for all to leave each man free to acquire property as fast as he can. Some will get wealthy. I don't believe in a law to prevent a man from getting rich; it would do more harm than good."—C.H.

[From the Aiken (S.C.) Standard & Review, Feb. 20, 1961]

SANITY TEST

The false notion that the Federal Government can legislate away human shortcomings and cancel out natural economic laws may be coming to an end. Whether this is true will be tested when impending efforts are again made to amend the Federal wage-hour law to extend coverage and boost the minimum wage.

Proponents of wage-hour revision run into forces that can no longer be swept under the rug by legislative fiat; namely, inflation, unemployment, and imbalance of the gold flow from the United States. These forces have reached their present proportions, mainly because the free-market system has already been coerced, regulated and taxed to the danger point.

Legislating another increase in the wage level will mean more cost increases to pass along to consumers in higher prices, and another turn in the inflationary spiral. It will mean further unemployment and a further weakening of the ability of American business and industry to compete with foreign producers of everything from neckties to automobiles. As this ability to compete is restricted, more and more of the Nation's gold and resources will drain away to other countries.

What is most sorely needed is a demonstration of faith in the ability of private citizens to run their own affairs to the benefit of themselves and our country, if the regulators and spenders will give them a chance.

[From the Cedar Rapids (Iowa) Gazette, Mar. 6, 1961]

WAGE FLOOR RISE MAKES NO JOBS

Secretary of Labor Goldberg says it is safe to assume that 5½ million people are now unemployed in this country—the largest number since the days of the big depression and the ensuing New Deal. This fact of heavy unemployment is being used in various ways to bolster various economic proposals which the Kennedy administration hopes to get enacted into law as soon as possible.

Understandably, however, it is stressed but lightly in connection with the proposed 25 percent boost in the minimum wage which administration leaders are trying to hustle through Congress before the Easter recess. It requires uncommon facility at argument to show that a time when employers are finding it necessary to lay off workers in abnormally large numbers is a good time to require employers to pay more money to the ones they keep. To be sure, there are those who undertake to make such a case, but their reasoning is devious and hard to follow.

For one thing, they contend that there is no ground for fear that boosting the minimum wage would force the layoff of many workers, for most workers already receive considerably more than the minimum wage proposed. But that is precisely the point. Most workers do receive more than the proposed minimum wage, and most of them are reasonably well satisfied with what they receive because it reflects recognition of the fact that they have more experience and skill than those who do receive the minimum. They can be expected to become less satisfied if the differential between their pay and that of the worker on the bottom rung is narrowed. And that reaction will run all the way up the line, from one pay level to the next.

So the effect of a rise in the minimum wage is not confined to the worker at the bottom level. It is felt at all levels, unless satisfactory pay differentials between all levels of skill, experience, and responsibility can be maintained.

There are times when these differentials can be maintained with respect to a higher minimum wage by proportionate increases in pay at all the higher levels, the cumulative cost being passed on to the consumer in the form of higher prices. But this happens to be not one of those times. Employers have been laying off workers because they couldn't sell enough of what they have to sell at the prices they had established. The odds certainly would be against their selling more at still higher prices.

In other words, an increased minimum wage would squeeze them between a rising floor and a stationary, if not actually falling, ceiling. The natural tendency is for this squeeze to express itself in an effort to hold down the total working force and increase the unit workload in order to maintain pay differentials as far as possible and thereby avoid employee dissatisfaction all along the line. Needless to say, such an effort is not calculated to produce new jobs in a hurry.

[From the Florence (S.C.) News, Feb. 25, 1961]

PRICE FIXING, BID RIGGING WRONG WHOEVER'S HEAD IS WEARING THE HAT

The people owe a heartfelt vote of thanks to the Justice Department for its successful prosecution of a price-fixing and bid-rigging ring within the electrical manufacturing industry.

The sentencing judge, who whisked vice presidents off to jail and levied hefty fines, commented vigorously and properly on the damage such an arrangement does to the free competitive enterprise of the Nation, and to the citizens and governments victimized.

We have no reason to believe that antitrust enforcement will be less vigorous under the new administration than it was under the old one which made this case.

While the evils of price fixing are fresh in the public mind, it may be well to remind the public that the very Government that did the prosecuting in some cases condones and in other cases encourages such practices.

The floor price of labor is fixed by the minimum wage law.

And labor unions are specifically exempted from the antitrust laws, so that they may use their monopoly positions to hoist wages, and hence prices, at will. They may, and do, also conspire to divide up markets.

There is something wrong with laws that penalize not on the basis of the offense but on the basis of who commits it. It is entirely possible for one man to be a farmer, a labor union official, and a businessman. As things stand, whether an action of this man is right or wrong depends upon which hat he is wearing when he commits it.

That monopolies operate to the disadvantage of the public has been recognized for centuries. The Sherman Act was passed in 1890, as soon as the threat of monopolies became serious in America.

The time has come to broaden the prohibition of monopolies so that all citizens are restrained, and all protected, alike.

[From the Rockford (Ill.) Register-Republic, Mar. 6, 1961]

MINIMUM-WAGE RUSH

Harlem Congressman ADAM POWELL'S House Labor Committee rushed through hearings on the administration's proposal to increase the minimum wage from $1 to $1.25 an hour and to extend its coverage to 4,300,000 workers. The committee approved these provisions Friday and specified that the minimum wage boost take place in 2 years, instead of 3 years as originally asked by the administration.

Efforts of Republicans to limit the increase to $1.15 and to extend coverage only to employees of retailers with five or more stores in at least two States were rebuffed by the Democratic majority. It now remains for conservative Democrats and Congressmen of both parties from smaller communities to try to inject some reason into the bill during floor debate.

With the business downturn continuing and many people looking for jobs, it makes no sense whatever to increase the minimum wage. A wage increase means nothing to the worker who is unemployed. Those who cannot find jobs at a $1 minimum wage will not find work if the wage floor is raised.

Relatively few companies have a minimum wage as low as $1 an hour, but the effect of legislation compelling higher wages for the lowest paid workers is to increase the entire wage structure, thus having a big impact upon the total payroll.

Employers with a fixed amount of income set aside for labor costs will look for ways to economize if they are forced to pay higher rates to employees. In many instances expenses will be trimmed by cutting down payrolls. Hardest hit by layoffs will be marginal employees—young people, unskilled workers, part-time workers, and older persons.

Moreover, the provision to extend coverage would affect many businesses operating entirely within one State, thus knocking out the clause in the Constitution which authorizes Congress to legislate only in the field of interstate commerce.

[From the Plainfield (N.J.) Courier-News, Feb. 24, 1961]

MINIMUM WAGE

Hearings have begun in the House Education and Labor Subcommittee on the Kennedy minimum wage bill. It may provide one of the earliest tests of the President's strength on Capitol Hill.

A hard fight is expected. The bill and its timing are controversial.

Opponents insist that the 25 percent increase, from the $1 to $1.25 over a 3-year period, would have an enormous effect on the total wage bill. Differentials have to be maintained, which means an upward adjustment for higher paid workers as well.

This would mean higher prices, more inflation, tougher competition from foreign imports, a further competitive handicap for U.S. exports. It could mean that marginal workers would lose jobs and marginal firms would be forced out of business.

To insist on wage increases at a time when profits are constricted could hurt business rather than help it.

[From the Columbia (Tenn.) Herald, Feb. 23, 1961]

WHY PRICE PEOPLE OUT OF JOBS?

With many industries showing declines in profits in spite of higher gross sales, evidence is piling up that American business is having tough sledding in international markets. Yet legislation to raise the Federal minimum wage is slated for early consideration in Congress.

The cost to the country of raising the minimum wage at this time is well described by a paper box manufacturer of St. Joseph, Mich. "We believe this would be very detrimental to our industry and will cause more inflation and unemployment. When the cost of packages such as our industry makes reaches a certain point, the customers turn to some other form of packaging which is less expensive and, as a consequence, we lose orders and in turn have to reduce our working forces. It is almost impossible to compete with foreign imports with our present wage structure and if the minimum is increased by 25 percent, we are sure more unemployment and inflation will be the result."

Multiply this paper box manufacturer by tens of thousands and you have a fair picture of what such legislation could do—in dollars and cents costs, and hardships imposed on marginal workers.

There are other longtime "costs" almost beyond calculation. These involve matters of principle such as whether the free market, free enterprise system can endure this kind of increasing centralized government control.

[From the Lebanon (Pa.) News, Feb. 28, 1961]

ECONOMIST MEANY

George Meany, unquestionably destined to be better remembered as president of the AFL–CIO than as an economist, derides the idea that this country's high wages are responsible for pricing American goods out of the world market.

The figures do, indeed, show that the value of American goods sold abroad exceeds the value of imports. The margin, unfortunately, is not enough to balance the sums spent on foreign aid or troop maintenance.

This scarcely justifies Meany's suggestion that high American wages have nothing to do with the imbalance of trade, however. Certainly the disparity between foreign wages and domestic wages helps explain why the United States imported 375,000 more tons of steel than it shipped abroad last year. Low-wage countries can manufacture steel and ship it across the seas and still undersell U.S. manufacturers in their home market.

The same situation exists for other goods. Television and radio parts can be imported from Japan across the wide Pacific and still cost less than to manufacture them in American shops.

Meany's economic theory is that the higher the wages, the more buying power is created and the more prosperous America will be. He appears to disregard the inflationary effect of such a process and the hardships it works on that considerable portion of the population that must exist on fixed incomes.

There must be a balanced relationship between wages and productivity. When such a balance is achieved, America will find herself in a better competitive position in the world market, and collaterally, better off at home.

[From the Charleston (S.C.) Post, Mar. 2, 1961]

BEHIND MINIMUM-WAGE DRIVE

A major objective of the drive to increase the minimum wage was revealed by Joel R. Jacobson, president of the New Jersey State CIO.

Betraying a lamentable ignorance of conditions in the South, he told a Senate subcommittee that the major cause of unemployment in New Jersey was the relocation of industries to "the low-wage, pauperized sections of the South."

To stop the flow of industry to this section, Congress, he said, should step up the minimum wage. The Federal Government should, as he sees it, legislate against the industrial development of the South.

There are conflicting figures as to comparative wages of southern and northern workers. We do not know how they actually compare, but we do know that new industries are welcomed in this section and that they have no trouble in attracting willing, efficient employees. And it is a fact, too, that in most southern localities the cost of living is lower than in New Jersey and most other Northern States.

What of unemployment in other northern areas? We presume Mr. Jacobson had in mind the impressive growth of the textile industry in the South. Unemployment is acute in the automobile, coal mining, and steel industries, but there has been little or no migration in these lines to the South.

There are various factors which enter into industrial investment. One is the labor-management atmosphere. Virtually all of the Southern States have right-to-work legislation on their books. These are laws under which membership or nonmembership in a labor union may not be a condition of getting or holding a job. It is this protection to workers that accounts for much of the anti-South animus such as voiced by Mr. Jacobson.

The South has attracted only such industries as found conditions here attractive to them. Favorable labor-management relations, the climate, community cooperation, raw materials, power, nearness to markets, transportation, and advantageous sites are among the considerations that have prompted companies to locate here. Such wage differentials as may exist are but a minor factor.

The South, too, has, in some areas, the problem of unemployment, but it is significant that the most acute situations are in States where union membership is widely compulsory, and where labor costs have actually forced some concerns out of business. We cite Michigan, Pennsylvania, and New Jersey as examples. To blame the South for their troubles is as absurd as it is false.

[From the Newport News (Va.) Times-Herald, Jan. 31, 1961]

HIGHER MINIMUM WAGE UNLIKELY

Cold facts of minimum wage raises by Government fiat have led to the belief in Washington that there will be no raises now, despite all of the talk by the new administration about raising the minimum wage from $1 an hour to $1.25 and all of the promotion of it by the Democratic Party platform. Labor Department studies, according to "The Insider's News Letter" have cast fresh doubt on the prospects for the $1.25 hourly minimum wage bill getting support from the administration, no matter how many headlines come from Washington reporting favorable prospects for the legislation.

The fact of the matter is that expert analysis has shown that raising minimum wages, especially in a time of recession, can worsen unemployment. For raising minimum wages sets up a chain reaction. If minimum wage earners have their standards raised and those who were below the minimum are advanced to it, there is a demand from all the echelons above for an increase in pay also. Thus the cost to an employer for doing business are not just those added by raising the pay of minimum wage earners. They hit him all along his pay schedules.

Moreover, when the minimum pay goes up the employer is most likely to see where best he can cut personnel to fit his payroll budget. And the first victims, of course, are those in the lower pay brackets. These can do the least in increasing production to meet the higher payrolls. So the lower employees in the production scale lose out and unemployment is increased rather than decreased. Thousands who now have a low-pay problem would have no pay at all after an increase in the minimum wage.

That was illustrated in 1956, last year of a substantial minimum wage raise. But that was during an expanding economy. Nevertheless, "significant" drops in employment were noted in the lower-paid industries, researchers said. And the Labor Department noted at the time that: "Had the minimum wage increase become effective during a period of recession, its adverse effects on employment might have been much greater."

On the face of the record, the new administration is not likely to put its talk about wage raises into action. In so doing it will recognize a fundamental of wages—that any increase in wages must be accompanied by a raise in production per worker. The question is as simple as that.

[From the Birmingham (Ala.) News, Feb. 18, 1961]

THE MINIMUM WAGE PUSH

A major Kennedy campaign pledge and current legislative aim is raising the minimum wage from $1 to $1.25 and extending coverage into areas of employment not now included under this Federal guarantee.

Labor Secretary Arthur Goldberg is pushing the Congress for speedy action but Representative ADAM CLAYTON POWELL, of Harlem, Labor and Education Committee chairman, has poured cold water on prospects for prompt attention. He's opposed to the Kennedy measure—but on grounds it doesn't go far enough, which is a typical enough reaction on his part.

This is not, with POWELL, so much principle as it is home folks legislative payoff. Many a Harlem voter would get dollars in the hand if POWELL could force an even higher minimum wage. He is unlikely to be able to do so. But meanwhile Powell pressure for a substantial increase won't hurt him with his constituents.

Kennedy and Goldberg are also coming under fire from the AFL–CIO. The labor organization doesn't think the Kennedy bill goes far enough either, nor does it project wage hikes fast enough. William F. Schnitzler put it bluntly that "what lies before you is not a bad bill. It is just not good enough."

Schnitzler has a whole string of arguments for boosting the minimum wage promptly. The Kennedy bill would fix a $1.15 base now, raising this 5 cents in each of the next 2 years. In arguing for more drastic action, the union executive sets up a series of statistics as to employees in certain job categories—retail trades people, hotel workers who don't get tips, restaurant employees and so on. Since the projected measure would cover only businesses which do a certain volume of business annually, $1 million, Schnitzler more or less poohpoohs any adverse effect the hike would make. His viewpoint is that only a relatively small number of such employers would be affected. The word to legislators is simple—it won't hurt many folks so why not just take the big plunge, and right now, all at once?

The trouble with that argument is that even though the figure $1 million seems so large as to suggest that whoever might be affected could "afford it," cost is cost, no matter what the volume of business. And costs in so many kinds of business enterprise have become such an acute problem that wholesale hikes which would result could send prices or service charges still higher.

The conservative, and in the News' view realistic, warning is that you cannot isolate costs in any such manner. Whenever added costs are forcibly injected into the economic picture on any substantial level, then inflation has been boosted. Further, costs are indeed so acute now that layoffs could result. This is certainly no time to be encouraging unemployment.

[From the Houston (Tex.) Chronicle, Aug. 17, 1960]

PROSPERITY CANNOT BE LEGISLATED BY HIKING MINIMUM WAGE RATE

A favorite measure for the Congress in both parties during an election year is the minimum wage bill. This is the device whereby Congress tells employers they must pay their workers at least a certain basic hourly rate plus overtime at a higher rate. Presumably it applies only to those employers engaged in interstate commerce, but because of the strain the Supreme Court has placed on interpretation of what is interstate commerce, this law has become almost universal in its application.

The present minimum wage law sets $1 an hour as the rate. This was reached over the years, gradually going up each time the Congress changed the law. Presently, Congress has proposals up for consideration which would hike this $1 an hour to $1.15 or to $1.25. The Democratic Party's bill calls for the higher rate plus removal of exemptions now allowed, which would affect an additional 5 million workers. The administration favors the lower figure and would embrace 1½ million additional employees.

It is important to keep in mind the fact that we cannot legislate economic welfare by such measures. There appears to be no ceiling at the rate the law is being changed.

The principal objection to all these laws regulating wages is that there is no corresponding increase in productivity with the increase in wages. Business or industry can pay any wage provided the worker produces in proportion to what he is paid. Labor too often overlooks this fact as, for example, when it opposes laws to end featherbedding. Labor would help its own cause if it were to work in closer cooperation with business on this point.

[From the Columbia (Tenn.) Herald, Feb. 11, 1961]

WAGE-HOUR HIKE POLITICAL PARADOX

Higher wages for everyone is desirable, but minimum wage boosting by the Government is an economic swindle rather than an economic panacea, according to the Chamber of Commerce of the United States.

The chamber points out that when the minimum wage was raised to $1 an hour in 1956, the economy was expanding. Even so, the Labor Department found the wage hike was followed by "significant declines in employment in most of the low-wage segments studied" and added: "Had the minimum wage increase become effective during a period of recession, its adverse effects on employment might have been much greater."

Today we are in a period of recession and here locally those industries which pay the lowest wages and which would be most affected by a mandatory hike, are the first to be hit by total unemployment. Yet the new Congress is being asked to raise the minimum wage to $1.25, as part of a recovery program, incongruous as that is.

Unemployment is expected to reach 6 million this year. This means that 6 million men and women will be unable to find jobs at $1 an hour in industries covered by the law. If Congress raises the minimum wage not only will the job opportunities of most of these people diminish, but additional thousands of workers will lose jobs.

Employers plagued with declining profits and rising costs are in no position to absorb both the cost of a higher minimum wage and the push it would give to wages right up the line.

One national retail chain has estimated that a $1.25 minimum wage would add $17 million to its wage costs—and would cause the firm to lay off up to 5,000 of its more than 20,000 employees, depending upon the extent to which the firm could increase prices to cover the added costs.

A smaller hotel chain, with 1,400 employees, estimates the legislation would raise its wage costs by $975,000—and would require layoffs of 150 employees.

The only alternative would be to pass the added wage costs along to consumers. It may have been more than coincidental, the national chamber says, that March 1956, effective date of the $1 minimum, also marked the beginning of a new upward trend in the Consumer Price Index, after nearly 4 years of virtually complete average stability.

A higher minimum wage would give low-cost foreign producers an additional price advantage in both foreign and domestic markets.

It is a political paradox that Congress, trying hard to solve our unemployment, depressed areas, and balance-of-payments problems, is asked to consider a minimum wage increase at the same time. In the best national interests, it would be far better for Congress to pursue policies that help business to pioneer the way to a new period of prosperity.

[From the Florence (S.C.) News, Feb. 11, 1961]

INCREASED UNEMPLOYMENT RESULTED FROM 1956 MINIMUM WAGE ACTION

The irony of the minimum wage law is that, aside from its humanitarian goals, it is becoming a prime cause of unemployment. No less an authority than the U.S. Labor Department studied the economic effects of the minimum wage after it was raised in 1956 from 75 cents to $1 an hour. The agency found "significant declines in employment in most of the low-wage industry segments studied." In the words of Nation's Business, "Employers cut their payrolls and replaced less efficient workers. They also installed more efficient machinery, changed product lines and raised production quotas."

Increasing wages by Government fiat simply means fewer jobs for marginal workers and increased wage costs all along the line in order to maintain wage differentials. And this is true even for businesses not directly covered by the law. To determine potential results of extending and increasing the minimum wage as proposed in the last Congress, Nation's Business queried firms in all parts of the country. These queries showed that a variety store chain operating in eight Southern States would be hit with a $360,000 a year increase in wage costs. It would have to fire 110 workers—the youngest and oldest women employees. A Louisiana druggist with 5 stores would have to discharge 50 of his 140 employees to stay in business. Some of them are teenagers; some elderly widows supplementing their social security checks with part-time work. A Cincinnati department store would have to lay off 90 employees, raise its prices 1 percent, eliminate overtime and no longer consider hiring unskilled persons older than 50. Multiply these instances by thousands and you get a pretty good idea of what overregulation can do. And in this instance it would almost certainly give another turn to the thumbscrews of inflation.

The most telling indictment against the Federal minimum wage in the minds of many critics is in the principle involved; namely, that of Government injecting itself as final judge and jury in the bargaining area between employer and employee.

[From the Somerset (Pa.) American, Feb. 20, 1961]

WAGES AND HOURS

It is rather significant that two measures in Congress have to do with the number of hours a wage earner puts in on his job and the compensation he, or she, shall get for his labors.

Congress got workers and wages into their labors several years ago, and some of those who profited by the legislation involved have been busy ever since persuading themselves and their friends that what was done then and since wasn't well done. A dollar an hour for a worker in industry, they hold, isn't high enough as a minimum.

When Somerset American came to Somerset it found that wages paid in three printing offices were low. While there were comparatively few persons dependent upon printing for employment, long hours and small wages resulted in dissatisfaction.

It wasn't necessary for Congress or the general assembly, to make laws to meet the situation. When a minimum wage law was passed, even the American had few names on its payroll that required much change.

But all was done by a mere word to the payroll bookkeeper. Higher wages were paid in Johnstown and other cities. The wage earners realized that the publisher paid all the traffic could stand. One after another, printers who had opportunity to get higher wages in larger communities took advantage of that which was offered.

Some went to Johnstown. Others found higher wages in Philadelphia and other eastern cities. More recently the shift has been to the Midwest.

Although there has been this siphoning of help trained in the American office, there are those who find it to be advantageous to become a part of the American staff. Some will remain indefinitely, while others feel that it is to their financial advantage to move on after they have become proficient in their work.

At the turn of the century, this writer managed a newspaper which was run by a relative. The wages paid in that shop were less than he could receive elsewhere. When he observed this difference (the wages he received and the wages which he might earn elsewhere) he weighed the facts in the case, and decided it would be better for him to remain where he was located at the time.

Then came this writer's change from employee to employer, from anxiety for payday to dread of having a payroll to meet and too little money to meet the payroll.

When this writer was employed on an Altoona newspaper, there were four daily newspapers in Altoona. Wages went higher and higher. One after another, three of the Altoona dailies folded up. They couldn't meet the expenses. Today, Altoona has one daily newspaper.

There have been plenty of other newspapers with similar experiences. There have been plenty of other producers who have learned the hard way that the law of supply and demand is working as industriously as ever.

Rising costs have been responsible for more than one newspaper being forced into consolidation or discontinuing publication. This is particularly true when competition is keen. Rising costs must be met by revenue, but the law of diminishing returns dictates that there is a limit in the amount the traffic will bear.

When this limit is reached, buyer resistance sets in, and the seller, whether he be a newspaper publisher or any other producer, discovers that he has priced his product out of the market.

[From the Denton (Tex.) Record-Chronicle, Jan. 31, 1961]

KENNEDY AGAIN CALLS FOR ECONOMIC ERROR

In his state of the Union message Monday, President Kennedy once more urged an increase in the minimum wage from the present $1 to $1.25 per hour.

Opposition to this hike is characterized as "heartless," and the impression is given by the measure's boosters that the opposition comes only from "greedy sweatshop owners."

There probably are still a few greedy sweatshop owners around, and nobody else is heartless enough to contend that a breadwinner can support his family on $40 a week these days. In fact, the average wage paid in industry today is more than twice the legal minimum.

Why do employers who pay for more than the minimum fight a measure which might presumably benefit them by forcing their competitors to raise wages?

The answer is that increases in the minimum will force wage increases all along the line. This in turn will increase inflationary pressure and make everything cost more. It will further hamper American sales of goods abroad, and increase sales of lower priced foreign products here. Many American workmen would lose their jobs in the process, while inflation would eat up the enforced wage increases.

Can we expect "labor statesmanship" to forgo increases in any but the minimum wages? It is unlikely.

Already one Chicago union, which deals with warehouse and mail order employes, is submitting a standard contract to employers which provides that if and when the minimum wage is increased by Congress, every employee's pay will be increased in proportion.

This would mean a 25-percent raise across the board for every union member. The minimum wage employee would go from $40 to $50 a week. But a $100-a-week man would get $125.

It is widely recognized by economists that many of our economic troubles, including high prices that workers must pay and unemployment that undermines their security, have come about because wages have risen too fast in the past.

A big new rise can only add to our troubles.

[From the Union (S.C.) Times, Feb. 28, 1961]

FACING TWO WAYS

President Kennedy's decision to set up an advisory committee to try to restrain wage-price inflation shows a dutiful concern for a longstanding problem. But that poor committee soon is going to run headlong into the boss' program, which if passed, will constitute a most powerful force for inflation in itself.

Prices we pay for goods must cover not only wages, materials and overhead; they must also cover taxes. If the producing companies are to survive, they must also include some profit; and if they are going to expand and hire more people, that profit must be large enough to justify and finance the expansion.

Yet, at a time when profits are low and offer no cushion, Mr. Kennedy is proposing the following:

New social security taxes which will add more than a billion dollars to costs.

Additional payroll taxes to finance unemployment compensation, to add more billions to costs.

An increase in the minimum wage that employers must pay, and pass on in prices. It must be remembered that minimum wage increases also cause a chain reaction of raises all the way up the ladder, "to maintain differentials" insisted upon by union and nonunion employees alike.

A package of programs which taken together will cost $5 to $6 billion, which must either result in still more taxes on business, or in large Federal deficits, which are inflationary in themselves.

Passage of the common situs picketing bill, which would increase unions' ability to force widespread higher wage increases through certain types of secondary boycotts now illegal.

In spite of all this flow of hard cash that employers must pay, the new committee is supposed to use "moral suasion" to keep prices from advancing.

The committee is not yet formed. No realists need apply.

[From the Little Falls (Minn.) Transcript, Feb. 28, 1961]

MINIMUM WAGE LEGISLATION NO CURE-ALL

Neither organized labor nor organized business is pleased with President Kennedy's proposals for increasing the minimum wage and broadening its application. The plan calls for an immediate increase from $1 to $1.15 an hour, followed by successive 5-cent increases annually until the proposed $1.25 figure is reached. Business thinks the hike to $1.15 is too big; labor thinks it is not big enough.

The fundamental battle lines—business against any increase in the minimum wage, and labor in favor of a substantial boost—have been drawn for some time. The labor leaders' dissatisfaction with the administration proposal alters the picture somewhat, but essentially the points at issue remain unchanged.

It is labor's contention that a good sized increase in the minimum should be placed in effect at once as a means of bolstering the economy by substantially adding to workers' purchasing power. Labor contends that this increased purchasing power would amount to well over a billion dollars if the minimum were boosted to $1.25 at once, and it sees a $600 million increase even if the figure goes up only to the $1.15 now proposed by the administration.

The Nation's principal spokesmen for business contend that, instead of bolstering the economy, an increase in the minimum wage level would have a dampening effect. Their claim is that such action would force business and industry to fire a large number of workers, and that this in turn would deepen the recession.

This issue may well turn out to be one of the most controversial before Congress in the current session. A hard-headed observation made on the issue came last week from George Hagedorn, research director of the National Association of Manufacturers. He said: "If the standard of living could be raised by placing legal floors under wage rates, then the backward nations of the world could have as high a standard of living as this country does, since they are as free as we are to take such action."

Those who clamor so loudly for curing all our ills with legislation should ponder the basic truth of this statement.—J.L.T.

[From the Longview (Tex.) Journal, Mar. 7, 1961]

ANOTHER SPIRAL?

Still fresh in the minds of American consumers are the wage-price spirals which accompanied inflation in the 1946–59 period. Is another such spiral in the making?

An editorial in Life magazine has this to say about the proposal to increase the Federal minimum wage and extend its coverage: "This is certainly not going to help the unemployed any. Some jobs just aren't worth more than $1 an hour and to make them illegal is to eliminate them."

The words of warning are blunt, but justified. The proposed extension of minimum wages and coverage would be primarily in the retail industry. This industry provides marginal employment for beginners, teenagers, part-time housewives, and others whose skills and productive worth is strictly limited. An out-of-line wage level would force elimination of as many of these jobs as possible in retailing.

It is difficult to square the minimum wage proposal with the President's urging that labor accept wage stabilization in order to help prevent more inflation at this dangerous time. An increase in the lowest wage means increases all along the line—the higher paid, skilled workers naturally demand that their differential in pay be maintained. Then the wage-price spiral is off to the races again.

[From the Mobile (Ala.) Register, Feb. 3, 1961]

IT STILL MAY NOT BE GOLD EVEN THOUGH IT GLITTERS

"We pledge to raise the minimum wage to $1.25 an hour," said the Democrats in convention at Los Angeles last year.

This, of course, was a clause in the platform put together for the Kennedy-Johnson ticket.

Now, in a followup, to the Los Angeles declaration of the Democratic national convention, President Kennedy has stated in a special economic message to Congress:

"I urge the Congress to raise the minimum wage immediately to $1.15 and to $1.25 within 2 years. This will improve the incomes, level of living, morale and efficiency of many of our lowest paid workers, and provide incentives for their more productive utilization."

If Congress should do what the President proposes, what would be its national economic effect?

Does this proposed new Federal intervention in wages give the country a guarantee that the goose would hang high economically, or would it be a stroke toward killing the goose that has laid the economic golden egg for this country?

In short, would the overall outcome be beneficial or detrimental?

Elements, fascinated by the doctrine of Federal utopianism, will not listen, but those in Congress and among the people who prefer down-to-earth economic reasoning will be attentive when Senator BARRY M. GOLDWATER, of Arizona, says:

"We cannot be against wage increases, per se. However, we must maintain a realistic position economically. When wage increases are not called for, to make them by Government fiat, in effect, works a hardship on the economic system and it works a hardship on the very people we are trying to help."

If this were an unsupported observation, the forces anxious to contradict it would be heartened, but Senator GOLDWATER has given it a wealth of commonsense support.

"It is simply an economic fact of life," he reminds, "that if we have an increase in cost it must be absorbed. The quickest way to absorb such an increase is to raise prices."

And:

"I think more and more working people in this country are recognizing that when the Government causes cost to go up in any way at all, the working people pay for it in higher living costs; that when they are paid unearned wage increases, those additional costs will have to be absorbed in price increases."

Senator GOLDWATER made the pertinent point, often overlooked or ignored, that artificially raising the minimum wage of the lowest paid workers sets off sort of a chain reaction in wage raising. These were his words:

"What happens if a person is getting $1 an hour and we raise that rate to $1.25? The associates of that worker in the same firm will have their wages increased, say, from $1.50 to $1.75, from $1.75 to $2, from $2 to $2.50. We have to do that in business. The same pay cannot be given to everybody, because there are different skills."

This adds up to a lot of higher wages at different levels to force up costs and prices in a new spurt of inflation. Who gets hit in a case of this kind is no mystery to people with their feet on the ground and their heads on their shoulders.

"We must maintain a reasonable balance between minimum wages and employment possibilities," Senator GOLDWATER has counseled.

Why that?

Listen to Mr. GOLDWATER again:

"If American businesses do not make some money, they go out of business; and if too many of them go out of business, the economic system gets into trouble."

When a business folds up, somebody's job disappears.

Another thing: Inflationary wage-raising that creates higher operating costs and results in higher prices makes it still harder for American business to compete with the low-cost imports which have become a source of growing worry for both industry and labor.

Here again is a possibility of businesses folding up and jobs disappearing if wages are raised to a point of making profitable operation in competition with imports simply out of the question.

As early as the 17th century, John Dryden realized that not all that glitters is gold.

Centuries later, some Americans are so reluctant to recognize that fact in its national economic application that they refuse to concede that what looks like a benefit in higher wages can become a liability in the double-barreled form of higher living costs and loss of jobs.

[From the Logan (W. Va.) Banner, Feb. 16, 1961]

WAGES RELATED TO JOBS

Economists estimate unemployment this winter at well over 5 million and predict that Government will take quick action to aid depressed areas. Immediate steps may include more job insurance, more public works and other measures to alleviate what is felt to be the growing problem of joblessness. What many do not seem to realize is that Government itself can create unemployment as a result of overregulation of our free market economic system.

The January issue of Nation's Business presents a telling case against impending proposals to raise the minimum wage and extend coverage of the Fair Labor Standards Act. This act was conceived with the best of humanitarian intentions toward those who toil in the factories. Its purpose was to eliminate from industries and interstate commerce labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency, and general well-being of the workers. It did not apply to local pursuits and services which no Federal legislation can effectively cover. Thus, for example, executives, professionals, local retailing employees and outside salesmen are exempt as well as employees in agriculture, fishing, and logging industries and taxicab work.

As with most Government activities the wage-hour law had an innocuous beginning. In 1938 the minimum wage was set at 25 cents an hour, raised to 40 cents in 1945 and 75 cents in 1949. In 1956, it was set at $1. In 1960 both Houses of Congress had bills under consideration that would have boosted the minimum wage to $1.25 and extended coverage to a point that legislators felt would actually result in Federal coverage for all employees of all businesses. Congress adjourned without making changes.

The irony of the minimum wage law is that, aside from its humanitarian goals, it is becoming a prime cause of unemployment. No less an authority than the U.S. Labor Department studied the economic effects of the minimum wage after it was raised in 1956 from 75 cents to $1 an hour. The agency found "significant declines in employment in most of the low-wage industry segments studied." In the words of Nation's Business, "Employers cut their payrolls and replaced less efficient workers. They also installed more efficient machinery, changed product lines and raised production quotas."

Increasing wages by Government flat simply means fewer jobs for marginal workers and increased wage costs all along the line in order to maintain wage differentials. And this is true even for businesses not directly covered by the law. To determine potential results of extending and increasing the minimum wage as proposed in the last Congress, Nation's Business queried firms in all parts of the country. These queries showed that a variety store chain operating in eight Southern States would be hit with a $360,000 a year increase in wage costs. It would have to fire 110 workers—the youngest and oldest women employees. A Louisiana druggist with 5 stores would have to discharge 50 of his 140 employees to stay in business. Some of them are teenagers; some elderly widows supplementing their social security checks with part-time work. A Cincinnati department store would have to lay off 90 employees, raise its prices 1 percent, eliminate overtime and no longer consider hiring unskilled persons older than 50. Multiply these instances by thousands and you get a pretty good idea of what overregulation can do. And in this instance it would almost certainly give another turn to the thumbscrews of inflation.

The most telling indictment against the Federal minimum wage in the minds of many critics is in the principle involved, namely—that of Government injecting itself as final judge and jury in the bargaining area between employer and employee.

[From the Chicago Sun-Times, Mar. 5, 1961]

HERE WE GO AGAIN

It is sometimes said there is nothing new under the sun. While hardly applying to many of the outstanding innovations of the jet age, this surely does apply to the battle over minimum wage legislation now crystalizing in Congress.

In prospect shortly is exactly the same struggle over exactly the same issues as that waged in the rump session last year after the national conventions.

And for President Kennedy, the outcome may well be the same.

Congressional Quarterly, a nonpartisan Washington research service, recently surveyed potential support in the House for several of the Kennedy administration's key welfare programs. Its report:

"Unless the President can elicit some vote switches the study indicates, his minimum wage, depressed area and education bills are likely to be defeated."

Chairman J. WILLIAM FULBRIGHT of the Senate Foreign Relations Committee, one of the most influential members of the President's own party, has counseled against passage of any minimum wage legislation until the Nation's economic picture clears.

Similar advice has been offered by economists and leaders of the business community. They warn that a boost in the wage minimum now, in a period of recession, cannot fail to force marginal enterprises out of business and low-scale, marginal workers out of their jobs.

Postponing action on this matter until the economy shows signs of recovery, thus is better able to bear the burden, strikes us as reasonable and sound.

But the reality is the President has called upon Congress to pass the legislation now. He has submitted a bill substantially the same as that which failed last time after passing the Senate.

House Republicans have served notice they will introduce the same bill which also failed last year after passing the House.

Differences between the two measures are in scope. The administration would raise the minimum to $1.25 in 3 yearly steps, and extend coverage to 4,100,000 who would reach $1.25 after the 4th year.

The bill to be introduced in the House by the GOP, calls for a raise to $1.15 with coverage of about 700,000 new workers.

All sides in the controversy should bear in mind that both bills would provide a raise to $1.15 now. The administration simply goes further. It would make increases mandatory to $1.20 next year and $1.25 in 1963. The GOP bill would leave to future Congresses to adjust the rate according to conditions that develop in the future.

Strangely, this also was the situation in the last Congress. President Kennedy, then Senator Kennedy, could have secured a boost to $1.15, which would now be in effect, had he been willing to accept the House-approved bill.

But the Senator was running for President. Failure of any legislation to materialize gave him a prime campaign issue. He insisted on $1.25.

The result was no legislation at all.

If Mr. Kennedy keeps on insisting on $1.25, with prospects as dim in the House as reported by Congressional Quarterly, he may again get no increase.

And according to such leaders of his own party as Senator FULBRIGHT this might be the best solution after all.

[From the High Point (N.C.) Enterprise, Feb. 8, 1961]

KENNEDY'S MINIMUM WAGE PROPOSAL COULD BACKFIRE

In choosing to champion a minimum pay boost in a three-step level to $1.25 an hour—with coverage extended to 4.3 million additional workers, President Kennedy's administration chooses the ground for its next testing of strength in the Congress.

Not since 1938, when the Fair Labor Standards Act was the occasion of such a fight, has there been a similar issue on which there is so much general agreement with the purposes and at the same time disagreement over methods of attainment.

It draws sharp lines for rematching in Congress of an issue defeated last year when Mr. Kennedy, as Senator, backed substantially the same proposition he now advocates as President.

Desirable as higher wages are, they have to be measured in effect. And a recession is hardly time for tampering with wages.

Yale Brozen, a leading economist at the University of Chicago, is one who thoughtfully wonders if changing the wage floor at this time might not do more harm than good. "You've already got unemployment and depressed areas," he says. "Why make both worse? Every time the minimum wage has been increased, unemployment of the unskilled, those covered by the increase, has increased."

But the U.S. Labor Department, examining effects of the 1956 increase, reports that only 62,000 workers in 15 low-wage industries were laid off by impact of the $1-an-hour minimum wage. Obviously, there are arguments both ways as to immediate effect; but inflationary pressures thus generated are undeniable.

By coupling antirecessionary measures with his minimum-wage proposals, President Kennedy may have given the latter the Achilles' heel that will impede where he had hoped to facilitate congressional approval.

Raising the wage floor as a means of combating recession stirs more political motives than humanitarian. If Kennedy can surmount this one, it will be a powerful straw-in-the-wind for the present but could arise to rebuke later by extending a recession which needs to be overcome as promptly as possible.

[From the Chelsea (Mass.) Record, Feb. 24, 1961]

WHY BE A PIKER?

Raising wages by fiat got its start back in the 1930's when there was some conceivable depression need of minimum standards. The rate, which continued in effect until after World War II was 40 cents an hour.

There is less to be said, however, for the current proposal to hoist the Federal figure to $1.25 per hour from the present $1 per hour. Its stated aim is to do away with an underpaid class by adding 25 cents per hour to minimum pay.

This theoretically would stuff more spending money into consumer pockets and set off a prosperity rocket into the wild blue yonder. Some practical considerations are ignored, one of which is that employers generally are in a cost-cutting phase. The principal cost for most of them is wages.

Instead of touching off a boom, it would be more likely to end in a job reduction trend, particularly in the retail field. Wages are fixed in the final analysis by the state of the general economy and the profit sheets of employers.

And, as the Wall Street Journal says, if there is anything to ordering wages by law, why be a piker? If $1.25 an hour is good for the country, why wouldn't $2 an hour be much better?

[From the Natchez (Miss.) Times, Feb. 27, 1961]

MINIMUM WAGE HIKE UNWISE

Can America become more prosperous by raising the minimum wage level, as some politicians are contending? Unfortunately, it can't, George Hagedorn, research director of the National Association of Manufacturers, told the House Special Subcommittee on Labor this week.

If, he said, the standard of living could be raised "by placing legal floors under wage rates, then the backward nations of the world could have as high a standard of living as this country does, since they are as free as we are to take such action."

What increasing the minimum wage, and bringing more people under minimum wage provisions, would do, Mr. Hagedorn warns, would be to deprive a lot of people of jobs they now hold or could get.

Common laborers, the figures show, have an unemployment rate twice that of the work force as a whole. Young people under 25 are suffering almost three times as much unemployment as any other age group. And while those over 65 have the smallest rate of unemployment, they have more long-term unemployment than any other group.

The problem is least serious among highly trained workers and those in their peak earning years.

A rise in the minimum wage—the wage paid to the least skilled, the young in their first jobs and the old as they shift to less demanding work—will reduce employment opportunities for the groups that already are having the hardest time, Mr. Hagedorn points out. Raising the price never creates more demand for goods or services.

The economist also demolished the notion that the sluggishness of the economy is due to a lack of purchasing power that can be remedied by a minimum wage increase.

Purchasing power was higher in 1960 than in any previous year in history. Purchasing power was increasing while unemployment was growing in 1954, too.

So, here's a proposal that can do great damage to those it presumes to help.

Mr. Hagedorn points out that even Secretary of Labor Goldberg doesn't claim the raise would increase employment substantially.

The last hike did increase unemployment, the Labor Department found. This is no time to make the same mistake again.

[From the Utica (N.Y.) Press, Feb. 21, 1961]

MINIMUM WAGE ISSUE

One of the sharpest fights of the 87th Congress will center around the minimum wage proposal, a measure that may sorely test administration strength ere it is disposed of.

The Kennedy administration is committed to this legislation, which was one of the President's campaign keystones, but now even some segments of organized labor have come out against parts of it.

The law now calls for $1 per hour. Kennedy wants an immediate raise to $1.15, and further raises in the next 2 years.

On the surface, this is the type of bill anyone could be for. In a nation so rich how could anyone oppose paying $1.15 per hour? In principle, possibly no one is opposed to doing so, but closer examination reveals the shortcomings of such legislation.

If this bill becomes law many small businesses, now operating on small profit margins, may be forced to close. Make an owner pay this increase, even if he has only a few workers, and his overhead goes up that much. To stay afloat he may have to discharge workers.

It is true that the immediate effect of such a bill is to put more money into circulation, but some economists argue that this means nothing unless there is a corresponding increase in the production of goods. Where would there be such a goods increase here?

Many States already have laws calling for higher minimum wages for various types of work. Some are based on the theory that a garage employee, for example, is worth more than a laundryworker. If such a law is enacted and a lesser skilled worker is brought up to the level of a higher skilled worker in the same plant, the latter, naturally is going to want a raise also, if for no other reason than to keep him ahead of a man with lesser skills.

A basic argument against any sort of Federal wage legislation lies in the States rights principle. States are far better able to perform this wage function (and many others) for its own residents than the Central Government.

In a word, passage of this bill will directly benefit those underpaid workers who are working, but what about those who may lose their jobs because of it? The Kennedy administration cannot afford to add to the unemployment load, even to keep a campaign pledge.

[From the Beckley (W. Va.) Post-Herald, Feb. 9, 1961]

ONE DOLLAR AND TWENTY-FIVE CENT PER HOUR MINIMUM WAGE IS NOT THE ANSWER

Right off, we can't get very excited about President Kennedy's $1.25 an hour minimum wage request. We can't really see what good it's going to do for men who can't find remunerative work.

And it just seems possible that it may do some harm. If it gives a boost to the general wage spiral, it will certainly have that effect. All of our difficulties in international trade and adverse balance of payments stem from the fact that wages in relation to production are too high rather than too low.

We are not able to compete under our present $1 hourly minimum with the products of foreign countries where wages are considerably lower. Not only do we lose out in competition for foreign markets, we also lose out at home where some foreign products can be marketed, even after meeting tariff payments, at prices below those which American industry must charge to stay in business. (We hope and trust that the price-fixing agreements in the electrical industry are the exception rather than the rule. If they are not, foreign competitors ought to find a ready market.)

Higher tariffs ought to be examined pretty carefully before they are resorted to, lest they be "protection" for the very kind of thing that the electrical industry was engaging in, and for which 29 companies and 44 of their executives were fined a total of nearly $2 million in a Federal court in Philadelphia this week.

The fact is that wage rises can price us out of the markets we now have. The Beckley area should be particularly aware of this. The market for coal has steadily dwindled in spite of low coal prices because of lower costs for foreign residual oil. And jobs have dwindled even more because of higher mining wages.

Wage rises that are arbitrary and have no relation to production efficiency are a curse to the worker. He may not realize it, but his increase in wages is usually eaten up by inflation, and there are people all around the world who will do a given job for a much smaller share of the world's goods. There is sometimes a considerable timelag before the effect is fully felt.

This factor causes emigration of American industry and exportation of jobs. Loud huzzas about the Kennedy proposal should be held to a minimum. It's awfully silly to cheer the high wages that may soon render one unemployed.

Ask the unemployed miners.

In time this idea is going to sink in. But how long, oh Lord, how long?

[From the Sandusky (Ohio) Register, Feb. 9, 1961]

THE BASIC CAUSE

Unemployment and distressed areas are the result of organized labor demands for increased Federal spending, higher minimum wages and more power to manipulate prices and wages, the leader of the Nation's largest farm organization, the American Farm Bureau, declares in the February issue of Nations' Agriculture. Charles B. Shuman, bureau president, describes the national economic climate as temperamental, alternately threatened by disastrous inflation or sudden recession.

The basis for any wage is the productivity of the worker, Shuman contends. When the minimum wage was increased to $1 an hour, many hundreds of thousands of young, inexperienced and unskilled workers were legislated out of work. The proposed $1.25 minimum will beget more unemployment. The only way to raise wages and reduce unem-

ployment is through increased production per worker, greater efficiency, and adequate capital investment.

[From the Norfolk (Va.) Ledger-Dispatch, Feb. 20, 1961]

THE MINIMUM WAGE MIRAGE

In the effort to snap the country out of the business slump by force-feeding dollars into the economy, the administration is pinning considerable—but possibly in our view vain—hope on an infusion via the minimum wage route.

President Kennedy, having failed last summer when he led a fight in the Senate for a $1.25 hourly minimum, is now supporting an increase to that figure over a 3-year span. The first jump would be from the present $1 to $1.15, with two 5-cent increases to follow. There would be a $1 minimum for some 4.2 million newly-covered workers, with no overtime pay for the first year; there would be overtime beyond 44 hours a week in the second year, 42 hours in the third year and 40 hours thereafter.

Organized labor seeks even more drastic action. The AFL–CIO is urging an immediate 44-hour week for the new workers and an immediate leap to the full $1.25. A spokesman for the big union contends that this will produce $1.2 billion in additional buying power, instead of the $600 million of the Kennedy plan.

Actually, both figures are open to serious question. Assuming that the mere passage of the law would produce the extra wage payments to the predicted extent, this money would not automatically become an addition to consumer buying power.

The various affected firms would have to take the money from somewhere else in their operations, and this in large part would be a subtraction from buying power. Moreover, where maintenance of wage differentials would force changes for higher paid workers, there would have to be further expense adjustments within each company—or a boost in income through higher prices. Spread this process over the country and it would spell a strong new surge of inflation, robbing the new wages of most of their meaning.

Moreover, because of the timing of the minimum wage drive, one of the chief arguments against a change becomes even more potent. This has to do with the reduction in employment which higher minimums could bring about. If an employer is determined to hold his wage costs down—as he would be in lean times—and is forced to raise the wage rate, then one of the first possibilities he is bound to consider is equalizing the payroll by leaving somebody off.

And in many cases it's our guess that "somebody" would be the man who held a job at, say, $40 a week and lost it. Simple arithmetic shows he's not $10 better off for the increase, but $40 worse off. A minimum wage hike wouldn't make much sense to him.

Maybe an argument can be made for lifting the wage floor in prosperous times—though even then a hike that would be virtually unnoticeable in one place could put another less prosperous community out of kilter.

But when the economy has slipped, it doesn't make any sense at all to take a step that could put marginal businesses in jeopardy, raise the cost of living and threaten new additions to the rolls of the unemployed.

[From the Chicago Daily News, Feb. 23, 1961]

HIGHER MINIMUM WAGE COULD HANDICAP RECOVERY

Among the antirecession measures which President Kennedy has asked Congress to expedite is one raising the legal minimum wage, in steps, from the present $1 an hour to $1.25. Labor Secretary Goldberg says this would give the 1,665,000 workers affected an additional $889 million in annual earnings.

This is another case of the recession's being used as a whip to advance a long-time objective in the hope that the "Wolf!" cry will bring about a less searching examination than normal.

What it ignores is that in our economy one man's wages are another man's costs.

To the average worker, whose income is far above the proposed minimum, it seems quite reasonable to require that one be paid less. He is unaware of the number of marginal companies for whom the $1.25 minimum might mean such a profitless operation as to force them out of business, with resulting unemployment.

Our society can, if it wishes, take the position that anybody whose skills are insufficient to earn him $1.25 an hour should earn nothing, and be supported by the community. But Congress should certainly take a long look before deciding that such a policy is desirable either for the individual or for society.

The American Retail Federation made a case study of the probable effects of the $1.25 minimum wage in the retail-service industries in the small town of Hagerstown, Md. The proposal is that employees of all concerns with an annual volume of $1 million would be covered by the law. Eighteen of the twenty-five retail stores in Hagerstown would thus be affected.

It was found that the average starting minimum wage in the covered stores was 93 cents an hour, and in the exempt establishments, 83 cents an hour. Clearly, if the one group must give 42 percent wage increases, the shift in the competitive situation is one to threaten both jobs and prices.

The legal minimum wage was jumped from 40 cents to 75 cents in 1950, a much more drastic spread than is now proposed. The impact on business was reduced by the production demands and inflation occasioned by the Korean war. Each increase, however, has been accompanied by reports of jobs eliminated and shifts to part-time work.

Nobody opposes a rising standard of living for all workers. There is general agreement with the declared purpose of minimum wage laws: "To eliminate conditions detrimental to health, etc."

But a further goal is to do this without substantially curtailing employment or earning power. Congress is being urged now to take a giant step which, it can be demonstrated, will cost jobs. That is completely at cross purposes with the goal of putting more wages in the pockets of workers.

[From the Johnson City (Tenn.) Press-Chronicle]

THIS COMMITTEE WILL HAVE TROUBLE

President Kennedy's decision to set up an advisory committee to try to restrain wage-price inflation shows a dutiful concern for a long-standing problem. But that committee soon is going to run headlong into programs, which, if passed, may themselves constitute powerful forces for inflation.

Prices we pay for goods must cover not only wages, materials, and overhead; they must also cover taxes. If the producing companies are to survive, they must also include some profit; and if companies are going to expand and hire more people, that profit must be large enough to justify and finance the expansion.

Yet, at a time when profits are low and offer no cushion, the new administration is proposing the following:

New social security taxes which will add more than a billion dollars to costs.

Additional payroll taxes to finance unemployment compensation, to add more billions to costs.

An increase in the minimum wage that employers must pay—and pass on in prices. It must be remembered that minimum wage increases are likely to cause a chain reaction of raises all the way up the ladder, to maintain differentials insisted upon by union and nonunion employees alike.

A package of miscellaneous welfare programs which, taken together, will cost $5 to $6 billion, which must either result in still more taxes on business, or in large Federal deficits. Deficits are inflationary in themselves.

In spite of all this flow of hard cash that employers must pay, the new committee is supposed to use moral suasion to keep prices from advancing.

[From the Conroe (Tex.) Courier, Feb. 1, 1961]

LIKE WEEDS IN THE SPRING

There are certain hardy political perennials which appear as surely and as regularly as the weeds in the spring.

The proposal to extend the coverage of the Federal wage-hour law, as well as the proposal to increase the legal minimum wage, is one of these. It is brought forward in every congressional session, and the next will be no exception.

The exempt workers—and they have been exempt ever since the law came into being—are in certain local service industries, of which retailing is the most important. It is significant that a highly organized effort was made to extend coverage to them during the last congressional session—and that, after extensive deliberation, the plan was shelved. And the reason for that, according to observers, was a strong tide of grass-roots opposition.

This opposition, to say the obvious, didn't arise because people are opposed to higher wages for anyone. It did arise for a number of sound reasons. One is that the proposal would set off a whole new wave of wage increases—which means a whole new wave of inflation. Another is that if we need legislation affecting local businesses, which must compete at the local level even if they are part of national chains, it should be applied by State and local action. A third is that retailing, like other service trades, offers unusual employment opportunities for unskilled, marginal, teenage, part-time, and other workers whose value to the employer is severely limited. An arbitrarily high wage would cause wide unemployment among these groups. And a fourth is that no more Federal fingers are wanted in local affairs.

The last Congress, like its predecessors, set a sound precedent in this.

[From the Orlando (Fla.) Sentinel, Feb. 26, 1961]

A WAY TO INCREASE UNEMPLOYMENT

Most citizens who have heard about President Kennedy's bill to increase the minimum wage by 25 cents an hour regard it in one of two ways:

1. Most employees make more than $1.25 an hour already, they believe, so what would be the harm?

2. How could a quarter an hour possibly make any difference to an employer?

Nation's Business has analyzed the effects of the President's proposal to increase the minimum wage and extend coverage of the wage-hour law to retail and service trades. It finds such legislation would:

Force Mitchell & Co., a Haverhill, Mass., department store, to fire 35 employees, mainly elderly workers.

Drive up the wage costs of S. & S. Cafeterias of Macon, Ga., by $600,000 a year.

Make the Plymouth Laundry of Chattanooga, Tenn. boost its prices by about 40 percent to avoid layoffs.

Wipe out the narrow 1 percent annual sales profit of Bridgers Lumber and Building Material Co., of Tuscaloosa, Ala., or compel that company to discharge one-third of its work force and raise its prices by 5 percent.

You can compare what would happen in Haverhill, Macon, or Chattanooga with what would happen here in Orlando, or in Jacksonville, Tampa, or any other city of the Nation if the minimum wage is raised.

Employers, already harassed by high labor costs, high cost of raw materials, high wholesale prices, and restrictive taxes, cannot afford to grant wage raises without a comparable increase in productivity or efficiency.

If overhead goes up they can do one of two things: Reduce the number of employees, or raise the prices of their goods and services.

A variety store chain operating in Florida and seven other Southern States says it would be hit with a $360,000 a year increase in wage costs. It would have to fire 110 workers—the youngest and oldest women employees.

A Louisiana druggist with 5 stores would have to discharge 50 of his 140 employees. A Cincinnati department store would have to lay off 90 employees, raise its prices 1 percent, eliminate overtime, and no longer consider hiring unskilled workers older than 50.

A southern laundry and drycleaning plant says it would have to let some employees go, raise prices about 10 percent.

The operator of an automobile parts chain says his retail wage costs, now nearly 15 percent of annual sales, would rise to 23 percent and net profit would drop below zero.

Traditionally, the minimum wage, passed in 1938 during the administration of Franklin D. Roosevelt, has been applied to workers in interstate commerce.

The idea of President Kennedy is to extend the wage-hour law to local businesses. It appears now as though most U.S. workers would be covered by the proposed legislation.

President Kennedy wants a bill to raise the minimum wage in two steps, first to $1.15 an hour, then to $1.25. This would mean $50 for a 40-hour week.

The effect on retailing and service businesses would be severe enough if only the $1-an-hour workers were affected, but all workers would want comparable increases.

The need for wage and salary differentials throughout an organization and throughout the economy would force all salaries upward.

(The Communications Workers of America have already told Congress that a new Federal minimum would make it easier to negotiate higher wages).

Some union contracts in the garment industry provide that the contract minimum shall be raised automatically if the Federal minimum is raised—to maintain wage differentials in the contract.

Business leaders say one of the first effects of an increase in the minimum wage would be to cause many businesses to shrink their operations.

At a time when low wage costs abroad enable foreign competitors to undersell domestic producers, a forced increase in the U.S. wage structure would further handicap many U.S. businesses.

Teenagers and older men and women are the backbone of the employee force in many retailing and service establishments. Many marginal workers find their only source of employment here.

They would be among the first to be laid off if businesses could not meet the increased labor cost. When the minimum wage was raised from 75 cents to $1 an hour in 1956, the U.S. Labor Department found significant declines in employment in most of the low-wage industry segments studied.

Employers cut their payrolls and replaced less efficient workers. They installed more efficient machinery, changed product lines and raised production quotas. Some also raised their prices.

This is another almost inescapable effect of raising the minimum wage: Inflation. It will quickly neutralize any benefit workers obtain from the 25 cents hourly pay boost.

Congress should give serious thought to these matters before it rushes ahead with a new minimum wage bill which is almost certain to create more unemployment, higher prices and inflation.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

Mr. ELLENDER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ELLENDER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEED GRAINS PROGRAM, 1961—CONFERENCE REPORT

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special program for feed grains for 1961.

Mr. ELLENDER. Mr. President, I yield myself 10 minutes.

After three sessions of the Senate conferees with the House conferees, the conference report I am about to submit was agreed upon. As I view the report, I am glad to say that there was no fundamental change in the bill as presented to the Senate for consideration a few days ago. Section 3, which was the subject of much discussion, was retained in the conference report, but only the word and figure "section 3." As I view the report, the language of the Senate bill was more or less adopted.

It is true that under the compromise made by the Senate and House, Secretary of Agriculture Freeman will have more grain to handle, probably, than he would have had under the Senate bill. But the fact remains that the feed trade will know in advance the amount of corn and other feed grains which can be disposed of by the Secretary during a certain period after the program is made effective.

The principal difference between the House bill and the Senate amendment was the provision contained in section 3 of the House bill. That provision would have authorized the Commodity Credit Corporation to sell in the market unlimited quantities of corn or grain sorghums for as low as 83 percent of the current support price.

It will be recalled that the proposal submitted by the President, as well as by the Secretary of Agriculture, imposed no limitation at all. The House did not impose a limitation on the quantity that could be disposed of, but the House put a floor of 83 percent of the support price below which the grain could not be sold. The Senate version did not contain such a provision, but limited the disposal of grain under the bill to that which is to be paid in kind to the farmer for performing his part of the contract. The conference substitute follows the Senate version and no provision for the sale of any grain is included in the conference substitute. The minimum price at which the Commodity Credit Corporation will be able to sell corn and grain sorghums will continue to be governed by the existing law, section 407 of the Agricultural Act of 1949. Subject to the exceptions specified in section 407, the minimum resale price will be 105 percent of the current support price plus reasonable carrying charges.

Mr. SYMINGTON. Mr. President, will the Senator from Louisiana yield?

Mr. ELLENDER. I yield.

Mr. SYMINGTON. Is the Secretary of Agriculture permitted to sell grain, under any circumstances, below 105 percent?

Mr. ELLENDER. Yes, under section 407 of the Agricultural Act of 1949 there are certain exceptions, for example, if it is spoiled or is grain which must be sold because it is about to deteriorate. But under the general rule provided by section 407 he can sell CCC grain for domestic use and without reservation only at 105 percent of the support price. In this case, under the bill the support price will be $1.20. That is the support price which will be established. This means that before the Secretary could sell a bushel of grain, he would have to receive a price of 105 percent of $1.20, plus carrying charges.

Mr. SYMINGTON. Is the Senator from Louisiana satisfied that under those circumstances the Secretary of Agriculture can do what is necessary to reduce the inventory of feed grains under the present law?

Mr. ELLENDER. My hope is that the corngrowers—in fact, the feedgrain growers—will take heed of the new program and will try to participate in it. I am satisfied that if they do, and if we get as much as 70-percent participation, there will be from 500 million to as much as 700 million fewer bushels of feed grains produced than was the case last year. That would put the program almost in balance.

In order to attain that objective, the bill provides that for every acre which the farmer agrees to take out of cultivation—that is, within the 20-percent reduction which is obligatory and the additional 20 percent which is optional—he will be paid for not planting the acreage.

Mr. SYMINGTON. What will he be paid in the first case?

Mr. ELLENDER. In the first case, he will be paid in cash; or, under the present compromise——

Mr. SYMINGTON. In kind?

Mr. ELLENDER. Yes—in the second case, he can be paid only in kind. That is for the second 20 percent, which is not obligatory.

Mr. SYMINGTON. What is the percentage in the first case?

Mr. ELLENDER. Fifty percent. Payment will be based on 50 percent of what might have been produced on the diverted acreage.

Mr. SYMINGTON. And in the second case?

Mr. ELLENDER. Sixty percent.

Mr. SYMINGTON. In section III, is there an incentive at the beginning to have the grain grower take part in the program?

Mr. ELLENDER. I think so. Payments in kind may be at such a level as to more or less force the grain grower to enter the program.

Mr. SYMINGTON. I have asked the Senator these questions because I very highly respect his opinion in this field, as he well knows. Does he believe that the farmer will be inclined to enter into the program, or would the farmer be inclined to grow as much as he could and take his chances on the market price?

Mr. ELLENDER. It is my considered judgment that the farmer will go into the program because of the incentives which are provided in the bill.

The farmer will be able to take between 20 and 40 percent of his corn and sorghum acreage out of cultivation and be paid for not planting. It is something I do not like too well; still, it is necessary to do that in order to save the Government this year from an overproduction of corn and other feed grains, which would thereby increase the storage charges. It is estimated that if the bill becomes law and 70 percent participation is secured, the taxpayers will save between $450 million and $500 million.

Mr. SYMINGTON. I thank the able chairman.

Mr. CARLSON. Mr. President, will the distinguished Senator from Louisiana yield?

Mr. ELLENDER. I yield.

Mr. CARLSON. The distinguished Senator from Louisiana just made a response to the Senator from Missouri which I am pleased he made. However, as I read the report, I get a different impression of the situation. I am sure that the Senator's view is correct, but I should like to go into it a little further. As I read the report and the language of the bill, the Secretary would be permitted to make payments in kind, that is, in grain from the Commodity Credit Corporation without regard to the 105 percent plus carrying charges.

Mr. ELLENDER. That is correct—only the amount that is paid in kind for participation in the program; that is all.

Mr. CARLSON. That is true.

Mr. ELLENDER. That was really the provision contained in the Senate version of the bill, as the Senator will recall.

Mr. CARLSON. But following that through, the only grain the Secretary can move onto the open market, out of the Commodity Credit Corporation stocks, without regard to the 105 percent of current support limitation, will be the amount paid for not planting the acreage diverted under the bill. Is that correct?

Mr. ELLENDER. That is correct.

Mr. CARLSON. I think the Senator's statement is very helpful.

I sincerely hope that the purpose of the program is to raise the income of the farmers and the income of the Nation; and I trust in the good faith of the Secretary, so that he will not put grain on the market in order to force the prices so low that the income of the farmers will be further reduced.

Mr. ELLENDER. I do not believe the Secretary intends to force prices down; I trust him, and I believe that he will not do that.

But I did not much blame the grain trade for being disturbed when we called this a voluntary program, at its inception, and then provided, as the House bill did, that the Secretary shall have the right to sell as much grain as he may desire, and thereby cause the market to go down and down, in an effort to force farmers to go into the program.

Mr. CARLSON. I assure the Senator that I have been greatly disturbed about that, too.

Mr. ELLENDER. In fact, I think everyone was concerned about it. But I assure the Senator that, in principle, the conference report follows the Senate version of the bill. The only difference is that, in my judgment, it is possible that more certificates will be available for redemption, because of the fact that payments in kind can be made on the first 20 percent reduction as well as on the second 20 percent.

The Senator will recall that the Senate version of the bill required a 30-percent cut in acreage, half of which was to be paid for in kind, and the other half in cash.

Mr. CARLSON. I should like to state that I had hoped that the first 20 percent in acreage reduction would be paid for in cash, not cash and payment in kind, because I think that will be the test for obtaining compliance.

It is my opinion that we shall not obtain a great deal of compliance, in view of the way this measure is now written. But we shall have to test it out.

Mr. ELLENDER. I hope the corngrowers will comply, because, as I have indicated here, that will show whether they want a program in the future. I for one do not feel that grain producers should receive price supports for unlimited production, with the result that the Government has to buy and store excess production at great cost. So I am very hopeful that they will conform to the new approach that is set forth here.

Mr. HRUSKA. Mr. President, on this point will the Senator from Louisiana yield?

Mr. ELLENDER. I yield.

Mr. HRUSKA. In regard to the power of sale that the Secretary will have—the power, in effect, to sell enough commodities to liquidate the certificates——

The PRESIDING OFFICER. The 10 minutes the Senator from Louisiana has yielded to himself have expired.

Mr. ELLENDER. Mr. President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for an additional 5 minutes.

Mr. HRUSKA. Many are concerned about the impact the power thereunder might have on the 1960 crop of corn. We know that until May 31 of this year the farmer has the right to put his feed grains under the price-support program and to get his loan. Can the Senator from Louisiana enlighten us on what impact the Secretary's power of sale will have—potentially or otherwise—on the sale of the 1960 crop of feed grains?

Mr. ELLENDER. I do not believe the redemption provision will have much impact. As I stated a while ago, the farmers do take a cut in acreage and do cooperate in order to reduce the surplus that is dangling over the market; and I do not believe there will be much manipulation of the market, because—I repeat—the grain trade will know, before the corn is planted—in other words, at the time of planting—almost to the bushel the amount that will be available for sale under the certificates that will be issued for compliance. In other words, the Secretary of Agriculture cannot wait until the end of the season to decide how much will be paid in cash or how much will be paid in kind. That decision will have to be made when the contracts are entered into between the growers and the Secretary of Agriculture.

Mr. HRUSKA. But will the certificates find their way into the hands of the Secretary of Agriculture before May 31, so that he will be able to sell stocks from the Commodity Credit Corporation inventories, and thereby depress the market on the 1960 crop? That is the question.

Mr. ELLENDER. I understand that. But the Senate had that provision in its version of the bill, and the House adopted that provision—which gives the Secretary the right to act, more or less as an agent for the holder of that certificate, in representing him, to dispose of it. But I want to impress on the Senator that the grain trade will know in advance the amount of feed grain that will be available for sale; and after the signup, I don't believe that any action to influence the market could be taken to get people into the program, when they have already signed up for it.

Mr. HRUSKA. I understand that. But the Secretary still has the right to sell as much as he wants to, in order to liquidate those certificates.

Mr. ELLENDER. Not as much as he wants to. He is limited to payment of the amount of grain the certificates call for.

Mr. HRUSKA. Yes; and all the certificates not redeemed in kind will find their way into his hands.

Mr. ELLENDER. That is right if the producers do not ask for redemption, and do not sell their certificates themselves, they would probably ask Commodity Credit Corporation for assistance in marketing their certificates. That is the same as the provision we had in the Senate's version of the bill. The only difference is that under the House version of the bill, since there is the option for the Secretary of Agriculture to pay in cash or in kind for the first 20 percent, it may be that there will be a little more grain to dispose of, under the certificate plan, than there would have been under the Senate version of the bill.

Mr. HRUSKA. I thank the Senator from Louisiana.

Mr. SYMINGTON. Mr. President, will the Senator from Louisiana yield?

Mr. ELLENDER. I yield.

Mr. SYMINGTON. I read now from the statement of the managers on the part of the House, in connection with the conference report on House bill 4510; the statement signed by Representative COOLEY and the other managers on the part of the House:

Under section 3 as passed by the House, the Commodity Credit Corporation would have been authorized to sell feed grains during the 1961 marketing year in unlimited quantities at prices not less than 17 percent below the 1961 support price, or about $1 per bushel for corn and a comparable price for grain sorghums.

That I understand clearly.

Mr. ELLENDER. That was in the House version of the bill.

Mr. SYMINGTON. Yes, in the House version of the bill.

Mr. ELLENDER. That is correct.

Mr. SYMINGTON. I read further from that part of the statement of the managers on the part of the House:

The new language of section 3 requires all certificates representing payments in kind to be redeemed for feed grains but a producer-certificate holder not desiring to take feed grains may obtain the assistance of the Commodity Credit Corporation in the marketing of his certificates for cash.

Mr. ELLENDER. That is correct—the same provision we had in the Senate version of the bill.

Mr. SYMINGTON. I should like to ask the able Senator from Louisiana if the return to the producer would be the same whether payments are made in cash or in kind; and if they are made in kind would the producer receive more if his certificates are marketed for him by Commodity Credit Corporation?

Mr. ELLENDER. The return to the producer should be about the same in any event. Payment in cash would be for so many dollars. Payment in kind would be for exactly the same number of dollars worth of grain. If the producer asked the Commodity Credit Corporation to help him market his certificate, he might expect the Corporation to sell it for about its face value and return that amount to him. If he asked Commodity Credit Corporation to redeem his certificate, it would be redeemed for the specified number of dollars worth of grain. The grain would be valued for redemption purposes at market value. A producer who took grain should be able to sell the grain on the market for about the same specified number of dollars if he so desired. Of course he might save some sales expense by reason of the assistance furnished by the Corporation.

Mr. SYMINGTON. Yes, I understand that.

Mr. ELLENDER. In other words, when a certificate is issued to a farmer for complying, the certificate will read, "This certificate is worth so many dollars worth of grain"—figured at the price-support fixed in this measure, which will be $1.20. When the certificate is redeemed it will be redeemed for that many dollars worth of grain, the grain paid in redemption being valued at market prices.

Mr. SYMINGTON. So if the farmer receives payment in kind, he will receive the same value as if he receives payment in cash. But since the certificate is valued on the basis of the support price for the grain and the grain paid in redemption is valued at the market price, the farmer will receive more bushels than the number used in fixing the value of the certificate. Is that correct?

Mr. ELLENDER. I assume that is correct, because the market price probably will be less than the support price. The kind and quality of the grain paid in redemption, as well as the location at which redemption is made, would also affect the number of bushels paid in redemption.

Mr. HICKENLOOPER. Mr. President, on this point will the Senator from Louisiana yield to me?

Mr. ELLENDER. I yield.

Mr. HICKENLOOPER. I agree with what the Senator from Louisiana says about the first 20 percent. But on the second 20 percent, which is a voluntary reduction, if the farmer wants to take out the additional 20 percent, then, as I understand——

The PRESIDING OFFICER. The additional 5 minutes the Senator from Louisiana has yielded to himself have expired.

Mr. ELLENDER. Mr. President, I yield myself an additional 5 minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for an additional 5 minutes.

Mr. HICKENLOOPER. Then, as I understand, his payment in kind will come at the market price, not at the support price.

Mr. ELLENDER. No. On the second 20 percent, the value of the certificate is figured at 60 percent of what he would have produced, based on the support price in this measure. All certificates are based on the same formula, except that the rate is 50 percent for the first 20 percent reduction and 60 percent for the second 20 percent reduction.

Mr. HICKENLOOPER. That is, for compliers.

Mr. ELLENDER. Certainly; the compliers are the only ones who are entitled to certificates. No one else is. I go back to the proposition that the certificates are based on the support price as fixed in the bill, but when they are redeemed in grain, the grain is valued at whatever the market level is at the time of the redemption.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. SYMINGTON. If that is true, then any farmer would prefer to receive, under the law, a cash payment as against receiving a payment in kind, only because he would get his money immediately, without having to market his certificate in order to obtain that value in kind.

Mr. ELLENDER. Yes; the certificate could be marketed with the assistance of the Commodity Credit Corporation for cash and the purchaser could obtain its redemption in grain. The amount of grain paid in redemption would represent the value of the certificate. If the certificates were valued at $1,200, the grain paid in redemption would be worth $1,200.

Mr. SYMINGTON. The 105 percent of support restriction on the Commodity Credit Corporation resale price does not enter into the redemption value of the grain at all, does it?

Mr. ELLENDER. No; let us not mix up the 105 percent with what is before us, because it has nothing to do with the bill before the Senate now. Let me make it plain that the present compromise does not in any way change the present law as to what the Commodity Credit Corporation stocks are sold for. It affects only the grain represented by the certificates that would be given to the farmers for participation.

Mr. SCHOEPPEL. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. SCHOEPPEL. I hold in my hand a sheet which contains a comparison of H.R. 4510 as passed by the House, the Senate amendment thereto, and the conference substitute therefor. I note on page 4 the following:

(a) Corn and grain sorghums price support limited to normal production of "harvested" acreage.

(b) reads:

Specified provision of the acreage of soil-conserving crops be increased by amount of diverted acres (Senate amendment leaves this to the Secretary).

Does the Senator have any idea what the Secretary's position would be on the matter?

Mr. ELLENDER. It is my belief that the Secretary would make about the same requirements under either the House or Senate version or the conference substitute. The Senate version did not require participating producers to increase their acreage of soil conserving crops by the number of acres diverted from feed grains. But it contained the more stringent requirement that the acreage of nonconserving crops should be reduced by the number of acres diverted from feed grains. I would expect the Secretary's program to include the more stringent provisions of the Senate version. I have no doubt of that. That was the difference between the House bill and the Senate version. The Senate version of the bill included specific instructions as to what to do, whereas the bill as passed by the House left much more to the discretion of the Secretary.

I am satisfied that the formula which will be adopted by the Secretary will not be different from that which we adopted in the bill originally.

Mr. SCHOEPPEL. I thank the Senator.

Under (b) on the same page of the memorandum to which I have referred, the following language is contained:

Specific prohibition against harvesting or grazing the diverted acreage. Conference substitute omits this provision, thereby leaving it within the discretion of the Secretary.

Mr. ELLENDER. That is correct, but I would expect the Secretary to include a provision of that sort. We have made a further change in that diverted acreage can be planted to certain nonsurplus crops such as castor beans and safflower. It is left to the discretion of the Secretary, but those who plant any of these

four commodities will not receive payments for diverting the acreage.

I now return to my prepared statement.

The Senate amendment contained rather detailed provisions as to the method of making payments in kind, while the House bill left broad discretion to the Secretary. The conference substitute follows the Senate provision. All payments in kind made under the bill would be made in the form of negotiable certificates redeemable in feed grains, the value of the certificate being determined on the basis of the basic county support rate multiplied by a certain percentage of the bushels which might have been produced on the acreage diverted. The certificate would be redeemable in feed grains valued at the market price at the time and place of redemption. As was provided in the Senate version of the bill, the Commodity Credit Corporation is directed to assist the producer in marketing his certificates.

All the language I have just read is what was contained in the Senate version of the bill.

The House bill provided for the diversion of 20 percent of a producer's 1959–60 average corn and grain sorghums acreage for a payment in cash or kind, and for the diversion of an additional 20 percent for payment in kind.

The PRESIDING OFFICER. The Senator's time has expired. The Senator is recognized for an additional 5 minutes.

Mr. ELLENDER. Mr. President, how much time have I consumed?

The PRESIDING OFFICER. The Senator has consumed 25 minutes.

Mr. ELLENDER. Mr. President, under the House bill, the entire 40 percent might therefore be paid for in kind if the Secretary of Agriculture elected to provide payment in kind for the first 20 percent reduction. The Senate amendment provided for a 30-percent diversion, half of which would be paid for in cash, and half of which would be paid for in kind. The conference substitute follows the House bill in giving the Secretary the discretion to provide payments in kind for the entire acreage diversion. The conference substitute provides for a required 20-percent diversion for which the Secretary might provide payment in cash or kind at a rate per acre not exceeding the basic county support rate multiplied by 50 percent of the 1959–60 average yield per acre for the farm; and for the diversion of up to an additional 20 percent for which payment in kind only could be made at a rate per acre not exceeding the basic county support rate multiplied by 60 percent of the 1959–60 average yield per acre.

The House bill required participation in the diversion program as a condition of eligibility for price support for soybeans and other oilseed crops—as well as corn and grain sorghums, and other feed grains designated by the Secretary. The Senate amendment required such participation as a condition of price support for oats, rye, and barley, without regard to whether the Secretary designated them. The conference substitute restricts this cross-compliance feature to corn and grain sorghums and other feed grains designated by the Secretary. It contains no cross-compliance requirement for soybeans.

The House bill excluded corn for silage from the commodities covered by the diversion program, while the Senate amendment would have extended the diversion program to oats, rye, and barley if the Secretary designated those commodities. The conference substitute restricts the diversion program to corn and grain sorghums, and includes corn for silage.

The House bill provided price support for corn for 1961 at any level above 65 percent of parity, while the Senate amendment provided for such support at $1.20 per bushel. The Secretary has already advised of his intention to fix the support level at $1.20 per bushel, and since the support price would therefore be $1.20 under either version, the substitute adopts the House language. The statement of managers on the part of the House makes it clear that the support level is intended to be $1.20.

The PRESIDING OFFICER. The time of the Senator has expired. The Senator is recognized for 3 additional minutes.

Mr. ELLENDER. Mr. President, support levels for 1961 for oats, rye, barley, and grain sorghums would also be the same under either the House or Senate version, and the conference substitute follows the House language.

The conference substitute follows the general form of the House bill in providing for the formulation of a diversion program by the Secretary of Agriculture, leaving many of the details to him. Under either the House bill or the Senate amendment, it is clear that an effective diversion program designed to reduce production is contemplated, and the Secretary has full authority under the conference substitute for such a program.

Under either version any producer might divert at least 20 acres from corn and grain sorghums and receive payment therefor, and the conference substitute retains this provision.

The Senate amendment contained a reporting provision not contained in the House bill. This provision is retained in the conference substitute with an amendment permitting the use of estimates when final figures are not available.

As was provided by the House bill, the conference substitute restricts the 1961 corn and grain sorghums price support to the normal production of the 1961 acreage. A provision of the House bill permitting producers, in lieu of receiving payments, to divert to nonsurplus, non-price-supported, nonfeed commodities, other than popcorn, was modified to permit such diversion only to such of the commodities, castor beans, safflower, sunflower, or sesame, as the Secretary may designate.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield to the Senator from Missouri.

Mr. SYMINGTON. Mr. President, in a statement from the office of the Secretary of Agriculture on the 20th of March it is said that the bill as presented by the able chairman today, "will mark a turning point in the build-up of Government-owned feed grain stocks and start us on the way toward bringing these stocks into manageable proportions."

Presumably the meaning there is that there will be a reduction.

Mr. ELLENDER. In the production of feed grains.

Mr. SYMINGTON. A reduction in the production of feed grains?

Mr. ELLENDER. That is correct.

Mr. SYMINGTON. Does the chairman agree?

Mr. ELLENDER. I do.

Mr. SYMINGTON. I would say, most respectfully, that I would hope both the able Secretary and the able chairman are correct.

Mr. ELLENDER. I am reasonably certain that I am correct. It is hoped that this program will result in the curtailment of about 25 percent of the present corn and sorghum acreage. Assuming there is 70 percent compliance, I have figured this program may take out of production as many as 16 or 17 million acres. Let us say the average production is 50 bushels an acre. If we multiply 50 times 17 million acres we get an idea of the amount of production involved.

The PRESIDING OFFICER. The additional time of the Senator from Louisiana has expired.

Mr. ELLENDER. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for an additional 2 minutes.

Mr. SYMINGTON. The level of this year's crop production will depend to a considerable extent upon the weather.

Mr. ELLENDER. Of course.

Mr. SYMINGTON. If the Secretary were allowed to sell at 17 percent below the price support level we could be sure the amount of grain in storage in the future would be less than today. I personally am worried, because under the program everything has to go, we might say, exactly right for the Secretary to end up with materially less feed grain in storage than there is today.

Mr. ELLENDER. My fear was that if the Secretary insisted upon putting his view into the bill we might not pass any bill at all. I would rather have this bill than no bill at all.

I honestly believe the feed grain growers will have an opportunity to show whether they wish to support any program. We make it very attractive for them to follow through in this program and to reduce acreage, as I have indicated.

Mr. YOUNG of North Dakota. Mr. President, will the Senator from California yield time to me?

Mr. KUCHEL. Mr. President, the minority yields 5 minutes to the distinguished senior Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota is recognized for 5 minutes.

Mr. YOUNG of North Dakota. Mr. President, while this is far from a perfect feed grain bill, I believe it is about

the best which can be enacted by the Congress in the short time we have to take action. I think the bill will go a long way toward curtailing a sharp buildup of feed grains in storage.

We are expected to have under control of the Department of Agriculture by next fall a carryover of approximately 3 billion bushels of feed grains. If we continue such a carryover, it will be a real threat to the livestock industry, and I think to all farming in general.

It has been pointed out by opponents that the proposed legislation would raise the price of feed grains to consumers. The same people go to the feed grain producing areas and say, "One provision in the bill, in all probability, will tend to depress your cash price even lower than it is now." These people go to the cattle feeders in my area and say that passage of the proposed legislation will mean higher feed prices to them.

My own opinion is that with a somewhat higher support price—and it is a modest increase—the cash price will be a little higher than it was last year, but this is only a guess on my part. The price support will be a little higher.

The bill would make a step in the right direction, which is toward curtailing surpluses. If the farmers cooperate with the program we shall go a long way toward solving a very serious farm problem. Cheap feed grains will result in lower meat prices. This has been true for years and years. It will always be the case.

This year the spring pig crop is 8 percent higher than it was a year ago. This has resulted almost entirely because of the most favorable corn-hog ratio in years. It means there will be more available meat next fall. The trend will continue, unless something is done.

I understand that in the major corn-producing States the cash prices for corn have been averaging 80 to 90 cents a bushel, while the price support is $1.06 a bushel. High moisture content corn is selling for as low as 70 cents a bushel.

One of the provisions in the bill would give the Secretary of Agriculture authority to place some additional corn on the market, which would perhaps have an adverse effect on the cash market. This is a practice which has been followed, pretty much, by the previous Secretary of Agriculture. Corn has been put on the market from time to time, almost weekly, on the theory that it was going out of condition. Basically it was good corn, which could have been stored for several years longer. This practice is one of the major reasons why the cash price for corn has been from 80 to 90 cents a bushel while the price support for corn has been $1.06 a bushel.

I do not think the provision in the bill will permit the sale by the Secretary of Agriculture of enough additional feed grain to have any material effect on the market. All in all, I think the conference report recommends a good bill, and I shall support it.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. YOUNG of North Dakota. I am glad to yield.

Mr. COOPER. Under the terms of the conference report, could the Secretary sell corn from surplus stocks at a price lower than is now provided?

The PRESIDING OFFICER. The 5 minutes yielded to the Senator from North Dakota have expired.

Mr. KUCHEL. Mr. President, the minority yields 2 additional minutes to the able Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota is recognized for 2 additional minutes.

Mr. COOPER. I shall repeat my question. Under the terms of the conference report, could the Secretary sell corn from surplus stocks at a price lower than is now provided; that is, the support price plus reasonable carrying charges?

Mr. YOUNG of North Dakota. He could not. That provision of the law would remain unchanged.

The proposed legislation would make it possible for the Secretary to sell a little additional corn on the market. I refer to the corn under certificate. The Secretary also could sell corn which is going out of condition.

Mr. COOPER. The sale of corn which represents amounts held by certificate-holders would have to be at the support price plus reasonable carrying charges?

Mr. YOUNG of North Dakota. No; the Secretary could sell such corn for the market price.

Mr. COOPER. For the market price. That would be a change, then?

Mr. YOUNG of North Dakota. Of course, that is the same as was provided in the Senate amendments to the bill. Any payment-in-kind grain could be sold at the market price.

Mr. COOPER. I intend to vote in favor of the conference report, but it does mark a change from the provisions of the Senate version of the bill, does it not? I thought, under the terms of the Senate version of the bill, that when the Secretary sold corn he was required to sell it for the support price plus a reasonable carrying charge.

Mr. YOUNG of North Dakota. That has always been the law. The only change would affect the grain which is called the payment-in-kind grain. Under the Senate amendments to the bill, that was to be half of the 30-percent reduction. Under the provision now presented, the Secretary could make all payments in kind rather than cash, and the farmer could elect to accept the grain himself or to turn it over to the Secretary for sale for whatever the market would bring on the cash market.

Mr. COOPER. I should like to ask two questions. The first question is whether the conference report provides that the price support might be higher than the $1.20 which was fixed in the Senate version of the House bill.

Mr. YOUNG of North Dakota. The understanding of the conferees—and I think it was written in the House report—was that the price support would be no higher than $1.20 a bushel.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KUCHEL. I yield 1 additional minute to the Senator from North Dakota.

Mr. COOPER. That provision is written in the report. The second question is this: The Senator from North Dakota may recall that I advanced a proposal, which was agreed to, providing that in any case an amount up to 20 acres of land could be withdrawn from production. Is that provision still in the conference report?

Mr. ELLENDER. The Senator is correct.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. KUCHEL. Mr. President, the minority yields 10 minutes to the distinguished senior Senator from Iowa.

Mr. HICKENLOOPER. As a member of the conference committee on the bill I found myself unable to sign the conference report, because in my opinion the bill still contains the same basic and fundamental defects that caused me to vote against the bill as it passed a few days ago.

Section 3, which was in the House version of the bill, and which was strongly supported by the Secretary of Agriculture is modified to some slight extent in the conference report, it is true. However, that modification is much like the sheriff's hat. A sheriff submitted a bill to the county board of supervisors for a new hat because a hole had been shot in the one he had when he was apprehending a prisoner. The county board of supervisors returned his expense account and said:

> We do not pay for articles of clothing lost in the performance of duty. Please revise your report and send it back.

So the sheriff revised his expense account and sent it back, with nothing in the account about the hat. However, he did make the mistake of inserting at the bottom of the account, "P.S. The hat is in here but you can't possibly find it."

In much the same way the conference report is submitted. Section 3 allegedly is not in the report. Some would like to have us believe that section 3 is not in the report, or it is in there and we cannot find it. But section 3 is definitely in the conference report. The only difference is that the amount has been reduced somewhat, as was pointed out a minute ago by the Senator from Louisiana. There is a provision which would reduce somewhat the amount of grain which the Secretary of Agriculture would be authorized to throw on the market in order to keep the market low.

As I said a few days ago, it would be easy to support the bill and to say, "Let them see what they can do with it." However, I do not believe that such action is justification for supporting a bill that I really believe is basically wrong in principle for the farmers of this country and for the feed grain raisers.

If Senators will consider the bill and the testimony of the Secretary of Agriculture and his chief adviser, they will find that their basic purpose is to keep the price of feed grains down. They so testified. They testified they would use the discretionary power that would be given to them in order to bring grains out of storage so that the price would not rise.

Of course, they said, "We do not want the price for the corn of noncompliers to go above the price which the compliers would receive." But to me that argument is inadequate and insupportable because if the price of corn rises above the support price, the complier would receive the added price anyway. He could withdraw it from storage and sell it any time he might wish to do so for the increased price. To me that argument is specious and not sustainable.

As I said the other day, the bill represents a 180° shift from the principles of an agriculture bill designed to get the farmer a better price and a better portion of the national income. This bill is designed to control the price and to keep the price down, if we can accept the testimony of the Secretary of Agriculture at face value. He does not wish the price to rise beyond $1.20 on corn on a comparable basis. He wants discretionary power to keep the price of all corn down around $1 a bushel.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. HICKENLOOPER. I yield.

Mr. SYMINGTON. What is the price of corn today?

Mr. HICKENLOOPER. To the farmer?

Mr. SYMINGTON. The support price? It is $1.06, is it not?

Mr. HICKENLOOPER. $1.06, yes.

Mr. SYMINGTON. And the actual price is around $1, is it not?

Mr. HICKENLOOPER. I think the price is less than that amount on the farm.

Mr. SYMINGTON. Then $1.20 would not be too bad, would it?

Mr. HICKENLOOPER. $1.20 is not too bad a price, but what has happened to those who in the past have been criticizing former Secretary of Agriculture Benson because he wanted a support price which would be approximately $1.50 or $1.60? Why settle on a price of $1.20 now as a part of the proposed program?

Mr. SYMINGTON. Mr. President, will the Senator yield further?

Mr. HICKENLOOPER. I yield.

Mr. SYMINGTON. The price in 1956 was $1.50, was it not?

Mr. HICKENLOOPER. I do not recall the exact price at that time. I will accept the Senator's word.

Mr. SYMINGTON. I believe the price was $1.50. Five years ago under Mr. Benson it was $1.50. Today it is about $1.

Mr. HICKENLOOPER. If the price 5 years ago under Mr. Benson was $1.50 and the Secretary of Agriculture now wishes to knock the price down to $1.20, I suggest that reduction is quite a comedown.

Mr. SYMINGTON. No, the present Secretary of Agriculture desires to raise the price from $1 to $1.20.

Mr. HICKENLOOPER. The Secretary of Agriculture has testified that he wishes to use surpluses in order to keep the price of corn down to $1, except for the compliers, and he wishes to keep the price for compliers at $1.20.

Mr. SYMINGTON. I believe the Secretary of Agriculture has testified—certainly he has told me—that he wishes to cut the very large inventory of grain that has been built up in the past 8 years, and also raise the present return to the farmer.

Mr. HICKENLOOPER. That is very true, and it is the desire of all of us. I do not know what the Secretary of Agriculture told the Senator from Missouri, but I suppose that would be his ambition. However, I do not believe the bill would do so. I do not believe the Secretary of Agriculture would receive anywhere near the compliance that he anticipates or states is necessary if the provisions of the bill are to be at all successful. The information I received is that compliance is simply not coming in.

The program is not an attractive one for the grain raiser who is also a feeder. The program may be fairly attractive at the moment for the cash grain farmer who sells his grain for $1. But there are comparatively few of those as compared with feeders who sell all their grain. I am informed from many sources that the farmers do not find the proposed program attractive. They do not believe it would materially help the grain situation or price. On the contrary, they believe the program may keep grain prices at low levels. In effect that is what we propose to do by freezing a high price of $1.20 and a floor price of $1, and between those prices the grain feeder can have his accordion movement in the price of grain.

Heretofore our programs and policies—at least those supported by most of us who are trying to help the farm situation—have been designed as a floor or support to afford protection against a severe decline in price, and to let the farmer get whatever he can above the support price.

The new theory that has been written into the bill is to put both a floor and a ceiling on grains, and to place the grain farmer between the two jaws of a vise. He cannot receive more than $1.25 or $1.20, although the bill provides 65 percent of parity. If the percentage is left at that figure, the price will be below $1.20. The farmer cannot receive more than $1.20, because the Secretary of Agriculture testified he will use the surplus grain on the market in order to keep the price down.

The theory and philosophy proposed is new and diametrically opposite to the philosophy we have tried to put into effect heretofore.

Payments may be made in kind. There is no requirement that any of the amounts be paid to the farmer in cash. The Secretary of Agriculture has discretion to determine whether he wishes to pay all of the amount in kind, to pay none of it in cash, or to pay part of it in cash and part of it in kind.

The net result of the proposed resolution is that it would put complete and absolute discretion in the Secretary of Agriculture, and if the program does not work to reduce surpluses, if it does not work to increase prices to the farmer, with all of the unlimited discretion the bill gives to the Secretary of Agriculture, he can blame no one else but Secretary of Agriculture Freeman, because under the bill he would have all the power and discretion anybody would need. I believe, as I said a while ago that the direction and the philosophy of the bill are basically wrong. I do not believe it is for the good of agriculture, in an emergency or otherwise. Therefore, for these reasons, and for those I stated the other day, when I voted against the bill, I cannot support the conference report.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KUCHEL. I yield 2 more minutes to the Senator from Iowa.

Mr. HICKENLOOPER. I could not sign the conference report for the reasons I have stated, and I will have to vote against it on those basic principles.

I wrote to the Secretary of Agriculture on March 20, and asked certain questions. I received, yesterday evening, his reply to that letter, dated March 21, 1961. I appreciate the promptness with which the Secretary of Agriculture answered my letter. I am not hypercritical about it when I say I feel he did not completely and fully answer the questions which I set out in my letter. He answered some of them. Nevertheless I do appreciate the courtesy of his reply.

I ask unanimous consent that a copy of my letter to Hon. Orville Freeman, Secretary of Agriculture, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 20, 1961.

Hon. ORVILLE FREEMAN,
Secretary of Agriculture,
Department of Agriculture,
Washington, D.C.

DEAR MR. SECRETARY: As you know the proposed feed grain bill will be acted upon by the Senate within the next few days. This proposed legislation provides you with tremendous discretionary authority to adversely affect the free market price for corn. Therefore, prior to the time the Senate will be asked to vote on this proposal I should like to have the answers to the following questions:

1. Do you intend to use your authority to make an advance payment to cooperators? If you do, do you intend to make this payment in cash or in payment-in-kind certificates? You should recognize that the marketing of the feed grains which would result from the conversion of the certificates into grain will have a tremendous downward impact on the free market price for feed grains.

Since farmers normally sell in excess of 500 million bushels of feed grains between April 1 and October 1 feed grains that were produced in 1960 under the legislation then prevailing, I would urge you, if you decide to make an advance payment, that this payment be made in cash. This grain is now owned by farmers in Minnesota, Illinois, Iowa, Ohio, Indiana, Missouri, Nebraska, North and South Dakota, and to a lesser degree in most of the other States. Making advance payments in kind would cost farmers tens of millions of dollars.

2. Do you intend to make cash or in-kind payments for the first 20 percent of adjustment? As you know the Republican conferees attempted to have the proposed conference bill amended to permit the payment of cash or in kind at the option of the producer. However, the Democrats who are in majority refused to provide this authority to the producer but gave the choice to the Secretary. The Republicans

were acting on the language of the President in his March 16 message to the Congress where he said as follows:

"As part of payment programs the Secretary of Agriculture should be authorized to make payments-in-kind in cases where producers prefer such payments and where the Secretary determines that the goal of reduction of available stocks makes such payments feasible."

I would urge that the choice be given to the farmer when he signs up.

The past policy providing for the resale of feed grains by the CCC was based on the following congressional delegation:

"In determining sales policies for basic agricultural commodities or storable nonbasic commodities, the Corporation should give consideration to the establishing of such policies with respect to prices, terms, and conditions as it determines will not discourage or deter manufacturers, processors, and dealers from acquiring and carrying normal inventories of the commodity of the current crop."

This proposal will do just the reverse.

In order that Congress may know exactly how you intend to administer the authorities granted in this sweeping legislation, please provide me the answers to these questions immediately. The answers to these questions are essential in order that we can vote intelligently.

Yours sincerely,

BOURKE B. HICKENLOOPER.

Mr. HICKENLOOPER. I ask unanimous consent that there be printed in the RECORD at this point a copy of the letter which I received from the Secretary of Agriculture.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 21, 1961.

Hon. BOURKE B. HICKENLOOPER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HICKENLOOPER: I am pleased to reply to your letter of March 20 in which you pose some questions with regard to the specific application and administration of the legislation which has been approved by the Senate-House conference committee and which is scheduled to come up for further action in the Senate today.

As your letter indicates, the pending legislation would authorize payments "not to exceed 50 percent of any payments to producers in advance of determination of performance." Since it would appear to be the will of Congress that such advance payments be made, and since it is desirable from the standpoint of our national economy to place additional purchasing power in the hands of farmers at this time, it is expected that such authorization will be used. This action would be in line with steps which have already been taken to make 50 percent advance payments to farmers who have resealed grain on their own farms.

As a member of this conference committee, you are undoubtedly aware of the language which was approved as a substitute for section 3 of H.R. 4510 as passed by the House. This authority has been explained in the statement of the managers on the part of the House, as follows:

"The new language of section 3 requires all certificates representing payments-in-kind to be redeemed for feed grains but a producer-certificate holder not desiring to take feed grains may obtain the assistance of the Commodity Credit Corporation in the marketing of his certificates for cash. The new language, however, gives the Secretary discretion as to when such certificates would be sold in order that the Secretary may have a measure of control over the rapidity with which the certificates may be placed on the market. The Secretary would be authorized, as a means of providing adequate assistance to producers in the marketing of their certificates, to direct the Commodity Credit Corporation to make an advance on the certificate to the producer. The Commodity Credit Corporation would then be reimbursed for such advance from the sale proceeds of the certificates. In this way, the Secretary would not be required, when he deemed such action contrary to the best interests of the program, to permit an undue quantity of grain to be put on the market."

Under this authority it would be possible to make payment in kind without having the tremendous downward impact on the market price for feed grains which you envision in your letter. You may be sure that we will not administer this program so as to reduce the income received by farmers prior to October 1, 1961, from sales of feed grains from the 1960 crop, below that they would have received if this program had not been enacted.

I would seriously question your conclusion that the legislation may discourage or deter manufacturers, processors, and dealers from acquiring and carrying normal inventories of feed grains. Insofar as this program is effective in bringing about a better balance between the supply of and demand for feed grains, it will have a healthy effect on the entire feed grain economy. Furthermore, you may be assured that it is not my intention to administer any discretionary authority vested in the Secretary of Agriculture in a manner unfair to any segment of the industry.

I know you share my deep conviction of the necessity of providing for the American farmer the most effective and successful program possible under the legislation which may be enacted by the Congress.

Sincerely,

ORVILLE L. FREEMAN,
Secretary.

Mr. ELLENDER. Mr. President, I yield 3 minutes to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I support the conference report. I do so, although I recognize that it has serious weaknesses. The chairman of the committee, the Senator from Louisiana [Mr. ELLENDER] has said the only alternative to the pending bill is no bill at all. That would mean hundreds of millions of bushels of additional feed grain produced. It would also mean, as a result, an increased cost for the taxpayers. It would also mean a lower income for the corn producer. I am sure it would also mean a lower income for the dairy and poultry farmers, and others as well.

I believe the pending bill is absolutely necessary. However, I disagree very strongly with the views expressed by the distinguished Senator from Iowa. I feel the bill does not put unlimited discretion in the hands of the Secretary of Agriculture. I believe he should have been given more than is provided in the bill. That is why I am fearful that the Secretary of Agriculture is not going to be able to secure anything like 70 percent compliance.

I hope he will be able to do so. The whole program depends on his ability to do so. However, the fact is that we have not given him as much discretion as he asked for originally, or as much as the House provided. If we are to have a program that will reduce the surpluses, if we are to have a program that will provide the farmer with an adequate income, and one that will secure compliance, we must give the Secretary the tools with which to work.

Finally, the conference report, Report No. 170, of the House of Representatives, dated March 17, 1961, has a very lucid statement on pages 4, 5, and 6 of the conference report. Because it expresses exactly what the proposal does, I ask unanimous consent that this portion of the report be printed in the RECORD at this point in my remarks.

There being no objection, the excerpt from the report was ordered to be printed in the RECORD, as follows:

STATEMENT OF MANAGERS ON THE PART OF THE HOUSE

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4510) to provide a special feed grains program for 1961 submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The amendment of the Senate struck out all after the enacting clause of H.R. 4510 and inserted the language of a similar Senate bill (S. 993) as passed by the Senate. The conference has agreed on a substitute to the Senate amendment which follows in general the language of the House bill with the exception of the changes noted below. Other than technical changes, the differences between the bill as passed by the House and the substitute agreed to by the conferees are as follows:

SECTION 1

This retains the language of the House bill with some modifications. The level of price support for the 1961 crop of corn will be established by the Secretary "at such level not less than 65 percent of the parity price therefore as the Secretary may determine" but the committee of conference understands that pursuant to this authority the support level for corn for the 1961 crop will be $1.20 per bushel.

The House bill required that soybean producers and producers of such other oilseed crops as might be designated by the Secretary would have to participate in the corn and grain sorghum acreage reduction program in order to be eligible for price supports on soybeans or such other designated oilseed crops. The conference substitute omits this requirement.

SECTION 2

Section 2 follows in general the language of the House bill. It authorizes the Secretary of Agriculture to formulate and carry out a special agricultural conservation program for corn and grain sorghums for 1961 and requires that an acreage equivalent to 20 percent of the average acreage on the farm of these two crops in the years 1959 and 1960 must be retired under the special conservation program in order for the producer to be eligible for price supports on corn or grain sorghums. An additional 20 percent may be retired at the producer's option. It requires that a corresponding increase must be made in the average acreage devoted in 1959 and 1960 to soil-conserving crops and practices and it is the understanding of the conference committee that the certification of the producer with respect to this acreage may be accepted as evidence of compliance.

The House bill contained the provision that any producer participating in the corn and grain sorghum acreage retirement program might elect, in lieu of any payment for

such land retirement, to grow on the diverted acreage any crop not in surplus, not eligible for price supports, and not produced principally for livestock feed which might be designated by the Secretary. This provision has caused so much misunderstanding that the committee of conference has substituted for it a listing of the specific crops which may be designated by the Secretary. They are castor beans, sunflower, safflower, and sesame. The Secretary will designate which, if any, of these crops may be grown on diverted acreage.

Paragraph 2 of the committee substitute combines the provisions contained in paragraphs 2 and 3 of section 2 of the House bill. The authority for financing the program is virtually the same as that in the House bill except that the specific authorization for expenditure of $500 million for payments in cash in advance of appropriations is eliminated and the language makes it clear that CCC may pay the cost involved in carrying out the provisions of section 3 of the conference substitute.

Paragraph 3 of section 2 contains the Senate provision for a sharing of payments among producers on the farm on a fair and equitable basis and in keeping with existing contracts.

SECTION 3

Section 3 of the bill as passed by the House, which was its most controversial section, was modified and rewritten by the conference committee. The effect of this is to change the language and the procedures of section 3 but to leave to the Secretary the power to encourage participation in the program by releasing into the market the amount of feed grains represented by the certificates issued as payment in kind under the program authorized by the legislation. Under section 3 as passed by the House, the Commodity Credit Corporation would have been authorized to sell feed grains during the 1961 marketing year in unlimited quantities at prices not less than 17 percent below the 1961 support price, or about $1 per bushel for corn and a comparable price for grain sorghums. The new language of section 3 requires all certificates representing payments in kind to be redeemed for feed grains but a producer-certificate holder not desiring to take feed grains may obtain the assistance of the Commodity Credit Corporation in the marketing of his certificates for cash. The new language, however, gives the Secretary discretion as to when such certificates would be sold in order that the Secretary may have a measure of control over the rapidity with which the certificates may be placed on the market. The Secretary would be authorized, as a means of providing adequate assistance to producers in the marketing of their certificates, to direct the Commodity Credit Corporation to make an advance on the certificate to the producer. The Commodity Credit Corporation would then be reimbursed for such advance from the sale proceeds of the certificates. In this way, the Secretary would not be required, when he deemed such action contrary to the best interests of the program, to permit an undue quantity of grain to be put on the market. If a certificate is not presented for redemption within 30 days of its issuance reasonable storage and other charges as determined by the Secretary, beginning 30 days after issuance of the certificate and ending with its presentation for redemption, would be deducted from the value of the certificate. However, if the Department elected to hold producers' certificates off the market longer than 30 days after their issuance, producers would not have to bear storage and other charges, since the time of the marketing of the certificates would not be within their control, but would be wholly within the control of the Department. Under the language of section 3 the Secretary is required to deduct only such storage and other charges as he determines to be reasonable and this would give him ample authority to relieve the producer of storage and other charges under these circumstances.

SECTION 4

Section 4 of the conference substitute adds language which was not in the House bill. It provides that the Secretary shall submit to Congress, within 90 days after the effective date of this act, a detailed report on the progress, cost, and reduction of surpluses under the program, and other relevant information.

Mr. ELLENDER. I yield 5 minutes to the Senator from Florida.

Mr. HOLLAND. Mr. President, I signed the conference report on the bill, not because I am completely in accord with all the provisions of the conference report, but because I believe the report improves greatly upon the House version. I deem it to be the duty of a conferee to endeavor to arrive at a report as nearly in keeping with the action of the House which he represents as it is possible for him to do.

I wish to state three particulars briefly in which I believe the House bill was improved upon by the conference report in approaching the provisions of the Senate bill.

The first was the elimination of the provision which in the House bill required soybean producers and producers of other oilseed crops designated by the Secretary of Agriculture to participate in the reduction of the acreage of corn and grain sorghums in order to obtain price support on soybeans and such other oilseed crops.

That provision should not have been tied into the bill, and I am glad it has been eliminated.

Second, the House bill provided that diverted acreage could be devoted to the production of crops other than feed crops which were not in surplus. I envisioned this to mean vegetables, strawberries, and other crops. I am sure that this would very readily occur to other Members of the Senate, also.

This provision was changed to read "That any producer may elect in lieu of such payment to devote such diverted acreage to castor beans, safflower, sunflower, or sesame, if designated by the Secretary."

This is a desirable change in that it is definitely established that vegetables and fruits cannot be planted on such diverted acreage.

The third point has already been mentioned. Instead of the Secretary of Agriculture having unlimited power to control the actual market price of grain by being able to pour on the market at his discretion any quantity from the Commodity Credit Corporation's huge stock, at prices down to $1 a bushel, that power is very drastically reduced in the conference report, by permitting him to dispose of grain at values below the support price only in redemption of certificates for payments in kind as covered by agreements with compliers.

I believe those three changes are fine changes in the bill.

The reason I am doubtful about the bill is that I believe anything that would increase price supports would not decrease production very much, if at all. That is what the bill would do. If past performance by corngrowers in the heavy-producing areas is any test at all, production will not be decreased very much.

I tried to place a provision in the bill requiring a signup of 80 percent before the program could be put into effect, and then I reduced it to 70 percent, so that there would be an adequate group coming in to promise some success before the program could actually go into effect. Neither of those suggestions was received with favor by the Senate committee or by the conference committee.

I am doubtful as to the usefulness of the bill. I hope it may prove to be more useful than I think it will be. I cannot help concurring in many respects with what the Senator from Iowa has said in his remarks, and with what the Senator from Wisconsin has said about farmers signing up.

I believe that there are numerous dilemmas in connection with the bill, and I wanted to put my position clearly on the record, in joining the able chairman of the committee and chairman of the conference committee in bringing about a most decent bill and in trying to make the conference as nearly in accord with the Senate-passed bill as it was possible for us to do.

Mr. HICKENLOOPER. Mr. President, will the Senator from Florida yield?

Mr. HOLLAND. I yield if I have time. May I have 1 additional minute?

Mr. HICKENLOOPER. I will yield a minute to the Senator from Florida from the time on this side. I was called out of the room to answer the telephone. I do not know whether the Senator from Florida discussed the question whether the bill will be, in effect, a bill to have the price of feed grains controlled by the Secretary of Agriculture.

Mr. HOLLAND. That was the objective of the Secretary. There is no doubt about it. We all heard his testimony. That was much more the objective of the House bill than it is of the conference report. To some degree, it still remains the objective of the conference report.

Mr. HICKENLOOPER. I believe it is the objective of the Secretary to control the price of corn. I merely want to call as witnesses to my understanding a couple of statements made in the other body yesterday on this subject. I refer to page 4411 of the RECORD of yesterday. The gentleman from Illinois [Mr. ARENDS] asked the chairman of the House Committee on Agriculture this question:

> But the price of corn for any farmer who does not go into the program will be controlled by the Secretary of Agriculture.
>
> Mr. COOLEY. That is right.

Through this colloquy, it is established that even the proponents of the bill believe it is designed, in effect, to control the price of corn. I insist that that is diametrically opposite to the programs we have attempted to establish in the past, even though they may not have been successful. But we have moved in that direction for the benefit of the farmer, to enable him to secure the best possible economic return.

Mr. HOLLAND. Mr. President, how much time remains on this side?

The PRESIDING OFFICER. The Senator from Louisiana has 7 minutes remaining; the Senator from Illinois has 22 minutes remaining.

Mr. HOLLAND. Mr. President, I understood the Senator from Iowa had offered to yield me 2 minutes from his side.

Mr. HICKENLOOPER. I yield 2 minutes from our time.

Mr. HOLLAND. I thank the Senator from Iowa. Of course, I agree completely that the original objective of the bill was to control the price of corn. I do not feel that it will accomplish the second purpose—the control of production—at all. I so stated in our committee, on the floor, and in the conference committee, as the Senator well knows.

I also feel that it is very clearly established that the conference report is much closer to the Senate version than was the House bill. It was for that reason that I was willing to try to work out a bill in that direction, and signed the conference report. I still have great misgivings about the effectiveness of the bill.

The Senator from Iowa will remember that in conference committee I strongly called attention to the same fact he has just mentioned, namely, that all three of the bills turn the price support operation in a direction completely away from that in which the program has worked heretofore.

Mr. HICKENLOOPER. I agree that the Senator from Florida did just that in the conference committee.

Mr. HOLLAND. I thank the Senator from Iowa.

Mr. DIRKSEN. Mr. President, I yield myself 5 minutes.

First, I think the distinguished Senator from Louisiana entirely kept faith with the Senate in pursuance of the request I made of him when this measure was first before the Senate, because I did limit that to the possible reinclusion of section 3 in the Senate bill. Section 3 was not reincorporated in the bill. Instead, the conference report took a different turn, and there was a modification of the language.

The first objection I have to utter with respect to the report is with respect to the question of choice. I reread the President's farm message. There he constantly emphasized that there should be a choice on the part of the producer, that the man who tills the soil should have the word as to how he should participate and how he should be paid. We depart from that thesis in the conference report, if I read it correctly, because it is not the producer who will determine how he will be paid on the 20-percent acreage scaledown; it is the Secretary who will make the choice for him. If I am wrong about that, then I should like to have some Senator who is familiar with the subject correct me. However, that is the way I read the report. So the first major departure is that the choice is in the hands of the Secretary instead of the producer.

That fact brings up the second objection, namely, that the Secretary of Agriculture, on the first 20 percent of the scaledown, can simply say to the farmer—and if I am wrong, I shall ask the distinguished Senator from North Dakota [Mr. YOUNG] to correct me—"You will be paid in kind, not in cash." The farmer may want cash. That would have been the better way to proceed, and I think that would have taken some of the offensive quality off the conference report.

However, when the Secretary says, "You will take payment in kind whether you like it or not," then the residual question is: How much participation is there? How much grain in kind will move out into the hands of the farmers? If I am correctly advised, the normal grain market is, in any normal year, between April 1 and October 1, about 500 million bushels of feed grain.

The distinguished Senator from Kansas [Mr. CARLSON] nurses the conviction that there will not be substantial participation in the program. If that be the case, obviously it would not reach that kind of level of outflow of surplus grain. But if it does, then the question is: What will be the impact upon the price structure at the very time we are trying, in the bill itself, to improve the income lot of the farmer?

So the question of choice has been put into the hands of the Secretary. If I were sitting in his seat, I might do the same thing I have suggested he would do. I might simply say, "You will take it in kind whether you like it or not." That is a clear departure and a complete departure, in fact, from the spirit of the farm message which the President sent to Congress.

It is anybody's guess, then, what the impact of these moving quantities of surpluses will be upon the market at the very moment when corn goes into the soil, and we see Minnesota, Illinois, Iowa, the Dakotas, Nebraska, and Indiana dotted with all those dainty green sentinels which will be standing up there, waving in the wind before too long; and the farmer will have some deep concern as to exactly what will happen to the price when that crop finally matures.

So section 3 was not incorporated, but language was incorporated which, in my considered judgment, will reach, not entirely, but in substantial degree, the same result.

There is one other item I shall discuss. The report provides that there can be an advance payment of 50 percent of what is due. Already a meeting has been set in Omaha, in the State of the distinguished Senator from Nebraska [Mr. HRUSKA]. I was given this morning a copy of a telegram which was sent to some of the farm leaders in Chicago, stating that the Secretary will be out there very shortly. He will make a speech. There will be a press conference. The farm people will be filled in on the details. They will be told that they can get 50 percent before performance.

Have we done that before? Have we given farmers 50 percent before they ever performed a lick under a contract to reduce acreage so as to achieve a desired result? If we have, then I take back what I have said. But I am not familiar with any advance payment which has ever been made. But the provision is there just as clear as crystal and just as clear as print can make it. To make certain that I am not guessing, I read the language from the conference report:

> The Secretary may make not to exceed 50 per centum of any payments to producers in advance of determination of performance.

Am I wrong? Or am I right? Am I correct in stating what that language means? That is what those words say to me.

The PRESIDING OFFICER. The time of the Senator from Illinois has expired.

Mr. DIRKSEN. I yield myself 2 additional minutes.

Mr. MILLER. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. MILLER. Will the Senator tell us how much the bill will cost in the way of appropriations?

Mr. DIRKSEN. We do not know. The only estimate we have at the moment is an indication by the Secretary, and perforce the President in his message, that the bill might save $500 million over and above the existing program, the program now on the statute books, which is a guess.

Since this discussion began I am advised that there has been resort to advance payments, but I doubt very much that the circumstances under which they were made are comparable to the situation which confronts us in the pending measure.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. WILLIAMS of Delaware. I saw the President's message in which he estimated that this would save about $500 million. However, I was interested to note that yesterday he suggested he would ask Congress for $442 million over and above the budget to pay the increased cost of the program. How the two statements can be reconciled, I do not know.

Mr. DIRKSEN. As a matter of fact, I make no endeavor to reconcile them. But I am not happy with this whole program.

Mr. YOUNG of North Dakota. Mr. President, will the Senator from Illinois yield? I note that he has been asking me questions.

Mr. DIRKSEN. Well, Mr. President, the Senator from North Dakota is my agricultural mentor. I sit at his feet, as a pupil. [Laughter.]

Mr. YOUNG of North Dakota. I thank the Senator from Illinois.

Mr. DIRKSEN. That is, in regard to everything except where wheat is concerned. [Laughter.]

Mr. YOUNG of North Dakota. The Senator is concerned about the provision which would permit the Secretary of Agriculture to sell feed grains for the first time below 105 percent of price support. That is the grain turned over to him by the farmer, for the payment-in-kind program. This provision, if used unwisely, could to some extent depress the market. But the grain trade will know exactly how much grain of this kind there will be all the time; and with

the Department of Agriculture now holding 2,700 million bushels of feed grains, it can have a fire sale of feed grains, of as much as it wants to, at almost any time. That has been going on for years; but the corn sold by the Department often has been good corn; and those who are feeders have been buying it.

Mr. DIRKSEN. I think there is no question that it is preferable to section 3 as it was in the bill when it was first messaged to the Congress.

But in the law it is recited that the Commodity Credit Corporation policy should be so pursued that manufacturers, processors, and others who use these commodities can pursue an orderly course in building inventories, knowing, of course, that they are not going to be clouted by some Federal agency.

The PRESIDING OFFICER. The time the Senator from Illinois has yielded to himself has expired.

Mr. DIRKSEN. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 additional minutes.

Mr. DIRKSEN. As I was saying, Mr. President, knowing, of course, that they are not going to be clouted by some Federal agency exactly when they are not looking for it, and then suffer substantial loss, although not always disaster.

So, Mr. President, under those circumstances I do not detract for a moment from the effort the Senate conferees made, because I know that the House conferees are rather tough negotiators; I know, from away back and from long experience, how they negotiate. But I believe I would be less than candid if I did not set forth to the Senate my own assessment of this matter, and then come to what I consider the logical conclusion; and that conclusion is that I must vote against the conference report. I shall leave the entire case right there.

Mr. HRUSKA. Mr. President, will the Senator from Illinois yield to me?

Mr. DIRKSEN. Let me ask how much time the Senator from Nebraska wishes to have.

Mr. HRUSKA. About 3 minutes.

Mr. DIRKSEN. Mr. President, let me inquire how much time remains under my control.

The PRESIDING OFFICER. Eleven minutes.

Mr. DIRKSEN. I yield 4 minutes to the distinguished Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 4 minutes.

Mr. HRUSKA. Mr. President, it is my intention to vote for the conference report. I shall do so somewhat reluctantly, because it contains a number of features which still are most undesirable. They have been modified and eased a little bit, as compared with the original proposals. Nevertheless, in several respects they are not at all desirable on a long-term basis. They are sufferable on the basis of a measure which will be in force for only 1 year.

Among the objections which still inhere are the ones enumerated by the Senator from Iowa; namely, that for the first time we shall have a measure which will seek to impose a ceiling as well as a floor on the support price of these feed grains.

Secondly, this measure still contains a provision giving the Secretary the power to sell. That provision has been modified and curtailed somewhat, and now the amount is not only predictable, but is limited in quantity. Nevertheless, the conference report provides power to sell which was considered much too great a power for any one person to wield without having any limitations upon it.

This measure also contains, for the first time, a provision for bushelage control.

Another point I wish to make is the one made by the Senator from Illinois, in regard to the choice being in the hands of the Secretary, rather than in the hands of the producer, as to whether he shall be paid in cash or in kind. I wish to say that in voting for the conference report, I shall not consider it a precedent on my part or on the part of this body for approving these features which are objectionable. The only warrant for going along with them is the fact that this measure is for a period of 1 year, for a period of one growing season, and therefore is stopgap in nature.

There is one point upon which I can scarcely refrain from commenting. It is that during the many political campaigns since 1952, there have been constant pledges and promises that there would be a restoration of 90 percent to 100 percent price supports. But here, for the first time when those campaign promisors have the unqualified and unrestricted power to do something about it and to achieve those goals, there is fixed, and there will be fixed by word of the Secretary of Agriculture now in office, not 90 percent, not 100 percent, but 74 percent of parity—$1.20 per bushel for corn. This indeed is revealing.

One final point: In the treatment received by this measure, whereby legislation is made possible, we find the strongest possible refutation of the plan suggested by the President in his message last week on the long-range farm bill, for farm bills to be formulated by commodity advisory committees and sent to Congress for its veto. Because unless we have that give-and-take between the House and the Senate, by a legislative body which represents all the people and all the interests involved in the agricultural program, it will be difficult, if not impossible, to reach a measure which will be sound and workable at the same time.

Let me say that I have prepared a brief statement in regard to how this plan will work and just what it provides. I ask unanimous consent that the statement be printed at this point in the RECORD.

Mr. President, I yield the balance of the time available to me.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

In brief, the conference report bill does the following:

1. Authorizes the Secretary to set for 1961 the price support for corn at not less than 65 percent of parity. Price support in 1961 is limited to a volume of corn and sorghum equal to the normal 1959–60 production of these grains.

2. Directs the Secretary to establish a voluntary special agricultural conservation and land retirement program for 1961 for corn and grain sorghum farmers. Under this program he would:

(a) Make payments to participating farmers in cash and/or in kind. Payments in cash and/or in kind on the first 20-percent reduction are calculated at the basic county support rate times 50 percent of normal production. Payments in kind on up to an additional 20-percent reduction are calculated at the basic county support rate times 60 percent of normal production.

(b) Require a 20-percent diversion of corn and grain sorghum acreage for payments in cash and/or in kind and authorize a 20-percent further diversion for payments in kind.

(c) Require in 1961 a net addition of acreage devoted to soil conserving practices in 1959–60.

(d) Require weed, insect, and rodent control on the retired acreage.

(e) Allow producers to meet the 20-percent land retirement requirement, in lieu of payments, by planting safflower, sunflower, sesame, and castor beans, if designated by the Secretary.

(f) Allow small corn-sorghum farmers—those planting 20 acres or less in 1959–60—to place their entire acreage in the program.

(g) Allow prepayment, of up to half of payments, before determination of compliance.

3. Provides that certificates issued to farmers would be expressed in dollars and redeemable in CCC feed grains—corn, oats, rye, barley, grain sorghum—at current market prices. The Secretary may assist in marketing certificates. Redemption of certificates must be within 30 days or certificates discounted. Provision made for sharing of certificates among all producers on the farm.

4. Requires that producers of corn, grain sorghum, and any other feed grain designated by the Secretary must participate in the land retirement program for corn and grain sorghum in order to be eligible for price supports.

5. Authorizes a general appropriation and allows CCC to pay administrative expenses from its funds. Also authorizes the incurring of advance obligations, plus the payment-in-kind costs.

6. Requires the Secretary to submit a report to Congress within 90 days showing the general operation and results of the program.

Mr. CARLSON. Mr. President——

Mr. DIRKSEN. Mr. President, I yield 2 minutes to the senior Senator from Kansas [Mr. CARLSON].

The PRESIDING OFFICER. The Senator from Kansas is recognized for 2 minutes.

Mr. CARLSON. Mr. President, I shall vote for the conference report. I believe that the conferees on the part of the Senate are entitled to much credit for bringing back the report in the form in which they have presented it today.

The first reason why I shall vote for the conference report is that the Secretary of Agriculture has stated that it should increase farm income by 12 percent; and I want the Congress to give the Secretary of Agriculture an opportunity to achieve that goal. As a matter of fact, I shall be very happy if that situation prevails.

The second reason is that this is a voluntary program. Every farmer will have an opportunity to review his farm

operations and then determine whether he wishes to enter the program.

I can assure the Senate that these farmers are good business people and understand farm operations; and, in my opinion, in view of the way this measure is now written, the reduction of acreage compliance with the program will be greatly limited.

If the committee had included in this measure a provision that the first 20 percent of acreage reduction would be paid in cash, I think the compliance would be much greater.

I have heard Senators make statements about 70 percent compliance. I do not wish to attempt to be a prophet, of course; but I think the Department will be happy if there is 33⅓ percent compliance.

Knowing the farm situation as I do, I sincerely hope the Secretary of Agriculture will not throw on the open market the grain he will be permitted to sell as the result of the acreage taken out of production, and thus force down the prices to an extent that will reduce the income of the farmers. The Secretary will have to determine that; and we have faith in him. Therefore, I shall leave it in his hands, in the hope that he will deal fairly with the farmers.

The PRESIDING OFFICER. The time yielded to the Senator from Kansas has expired.

Mr. ELLENDER. Mr. President, I yield 3 minutes to the Senator from Minnesota.

Mr. HUMPHREY. Mr. President, I first wish to commend the chairman of the committee and our conferees for the results they were able to obtain in this important conference on the 1961 feed grains program. The fact is that the Senate conferees were able to remove, it seems to me, many of the objections to what was described as being the authority of the Secretary to unduly depress the price of feed grains in case of failure of compliance.

The bill boils down to two or three simple propositions: The first is that it is designed to improve the price of feed grains. Second, it is designed to cut down production of feed grains, and thereby cut into the available surpluses in the hands of the Commodity Credit Corporation. Third, it is designed to give the Secretary of Agriculture a degree of flexibility in bringing about compliance with the acreage reduction and production reduction parts of the program.

The bill provides that, in order to come under the price support provisions, which are set at $1.20 on a national average for corn, a farmer must take 20 percent of the acreage which he had in production for the 2-year period 1959–60 out of production.

The bill provides that a farmer can take out, on a voluntary basis, another 20 percent. That latter 20 percent will be paid for by the option of either planting certain crops not in surplus, which are listed, or by payment in kind up to 60 percent of the average production of the acres retired.

The 20 percent that is taken out because of the compulsory features of the bill will be paid for at 50 percent of the normal production times the support price for the particular crop. This will be paid either in cash or in kind on the basis of a negotiable certificate.

If the farmer takes acreage out of production, he will receive a negotiable certificate. He may have the Commodity Credit Corporation act as his agent, and thereby sell into the market the amount of grain in storage presently by the Commodity Credit Corporation equal to the amount he is to be paid for compliance.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HUMPHREY. May I have half a minute more?

Mr. ELLENDER. I yield one-half a minute to the Senator.

Mr. HUMPHREY. He may, if he does not wish to do that, receive it all in kind.

The purpose of the measure is to stabilize the market, on the one hand, and not to give the Secretary too much power, in the event he wanted to be indiscreet in any way in his exercise of the power—and I can assure the Senate he will not be. But, at the same time, it also gives the Secretary the authority to back up a crop reduction program by payment in cash or in kind, at the option of the farmer, when he asks the Commodity Credit Corporation to act on his behalf.

I wish to thank the chairman of the committee for doing what I think is a creditable job. The bill does not go as far as perhaps is required, but it is an emergency program for 1 year, and it deserves to be tried.

The PRESIDING OFFICER. The time of the Senator has again expired.

Mr. KUCHEL. Mr. President, the minority yields 3 minutes to the Senator from Indiana [Mr. CAPEHART].

Mr. CAPEHART. Mr. President, I wish to ask the chairman two or three questions. My first question is, Does the proposed legislation in any way affect the total amount which can be paid to an individual farmer?

Mr. ELLENDER. No. It does not limit the total amount which may be paid to an individual farmer.

Mr. CAPEHART. The Senator is aware of the fact that there is a law which limits the amount which can be paid to any one individual farmer. Is he not?

Mr. ELLENDER. There is no limitation provided in the bill. Limitations relating to participation in the Soil Bank Act programs do not apply to the bill.

Mr. CAPEHART. Under the proposed act, the Secretary can pay a farmer an unlimited amount. Is that correct?

Mr. ELLENDER. The amount is not entirely unlimited. The payment rate is limited but there is no overall limitation in addition to the payment rate limitation.

Mr. CAPEHART. My second question is, Soybeans, of course, are not affected in any respect. Is that correct?

Mr. ELLENDER. The Senator is correct. The law is not changed in that respect at all.

Mr. CAPEHART. My third question is, If a farmer reduced his corn production by 80 or 40 or 10 acres, could he feed cattle or livestock on the acreage, provided he did not grow any grass or any other crop that could be eaten?

Mr. ELLENDER. That matter would be left to the discretion of the Secretary of Agriculture. I doubt whether the Secretary would issue an order giving that kind of freedom, because in almost any part of the country grass does grow on the diverted acres.

Mr. CAPEHART. Suppose it could be proved that, so far as grains or other feed of any kind are concerned, the acreage would be as barren as is this floor.

Mr. ELLENDER. That situation might prove to be true in one case, and not in another. The law gives the Secretary authority in that respect.

Mr. CAPEHART. One of the possible troubles with the proposed law is that it gives the Secretary too broad power, in my opinion, with regard to conservation matters.

Mr. ELLENDER. The Senate version of the bill was specific in that it contained everything the Secretary could do.

Mr. CAPEHART. As the proposal now is before the Senate, it would be left entirely to the discretion of the Secretary. Is that correct?

Mr. ELLENDER. That is correct.

Mr. CAPEHART. I thank the Senator.

Mr. ELLENDER. Mr. President, I yield 4 minutes to the Senator from Missouri [Mr. SYMINGTON].

Mr. SYMINGTON. Mr. President, after many years on the Senate Agriculture Committee, it became my feeling that the basic problem facing agriculture is comparable to what often faces any other business, namely, the danger of excess inventories. So we face the problem of how to reduce those inventories, and also how to have a law which would assure these same inventories would never again reach the size they have attained in recent years.

In 1956 the price of corn was about $1.50 a bushel. In 1952 the price was considerably higher than that. In 1952 the Government inventories of corn amounted to 313.9 million bushels. In 1956 this had increased to 702.1 million.

In 1961 the Government inventories reached an all time high of 1,465.2 million bushels.

As the inventories of corn went steadily up, the price of corn and other feed grains received by farmers went steadily down. Many persons are sincere in believing that situation was due to the law. But after studying the matter, I am convinced it did not occur because of the law, but because of the way the law was administered.

Now, for the first time, we have a bill before the Senate which should make it possible, as I read it, for the Secretary of Agriculture to control at least to some extent, the future production of feed grains. I had hoped he would receive the same type and character of authority he asked for in the beginning, because I am certain with that type of authority he could have controlled production better than he can under the law we will pass today.

On the other hand, inasmuch as the price of corn has gone down steadily in recent years, and inasmuch as the amount of corn owned by the taxpayers has gone up steadily, I am convinced that the law which has been proposed by the Senate and House Agriculture Committees, the committee in this body being headed by the able Senator from Louisiana [Mr. ELLENDER], will be a step forward, not only for the farmer of this country, but also for the taxpayers, because the latter is the one who ultimately pays for all the surplus grain that goes to storage.

So I shall vote for the conference report. I do not think the bill is as good as it might be, but I am certain the results are going to be better in 1961, as a result of enacting this bill, than they have been in recent years.

I believe there is a good chance these gigantic stocks will go down, and as a result of the increase in price supports, the return to the farmer will go up.

Mr. KUCHEL. Mr. President, I yield 1 minute to the Senator from Connecticut.

Mr. BUSH. Mr. President, I announce my continued disapproval of the feed grains bill and the conference report and shall vote against the report. I ask unanimous consent that two telegrams be printed at this point in the RECORD following my remarks.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

HARTFORD, CONN., *March 17, 1961.*

Senator PRESCOTT BUSH,
Senate Office Building,
Washington, D.C.:

Urge that you oppose acceptance of conference committee report on H.R. 4510. In final analysis bill is not changed, bill will not reduce cost as much as claimed. Continues old price-support program with authority for Secretary to raise support levels for some feed grains. Such will more than offset attempts to reduce acreage. Northeast dairy and poultry producers will be adversely affected by higher grain prices, and possibility of increased competition from midwestern dairy and poultry production.

EDWARD F. DICKAU,
President, Connecticut Farm Bureau Association.

HARTFORD, CONN., *March 18, 1961.*

Hon. PRESCOTT BUSH,
Senate Office Building,
Washington, D.C.:

We greatly appreciate your action with reference to feed grains bill and urge you to continue to oppose the compromise bill.

Norman Little, Rocky Hill; Frank Morris, Wethersfield; David Anderson, Wethersfield; John Hays, Rocky Hill; William Collins, Rocky Hill; Frank Wurdig, Bloomfield; George Bragdon, Jr., Rocky Hill; Stephen Boyko, Windsor; Charles Canfield, Rocky Hill; John Lukens, Windsor; Robert De Pietro, East Hartford; John Meisterling, Rocky Hill; William D. Morgan, Wethersfield.

Mr. KUCHEL. Mr. President, if no other Senator desires to speak in opposition, the minority is prepared to yield back the remainder of its time, provided the majority does likewise.

Mr. ELLENDER. Mr. President, we have no time remaining.

The PRESIDING OFFICER. The time of the majority has expired. Does the minority yield back its remaining time?

Mr. KUCHEL. Mr. President, the minority does.

Is it in order, Mr. President, for the absence of a quorum to be suggested?

The PRESIDING OFFICER. It is.

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERTSON (when his name was called). On this vote I have a pair with the senior Senator from Mississippi [Mr. EASTLAND]. If he were present and voting he would vote "yea." If I were at liberty to vote I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. HUMPHREY. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Connecticut [Mr. DODD], the Senator from Mississippi [Mr. EASTLAND], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Tennessee [Mr. GORE], the Senator from North Carolina [Mr. JORDAN], are absent on official business.

I also announce that the Senator from New Mexico [Mr. CHAVEZ], is absent because of illness.

I further announce that the Senator from Texas [Mr. BLAKLEY], is necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee [Mr. GORE], and the Senator from North Carolina [Mr. JORDAN] would each vote "yea."

On this vote, the Senator from Vermont [Mr. AIKEN] is paired with the Senator from North Dakota [Mr. BURDICK]. If present and voting, the Senator from Vermont would vote "nay" and the Senator from North Dakota would vote "yea."

On this vote, the Senator from Connecticut [Mr. DODD] is paired with the Senator from Tennessee [Mr. KEFAUVER]. If present and voting, the Senator from Connecticut would vote "nay" and the Senator from Tennessee would vote "yea."

On this vote, the Senator from Texas [Mr. BLAKLEY] is paired with the Senator from New Mexico [Mr. CHAVEZ]. If present and voting, the Senator from Texas would vote "nay" and the Senator from New Mexico would vote "yea."

Mr. KUCHEL. I announce that the Senator from Vermont [Mr. AIKEN] is absent by leave of the Senate.

The Senator from Vermont [Mr. PROUTY] is absent by leave of the Senate because of illness.

On this vote, the Senator from Vermont [Mr. AIKEN] is paired with the Senator from North Dakota [Mr. BURDICK]. If present and voting, the Senator from Vermont would vote "nay" and the Senator from North Dakota would vote "yea."

The result was announced—yeas 58, nays 31, as follows:

[No. 21]

Chavez	Jordan	

So the conference report was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ELLENDER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MILLER. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a statement I have prepared in explanation of my vote on the conference report on the feed grains bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATION OF VOTE OF SENATOR JACK MILLER

I voted against the conference report on H.R. 4510, providing a special program for feed grains for 1961 because I am convinced the proposed bill is unfair, administratively unworkable, and worst of all will not result in reduction in production commensurate with the cost of the program.

The bill is unfair because it uses the 1959–60 crop acreage as a base. This discriminates in favor of farmers who have overplanted their farms with corn and who will thus have a high base for support prices, and against farmers who have used good crop rotation practices and will consequently have a lower base acreage for crops eligible for price support. I recognize that the bill provides that the Secretary may make adjustments in acreage for 1959–60 "to give due consideration to * * * crop rotation * * *," but without more specific standards such a provision is meaningless and administratively unworkable. The bill is unfair to grain farmers who do not have an option of being paid in cash or in kind on the first

20 percent of their retired acres. Instead, it is the Secretary of Agriculture who has been given the option of making payment in cash or in kind. Grain farmers are thus put at the mercy of the Secretary's discretion, and Congress itself has no way of knowing how much cash money will have to be appropriated.

The bill is administratively unworkable because of lack of specific standards and also because of use of the 1959–60 yield as a basis for payment of support prices and for retirement payments. In my own State of Iowa there are thousands of farmers who feed all of their grain. No one has any accurate statistics for their 1959–60 yields.

Finally, I do not believe the bill will bring about a reduction in production commensurate with the cost to our taxpayers. The bill limits support prices to the average yield per acre for 1959–60, but this will not result in complying farmers limiting their yields to such a base. They would be very foolish if they did not overplant as insurance against drought and other conditions so that their yields will give them the maximum yield for which they can receive price supports. The excess will either be sold in the open market or will be fed—adding to and not cutting down on the yield on the nonretired acres. Moreover, noncomplying farmers will be encouraged to overplant in 1961 in order to have a high 1961 acreage in case Congress uses 1961 as one of the base years in a long-range farm program.

In conclusion, I recognize that there can be honest differences of opinion on any measure such as this. However, there has been too much philosophy running through consideration of the feed grains legislation to the effect that "We must have a farm bill," "After all, it's only for 1 year anyhow," and "Regardless of its shortcomings there will be some improvement." In my humble judgment, we have too much bad legislation on the books already as a result of such philosophy. It is not fair to the farmers of America to have a proposition put to their representatives in Congress that "You will take this or nothing."

The PRESIDING OFFICER. Under the unanimous-consent request, the Senator from Oklahoma [Mr. KERR] is recognized.

TEMPORARY EXTENDED UNEMPLOYMENT COMPENSATION ACT OF 1961—CONFERENCE REPORT

Mr. KERR. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4806) to provide for the establishment of a temporary program of extended unemployment compensation, to provide for a temporary increase in the rate of the Federal unemployment tax, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, pp. 4541–4543, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, I call up the conference report on H.R. 4806, a bill to provide a temporary program of extended unemployment compensation, and to provide for a temporary increase in the Federal unemployment tax rate.

The Senate made four principal amendments to the bill as it had been passed by the House. The first Senate amendment provided for a reduction of temporary unemployment compensation received by an individual because of the concurrent receipt by him of a social security benefit, a civil service retirement annuity, an amount under any other Federal or State retirement system, or under a private retirement plan contributed to by an employer. Under the Senate amendment, there would have been no reduction on account of disability benefits or on account of benefits received from the Veterans' Administration by an individual 65 years of age or over. The House conferees accepted this amendment with an amendment. Under the conference agreement temporary extended unemployment compensation will be reduced by amounts received as a retirement pension or annuity under a public or private retirement plan provided, or contributed to, by a base period employer. There would be no reduction for any retirement benefit received by reason of disability, or any amount received under title II of the Social Security Act. References to veterans' payments were deleted under the conference agreement, because such payments are not paid by reason of retirement, and so would not bring about any reduction in unemployment compensation. The House conferees insisted that social security benefits be eliminated from the amendment, and the Senate conferees agreed.

Under the new base-period-employer test agreed to by the conferees, an individual would not be permitted to receive unemployment benefits under the bill, without reduction for retirement benefits, if both types of payments arise by reason of service for the same employer.

To a great extent the conference agreement will stop abuses of the type described by the Senator from Delaware [Mr. WILLIAMS] during the debate on the bill. In no case will an individual be entitled both to temporary unemployment compensation under the bill and retirement benefits based upon service for the same employer. However, it is recognized that the conferees were unable to draft, in the time we felt we had available to us, a workable agreement which would have eliminated all the abuses the Senate had in mind when it passed its version of the bill.

The second amendment provided that information furnished to the Secretary of Labor with respect to the operation of this temporary program should include data procured on a sampling basis relating to the personal characteristics, family situation, and employment and experience of individuals receiving temporary benefits under this act. The House receded.

The next amendment made by the Senate would have made the temporary tax increase under the bill apply to calendar years 1961 and 1962 instead of calendar years 1962 and 1963. The House conferees insisted on their own provision which made the temporary tax increase apply to years 1962 and 1963. The Senate conferees agreed to the House position after, however, the House had receded with respect to certain technical amendments dealing with the date change.

The House conferees were not satisfied with their own provision which would have permitted an estimated $57 million surplus of tax collections over benefit payments to be distributed among all the States on the basis of their covered payrolls. The House conferees, in receding on these technical amendments, stated that a more equitable method could and would be worked out in the future for disposing of this anticipated surplus.

The last Senate amendment provided for an increase in the $350 million ceiling on amounts which would be available for grants to States for administrative purposes. Under the Senate amendment, a temporary increase to $425 million would have been provided for fiscal years 1961 and 1962. Under the conference agreement, the ceiling for fiscal year ending June 30, 1961, is raised to $385 million and for fiscal year ending June 30, 1962, the ceiling is to be $415 million. For fiscal years thereafter under the bill, the ceiling will revert to its current $350 million figure.

Mr. President, I recommend that the Senate adopt the conference report. We secured as reasonable a compromise as we were able to secure in the time that we felt was available to us with respect to the amendments which had been added by the Senate.

We had a compelling feeling, as did the House conferees, that there is a great need for this legislation. The Senate had passed the bill as I have outlined, with certain changes from the provisions in the bill sent to us by the House. However, we were unable in the time allowed to bring about, through the negotiations we had, further concessions from the House conferees than those outlined in the remarks I have just made.

Therefore, because of the compelling need which I and the majority conferees feel exists for the benefit of these people, and in spite of the fact that its language in its entirety does not conform to the views of a majority of the Senate conferees, it is my recommendation for and on their behalf that the conference report be approved.

Mr. KUCHEL. Mr. President, under the unanimous consent agreement the time is divided equally and controlled by the majority leader and the minority leader, without any indication that it represents a cleavage in the Senate on the report. The minority leader allots 2 minutes to the Senator from Kansas.

Mr. CARLSON. Mr. President, as a conferee who signed the conference report I wish to make the statement that during the committee deliberations on the bill and during the debate on it in the Senate, and on the various amendments, I supported the Byrd amendment, and that I supported the Williams amendment which would have added a provision to make the tax collections current. I supported the Williams amendment which tried to correct some of the abuses

that I believe prevail in the unemployment compensation program.

I signed the conference report for the reason that I believe there is urgent need in the Nation to take care of groups of unemployed people whose unemployment rights have run out, and because I believe the additional 13 weeks should be helpful.

I want the RECORD to show very plainly that I do not feel that this should be recognized, or that my vote should be recognized, as in support of a Federal program for the unemployment compensation program as a whole. I would be opposed to federalizing the system. I am opposed to Federal standards. This is a State program, and should be a State program, not a Federal program. When future programs come before the Senate I expect to so vote.

I wish the RECORD to show that I signed the conference report for the reason that I believe there is a need for it, and I did not want to delay any action on it any further.

Mr. KERR. Mr. President, I yield 5 minutes to the Senator from Ohio.

Mr. YOUNG of Ohio. Mr. President, I support this conference report. An estimated half million American workers have exhausted their unemployment benefits and are living without income. An additional million and a half workers will be in the same predicament within the next 6 months.

In my home State of Ohio over 229,000 workers are now collecting unemployment compensation. These people represent over 9 percent of those eligible for these benefits. Over 13,000 Ohioans exhausted their benefits last January. Over 55,000 exhausted their benefits within the last 6 months. The same situation is true, to a greater or lesser degree, in practically every State in the Union.

Mr. President, these are the statistics. However, unemployment of men and women means more than statistics. Unemployment is human beings in distress. Unemployment means borrowing money. Unemployment is bewilderment, frustration, and boredom because there is no work to be found. It is distress, anxiety, broken homes, and juvenile delinquency. It is loss of dignity.

Mr. President, in my view, involuntary unemployment is a great moral wrong. If there were no other reason for adoption of the conference report, compassion for the physical suffering of the families of millions of workers would be reason enough. For these families it will mean subsistence for a few weeks longer while the breadwinner looks for a job.

Unemployment is not a local problem or a problem for the States to deal with individually. It is a national problem. During wartime, nobody asked the now unemployed workers in Pennsylvania or Ohio whether they were Pennsylvanians or Ohioans. They were Americans. Likewise with the onslaught of the recession which is in every way a dangerous foe, these workers are Americans and should be helped by their Federal Government as well as by their State and local governments.

Our society and economy today are too complex for us to look upon unemployment as a local problem. Unemployment in the automobile industry in Michigan directly affects the farmer in Iowa and California. A plant shutdown in Conneaut, Ohio, can eventually mean loss of jobs or income to citizens of other States who never heard of Conneaut. These examples serve to emphasize the complicated interrelationships that exist in our economy, and in fact, force each American to be his brother's keeper.

Mr. President, unemployment compensation has been the economy's first line of defense against loss of income that accompanies loss of jobs. Loss of income for millions of Americans not only causes personal hardship, it also depresses consumer spending, sending the economy into a downward spiral and thus delaying recovery.

Unemployment compensation was designed as a cushion during periods of recession and depression. It was one of the many built-in stabilizers passed during the New Deal era, so-called. Now, over 20 years later, we are faced with the fact that it does not go far enough under present economic conditions. Through adoption of the conference report, we can insure that this stabilizing function will continue long enough to give the new administration of President Kennedy a chance to cope with problems at hand and for the natural recovery forces at work in our Nation to assert themselves.

Mr. President, I urge that the conference report be adopted and that we get on with the business of restoring our economy and our people to prosperity and general well being. This legislation is vital for eventual success.

Mr. KUCHEL. Mr. President, I yield 2 minutes to the distinguished Senator from New York.

Mr. JAVITS. Mr. President, we have heard much about antirecession programs. This is really the first antirecession bill. A number of bills are being flagged as antirecession measures, perhaps to get them by under a "rush" tag, when actually they are not antirecession bills. However, this bill is an antirecession measure.

I think Congress is entitled to praise and approval for having brought this bill to fruition. It is absolutely essential to any concrete underpinning for our economy to make certain that workers who are unemployed through no fault of their own do not suffer in so affluent a society—to paraphrase the title of a book—as ours. So the general purpose of the proposed legislation is very much to be commended.

Second, I express the hope that my State of New York will be, perhaps, the first to participate. Our legislature will adjourn this weekend. Both my colleague from New York [Mr. KEATING] and I have talked with Governor Rockefeller concerning the passage of legislation which would make it possible for New York to take advantage of this act, in lieu of what was called trigger-point legislation in New York, by which the State itself would have endeavored, notwithstanding the overwhelming burden, to fulfill some of the responsibility which is provided in the bill before the Senate.

Finally, I think the conferees have reached an admirable solution of the pension problem. I am one of those who voted "nay" on theat amendment, because I thought it went much too far in penalizing the recipients of social security. Indeed, I hoped and believed that if there were a substantial negative vote, it would indicate that we were disquieted about the matter, notwithstanding the sensational disclosures for which great credit and tribute are due the distinguished Senator from Delaware [Mr. WILLIAMS]. This problem has been solved, because obviously there was no division between those who were disquieted and those who favored the amendment in its previous form. So I believe an excellent compromise has been reached.

Congress has shown that in the pinches it acts with responsibility. I think it should be noted for the country and the world that the U.S. Congress knows how to assume and to carry responsibility when a responsibility is clearly ours.

Mr. CARLSON. Mr. President, I yield 15 minutes to the distinguished Senator from Delaware [Mr. WILLIAMS].

Mr. WILLIAMS of Delaware. Mr. President, first, I believe the conference in accepting the amendment correcting the abuse of the compensation system through excessive retirement payments, worked out an excellent solution. I think it is one which will do much to maintain the prestige of the program.

In this connection, I ask unanimous consent to have printed in the RECORD a letter which I received from a member of the staff, and which I asked him to prepare after reading the colloquy which I had earlier had with the distinguished Senator from Rhode Island [Mr. PASTORE] to make certain that we had given a proper interpretation of the amendment on the floor. The amendment approved exempts also all social security pensions, veterans' pensions, and all disability pensions. Likewise, it does not affect survivorship benefits.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON
INTERNAL REVENUE TAXATION,
Washington, March 20, 1961.

HON. JOHN J. WILLIAMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILLIAMS: In accordance with your request, the staff has examined the exchange between you and Senator PASTORE during the debate on the amendment to the Temporary Extended Unemployment Compensation Act of 1961, which would impose a limitation on payments of compensation to individuals entitled to retirement benefits. During the exchange, Senator PASTORE inquired as to whether the amendment would affect pensions or annuities purchased exclusively by employees.

It is correct, as you stated to Senator PASTORE, that the amendment does not apply to any pension, annuity or other payment received by an individual to which he exclusively contributed without any assistance from the employer. The amendment applies

only in the case of retirement benefits under a plan provided, or contributed to, by an employer.

Sincerely yours,

COLIN F. STAM,
Chief of Staff.

Mr. WILLIAMS of Delaware. Mr. President, while I am very well pleased with that particular phase of the conference report, I regret that the conferees would not accept the other amendment which the Senate approved. This second amendment would have put the program on a pay-as-you-go basis. Under the bill as it passed the House and as it passed the Senate, there was no difference in the benefit payments. Under both approximately $1 billion would be paid out in benefits through the 50 States between now and June 30, 1962. However, under the bill as it passed the House there is no provision whereby any of the tax to be paid under the bill would be collected until January 1963, or until 6 months after all benefits had been paid out.

The House bill did contain a built-in tax increase, but that tax will not be collected until 6 months after all the benefits have been paid out. In the Senate, I offered an amendment which would have advanced the effective date of the tax increase 1 year, whereby the tax rate increase would go into effect on the same day the benefits went into effect. This would have put the program on a pay-as-you-go basis. The conference saw fit to leave this provision out, which means that the Government will now borrow the money to advance these payments.

In his speeches the President has said much about his desire to keep his administration on a pay-as-you-go basis. I am very much disturbed to learn that he is now departing from the promises which he has been making. Particularly was I disturbed when I learned that no method was provided in the bill to pay for the benefits which will be made available other than to appropriate money. The only way in which this money could be obtained by appropriations would be to borrow money and further increase the national debt. In turn, that would increase the interest charge as well as the cost of the program to the employers of America.

This is but a part of a pattern of fiscal irresponsibility on the part of the New Frontier administration. Surely this measure was never intended as a pump-priming bill. The bill was supposed to be for the benefit of those in the labor force who, through no fault of their own, were unable to get work. If it were such and worthy of enactment, then certainly it was worthy of being paid for. I would not be so much disturbed except that this is a part of a general pattern which we find unfolding as we cross into the New Frontier.

For example, three bills are now pending before the Committee on Finance and the Committee on Ways and Means. All of them are on the "must" list of the administration. I refer, first, to H.R. 4806, which we are dealing with today and which provides $1 billion of benefits to be paid in the next 15 or 18 months.

Second, H.R. 4571 proposes to raise the social security benefits effective April 1, 1961, to the beneficiaries under the social security program. Under that bill, $1 billion a year would be spent. So within the next 18 months, $1,750 million would be paid out under that bill.

Third, we have Senate bill 909 and a companion bill in the House, the administration's so-called medical care bill, which, if enacted as the administration requests, would cost another $1 billion during the calendar year 1962. These three bills alone, if enacted, as requested by the President, would distribute in benefits $3¾ billion during the next 2 years, or before the next election; but not one dime of the taxes would be collected on any of these proposals until 1963, or 60 days after the 1962 election.

Mr. KERR. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I shall yield in just a moment.

Mr. President, two of these bills contain provisions by means of which the social security tax on the employers and the employees will be increased; and the first one contains a provision by means of which the employment tax on the employers would be increased. Supposedly those increases would be adequate to pay the cost of these bills. However, I call particular attention to the fact that in all three instances, under the plan of the administration, not a dime of tax would be collected under any of these bills until 60 days after the 1962 election, which would be January 1963. If the administration wants to send us these bills and wishes to recommend that Congress enact them, the President should put the price tag on each, and in each case the tax increase should be effective on the same day that the bill would go into effect.

If, on the other hand, they are being offered purely as pump primers, they should be labeled accordingly.

Now I yield to the Senator from Oklahoma.

Mr. KERR. Will the Senator from Delaware state again the bills he has listed?

Mr. WILLIAMS of Delaware. Yes. The first is House bill 4806, or the conference report, which we are now considering. It will result in payments of $1 billion between now and next July.

The next one is House bill 4571, the social security bill, under which it is estimated that $1,750 million would be paid during the next 18 months.

Then there is Senate bill 909 and the companion House bill, which would put medical care under the social security system, as recommended last year by President Kennedy, and it is estimated to cost $1 billion annually.

Mr. KERR. What is the total to which the Senator from Delaware has referred?

Mr. WILLIAMS of Delaware. The total of the three, if they are enacted now in the way President Kennedy suggests, would be $3,750 million, to be paid before the next congressional election. It is true that each of those bills has a built-in tax increase provision which presumably would pay the cost of the bills, but in each instance the tax increase would not go into effect until January 1963, after all these payments had been made. In the meantime, the payments would be financed from the general fund or from the trust fund.

Mr. KERR. I thank the Senator from Delaware.

Mr. BENNETT. Mr. President, will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. BENNETT. With respect to the pending conference report on House bill 4806, do not we have a situation in which the benefits are to be established and paid out and ended, and then the tax will start and will run until all of it is paid?

In my part of the country we have an old expression of "paying for a dead horse." Will not that be the effect in this case?

Mr. WILLIAMS of Delaware. Yes. All the benefits are supposed to be paid out by June 1962; and this program will, for all intents and purposes, be dead as of that date. The employers will begin to pay for half of it in 1963, and they will pay for the other half in 1964. No tax will be collected until 6 months after all benefits are paid.

In the White House messages which accompany the requests for these programs, there is much use of the phrase, "This, in itself, will not unbalance the budget." The substance of that phrase has almost habitually been used in those messages. That excuse reminds me of the old question, "Which straw breaks the camel's back?"

I do not think any of these measures or programs can be considered entirely apart from the others; and in connection with that point, I shall call attention to some other bills which will add to the total deficit for fiscal 1962.

Let us not be fooled. On the New Frontier we are again witnessing an attempt to lead the American people down the path of government red ink.

Mr. CARLSON. Mr. President, at this point will the Senator from Delaware yield to me?

Mr. WILLIAMS of Delaware. I yield.

Mr. CARLSON. In regard to the three bills the Senator from Delaware has mentioned, and particularly in regard to the pending conference report on House bill 4806, under which the tax would be deferred until 1963, is it not true that under the 1958 act by which we authorized the States to borrow from the Federal Government, for social security purposes, those taxes also will begin to be paid in 1963?

Mr. WILLIAMS of Delaware. They will be paid in 1964, on 1963 income, if the States owing the money take advantage of the greatest possible delay—which most of them seem to be doing; and that will make a double tax increase as of that 1 year for all employers in that State.

Mr. CARLSON. Is it not true that 17 States would be in that position, and would be paying in 1963 for the program we are considering at this time, and also would be collecting at the same time for the payments authorized in 1958—in other words, for the amounts of money

they already have borrowed from the Federal Government?

Mr. WILLIAMS of Delaware. That is correct, and it is for that reason that the employers almost overwhelmingly urge that we put this program on a pay-as-you-go basis.

As I have stated, the President keeps emphasizing in his messages which accompany his proposals that no one of these requested programs will in itself unbalance the budget.

Yesterday the President requested an additional $1 billion of defense funds; and in connection with that request he says that amount, of itself, will not unbalance the budget.

Surely someone in the White House must be keeping a running total of the cost of these vast new spending plans on the New Frontier.

In addition to the three measures which, in total, will cost $3,750 million if enacted, I shall now list a series of other suggested spending proposals of the administration for which no compensating revenue is provided.

Today he is asking an additional $1 billion in defense funds.

The Senate has already passed the administration-requested depressed areas bill for which the cost will be $394 million.

The cost of House bill 4884 to aid dependent children will be $305 million.

The federal aid to education bill in 1961 will cost $666 million, and under that bill the expenditure in 1962 will be $766 million—or a total of $1,432 million during the first 2 years. I assume that the President is sincere when he requests the enactment of these programs, but I ask again, "What are the administration's plans to pay for them?"

Today, the Senate has agreed to the conference report on the so-called feed grains bill. In one of his messages the President stated that if Congress enacts the agricultural program he recommends there will be a saving of $500 million as compared with the Eisenhower budget, but yesterday President Kennedy stated in another message which went to the Appropriations Committee that he is asking for an additional $440 million for the Department of Agriculture over and above the amount of the Eisenhower budget.

If that is the way we are going to save money under the New Frontier, we shall "save" ourselves into bankruptcy.

President Kennedy has asked for $442 million extra for the Department of Agriculture, and $41 million extra for the Department of the Interior, and $11 million extra for the U.S. Information Agency, and $40 million extra for the Peace Corps, and $51 million extra for the educational television bill which the Senate passed yesterday, and the cost of the public works bill S. 861, which is recommended by the administration, would cost in 1961 another $775 million.

The total cost of these latter listed bills is about 4½ billion, which, when added to the cost of the first three bills brings the total to $8 billion—extra expenditures of $8 billion within the next 2 years and not one provision by the administration to raise that money.

Frankly, this widely heralded New Frontier is beginning to look more and more like a warmed-up version of the deficit spending policies of the old Fair Deal and New Deal administrations.

All these benefits have been promised to the American people as representing the generous gifts they will receive on the New Frontier; but President Kennedy and his New Frontiersmen do not explain the cost of their programs. On the contrary, the President keeps emphasizing that any one of the programs can be enacted and that each in itself will not unbalance the budget.

But, Mr. President, if the latter list of bills requested by the administration is enacted the additional cost to the American people will be $4,491 million, and if that additional amount is added to the cost of the three bills to which I first referred—which in total will cost $3,750 million—the total will be $8,100 million. This is the minimum cost of the programs which the Kennedy administration has urgently asked Congress to enact as part of its program under the New Frontier. These funds would be spent in the next 18 months although the Kennedy administration has not yet sent to the Congress a recommendation for raising the money. This would mean that we would have an additional $8 billion or $10 billion added to next year's deficit.

I think all should realize that although we are now receiving a great deal of lipservice from the White House in regard to balancing the budget, it is the same kind of lipservice that we received in 1932 and in 1948. In that connection I shall read from the Democratic platform of 1932. Far be it from me on this side of the aisle, generally to quote, the Democratic platform, but I read it at this time because I believe attention should be called to it. Apparently many persons, including the administration, have forgotten it.

I now read from the Democratic platform of 1932:

> We favor maintenance of the national credit by a Federal budget annually balanced on the basis of accurate executive estimates within revenues, raised by a system of taxation levied on the principle of ability to pay.

That was the platform upon which the New Deal administration was elected in 1932.

Subsequently, in 1948, the candidate on the Fair Deal platform said:

> We pledge the continued maintenance of those sound fiscal policies which under Democratic leadership have brought about a balanced budget and reduction of the public debt * * *.

Again, Mr. President, at this very time we are getting from the White House similar statements that "we favor a balanced budget."

Apparently, they favor a balanced budget only when speaking on the political platforms.

We have had too much of this type of balancing the budget—with nothing more than lipservice. Since 1900 the Democratic Party has had control of our Government for 26 years. I do not charge them with responsibility for the 80th Congress; President Truman said he did not wish to accept any responsibility for the 80th Congress, and as a Republican I am glad to accept the results of that Congress for our party. During those 26 years, on only three occasions—only three times since 1900—when the Democratic Party has had its candidate in the White House has that party ever balanced the budget or lived within its income.

On the other hand, during those years, by means of deficit spending they have spent $268 billion more than was taken in during the 26 years they were in office.

It is true that $198 billion of that occurred during the war years, but $70 billion of that deficit was created during peacetime.

I believe it is well to call attention to this past record, because, as one Member of the Senate, I hate to see the Government launch on another round of deficit spending.

Today we hear a great deal about the large interest charges on the national debt. Last year those interest charges amounted to approximately $9 billion—a very large amount. But to those who have been shedding crocodile tears for the taxpayers because of those large national-debt interest charges I point out that 95 percent of the $9 billion interest charges on this national debt goes to pay the interest on the portion of the national debt which was created under the Democratic administrations. It is very appropriate that sympathy for the high interest charges and deficit spending comes from the other side of the aisle. They created the most of this debt. I shall not vote for any measure under this hypocritical method of passing something out to the American people without at the same time including in the bill a provision by means of which we are going to pay for it.

Mr. President, the United States of America cannot spend itself into prosperity on borrowed money. It is time we recognized that fact. The attempt to do that has been made before. In 1932 the administration launched into a period of deficit spending. What happened to unemployment? In 1940, after 8 years of deficit spending, trying to spend ourselves into prosperity, 14.6 percent of our labor force was unemployed; 17 percent was unemployed in 1939; 19 percent was unemployed in 1938. It is well for us to learn the lesson of history that we cannot borrow money and spend ourselves into prosperity, as a nation or as a State, any more than one can as an individual.

The American people in very plain language should be told that this is apparently the beginning of the launching into another era of excessive deficit spending.

I think we should recognize that fact as we vote on the pending report and on many of the other measures being proposed by the administration.

I serve notice that to all these bills I shall offer amendments similar to the one I have been discussing, providing that the proposed tax goes into effect on the same date as the benefits. If we are going to pass such bills we should at least put a price tag on them. As candidates stand on the platform and brag about

all the benefits that have been given to the people, they should also say, "We have raised your taxes accordingly." Let the American people know that they, and they alone, are paying for the new programs. The Federal Government does not have access to any mysterious source of income. The people shall ultimately have to pay for these programs by taxes, or we must launch into another era of deficit spending and charge the cost to our grandchildren. Then we go into another round of inflation.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. BENNETT. Earlier, in the discussion on H.R. 4806, the Senator pointed out that, by the terms of the bill there was provision—which his amendment would have cured, but, unfortunately, it was rejected—that the benefits of the bill will be provided between now and the next election, and the bill will be paid for after January 1963.

Mr. WILLIAMS of Delaware. That is correct.

Mr. BENNETT. I wonder if our friends on the other side of the aisle have forgotten that there is to be an election in 1964. I wonder how much political hay can come out of the fact that for 2 years Americans will be carrying taxes to finance a bill the benefits of which will be advanced?

Mr. WILLIAMS of Delaware. I advanced that argument to a Senator on the other side of the aisle. He suggested that by letting the tax go into effect in January 1963, perhaps by the time of the 1964 elections the people will have forgotten it.

Mr. KERR. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 10 minutes.

Mr. KERR. I had not known we were going to be in the position of either being subjected to or having the privilege of listening to the dissertation of the distinguished Senator from Delaware on fiscal responsibility, or lack of it, by the incumbent in the White House today and the Democratic officeholders in the past 28 years. But since that has been the diet made available to us, I want to say a few words about fiscal responsibility.

The Senator from Delaware talks about rushing into another era of deficit spending. I call attention to the fact that we have just gone through 8 years of the highest peacetime deficit spending in the history of this country. The largest peacetime deficits, in the state of balances of cash income and outgo, were those of Mr. Eisenhower's two terms, which have just terminated.

The Senator from Delaware talked about excess interest. I am glad he mentioned that factor. The total public and private debt in the United States today approximates $1 trillion. The interest is paid by the American people, either as borrowers, or taxpayers. Insofar as the cost to them is concerned, there is no way to differentiate between the two, because if there is a necessity to pay interest on mortgages on homes, on appliances in the home, on personal loans, or any other indebtedness, or in the form of taxes collected by the Federal Government to pay interest on the national debt, or by the States to pay the debt on the State debts, the American people pay for it. So in the final analysis, the interest paid by the American people is an item of expense in their personal budget, whether it goes into their own indebtedness or the indebtedness of one of the branches of their Government.

The overall interest rates at this time are something like 2 percentage points above what they were when Mr. Eisenhower was elected President in 1952. Add the additional interest costs on the $1 trillion of public and private debt today, and we get the astronomical figure of $20 billion a year. The minimum amount of additional interest paid by the people today on both the public and private debt, by reason of the fiscal and monetary control policies of the Eisenhower administration, amounts to $15 billion a year. That interest rate is locked into the total debt, public and private, and is a part of that debt. So that for years in the future the American people will be paying $15 billion or more a year in excess interest on their private and public debt than they would have paid had the rates of interest not been affected by the Eisenhower administration, as those interest rates were changed by reason of the fiscal responsibility and monetary control policies of the Eisenhower administration. So that $15 to $20 billion a year penalty in interest rates on the part of the American people is one of the elements of the Eisenhower heritage left to the American people by reason of the fiscal and monetary control policies of the last 8 years.

I am sure the Senator from Delaware did not mean to leave the impression that the conference bill as now before the Senate does not have provision for revenues to pay the cost of the bill. I voted for the amendment to make the tax collectible in 1961 and 1962. We sought to secure agreement of the House to that provision.

We failed. That does not change the fact that the tax-raising provisions to pay the costs of the program were written into the bill itself. It is true the tax would be applied for the years 1962 and 1963, but therein is one of the great differences between the Unemployment Compensation Act of 1961 and the Unemployment Compensation Act of 1958, which had no self-liquidating tax-collecting provision written into it to pay the cost.

Reference was made to S. 909 and to H.R. 4571, the latter being a bill for expansion of social security benefits and coverage, to go into effect on one date with the tax revenue to start on another date. The Senator talked about the bill as one to create deficit spending.

I am sure the Senator is aware of the fact that the provisions in the bill are such that the money would not be spent from the Treasury, or from the cash budget of the Government, but instead would come from the social security trust fund. Therefore, the expenditure would not be in the form of deficit spending.

The same is true with respect to S. 909.

Whether the two bills are meritorious or not will be a subject to which Senators will address themselves at the appropriate time, but the $2 billion cost of those two bills in the time referred to by the Senator from Delaware would not result in any deficit in the general revenue fund, and I am sure the Senator from Delaware is aware of that fact.

So, Mr. President, with reference to the three bills the Senator mentioned, two of the bills involve moneys not to be paid out of the general revenue fund, which means they should not be the basis for the charge of deficit spending, and the other involves funds to be paid out of the general revenue fund, which would require an increase in the amount of money going from the general revenue fund, but has an offset through the positive fact that the measure to produce the revenue to pay for the cost is written into the bill.

The Senator referred to the rate of unemployment in 1940. No Senator regrets any more than I do that after 8 years of the Roosevelt administration and leadership we had a rate of unemployment of 14.6 percent of the labor force. But, Mr. President, when Mr. Roosevelt went into office the percentage of unemployment was 24.9, on the basis of the record in the Department of Labor. I am forced to say that as I viewed the situation, from where I was in 1932 and 1933, my impression was then, and it still is, that the rate of unemployment was much higher than that figure.

Unfortunate as it was that the rate of unemployment was still 14.6 in 1940, it had been reduced from 24.9 percent in 1933. The present rate of unemployment, in the vicinity of 8 percent or approaching it, has grown from a rate of around 3 percent in the last Democratic year preceding the present Democratic year.

I referred a moment ago to the fact that the 8 years of the Eisenhower administration were 8 years of the largest peacetime deficit spending in the history of this country.

That is true, notwithstanding the fact that more taxes were paid by the American people in those 8 years than had been paid by the American people in the 173 years prior thereto, including the 20 years of the Truman and Roosevelt administrations and the costs of World War II. It was the largest peacetime deficit in history.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. KERR. Mr. President, I yield myself an additional 3 minutes.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for an additional 3 minutes.

Mr. KERR. Mr. President, in those 8 years the Government collected more money in taxes from the American people than had been collected in the 173 years prior thereto since the Government was founded.

I had not thought that these remarks were appropriate to the conference report, and I would not have made them at this time had they not been provoked

by the discussion of the distinguished Senator from Delaware. The Senator certainly had a perfect right to make his remarks. I cherish my friendship for him. The Senator knows I have great respect and regard for him. In view of the range of his remarks, their significance, implications, and context, I felt that these few brief remarks should be put into the RECORD, to keep the record on fiscal responsibility straight.

Mr. BENNETT. Mr. President, will the Senator yield before he takes his seat?

Mr. KERR. If I am to yield at all I shall have to do so before I take my seat. I yield.

Mr. BENNETT. The Senator mentioned the unemployment rate in the year 1952. Was the United States in war in Korea in 1952?

Mr. KERR. I believe that is correct.

Mr. BENNETT. It seems to me I remember that the United States was at war then.

Mr. KERR. Yes.

Mr. BENNETT. I thank the Senator.

Mr. KERR. I say this to the Senator: At no time in the years before Korea or after Korea did the unemployment rate reach its current level, nor had it been at the current level since 1940.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. KERR. I yield to the Senator from Delaware.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. CARLSON. Mr. President, does the Senator from Delaware desire time?

Mr. WILLIAMS of Delaware. Yes.

Mr. CARLSON. I yield 5 minutes to the Senator from Delaware.

The PRESIDING OFFICER. The Senator from Delaware is recognized for 5 minutes.

Mr. WILLIAMS of Delaware. Mr. President, I am sure the Senator from Oklahoma desires to have the record completely straight in connection with these figures on unemployment.

I invite the Senator's attention to the fact that the average unemployment rate in the year 1960, based upon the Bureau of Labor Statistics, was 5.6 percent. The average unemployment rate for the year 1949, which was the last Democratic year before the Korean War, was 5.9 percent, which is higher than the rate in the year 1960.

I do not think my friend from Oklahoma would boast of the fact that in the preceding administrations, either in 1940 or in 1949, the unemployment was cured by war. I know the Senator does not wish to leave that implication, and certainly I do not; but the fact remains that deficit spending did not cure the unemployment in either of those periods. I emphasize again—our country cannot spend itself into prosperity on borrowed money. This has been proven by the record of the 8 years of the New Deal administration. It was proven again in 1949.

It is true that in 1958 we had the largest peacetime deficit in the history of this country. I accept that as a responsibility of the Eisenhower administration.

But the Senator from Oklahoma did not tell the whole story.

I also invite the attention of my friend to the fact that since 1900 the Republican Party has had control of our Government for 34 years. During those 34 years the Republican Party balanced the budget 22 times, while the budget was balanced by our friends on the other side of the aisle only three times.

In the 22 years the Republican Party balanced the budget the surpluses totaled $21,990 million. In the 12 years in which the Republicans did not balance the budget, including 1958, which had the largest peacetime deficit, the total deficit was $35,400 million. Therefore, from the 34 Republican years of operation of the Government, including those of the Eisenhower administration, there was a total deficit of only $13.4 billion.

On the other hand, during the 26 years of Democratic administrations the Democrats spent $268 billion more than they took in. They balanced the budget only three times.

Ninety-five percent of our present $9 billion interest charges go to pay interest on that portion of the national debt created by the Democratic Party.

This is the reason that I think it is necessary to caution the Senate and the country against the fact that we are today apparently launching into another era of deficit spending.

It is true, as you stated and as I pointed out in my remarks, that the cost of the benefits under two of the bills which I mentioned would be paid out of the trust fund of social security instead of from the general fund. What difference does that make? Since when did the trust fund not belong to the contributors of the social security system? If that is not deficit spending, by such a line of reasoning we could use all of the $20 billion in the trust fund and balance the national budget. I know the Senator from Oklahoma does not mean to imply that. Certainly if we spend from the trust fund without providing a way for reimbursement we are only postponing the day the American people will have to provide the money in the form of additional taxes.

The point I am making is that the Administration is making elaborate plans to spend $8 billion during the next 2 years, but it makes no plans to raise the revenue until after the next election.

The Eisenhower administration policies regarding financing our national debt were strongly endorsed by many Senators on the other side of the aisle as well as by Senators on this side of the aisle. As evidence of that statement I call attention to the fact that since January 1961 when President Kennedy took office, his appointments to the Cabinet, from the Office of Secretary of the Treasury right down to the man who has the responsibility of management of the debt, were all men who strongly endorsed the monetary policies of the preceding administration. These men appeared before our committee, of which the Senator from Oklahoma is a member, and strongly endorsed the monetary policies of the previous administration and indicated that they would continue those same policies. They are being continued today. The Senate Finance Committee unanimously confirmed those who are pledged to continue to carry out the sound fiscal policies of the preceding administration. Certainly we would all like to have lower interest rates, if they could be obtained in the borrowing of money. But money is a commodity, and if we are going to have another round of deficit spending such as we had even in 1958, we will find that the extra demand for money by the present administration will again call for higher interest rates.

Therefore, it is important that we keep strong control over our budgetary expenditures.

Mr. KERR. Mr. President, in order to set the record straight, I wish to say that I neither endorse the fiscal policies of the preceding administration, nor have I been able to find the slightest evidence that they were sound. On the contrary, as I have so often noted on the floor of the Senate, I thought they were very unsound fiscal and monetary control policies.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. WILLIAMS of Delaware. I did not mean to imply that the Senator from Oklahoma had endorsed those policies in any of his remarks. I merely wished to point out that he supported the confirmation of the appointees of President Kennedy who did endorse such policies.

Mr. KERR. I believe the inference could be drawn from what the Senator said, and I wish to make perfectly clear that the inference is not justified, and that my position and record are to the contrary.

Mr. CARLSON. Mr. President, if no Senator wishes to speak further on this side, I yield back the remainder of my time.

Mr. KERR. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the conference report on H.R. 4806.

The report was agreed to.

Mr. KERR. Mr. President, I move that the vote by which the conference report was agreed to be reconsidered.

Mr. CARLSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEAVE OF ABSENCE

Mr. HICKENLOOPER. Mr. President, I ask unanimous consent that I may be absent from the Senate the remainder of today, tomorrow, and the remainder of the week.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICAN COALITION OF PATRIOTIC SOCIETIES 32D ANNUAL LUNCHEON MEETING

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent to have printed

in the body of the RECORD resolutions adopted at the 32d annual luncheon meeting of the American Coalition of Patriotic Societies, at the Mayflower Hotel, Washington, D.C., on February 2, 1961.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTIONS OF AMERICAN COALITION OF PATRIOTIC SOCIETIES

MEETING THE CONSTITUTIONAL CRISIS

Whereas the people of the United States now face a serious constitutional crisis in which they have to deal with increasing centralization of power in Federal agencies with corresponding loss of cherished liberties as individuals and encroachments on the rights and powers of the governments of the States as guaranteed under the Constitution of the United States; and

Whereas some of the most serious of these developments are attributable to attempted usurpations on the part of members of the Supreme Court; and

Whereas a long train of illegal, unconstitutional rulings, if allowed to be treated as law, either through action or inaction, will result in the overthrow of our form of limited constitutional government in favor of an unlimited and absolute centralized autocracy: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., commend the following plan of action:

1. That the several States, in their highest sovereign capacities through their legislatures, pass appropriate acts declaring the illegal rulings of members of the Supreme Court as beyond the Court's constitutional authority, invalid, and not law within the jurisdiction of the State concerned, thereby clarifying and making definite for the benefit of law enforcement officers so that they can know what is the law in the given State.

TWENTY-THIRD AMENDMENT

Whereas America's greatness is the product of a people's faith in constitutional law, designed to protect the property and enterprise of each citizen from political invasion and conquest; and

Whereas our Government now operates 700 large businesses and each competes tax free with every phase of American private enterprise; and

Whereas the value of these Government-owned corporations is estimated at from $60 to $100 billion and if they were sold to private individuals or corporations, this amount of money could be used to reduce the national debt and these corporations would be placed on the tax rolls, paying corporation tax, city tax, county tax, and school tax: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., urges every State legislature to pass a resolution requesting the Congress of the United States to act favorably on House Joint Resolution 23, proposing an amendment to the Constitution of the United States relative to abolishing personal income, estate, and gift taxes and prohibiting the United States from engaging in business in competition with its citizens.

PARTICIPATION IN NATO CONVENTION

Whereas clause 7 of section 9 of the first article of the Constitution of the United States of America provides: "No money shall be drawn from the Treasury, but in consequence of appropriations made by law"; and

Whereas it has been settled by numerous decisions of the Supreme Court of the United States that under this section of the Constitution, Congress does not have the power to make appropriations of public moneys, except for public purpose; and

Whereas Public Law 86-719, to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted; and

Whereas this law provides that the Commission will travel and act as private citizens; and

Whereas this law, the constitutionality of which has been challenged in the U.S. Senate, conflicts with the above quoted constitutional provision because it would authorize appropriation of tax money to pay the expenses of private citizens engaged in a private mission; and

Whereas the Logan Act makes it a crime for any private citizen to attempt to carry on negotiations with any foreign country: Therefore, be it

Resolved, That the American Coalition of Patriotic Societies, Inc., requests that the Congress of the United States reconsider taking part in such a movement as set forth in Public Law 86-719 which is in violation of the Constitution of the United States of America and will cause confusion and cast doubt in the minds of Europeans upon the authority of those who are now empowered to represent the United States, both diplomatically and militarily, in connection with the NATO Treaty; and be it further

Resolved, That such an exploratory convention would serve no purpose other than to change our form of government without the consent of the people.

SUPPRESSION OF FREEDOM OF SPEECH

Resolved, That the American Coalition of Patriotic Societies, Inc., expresses its support of the stand taken by Senator STYLES BRIDGES in opposition to the attack on freedom of speech of American citizens in the form of censorship under the guise of the requirements of security.

DISARMAMENT NEGOTIATIONS

Resolved, That the American Coalition of Patriotic Societies, Inc., recommends that our Government bring an immediate end to further disarmament negotiations; and be it further

Resolved, That our Government immediately resume weapons testing and strengthen in every possible way our military preparedness program.

MAJ. WALTER REDER: PRISONER OF PEACE

Whereas World War II ended more than 15 years ago but * * * thousands of war prisoners are undergoing unusual punishment inflicted without regard to rules of evidence or the principles of international agreements concerned with the laws of war; and

Whereas one outstanding example of such punishment is Maj. Walter Reder, formerly of the German Army, and now in an Italian military prison, who has been in captivity for more than 15 years; and

Whereas the series of circumstances culminating in the sentence of Major Reder to life imprisonment were so grossly unjust as to cause his liberation to become an index of the capacity of Western nations to conform to the principles of justice; and

Whereas the studies of Major Reder's case by F. J. P. Veale, a distinguished member of the British bar, as published in "War Crimes Discreetly Veiled" (Devin-Adair, 1959, pp. 137-176), show that Major Reder, in the performance of his duties on September 29, 1944, as commander of Reconnaissance Unit No. 16 in the encirclement and destruction of the Communist Stella Rosa Brigade, acted in accord with the highest traditions of military service and in line with long-established precedents in the armies of the United States, Great Britain, and Italy; and

Whereas his battle conduct won him not only the approval of his immediate superior in command and his commander in chief; and

Whereas the long chain of events in his personal tragedy was initially set in motion by both the action and inaction, first of U.S. authorities and later of British; and

Whereas all but few of the so-called war criminals of World War II, including German Field Marshal Kesselring, have long since been released; and

Whereas Major Reder has become a symbol of discord that must be rectified before a more complete restoration of harmony among the nations of the West can be effected: Therefore be it

Resolved, by the American Coalition of Patriotic Societies, Inc.,

1. That the President of the United States be formally requested to use the good offices of our Government to secure the release of Major Reder so as to strengthen the general respect for the principles of international law in the treatment of prisoners; and

2. That the President of the Republic of Italy be respectfully requested to institute an official inquiry as to whether the case of Major Reder is one for the exercise of executive clemency; and

3. That the Presidents of Austria and Germany be respectfully requested to take corresponding action.

JUDICIAL OATH

Whereas the contract known as the Constitution of the United States (art. VI, cl. 3) provides that "all executive and judicial officers both of the United States and of the several States, shall be bound by oath or affirmation, to support this Constitution"; and

Whereas the oath prescribed (28 U.S.C. 453, June 25, 1948), for each justice or judge of the United States to take before performing the duties of his office, is:

"I, ----------, do solemnly swear (or affirm) that I will administer justice without respect to persons, and do equal right to the poor and to the rich, and that I will faithfully and impartially discharge and perform all the duties incumbent upon me as ---------- according to the best of my abilities and understanding, agreeably to the Constitution and laws of the United States. So help me God"; and

Whereas the above quoted oath does not bind Federal judicial officers "to support this Constitution" by oath or affirmation as specifically required by article VI, clause 3, but constitutes a palpable departure from clearly stated constitutional requirements and thus invites and encourages subversion; and

Whereas the danger of the Federal Government exceeding its limits was recognized by the founders of our constitutional system, well illustrated by Jefferson's 1823 statement: "There is no danger I apprehend so much as the consolidation of our Government by the noiseless, and therefore unalarming, instrumentality of the Supreme Court"; and

Whereas all other officers named in article VI of the Constitution, both Federal and State, are affirmatively bound by a direct oath or affirmation to support and defend the Constitution of the United States against all enemies, foreign and domestic; and

Whereas there is no valid reason why members of the Federal judiciary should be immune from being likewise bound by such oath or affirmation; and

Whereas failure on the part of members of the Federal judiciary to be bound by such oath or affirmation automatically disqualifies them for the offices in the name of which they have been serving; and

Whereas the several States, as signatories or parties to the Constitution, have contractual responsibilities to enforce the terms of this compact and to prevent its subversion: Therefore be it

Resolved by the American Coalition of Patriotic Societies, Inc.,

1. That the people of the several States, acting in their highest sovereign capacities through their State governments under the Constitution of the United States, enact measures declaring that only those judicial officials, Federal and State, who are duly bound by oath "to support this Constitution," shall exercise judicial power within the jurisdiction of the State concerned; and

2. That the Congress of the United States promptly enact legislation to amend title 25, United States Code, section 453, so as to bind Federal judicial officers by oath or affirmation "to support this Constitution."

IMMIGRATION

Whereas since the enactment of the Immigration and Nationality Act in 1952, there has been an unremitting attack against this monumental legislation by Communists, hyphenated Americans, political auctioneers, and starry-eyed liberals; and

Whereas the maintenance of our protective national origins immigration system, embodied in the Immigration and Nationality Act is vital to the preservation of this Republic; and

Whereas patriotic organizations and individuals have succeeded in repelling a direct frontal attack for repeal of the Immigration and Nationality Act; and

Whereas the enemies of the act have resorted to the technique of chipping away at the act by lax enforcement, administrative interpretations and amendments which have the effect of undermining the foundations of our cultural integrity and threaten our security; and

Whereas this technique of chipping away is more difficult to detect and defeat than a direct frontal attack: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., call to action all patriotic organizations and individuals to resist lax enforcement and administration of our immigration laws and to ferret out and defeat all amendments to the immigration laws which would weaken or undermine them by either admission of additional numbers of aliens or relaxing the requirements for admission or deportation.

POLITICAL ACTIVITIES OF CHURCHES

Whereas certain church organizations and the National Council of Churches (formerly the Federal Council of Churches) make claims of representing 60 million church members from over 35 denominations in their lobbies on political, economic, and social controversies; and

Whereas the consistent support by these church organizations of objectives such as Federal aid to education and massive foreign aid; consistent support of the Communist position on opposition to the Walter-McCarran Immigration Act; support of the International Labor Organization; opposition to congressional investigations of subversion, typify radical political positions that are personally opposed by the great majority of church members; and

Whereas the American Coalition of Patriotic Societies, Inc., for many years has recognized and has had documented proof of the infiltration of socialism and un-Americanism in certain church organizations and social action committees: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., go on record as questioning the validity of the claims of these organizations that they represent the opinion of their members in nonreligious matters, and we further oppose the political, economic, socialistic world government activities of these church organizations as being a threat to Christianity and an aid to atheistic communism.

DRUGS AND NARCOTICS

Resolved, That the Congress investigate all aspects of the illicit importation of drugs and narcotics from foreign sources with a view of determining if there are more effective methods of treatment of addicts, and control of the traffic, than now in use in this country, including manufacture, importation, distribution, and financing.

OBSCENE MATERIAL

Whereas the production of obscene material, including many magazines on sale at newsstands, is a fantastic business in this country today detrimental to the morals and sanctity of our homes and conducive to the increase in juvenile delinquency, and

Whereas a source of obscene material has been traced to supporters of communism: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., requests Congress and State legislatures for legislation to strengthen criminal penalties for the mailing, importing, or transporting of obscene matter by giving stiffer jail sentences, increasing fines and making jail sentences mandatory for additional offenses.

METRO GOVERNMENT

Whereas metro government is the nucleus of a movement to establish in the United States a Soviet-style arrangement—dividing the Nation into metropolitan areas—each governed by an appointed expert; and

Whereas this is in direct violation of the Constitution which guarantees to citizens, government by elected representatives; and

Whereas the metro-drafted model constitution, charters and laws, which are sloganeered as strengthening the government are, in fact, disguised proposals for the abolishment of constitutional rights, and for the overthrow of our form of government by interstate compact: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., request that an investigation by appropriate committees of State and Federal Governments be instituted for the purpose of determining the degree of danger inherent in the metro collectivist philosophy (which already has infiltrated our dual governments at all levels) and is antagonistic to, and the antithesis of, our republican—or check and balance—form of government, erected as an institution of, by, and for the people.

URBAN RENEWAL

Whereas public housing is a favorite program of big spenders in government; and

Whereas a new aspect of Federal housing is called urban renewal which is a federally financed program of city planning under which municipal governments are authorized to seize homes and other private property and resell them, below cost, to other private citizens, who agree to develop the area in accordance with the plan of the municipal urban renewal commission; and

Whereas the tremendous power of eminent domain is vested in a city's urban renewal commission; and

Whereas eminent domain can be a very dangerous power and the meaning of necessary public use must be strictly limited or no one can consider his property safe from seizure; and

Whereas the Federal Government has no money except what it takes from its citizens in the form of taxes which are then siphoned through the Federal bureaucracy and returned to the States in the form of doles less administrative costs: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., opposes Federal financing of urban renewal as a dangerous increase in Federal spending with its accompanying centralization of Federal power over our cities and its violations of private property rights.

FOREIGN AID AND TRADE

Whereas our depressed areas are the result of the unending wage-price spiral and of governmental intervention in the field of international commerce and trade; and

Whereas this intervention and failure to enact corrective measures have contributed to higher production and living costs, and unemployment and inflation; and

Whereas these governmental policies have forced the removal of American industries to foreign nations; and

Whereas these policies have seriously damaged or destroyed commercial enterprises, particularly in the ceramic, clothing, typewriter, electrical equipment, textile, millinery, toy, chemical, photographic, shipbuilding, automobile, jewelry, knitwear, heavy industrial equipment and other industries; and

Whereas the proposed depressed area program is wholly unrealistic and inadequate to correct these conditions and to support American workers thus deprived of their livelihood; and

Whereas such measures would further increase governmental intervention in the economy: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., urges the Congress and the administration to repeal the Trade Agreements Act; that the function of imposing tariffs be restored to the Congress, where it constitutionally belongs; that the tariff schedules now applicable to the affected industries be equalized in order to meet the competition of foreign goods in the American market.

SEVER DIPLOMATIC RELATIONS WITH THE U.S.S.R.

Whereas the Soviet Union has demonstrated its lack of good faith in our treaties with it; and

Whereas it has maintained, despite its commitment not to interfere in our domestic affairs, an apparatus of espionage, sabotage, and subversion within our borders; and

Whereas it has subjected our Nation and its leaders to a barrage of insults and abuse: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., urges our Government to sever diplomatic relations with the U.S.S.R., that it declare the Communist Party of the United States a conspiracy within our borders, that American members of the conspiracy be charged with treason and dealt with accordingly, and that foreign agents be prosecuted for espionage.

UNITED NATIONS

Whereas for over 15 years the United States has taken every reasonable action in and cooperated with the United Nations in an effort to attain the declared objective of that organization, namely, the settlement of world disputes without war; and

Whereas the history of these 15 years shows that the United Nations has not only failed of its high objective but has actually encouraged the aggression and expansion of the Communist powers, so that today resistance by the United Nations to all forms of international violence, lawlessness, mass murder, and genocide is not even token in reality, and in fact represents an obstacle to the legitimate national policies of the great nations of the free world, including particularly the United States; and

Whereas the rationalization frequently offered that it is better to talk than to fight has proved an illusory hope, since the Communist powers unfailingly decline to talk whenever their vital interests are involved in any criticism; and

Whereas, the Korean war, the Suez crisis, the Iraqi revolution, the current events in

the Congo, and many others clearly demonstrate that, if we entrust the sovereignty of the United States and the life, liberty, and property of people to the United Nations, we are running a grave risk; and

Whereas at the time of the entrance of the United States into the United Nations organization there was no realization of the deplorable fact that the United Nations Charter and the plan behind it were the handiwork of treacherous Americans working for foreign powers whose hidden aims were diametrically opposed to those of the United States; and

Whereas the membership of the United Nations has increased and continues to increase in numbers alarmingly, and the present members of the United Nations already include 99 nations, of which a substantial percentage are newly formed political creations, incapable of directing their own affairs aside from any constructive participation in a world organization and which nevertheless possess equal voting power in the General Assembly with the United States, despite which the United States bears the major portion of all costs; and

Whereas despite every effort on the part of the United States to maintain its prestige and influence in the United Nations organization, this prestige and influence is being perilously eroded to a point where action by the United Nations organization inimical to the vital interests of the United States is not only possible but probable; and

Whereas the destiny of this Nation is being blurred and obstructed by the continued highly publicized association of its leaders with irresponsible and criminal elements from other nations; and

Whereas in pursuit of this great destiny it is incumbent upon the American Nation to revive, restore, and maintain the high principles of domestic and international conduct, which have been characteristic of the Nation since its birth; and

Whereas despite express provisions to the contrary, participation in the United Nations has resulted in a direct and indirect surrender of sovereignty by the American Nation and an impingement on its domestic affairs unforseen at the time of the adoption of the United Nations Charter: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., urges the expeditious withdrawal of the United States of America from the United Nations organization, and the removal of the United Nations organization from American territory.

CUBA

Whereas Cuba has become a 100-percent Soviet satellite, only 90 miles from our shores; and

Whereas as always, bloodthirsty Communist satellite state at our very threshold, they have scourged and defiled Cuba, destroyed all elementary decency and obliterated every right and freedom; and

Whereas unless broken and thrown back, communism will surge on to engulf and destroy other sister Republics, some may sink any moment, the Caribbean overnight may become a Red lake; and

Whereas it would be inhuman to abandon our Cuban friends to Communist slavery; and

Whereas we cannot risk having a Communist satellite state at our very threshhold, controlling the Caribbean and the approaches to the Panama Canal and the Mississippi Valley; and

Whereas the United States of America must dictate and control its own policies, especially when the very lives and freedoms of its citizens are at stake: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., makes the following recommendations:

1. Recognize a responsible Cuban Government in exile, just as we recognized the Free French and others during World War II.

2. Give that government our full support, morally and materially, with arms and money.

3. Invoke a "pacific" blockade of Cuba, to take care of trading by the Communist nations.

4. Continue U.S. cooperation and guidance after the Communists have been driven out of Cuba in order to rehabilitate that poor country and bring it back to freedom and constitutional representative government.

CARIBBEAN SECURITY

Whereas since the 1956 Suez crisis the Caribbean has become a fourth front against the United States with the Panama Canal as the key target in the struggle for control of the Western Hemisphere by the world revolutionary movement known as the international Communist conspiracy; and

Whereas the foreign policy of the United States for the past generation has been the treatment of symptoms rather than causes, and replete with surrenders of basic rights and principles with consequent intensification of diplomatic problems; and

Whereas our Caribbean policies have tended to bring about a long series of diplomatic failures adversely affecting the security of the United States and other parts of the Western Hemisphere; and

Whereas these failures have contributed to the establishment of a Soviet beachhead in Cuba, threats to our naval bases at Guantanamo, Cuba, and Chagaramas, in Trinidad, overthrow of the constitutional governments of Venezuela and other countries fronting on the Caribbean, and the formal raising of the flag of the Republic of Panama over the Canal Zone territory; and

Whereas the most unfortunate and reprehensible order of the President in striking the flag of the United States in the Canal Zone, issued under pressure of Communist-inspired demands of radicals in Panama and on advice of the Department of State in clear violation of our traditional interpretation of the treaties of 1903, 1936, and 1955 with the Republic of Panama, and in contemptuous defiance of mandates of the Congress, has aided and abetted the subversive forces behind the program for Caribbean conquest; and

Whereas the repeated diplomatic failures of the Government of the United States to carry out its recognized responsibility for the security of the countries bordering the Caribbean, has served to encourage invasions of various countries by revolutionaries from Soviet Cuba and raises the question of whether or not there are in our Department of State communistic or other subversive influences that are still hidden: Therefore be it

Resolved by the American Coalition of Patriotic Societies, Inc.,

1. That the Congress of the United States conduct comprehensive investigations relative to subversive influences in our Department of State; and

2. That the Congress, by appropriate measures, take steps to accomplish the following:

(a) Make definite, and reaffirm, the principle of the Monroe Doctrine as applying to intervention by the subversive forces known as international communism; and

(b) Make definite, and reaffirm, U.S. policies for exclusive jurisdiction in perpetuity over the Panama Canal or any other Isthmian Canal that may be constructed in the future; and

(c) Repudiate the President's order directing display of the Panama flag over the Canal Zone territory a violation of law, treaty, international usage, and the historic policy of the United States and invalid; and

(d) Legislate for the formation of a permanent Caribbean partial force.

DOMINICAN REPUBLIC

Whereas the Dominican Republic under the leadership of Generalissimo Trujillo has proven to be a loyal friend of the United States of America and an ardent foe of communism; and

Whereas under the direction of certain State Department officials, our Government has endorsed the anti-Trujillo stand promoted by Cuba's Castro and Venezuela's Betancourt; and

Whereas our Government wrongfully condoned and joined in the action of the Organization of American States in withdrawing recognition of the Dominican Republic: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., urges the Congress of the United States to demand by joint resolution the immediate reinstatement of normal diplomatic relations with this friendly Republic in the Caribbean, the Dominican Republic.

TERRITORIAL SEA WIDTH

Whereas a fundamental principle of international law is the 3-mile limit for territorial seas; and

Whereas Afro-Asian nations, with Communist support, are endeavoring to extend the present 3-mile limit to a 12-mile limit, which extension, by transforming more than 3 million square miles of international sea into territorial waters closable at the will of its sovereigns, would impair the principle of freedom of the seas; and

Whereas the U.S. delegation to the 1960 United Nations Conference on the Law of the Sea, in substantial degree conforming to Soviet strategy for the high seas, voted to compromise with this principle by agreeing to a 6-mile limit, which move was defeated by only one vote; and

Whereas any such compromise in principle would affect adversely the vital interests of the United States and other maritime nations by making strategic sea routes and air above subject to closure, among them such important arteries of trade as the Straits of Gibraltar, Bab-el Mandeb, and Malacca: Therefore be it

Resolved by the American Coalition of Patriotic Societies, Inc.,

1. That the United States adhere to the fundamental principle of international law providing for a 3-mile limit as the width for territorial seas; and

2. That the Congress conduct comprehensive inquiries into the influence in the Department of State responsible for the attempted compromise of this principle in favor of a 6-mile limit.

SUBVERSIVE ACTIVITIES IN THE FIELD OF MENTAL HEALTH

Whereas the Charter of the World Health Organization has defined "health" as "a state of complete physical, mental, and social well-being, and not merely the absence of disease or infirmity"; and

Whereas the World Federation for Mental Health, a voluntary but official agency of the ILO, UNESCO, and WHO, which in the name of mental health has been conducting extensive activities in all fields of life in these United States, which activities are based upon the official credo of the WFMH, Mental Health and World Citizenship; and

Whereas the avowed purpose of the credo of the WFMH is to bring about social, economic, and political change in conformity with the thinking of the membership of the

WFMH which in nowise resembles the traditional concepts of our American way of life; and

Whereas the methods and activities of the World Federation for Mental Health, its individual members, group members, and affiliated persons and groups are subtle and ingenious, and not publicly identified as such, as typified by this statement from the credo (p. 47): "That the mental health aspects of wide and important issues be promptly interpreted to the public, in part in the interest of stimulating a higher level of international thinking"; and

Whereas the social, economic, and political changes desired by the World Federation for Mental Health can only come about through a change in the form of government of the United States and a consequent surrender of the sovereignty of the United States to an authoritative and armed world government; and

Whereas the World Federation has stated (p. 7): "Social institutions such as family and school impose their imprint early in the personality development of their members, who in turn tend to perpetuate the traditional pattern to which they have been molded. It is the men and women in whom these patterns of attitude and behavior have been incorporated who present the immediate resistance to social, economic, and political changes." The broad definition of what now constitutes mental ill health and the great powers of confinement now enjoyed by the members of the psychiatric and social science professions endangers the continued liberty of such individuals who resist the social, economic, and political changes actively being sought by the World Federation for Mental Health within the United States: Therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., deplores the activities of the World Federation for Mental Health in the internal affairs of the people of the United States of America; and be it further

Resolved, That inasmuch as said activities are of a nature foreign and inimical to the ways of the United States, that we petition the Congress of the United States, and in particular the House Committee on Un-American Activities and the Senate Committee on Internal Security, to investigate the said activities of the World Federation for Mental Health, its affiliated organizations and membership; and be it further

Resolved, That these committees of Congress be requested to investigate particularly the loyalty of promoters of the philosophy of the World Federation for Mental Health which appears to be inimical to and for the purpose of destroying our form of government and our American way of life.

ANTIDOTE FOR SUBVERSIVE PROPAGANDA

Whereas the events marking recent unprecedented conquests by Soviet tyranny point to the ineffectiveness of our propaganda war; and

Whereas authoritative sources believe that this condition is due to the fact that persons originally employed during World War II, because of favor to our then ally, Soviet Russia, still occupy key positions in our diverse information and foreign propaganda services; and

Whereas it has been demonstrated that these remnants of wartime propaganda manage to eliminate from government service all persons who are of a different political ideology from themselves; and

Whereas it has been demonstrated that several of those who were included in that self-perpetuating leftist bureaucracy worked since the war hand-in-glove with the Soviet agencies, extraditing to the Communists those nationals of Central and Eastern European origin who could effectively oppose them, and that in such way they have facilitated the conquest of the vast satellite empire by the Soviets; and

Whereas the continued sabotaging of our propaganda war by some of these bureaucrats means grave national danger: Therefore be it

Resolved by the American Coalition of Patriotic Societies, Inc.,

1. That the Government should undertake the following measures without delay:

(a) Isolate and ferret out all persons who, while in the service of the American Military Government in Europe, extradited the anti-Communist leaders of the Slavic, Hungarian and Rumanian nations;

(b) Remove from policymaking bureaucratic posts those civil servants who were originally employed because of their sympathies to communism; and

(c) State, without equivocation, that those citizens and legal residents of Central and Eastern European origin whose services are urgently needed in the propaganda war should not be rejected because their countries fought on the German and Italian side during the war (Germany and Italy themselves being now our trusted allies), and that, furthermore, those persons who have been cleared by successive waves of investigations in Europe and America, and finally admitted to citizenship, should not now be penalized; and that their files, insofar as events of 15 and 20 years ago are concerned (at which time most were in their early teens), should not be reopened after anonymous letter or telephone call, emanating from terrorist sources opposed to freedom; and

(d) Endeavor to incorporate into our propaganda machinery, which includes the Voice of America and Free Europe Committees, such individuals of Central and Eastern European origin, whose technical knowledge and services are needed, making their loyalty to this Nation and their opposition to communism the only criteria of judgment; and

2. That the Congress conduct comprehensive inquiries into the operations of our propaganda agencies affecting Iron Curtain countries.

REAFFIRMATIONS

Resolved, That the American Coalition of Patriotic Societies, Inc., reaffirms the resolutions adopted at previous annual meetings and continues to support:

1. Retention of the Connally reservation to the protocol of U.S. adherence to the World Court;

2. Repeal of the Trade Agreements Act;

3. Opposition to the cultural exchange program;

4. Investigation of the subject of food and beverage contamination;

5. Opposition to fluoridation of public water supplies;

6. Making labor unions subject to the same rules and laws that govern corporations; and also to existing State and local laws in regard to acts of lawlessness and violence;

7. Opposition to Federal aid to education;

8. Support of the House Committee on Un-American Activities.

SUPPORT OF CONSTITUTIONAL GOVERNMENT

Whereas the purpose of the patriotic societies should be not only to honor the memories of our ancestors who suffered and died to make this country independent but to fight with all our power to preserve our inheritance and the American way of life as provided by our Constitution; and

Whereas the patriotic societies cannot be influential unless they are adequately financed; therefore be it

Resolved, That the American Coalition of Patriotic Societies, Inc., requests each associated society to endeavor to send an annual minimum of $1 for each member of their society to the American Coalition of Patriotic Societies, Inc., to be used in the work of implementing the resolutions.

EAST PROVIDENCE—AN ALL AMERICA CITY

Mr. PASTORE. Mr. President, 11 American cities are a little prouder this month because they have been singled out for special citations on the basis of energetic purposeful citizen effort.

The citations are by Look magazine and the National Municipal League. The final 11 are chosen from 100 candidate cities by the All America Cities jury, of which the noted Dr. George H. Gallup is foreman, associated with an exemplary body of distinguished Americans.

East Providence, R.I., is one of the proud 11 to be named an All America City this year.

East Providence became a city only recently—on December 1, 1958. The citation is actually for the zeal of the citizens, their enthusiasm and their labors that brought about this change from the traditional New England town government.

Few New England cities or towns have a longer tradition than the honored city. The first white settler of what is now East Providence was Roger Williams. A fugitive from Massachusetts he landed on this soil in mid-April of 1636 after a bitter winter voyage of 14 weeks in an open boat. In June of that same year Massachusetts claimed the land—and the exiled Roger Williams moved across the Seekonk River to found the city of Providence.

Rhode Island and Massachusetts both claimed that original site in a boundary dispute that continued for 226 years and was settled in favor of Rhode Island in December 1861.

On March 1, 1862, the place received its charter as a town, and also received its name of East Providence. The privilege of selecting the name had been given to Rhode Island's War Governor Sprague.

The government of the settlement dates back over 300 years to July 1, 1644, when the colony of 58 families entered into a compact to subject themselves to a governing body of 9 persons for the well ordering of the town's affairs.

With the church in the center, the houses of the settlement were built in a semicircle. This was known as the ring of the town. The ring was burned on March 28, 1676, by the Indians under command of King Philip. But the blockhouse survived, and so did the inhabitants who had found refuge within.

The settlement was rebuilt and flourished. Today when public education is being discussed it is interesting to note that over 260 years ago, on December 4, 1699, the selectmen of the settlement made a contract for school to be kept and the boys and girls taught to read English, to write, and cast accounts.

And if the talk is about the government of cities, it is equally interesting to note that a resident of this settlement, Thomas Willet, became the first

English mayor of the city of New York when it was surrendered by the Dutch in August 1664.

These are only a few of the historical incidents that will undoubtedly be revived as the city of East Providence receives its citation as the focal point of a civic celebration on April 6, 1961.

The drama of war will be recited—the tragedies of Indian warfare—the drama of the Revolution equally close to their doors—and the scars of other wars dating back to the Civil War when it was new as the name of the town was new.

But there will be talk of peace, too—and of prosperity and progress which spell the birthright of every American community. And in this common effort for peace and progress this bustling city in the far east of America will salute its sister cities, sharers in the All America City Award, from coast to coast.

I, too, salute all of them, as I salute East Providence.

BOOK BURNING ON THE NEW FRONTIER

Mr. BENNETT. Mr. President, I was shocked to read in the March 16 issue of the Washington Evening Star the following item in Joseph Young's column:

MAGAZINE BURNING

Postmaster General Day has ordered postmasters throughout the country to destroy all copies of the January and February Postal Service News magazine which had not already been distributed to postal employees. All 550,000 postal workers regularly receive a copy of the magazine each month. Mr. Day ordered all copies of the magazine destroyed.

The January and February copies of the magazine, which is published by the department, were written, edited, and printed by the preceding regime before Mr. Day and his team took office. It's understood that the new crowd objected to a laudatory spread in the February issue detailing the achievements of Postmaster General Summerfield. It's a mystery, however, as to why the January copies were destroyed, since there was no particular glorification of the Summerfield regime in that issue.

The Post Service News is a house organ type of publication aimed at postal employees, stressing features and human interest stories of those working for the postal service.

Upon hearing that the new Postmaster General had issued orders for the destruction of all copies of these two issues, my curiosity was immediately aroused, and I proceeded to obtain copies of the banned issues. Through the ages, this reaction has always followed book burning and censorship—a fact which Postmaster General Day would do well to keep in mind if he is tempted to embark on such a crusade again. To have a book banned by the Post Office is the greatest thing that could happen to any book.

It was not easy, but through certain clandestine sources I finally obtained copies of the forbidden publications. I smuggled them into my office, and in the privacy of my room I studied the contents. I am happy to report that neither of the issues contains anything which needs to be kept from the American people.

The offensive matter in the February issue is, as Mr. Young indicates, an article outlining the improvements that were made in the post office during the past 8 years. It is understandable that Mr. Day would want to keep this information from the public. Some immature minds might surmise that the achievements of that period are to the credit of the Republican Party, and this Mr. Day would like to prevent.

This attempt to wipe out the record of the Eisenhower administration's achievements in modernizing our postal system called to my mind a policy outlined in George Orwell's great novel "Nineteen Eighty-four." The hero of this book, it will be recalled, was employed in the Ministry of Truth, and it was his duty to aid in the work of destroying and altering the records of history which did not happen to jibe with the current party line, or which might be embarrassing in some way to the current administration.

In Orwell's words:

There were the armies of reference clerks whose job was simply to draw up lists of books and periodicals which were due for recall. There were the vast repositories where the corrected documents were stored, and the hidden furnaces where the original copies were destroyed. And somewhere or other, quite anonymous, there were the directing brains who coordinated the whole effort and laid down the lines of policy which made it necessary that this fragment of the past should be preserved, that one falsified, and the other rubbed out of existence.

Apparently it was Mr. Day's wish that the record of the past 8 years could be rubbed out of existence. But this is not 1984—although that year may be closer than we think—and there may still be ways of thwarting the directing brains who would erase history.

Therefore, I ask unanimous consent that the entire text of Mr. Summerfield's report printed in the February issue of the Postal magazine be printed at this point in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

POSTMASTER GENERAL SUMMERFIELD'S FINAL REPORT TO THE PRESIDENT

DECEMBER 29, 1960.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Eight years ago when you appointed me your Postmaster General, you instructed me to "institute a program directed at improving service, while at the same time reducing costs and decreasing deficits."

Thus your directive in effect established three goals for the Post Office Department:

DEPARTMENT GOALS

First, give the American people the kind of postal service they must have in a growing economy.

Second, reduce the postal deficit through economies and the application of modern management techniques.

Third, persuade the Congress to complete the job of balancing the postal budget by relieving the Department of subsidy burdens, by reimbursing us for charges for services provided to other agencies, and by adjusting postal rates to offset postal costs.

In this, my final report, I am pleased to tell you that we have substantially improved the postal service and that we have made notable progress in our program of postal modernization. I regret to report that due to congressional failure to recognize its responsibility for increasing postal rates from time to time as costs increased, it has not been possible for us to eliminate the postal deficit.

TASK FACED, MEASURED, AND MET

When I assumed office in 1953 I made a comprehensive study of the postal operation and it became apparent that to carry out your directives would require a complete reorganization of the postal service, together with a program of thorough modernization of the physical plant.

In 1953 the Department was handling 50 billion pieces of mail through 41,000 postal installations manned by some 520,000 employees. The total value of transactions of the Department amounted to $18 billion a year.

Ours is the second largest department of Government, only exceeded in size and complexity by the Defense Department. Yet we were handling nearly twice the volume of mail in 1953 over 1938 with facilities that had changed very little since 1938. It was obvious to us that in our postal structures we were faced with a critical major problem.

Mechanization as we know it in the modern industrial processing plants had not been applied to mail handling. The ever-increasing volume of mail was worked by hand much the same as it had been done since the Department was founded in 1775. In the past 8 years it has taken a complete reorganization and modernization of methods to bring the Department abreast of the techniques used in modern business today.

INADEQUATE ACCOUNTING CORRECTED

In 1953 the Department's accounting was archaic. Many statements and reports essential to good management did not exist and some of the reports that were prepared were as much as 17 months old when released. Verification and reconciliation of the money order accounts were years behind. Disbursing and payroll functions were carried on in individual post offices. Many thousand man-hours superfluous to the needs of the service were spent in the larger post offices on such nonessential activities as accounting for employees' salary advances which ran into millions of dollars every year, cashing checks for employees, and on doing over and over, by hand, accounting operations of the type which modern business had put on machines years ago. The settlement of transportation charges lagged as much as 2 years or more, necessitating repeated partial payments to the carriers to provide them with the necessary operating funds.

In clearing away this obsolescence we have established modern controller-type functions not only in the Department but also in the regions and in the large post offices. We have employed certified public accountants in our financial operations for the first time, modernized the system, and centralized accounting functions in the regions to permit preparation of payrolls, settlement of claims and similar operations to be mechanized. The accounts are now on an accrual basis and up to date. Employees receive their paychecks on time and in the right amount. Payments to transportation companies and other suppliers are on a current basis. We have complete financial reports a few days after the end of each period.

MODERN PERSONNEL SYSTEM INSTALLED

The personnel system in 1953 was the despair of management and of employees alike. Personnel costs currently absorb more than 80 percent of the budget. This makes it our most important single cost element. Personnel functions were dispersed among the bureaus of the Department. No adequate means existed for creating and nurturing good management-employee rela-

tions. Even minor grievances and other personnel matters reached Department attention more often through employee organizations and the Congress than through normal management channels. The pay structure in the post offices was a hodgepodge. In some instances supervisors were paid less than their workers. There was no competent system for equating pay with responsibility.

The establishment of a Bureau of Personnel in 1953 laid the groundwork for a complete personnel service. It made it possible to adopt a classification and compensation system which assures pay commensurate with responsibility. The Bureau as it is now constituted creates employee training programs, safety education, the review of grievance appeals, and the making of awards to employees for valuable suggestions for improving the service. The Department is now in the forefront in its practice of modern industrial relations.

POST OFFICE MODERNIZATION NOW WELL ADVANCED

Our post offices had, by 1953, become generally too small to handle the mails. There were instances where mail had to be loaded and unloaded and even sorted on sidewalks and other unprotected areas. Years of congestion and unarrested obsolescence had turned our public offices into poorly lighted, poorly ventilated facilities. Too many of them were gloomy to visit and cheerless to work in.

Correction of these conditions in our physical plant has been our largest task. We have approached it in a number of ways.

We have adapted commercial leasing techniques to our leasing of new post office structures built and owned by private capital. This has enabled us to provide more than 5,600 new structures. The need for these new post offices can be appreciated when we consider that hundreds of the replaced post offices were originally built to serve towns of some 5,000 to 10,000 population which today have grown to be cities of 40,000 to 75,000. We have adapted standard designs of architectural excellence for long-range improvement in the appearance of our buildings.

We have brought light and color to the interiors of our offices and directed that the forbidding screenline give way to the open counter, thus making our offices cheerful places in which to work and to transact postal business. We have designed large new structures to house mail handling of the future which will be by machine in one- or two-floored air-conditioned structures located away from congested city areas where there is ample room for trucks to load and unload without causing, or suffering from, city traffic jams. We have built and have under construction a number of such large facilities. We have built and have in operation a fully mechanized post office at Providence, R.I. The Providence post office handles the outgoing mail for a large new England area in which 81 smaller post offices are located. Thus Providence is a working post office and at the same time a laboratory for testing machines and operating methods under actual production conditions. The knowledge of mechanization we gain in Providence should enable the new administration to move more rapidly and more surely in mechanizing large postal installations throughout the country. A second generation of mechanized postal machinery is now under development and will be housed in a modern postal facility to be constructed at Oakland, Calif.

MECHANIZATION MAKES GREAT PROGRESS

We have instituted a long-range program for the development of machines to handle the mail of the future and in the course of these few years, we have brought some of these machines to a high stage of development. We have electronic sorters on the production lines in a few post offices. Large conveyor systems are installed in about a dozen large facilities. Cullers are in production. Some 75 high-speed facer-cancelers are being installed. The electronic reading and automatic coding of addresses is far advanced.

We have experimented with the movement of written messages by electronic facsimile transmission. Our demonstration of this method of communication to both your Cabinet Committee and to the press and radio representatives clearly indicates its practicability and availability whenever the expanding volume of mail shall require it.

Modernization of the postal plant was advanced beyond the planning stage in 1960 when the Congress granted the first specific appropriation for the accelerated modernization program. While the Department has made a substantial start limitations on time and funds have prevented many of its plans from being carried out. It will fall to the lot of the succeeding administrations to carry out these plans.

MANAGEMENT AND ORGANIZATION OVERHAULED

In 1953 the Department was handling management details in Washington which belonged in the field. Decentralization of management, recommended by the Penrose-Overstreet Commission as long ago as 1909 and in 1949 by the Hoover Commission, has been completed and has contributed greatly to the efficient operation of the postal system by providing the right type and amount of supervision close to our post offices through 15 regional operations directorships. Each of these 15 regional directors is supported with appropriate operating, transportation, accounting and personnel staffs who now control the finances, provide guidance, and analyze the operating results in our postal installations. Decisions needed by our postmasters, which formerly took weeks and even months to get from Washington, are now obtained quickly from the nearest regional headquarters.

In our field operations we have followed the principle of undivided responsibility by assigning airmail facilities, railway post offices, highway post offices, and mail terminals to appropriate postmasters. This is important because it places with the postmaster the authority and responsibility for the mail service in his area and thus gives his patrons a single point of contact with the postal service.

SERVICE IMPROVEMENTS

We have reorganized the handling of local preferential mail to bring about next-day delivery for the 168 million people who live in our 81 centers of population and the commercial areas which surround them. This next-day delivery is accomplished by an improved transportation network and its importance can be understood when it is realized that two-thirds of our mail is delivered within a 200-mile radius from its originating point.

We have carried this next-day delivery objective one step further and prepared plans for moving preferential mail between the centers of population throughout the Nation on schedules which have made next-day delivery either a present accomplished fact, or one which can be reached in the very near future.

An essential part of these plans is the airlifting of preferential mail by the Nation's commercial scheduled airlines on a space-available basis. Delivery of 2 billion pieces of mail each year is now advanced from 24 to 48 hours by this means. This has been accomplished with no increase in cost to the Post Office Department.

We have expanded the carrier service to accommodate the 9,300,000 families who have made up the suburban growth around our cities and have established carrier service in 1,000 new communities. We have tailored the city delivery service to the needs of the business communities. Some 900,000 additional business firms now have carrier service.

We have supplied later collection service in business and in residential areas where such expansion of service was called for.

We have added to the rural delivery service to reach 1,400,000 farm families along more sparsely settled routes who have not heretofore enjoyed mail delivery to their homes.

We have tailored the hours of window service in the post offices to meet local requirements.

Certified mail was established to provide a certified delivery service for mail of no intrinsic value at less costly rates than had been required for registered mail.

Combination mail now makes it possible to send related messages in the parcel post package.

Olive drab color of mailtrucks and street corner collection boxes has given way to the now familiar red, white, and blue, thus improving visibility and safety. Because of this color scheme, there has been a substantial reduction in accidents, and the Department has been awarded the National Safety Council's Traffic Safety Award for the past 5 consecutive years.

The process of buying a money order has been made easier and quicker, and a new money order form has substantially reduced the possibility of fraud against our people and against the Government.

Stamp vending machines eliminate waiting lines and supply afterhour service. Millions of copies of mailing aids have helped the people improve the service by their own efforts.

Other activities of the Department have had their full share of our attention.

FRAUDS, DEPREDATIONS, AND OBSCENITY CONTROLLED

We have moved forward energetically in specialized campaigns against mail frauds, thievery, and other offenses against the postal laws. Arrests and convictions for these offenses in 1960 were 50 percent more numerous than in 1953.

We have carried on a strong campaign of public education and law enforcement against the $500 million a year traffic in solicitation and delivery of obscene materials through the mails. We have succeeded in arousing public opinion against this national disgrace. We have sought and obtained stronger laws to cope with the problem. Our part in enforcing these laws resulted in 130 percent more arrests and convictions in 1960 than in 1953.

PHILATELY PROMOTED

The interest of millions of our citizens in the fascinating beauty and history of postage stamps has been intensified by our revitalized philatelic program. The Department has made use of this interest to keep before our people not only our cherished American traditions but also the concepts of freedom and outstanding human leadership in other nations, and has thereby made an acknowledged and unique contribution to our national drive toward better world-wide relations. Our new "Champion of Liberty" stamps honoring foreign-born leaders have been enthusiastically received both abroad and at home.

INTERNATIONAL RELATIONS STRENGTHENED

During the past 8 years, the Department increased its participation in the activities of the Universal Postal Union and we were designated as Chairman of the important Consultative Committee on Postal Studies of the Universal Postal Union. The Department also participated in the activities of the Postal Union of the Americas and Spain. These international organizations provide a

means for increasing international understanding and good will through the interchange of ideas between the postal services of all nations.

THE DEFICIT, OUR MAJOR TASK

One of our major objectives has been to eliminate the postal deficit. That we have been unable to do so is a great disappointment to me—as I know it is to you.

From its very inception, it is evident that the postal service was intended to pay its way. In fact, in the first 30 years of operation the Department enjoyed a 15 percent profit, and since its beginning through World War II the average annual loss amounted to less than $30 million. Since 1946 the average annual loss has increased more than 15-fold to $556 million. The philosophy of deficit financing seems to be a post-War II phenomenon.

As I have previously pointed out to you, the postal deficit has a significance which transcends the financial position of a single Federal department. It has continued for a decade and a half to play a major role in our national financial picture. From June 30, 1946, the end of the fiscal year in which World War II was brought to a close, to last June 30, 1960, our national debt has increased $16.9 billion. During the same period the post office deficit has accumulated to $7.4 billion. These two figures show the large part played by postal finances in our national economic picture.

In 1952, the last fiscal year of the previous administration, the postal deficit was $720 million. Actions we requested and the Congress approved established reimbursement to this Department for free service rendered other Government agencies and removed airline subsidies as an element of postal costs. These actions, together with the major economies we were able to effect in the early years of our reorganization and modernization program, reduced the annual deficit to a low point of $363 million by the end of fiscal year 1955.

I should point out that we in the executive branch have done all we could to eliminate this deficit short of curtailing service to postal patrons. Through operating efficiencies at every point we have been able to handle 28 percent more mail with an increase of only 13 percent in man-hours.

We have raised rates for postal services in those areas where we had administrative authority to do so, producing $300 million in additional revenues annually. After 5 years of struggle before the Congress we finally obtained, in 1958, general increases in postal rates to the extent of $600 million annually. These increases, however, have not, by any means, kept pace with the increases in costs during this period which have been added to the postal service by the Congress through pay increases and employee fringe benefits.

We tried vigorously in 1959 and again in 1960 to obtain further postal rate increases from the Congress, but without success. As a result the Post Office deficit today is larger than when this administration took office.

TO SUM UP

Equipping the Department with the resources and the momentum to meet the task which the future will bring was only made possible by the untiring efforts of the 26 very able men who have served on my top staff during this administration. Working with and through the thousands of devoted and dedicated people in the field organization, these men have brought about a new esprit de corps in the postal service.

In summary, we have, within the limits allowed us by the Congress, fulfilled almost all of the objectives which we established 8 years ago.

We have provided the American people with the kind of service they must have in our growing economy.

We have reduced the postal deficit as far as lay within our power through economies, the raising of additional revenues, and the application of modern management techniques.

We have persuaded the Congress to relieve the Department of subsidy burdens, to reimburse us for services provided other governmental agencies, and to raise postal rates to some extent even though this latter action fell far short of complete liquidation of the postal deficit.

Without your wise counsel and enthusiastic support, Mr. President, the Department could not have made the very real progress that I am reporting today.

Now I am prepared, in a few weeks, to turn over to my successor a Department whose operations have been adjusted to the jet-air and electronic age—a Department which now faces the future with confidence instead of simply reliving the past.

Respectfully,

ARTHUR E. SUMMERFIELD,
Postmaser General.

Mr. BENNETT. Mr. President, I make my request fully aware of the risk involved—that the Postmaster General may order the burning of today's issue of the CONGRESSIONAL RECORD, or at least may ban it from the mails—but that is a risk we shall have to take.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. CARLSON. I well remember the criticisms that came to former Postmaster General Arthur Summerfield when he withheld, or considered withholding, from transportation through the mails of certain books which he thought contained questionable reading material. I had not realized that our present Postmaster General had reached the point where he was burning material that had gone through the mail.

Mr. BENNETT. This magazine did not get through the mail, as I understand. It was burned in the Postal Department before it went out; but, fortunately, not all of it had been burned.

THE BURNS CREEK PUBLIC POWER PROJECT

Mr. BENNETT. Mr. President, in Tuesday's CONGRESSIONAL RECORD the junior Senator from Idaho [Mr. CHURCH] made a statement on the Burns Creek public power project which would be authorized by S. 66 on which hearings were held last week by the Senate Interior Committee. In that statement he stated:

> The only testimony offered in opposition was from representatives of private utility interests.

This statement standing by itself might mislead those of my colleagues who are not familiar with the history of the Burns Creek legislation. First of all, the private utilities were not the only ones who appeared at the hearing in opposition to Burns Creek. Other opponents included: V. G. Pearson, business manager of Local Union 57, International Brotherhood of Electrical Workers, representing 1,800 union members in Idaho, Utah, and Colorado; G. E. Sorenson, president, the Kemmerer Coal Co., of Frontier, Wyo.; Orr Garber, member of the Wyoming Natural Resources Board, and Daniel W. Cannon, of the National Association of Manufacturers.

UNITED MINE WORKERS OPPOSE BURNS CREEK

Moreover, a statement was filed by Arthur Biggs, representing district 22 of the United Mine Workers, and in addition I appeared in opposition to the project.

I assume that the Senator from Idaho was not in the committee room when I made my statement.

I ask unanimous consent that Mr. Biggs' statement appear in the RECORD following my remarks, together with a letter of January 16, 1961, which I received from Harry Mangus, president, district 22 of the United Mine Workers of America, and my statement, together with the text of my statement before the committee.

(See exhibit 1.)

WIDESPREAD OPPOSITION

Mr. BENNETT. Mr. President, it should be noted that S. 66 is virtually identical to a bill considered by the House and the Senate in the 86th Congress. Many other groups and individuals went on record at that time. Among these were the Utah-Wyoming Coal Operators Association, represented by Oscar A. Glaeser and William J. O'Connor; Mayor William Welsh, of Price, Utah; Harry Mangus, president of district 22 of the United Mine Workers; Thomas Kennedy, president of the United Mine Workers; the Utah Mining Association; the Wyoming Mining Association; Patrick Quealy, mayor of Kemmerer, Wyo., and many others. Since they were already on record, some of these groups and individuals understandably did not wish to undertake the considerable expense of traveling to Washington once again. In fact, the chairman of the committee specifically asked that testimony presented in previous hearings not be repeated.

In addition, I have received expressions of opposition to the Burns Creek project from the Carbon and Emery County Commissions, the City Councils of Price and Helper, and from the Price Chamber of Commerce.

In his statement, Senator CHURCH criticized a pamphlet distributed by the Utah Power & Light Co. which opposed the Burns Creek project. He also included a statement purporting to refute the pamphlet. In order to make the record complete, I ask unanimous consent that the text of the pamphlet, together with statements given at the Senate hearings by E. M. Naughton and E. A. Hunter, president and assistant to the president, respectively, of the Utah Power & Light Co., be included in the RECORD following my remarks.

(See exhibit 2.)

EXHIBIT 1

STATEMENT IN OPPOSITION TO S. 66, DISTRICT 22 UNITED MINE WORKERS OF AMERICA

District 22 of the United Mine Workers of America is sincerely convinced that Burns Creek is an unnecessary power project which would be built for the benefit of a few preference customers. We represent some 2,600 miners in Utah and Wyoming—all we have left of the about 7,000 miners we had 10 years ago.

We, and the mine workers whom we represent, do not think we should have taxes

deducted from our paychecks each period to help pay for a hydroelectric powerplant which will directly compete with us.

This is very unfair because the facts indicate that electric power from Burns Creek project would be sold to only a very few preferred customers who are much better off financially than the mineworkers in the area.

The Burns Creek hydroelectric project as proposed will include a 90,000-kilowatt hydroelectric plant which will generate an estimated 500 million kilowatt-hours per year. If these 500 million kilowatt-hours were supplied by a steam electric plant burning coal it would consume about 250,000 tons of coal per year. To mine this amount of coal would require about 20,000 man-shifts of coal-mining labor. It would bring to our area about one-half million dollars in annual miners' wages.

The coal miners are in desperate need of this additional coal-mining business. In recent years, the coal miners have experienced a sharp curtailment in work which has created considerable unemployment resulting in many hardship cases and causing much suffering and misery. This has had a terriffic impact upon our economy in the coal-mining communities in both States. Some of our towns have already become ghost towns and we should not allow the other communities to disintegrate into social and economic stagnation.

The Utah Power & Light Co. has under construction a 150,000-kilowatt steam electric plant near Kemmerer in western Wyoming. This plant, which will burn coal exclusively, has already been postponed 2 years because of surplus hydroelectric power being available in the area. We have protested the construction of the Burns Creek project because it is a further threat to the Kemmerer plant and our coal-mining livelihood.

The Senate committee in hearings last year recognized this threat and as a result I note that S. 66 attempts to correct it with language which provides that the Burns Creek generating units will not be installed until the preference customers are able to consume the power.

This new language, however, fails to hide the fact that Burns Creek will still injure the coal-mining business in the area. Providing for delayed installation of some of the Burns Creek generating units ignores the fact that if the Government did not assume the continuing responsibility to supply the electric power requirements of these few preference customers by building hydroelectric plants, then these same customers would be obliged to buy their additional requirements from the investor-owned power companies rather than from the Government.

The use of cheap natural gas and oil in the homes and industry and the use of the diesel engines by the railroad have already seriously affected the coal miner. Please do not further hurt us by giving us further competition by building the Burns Creek hydroelectric plant, which would not put any new land under cultivation. We coal miners are not against Government irrigation projects, but Burns Creek is not for irrigation but is almost exclusively a power project.

Coal is a vital commodity in time of emergency. If projects such as Burns Creek are allowed to reduce our employment and drive the coal miners into other employment during normal times, who is going to mine the coal during times of emergency?

Our employment is mostly seasonal. We have peak employment in the winter and fall. Our minimum employment is in the summertime.

Mining coal for the production of electricity is a fairly constant year-round operation, and therefore very beneficial to the coal miners.

We are not asking you to spend Government money to aid the coal miners in district 22. All we are asking you is that you do not authorize a $48 million Government hydroelectric plant which would dilute the coal consumption by 250,000 tons per year in our area and do away with 20,000 man-shifts per year of potential work for our coal miners.

District 22, United Mine Workers of America, strongly urges that the members of this committee reject S. 66.

It is requested that this statement in opposition to the construction of Burns Creek be carefully considered by the committee and be made a part of the record of hearings.

UNITED MINE WORKERS OF AMERICA,
DISTRICT 22, WYOMING-UTAH,
Price, Utah, January 17, 1961.

Senator WALLACE F. BENNETT,
U.S. Senate, Washington, D.C.

DEAR SENATOR BENNETT: It is my understanding and information that once again the Burns Creek project is up for approval by the congressional delegation.

I am sure that an examination of the records will show the various reasons why the United Mine Workers are opposed to this program. Once again we sincerely urge and request your cooperation for the purpose of opposing the Burns Creek project.

As you know, our main opposition lies in the reason that this dam is being constructed mainly for the purpose of generating electricity. This, of course, will seriously hamper the Utah Power & Light Co. plant at Kemmerer, Wyo., which is utilizing coal to generate its steam. There is no shortage of electrical energy in the area, etc.

I am sure you realize the unemployment situation that exists in our Nation, in particular the coalfields in Utah and Wyoming. I sincerely urge you to vote against passage of the Burns Creek project as its sponsors have originally sponsored it.

Your consideration, attention, and reply to this letter would be most appreciated.

I remain,

Sincerely yours,

HARRY MANGUS,
President, District 22, U.M.W. of A.

STATEMENT BY SENATOR WALLACE F. BENNETT GIVEN TO THE SENATE INTERIOR COMMITTEE, WEDNESDAY, MARCH 15, 1961

THE BURNS CREEK PROJECT—SHOULD BE REJECTED

Mr. Chairman and members of the committee, I greatly appreciate the opportunity to appear before you today. First of all, I wish to give my full support to the Navajo and San Juan Chama reclamation projects which the committee is considering this morning. Both Gov. George D. Clyde, who is Utah's Commissioner on the Upper Colorado River Commission, and the Utah Water & Power Board have advised me that they too give their support to these two meritorious projects. I was happy to vote for priority in planning of the Navajo and San Juan projects when the Senate approved the Upper Colorado River storage project in 1955.

As the senior Senator from Utah, a State which pioneered in the development of irrigation and water development, I have consistently supported sound, worthwhile reclamation projects when they have come before the Senate for approval. It is, therefore, an unusual occasion for me today to have to appear before you and express my strong opposition to authorization of the Burns Creek project which is also being considered by the committee today.

BURNS CREEK—A BLOW TO THE UTAH-WYOMING COAL INDUSTRY

There are four basic reasons why I cannot support the bill and why the Senate Interior Committee should reject it. First of all, it would deal a severe blow to the coal miners and to the entire coal mining industry of Utah and Wyoming. Under the Burns Creek bill, a 90,000-kilowatt hydroelectric plant will be built which will generate an estimated 50 million kilowatt-hours each year. If these 50 million kilowatt-hours were supplied by a steam electric plant using coal, 250,000 tons would be consumed each year. It would require 20,000 man-shifts of coal miner labor to mine that amount of coal and it would add approximately $500,000 to the annual wages of our Utah and Wyoming coal miners.

For the past several weeks, the Senate Banking and Currency Committee, on which I serve, has been considering a bill which would supposedly give Federal assistance to the distressed areas in our economy. The Utah coal mining area in Carbon and Emery Counties is not only distressed, it is depressed. Thus, it is incongruous in the extreme that this very day the Senate should debate a bill to aid economically distressed areas while one of its committees is holding hearings on another bill which will create distressed areas in Utah and Wyoming.

The Carbon and Emery County areas are not only distressed but their citizens are distressed that the Senate would consider a bill which would strike a blow at their principal means of livelihood, the coal mining industry. The county commissioners of both counties have expressed their strong objections to the Burns Creek bill. So, too, has district 22 of the United Mine Workers of America and the Utah-Wyoming Coal Operators Association. These have been joined by the City Councils of Price and Helper and by the Price, Utah, Chamber of Commerce.

Proponents of the bill argue that the project is needed to supply power to the so-called preference customers. These preferred customers have neither a legal nor a divine right to an unlimited supply of federally produced power. Moreover, they are much better off financially than the coal miners of Utah. To completely destroy this argument, the preference customers have abundant alternative power sources readily available while the mining of coal is virtually the only skill our Utah miners know. Our coal miners are justifiably disturbed at the prospect of having taxes deducted from their often infrequent paychecks to help pay for the Burns Creek powerplant which will directly compete with them.

BURNS CREEK—A PUBLIC POWER NOT A RECLAMATION PROJECT

In discussing public power for preference customers, I have hinted at a second basic reason why the Burns Creek bill should be rejected. That is, it is not a reclamation project, it is an unalloyed public power project, the irrigation benefits of which are all but nonexistent. This is clearly manifest by the fact that only 1.7 percent of the approximately $50 million total estimated cost is allocated to irrigation. Over 98 percent is allocated to power. Not one new acre of land would be brought under cultivation. At the most, only 100,000 acre-feet of supplemental water would be provided which the Bureau of Reclamation states would only be used two or three times over a 50-year period.

While the proposed Burns Creek Reservoir would impound 234,000 acre-feet of water, almost 60 percent of that amount would be wasted as far as irrigators are concerned since it would be devoted solely to furnish a power head.

It is obvious that this $50 million nationalized power project is being brought before the Congress under the more respected and venerated designation of a reclamation project. This can only harm true reclamation projects in the future. Once we make public power, and not irrigation,

the paramount purpose of reclamation projects, just that soon will we in the 17 reclamation States lose the support in Congress of our sister States to the east and south. We shall bring the reclamation program down in disrepute and make it just another pawn in the interminable public versus private power dispute.

BURNS CREEK PROJECT NOT NEEDED

My third reason for opposing the Burns Creek public power project is that it is not needed. Certainly it is not needed for reclamation purposes as I have already indicated. In fact, reclamation will actually be harmed. By saddling the true reclamation project, Palisades, with an uneconomic downstream public power parasite, Burns Creek, repayment of Palisades power costs will be delayed 32 years and repayment of its irrigation costs will be delayed 26 years. During the delay caused by diversion of funds to Burns Creek, Palisades would have contributed a surplus of over $30 million which could be used to aid worthy reclamation projects. Instead, it will all be eaten up for public power, not for irrigation.

As for storage, in this very dry year it is apparent that there will be over 900,000 acre-feet of unfilled reservoir capacity on the Upper Snake River when this spring's water harvest is over, unless a deluge occurs. Thus, there is more storage capacity upstream from the Burns Creek site than there is water to fill it in a dry year, which is the only time the water would be needed. What good would the storage capacity do for irrigators if there is no water?

The only remaining justification is river reregulation. However, if this should ever be needed, a completely adequate river reregulation reservoir could be built for about $4.5 million instead of $50 million.

The proposed reservoir is not needed for production of electric power—unless the Federal Government is bound and determined to launch forth on an unlimited public power program where the sky is the limit and the taxpayers, the coal miners, and the public utility investors are left holding the proverbial bag. Adequate electric service is now being provided by private and municipal power companies and REA's. The Federal Power Commission in its April 1960 report shows that there is sufficient installed capability available to carry the total 1960 peakload anticipated in the Utah-Idaho area, with a surplus in excess of 376,000 kilowatts. The same report shows that in 1963 the surplus will be over 350,000 kilowatts, and this figure does not include Burns Creek. Moreover, the public utilities will install almost a million kilowatts in the next 6 years to assure ample power. This will more than adequately meet all of the power needs of the area including those of the preference customers.

This power project can only be justified on the basis of the Federal Government assuming the unwarranted obligation of providing preference customers with power to meet their growing loads. I submit that this is not a valid reason to run the risk of discrediting the entire reclamation program and to obligate $50 million. Are we now to accept the doctrine that once customers are attached to Federal Government generating stations, they must thereafter be taken care of only in that way, and that private power resources can never again serve them? Such a doctrine should be summarily rejected.

BURNS CREEK UNECONOMICAL

The fourth and last reason for my opposition to this project is that it is uneconomical. It cannot pay its own way. Burns Creek power would cost over $500 per kilowatt compared to Palisades' $185 per kilowatt. The Bureau of Reclamation admits it proposes to sell Burns Creek power below cost, in fact so far below cost that the Bureau's estimated power revenues resulting from Burns Creek would not even pay the interest charges on the project. Therefore, it saddles the sound Palisades project with a $30 million additional cost and delays its payout more than 25 years.

As if this $30 million loss were not enough, the Bureau has estimated that if Burns Creek is built, taxes foregone because of the Federal construction of the power facilities would amount to $472,000 per year. That constituted a loss for the taxpayers of $24 million during the Burns Creek payout period. This adds up to a total loss of $54 million. Meanwhile, our coal miners are denied work.

For these reasons, Mr. Chairman, I hope the committee will refuse to approve the Burns Creek bill.

EXHIBIT 2

BURNS CREEK: $50 MILLION WHITE ELEPHANT

Should you pay for:

A reregulating project, the need for which has not been proved?

An irrigation project that won't irrigate any new land?

A flood control project that won't help control floods?

A fish and wildlife conservation project that won't benefit fish and wildlife?

A project that would provide subsidized, below-cost power to a favored few in an area where ample supplies are now available for all present needs and will be provided for future needs?

A project that endangers future sound reclamation projects?

Such a project is unnecessary, unjustified, and an extravagant waste of the taxpayers' money.

Burns Creek is a white elephant.

This $50 million white elephant is proposed by the Bureau of Reclamation, with support from municipalities and cooperatives now buying Federal Government power. They would build it 30 miles below the existing Palisades reclamation and power project on the Snake River in Idaho.

Legislation before Congress (S. 66, H.R. 378 and H.R. 36) and the project's supporters attempt to camouflage its true purpose with fictitious claims of multipurpose benefits.

But Burns Creek is nothing but a power project, and a poor one at that, to be built at taxpayer expense to generate 90,000 kilowatts of electricity for a favored few in an area already provided with plenty of power. Rates are well below the national average and the area is assured of ample supplies in the future.

BURNS CREEK: "DEATH BLOW" TO WESTERN RECLAMATION

Pressure for approval of the camoflaged Burns Creek power project endangers future sound reclamation projects—vital to western progress and prosperity.

Here's proof of the growing resentment generated among eastern Congressmen:

"If the Bureau of Reclamation and the reclamation States want to lose friends, just let them keep bringing in such things as Burns Creek * * *."—U.S. Representative CLEVELAND M. BAILEY, of West Virginia.

"I think you people out there who have said you want Congress to go along with you on sound projects have made a horrible mistake in bringing a project of this kind before the Congress."—U.S. Representative JAMES A. HALEY, of Florida.

"* * * we who come from the east and provide a good bit of the money have got to be very skeptical of the Reclamation Bureau and the proponents of legislation like this."—U.S. Representative JOHN SAYLOR, of Pennsylvania.

"If the Bureau is so hard up for work that it is going to propose such things as this Burns Creek project, which is a detriment instead of an asset to reclamation, then we people in the east * * * had better start taking a long, hard look at all of its future proposals."—U.S. Senator HUGH SCOTT, of Pennsylvania.

BURNS CREEK IS A POWER PROJECT

More than 98 percent of the project's cost has been allocated to electric power by the Bureau of Reclamation. Only 1.7 percent has been allocated to irrigation, and not 1 penny has been allocated to reregulation, flood control, or fish and wildlife.

Here's how some Members of Congress brand this $50 million project for what it truly is:

"This is a power project pure and simple."—U.S. Senator WALLACE BENNETT, of Utah.

"I do not see anything in here, except power."—U.S. Senator BARRY GOLDWATER, of Arizona.

Despite this clear fact, Burns Creek supporters continue the fiction that it will provide multipurpose benefits.

But let's separate fact from fiction:

Fiction: Burns Creek is an irrigation project.

Fact: Only 1.7 percent of the project's total cost is allocated to irrigation. It would provide only about 100,000 acre-feet of holdover storage—a teacup quantity in relation to the over 4 million acre-feet now stored on the upper Snake River—to supplement existing irrigation water.

Harold Nelson, region 1 director, Bureau of Reclamation, has testified that this water would be used "only two or three times in 50 years."

Not 1 acre of new land would be brought under cultivation. Yet Burns Creek would remove more than 3,000 acres now in production.

Here's additional proof of this fact:

"* * * this project is not designed to reclaim any new land."—U.S. Senator FRANK CHURCH, of Idaho.

"* * * the irrigation aspects are secondary."—U.S. Senator EVERETT DIRKSEN, of Illinois.

Fiction: Burns Creek is reregulation project.

Fact: Not 1 penny of the project's total cost is allocated to reregulation to protect downstream irrigators against water surges from Palisades Dam. Need for reregulation has not yet been established. Even if this need existed, a small reservoir costing about $5 million at present prices would do the job.

Here's additional proof of this fact:

"The reservoir is not needed for river reregulation * * *."—U.S. Senator WALLACE BENNETT of Utah.

"(Burns Creek) will not be a reregulating reservoir * * *." If reregulation is needed Burns Creek will not do the job * * *.

"If reregulation is ever needed, it can be obtained by constructing a small dam downstream of the Palisades project."—U.S. Senator BARRY GOLDWATER, of Arizona.

Fiction: Burns Creek is required to firm up the peak generation at Palisades.

Fact: N. B. Bennett, Jr., Assistant Reclamation Commissioner, testified: "* * *. We could accomplish the same thing cheaper if we purchased power to firm up Palisades."

Fiction: Burns Creek would assist flood control.

Fact: Burns Creek would not provide any flood control benefits. N. B. Bennett, Jr., Assistant Reclamation Commissioner, testified: "We have no flood control in Burns Creek."

Fiction: Burns Creek would provide fish and wildlife conservation.

Fact: Burns Creek would not provide any fish and wildlife benefits, James T. McBroom, U.S. Fish and Wildlife Service, testified: "There are no fish and wildlife benefits in this project."

Fiction: Burns Creek power is needed.

Fact: Utah Power & Light Co. and Idaho Power Co. have kept generating capacity well ahead of need. Result: No power shortage exists now and none is foreseeable in the future. Almost 1 million additional kilowatts are scheduled to be installed in the next 7 years by Utah Power & Light Co. and Idaho Power Co.—at no cost to the taxpayers.

Utah Power & Light Co. and Idaho Power Co. are fully meeting the demands of deep-well pumps for full development of the area's underground water resources.

Since 1949, Utah Power & Light Co. has added more than 45,600 kilowatts of new pumping load in its Idaho territory to serve pumps supplying water to 106,800 additional acres.

Since 1949, Idaho Power Co. has added 146,500 kilowatts of new pumping load to serve pumps supplying water to 400,000 additional acres.

BURNS CREEK: POWER FOR A FAVORED FEW

Power from this $50 million white elephant would go at below-cost rates to a handful of preference customers who have a discriminatory first call on Government power.

More than half of the Government power produced in the area is allocated to three municipalities primarily serving urban residents and businesses—not irrigation customers. Thus Burns Creek power would benefit a favored few—with the rest of the Nation's taxpayers paying the bill.

The Bureau of Reclamation claims the right of these favored few customers to be supplied with federally produced power to meet their load growth—itself a claim for the Federal Government's right to assume the obligations of a utility.

BURNS CREEK IS UNECONOMIC

Burns Creek is not only a power project but an uneconomic one. It will cost $505 per kilowatt compared with $185 per kilowatt at Palisades. Power revenues from Burns Creek admittedly fall by $311,000 of paying annual interest on power investment. This means $30 million over the payout period would have to be made up from revenue from Palisades—money otherwise available for true reclamation projects.

Construction of Burns Creek means loss of $34 million that would be paid by investor-owned utilities in taxes. This type of legislation will whittle away, step by step, the tax base for the support of local governmental units—State, county, city, schools.

And it means further, that it would cut coal consumption by the area's steam-electric generating facilities by 250,000 tons per year requiring many thousand coal miner shifts per year, thereby further hurting the already depressed coal industry in Utah and Wyoming.

ACTIVELY SUPPORTS TRUE RECLAMATION

Utah Power & Light Co. has a long and consistent record of active support of sound reclamation programs. More than once we have joined the Idaho State Reclamation Association, the Committee of Nine and the Bureau of Reclamation in conceiving, planning, and developing such projects, including the Palisades reclamation and power project.

We have fostered the generation of electric power where such power is a proper adjunct to the development of water for agricultural, industrial, or culinary purposes.

On the other hand, we have been and are now unalterably opposed to Federal projects whose sole or primary function is the generation of electric power.

We recognize and respect the right of irrigator groups to endorse, as they have done, construction of the Burns Creek project; but we believe that in this instance true reclamation is being used to promote public power. Should future studies prove that river reregulation is needed, we will join irrigation groups in supporting a reregulating reservoir.

Protest Burns Creek now.

Burns Creek is an inflated $50 million power project camouflaged with fictitious claims of reregulation, irrigation, flood control, and fish and wildlife benefits. It would provide below-cost subsidized power to a favored few at the expense of the Nation's taxpayers, putting an extravagant drain on the U.S. Treasury. Burns Creek legislation is now before Congress. Protest this unnecessary, unjustified, and wasteful white elephant by writing or wiring your Congressmen today.

STATEMENT OF E. M. NAUGHTON, UTAH POWER & LIGHT CO., BEFORE THE SENATE SUBCOMMITTEE ON IRRIGATION AND RECLAMATION, 87TH CONGRESS, OPPOSING BURNS CREEK PROJECT S. 66, MARCH 15, 1961

Mr. Chairman and members of the committee, I am E. M. Naughton, president, Utah Power & Light Co., which serves southeastern Idaho, western Wyoming, and most of Utah. I reside in Salt Lake City. My associate, Mr. E. A. Hunter, and I are appearing here together—in the interest of conserving your committee's time—in opposition to S. 66, which proposes authorization of the Burns Creek project.

S. 66 would authorize a large power project. Certainly Burns Creek is not worthy of being labeled a reclamation project.

Our company is almost 50 years old. We have always promoted development of the natural, agricultural, and industrial resources of our region. Long ago we realized that for basic industries to be developed and to prosper in a semiarid region, the rain and snow fall we do receive must be prudently husbanded.

We have a long record of active support of sound reclamation programs. Many times we have worked with reclamation associations, water users, and the Bureau of Reclamation in conceiving, planning, and developing true reclamation projects. To bring about several Federal projects constructed in our region, our company adjusted certain of its longstanding water rights to assist the Bureau in developing water for purposes other than power generation. Our record is crystal clear in support of water development on the upper Colorado River.

Nearly 12 years ago a true reclamation project—Palisades on the Snake River in southeastern Idaho—was authorized for construction. Our company, with landowners and other citizens in the area, actively supported that legislation because it would bring water to land, and we appeared before congressional committees in its support.

As a company we have always fostered the generation of electric power where such power is a proper adjunct to the development of water for agricultural, industrial, or culinary purposes. On the other hand, we are unalterably opposed to Federal projects having as a primary purpose the generation of electric power. Federal projects built for power production only follow neither the intent nor the spirit of true reclamation law.

During hearings leading to the Palisades authorization 12 years ago, consideration was given to the possible ultimate need for a small reregulating reservoir downstream should water level fluctuation at irrigators' headgates be found detrimental during early operation of the project. Our company did not disagree with construction of such a reservoir if its need be proven.

The Palisades project has now been in operation for 3 years, and during that time no definite need has been provided for any downstream reregulation.

Note should be taken of the fact that before the Palisades project went into operation the Bureau of Reclamation conceived, designed, and actively promoted construction of a high dam to form a reregulating reservoir some 10 times the size of the one considered 12 years before and with 90,000 kilowatts of capacity. The Bureau called it a reclamation project—Burns Creek—even though it admitted that 98 percent of its proposed cost would be allocated to electric power.

The Burns Creek project is not only an unnecessary power project, but a very expensive power project. It would cost over $500 per kilowatt as compared to Palisades' $185 per kilowatt. It would impose upon the Palisades reclamation project ill-advised financial responsibility and thus substantially delay the time when power revenues from Palisades could be put to more beneficial purposes. Were Burns Creek built we would have a sound reclamation project—Palisades, subsidizing an unsound power project—Burns Creek, to provide electric power for a few preference customers who already have available to them an ample power supply.

The electric companies have always been and are now willing and able to supply all power needs of the area. We also have comprehensive long-range plans for providing all future power needs. The electric utility companies of the Rocky Mountain region plan to spend $2.5 billion in the 15 years ending 1975. This will provide new generating plants and other facilities which will increase the amount of electric power now available by 7 million kilowatts. Utah Power & Light Co. alone plans to spend $625 million in the same period to provide 1,500,000 kilowatts of new generating capacity and associated facilities. My company is presently engaged in building the Kemmerer steam-electric plant which will have an ultimate capacity of 500,000 kilowatts and will cost in excess of $80 million. These facilities, provided by the private utilities at not 1 penny of cost to the Federal Government (in fact, we are large taxpayers rather than tax consumers), will be adequate to supply the total area's electric loads, including those of the preference customers.

Burns Creek is certainly not a reclamation project. It would provide only 100,000 acre-feet of supplemental water to lands already well supplied. That small amount could have little, if any, effect on drought conditions when we consider that the reservoir development of the upper Snake impounds over 4 million acre-feet of water. Bureau witnesses have testified that this supplemental water from Burns Creek would be used two or three times over a 50-year period.

Senator CHURCH stated before the Senate in 1959 that the Burns Creek project is needed as an insurance policy against drought. I submit that such an insurance policy would saddle the American taxpayers with a $50 million premium with very negligible if any benefit. I refer you to the record—page 12, "Supplemental Report on Palisades Dam June 1949." The table shows that if Palisades were authorized—it has now been built—there would remain a shortage of 2,586,000 acre-feet in irrigation water in a year like 1934. May I ask this committee what benefit 100,000 acre-feet from Burns Creek would be to meet a shortage of 2.6 million acre-feet? It would meet only 4 percent of the total need at a price of nearly $50 million.

A proposed Burns Creek reservoir would impound 234,000 acre-feet of water, but almost 60 percent of that water would be thrown away in the interest of power head.

It is very dry out in Idaho right now—in fact in the whole intermountain area. Unless a miracle happens there will be over 900,000 acre-feet of unfilled reservoir capacity on the Upper Snake River when this spring's water harvest is over. It has been generally known for some time that we were going to have a bad water year and that we had better conserve what water we had. Yet in this period, when water should have been

stored for use by the farmers later on, releases have been made from Jackson Lake to provide a power head at Palisades, and since the 1st of October about 150,000 acre-feet have been released from the Palisades Reservoir over and above minimum downstream requirements to generate power for preference customers. Here is a factual example of what a powerplant can do to an irrigation project—a farmer's water. There is simply too much temptation to generate power in the hope that divine providence will bail the Bureau out later on and provide the farmers with water. Had the farmers not stepped in in January and demanded that the Bureau stop its foolishness, the situation would have been worse than it now is.

Here in the first dry year we have had for a long time we have far more storage capacity upstream from the Burns Creek site than we have water to fill it. What good would 100,000 acre-feet of additional storage capacity be to the farmers?

Mr. N. B. Bennett, Assistant Commissioner of Reclamation, has inferred that once the U.S. Government supplies any power to a preference customer that it incurs an obligation to supply preference customer's needs, no matter what they may be, forever. In testifying before this committee in 1959, Mr. Bennett stated: "* * * these people (preference customers) now have contracts for power with the Federal Government and we believe that they should continue to receive from the Federal Government power to meet their growing loads."

One would conclude from his testimony that ultimately when all hydrosites are developed, then the U.S. Government would construct steam or other generating facilities as might be required for these preference customers.

Some proponents of Burns Creek have testified that Government subsidized power is necessary to develop southeastern Idaho's arable land. It is interesting to note that last year our company's service for irrigation pumping was 6½ times what it was 10 years ago. Electricity for agriculture is cheap in the area we serve. Southeastern Idaho is famous for its potatoes and sugarbeets and we are pleased to report that power costs, as a percentage of the value of the product, are only 4.6 percent for potatoes and 8.1 percent for sugarbeets.

According to a recent Federal Power Commission report on electric rates for residential and farm service such rates in Idaho are among the lowest in the Nation.

Further operating experience with the Palisades project may develop the need for some downstream regulation—that need has not developed as yet—but reregulation can be supplied as it was conceived by the Bureau 12 years ago, with construction of a small reservoir, say 17,000 to 18,000 acre-feet, requiring a very low dam, at a cost estimated at $4.5 million. If such need develops, certainly our company would wholeheartedly support it.

Speaking of the need for regulating reservoirs on rivers subject to wide flow variations because of changing rates of release of water for irrigation and power generation, I submit that if the need for reregulation downstream from the Palisades project be proved the same type reregulation would be required downstream from a Burns Creek project if it should have a 90,000-kilowatt plant, because the same water would be released into the streambed.

Our company has made a very careful study of the economics of Burns Creek which definitely proves that the entire project is infeasible and unnecessary. My associate, Mr. E. A. Hunter, is thoroughly familiar with those studies and will testify in detail during these proceedings as to his findings and opinion.

STATEMENT OF E. A. HUNTER, UTAH POWER & LIGHT CO., BEFORE SENATE SUBCOMMITTEE ON IRRIGATION AND RECLAMATION, 87TH CONGRESS, 1ST SESSION, OPPOSING BURNS CREEK PROJECT, S. 66

Mr. Chairman and members of the committee, I am E. A. Hunter, assistant to the president, Utah Power & Light Co. The following statement is made on behalf of Utah Power & Light Co. which opposes the construction of the Burns Creek project.

In 1957 when Burns Creek legislation was first introduced a careful analysis of the Bureau of Reclamation's Burns Creek report led us to conclude that Burns Creek was an unnecessary, unjustified, and extremely uneconomic project. Since then we have appeared in opposition to this project several times and each time we are more thoroughly convinced than before that the project is ill-conceived, unnecessary, and wasteful. It is not in the best interests of the taxpayers of the region, the taxpayers of the Nation, nor the reclamation program of the West.

The purpose of Burns Creek, as stated in S. 66, is misleading. It has been stated that Burns Creek would provide facilities for river reregulation—this, in spite of the fact that a ranking Bureau of Reclamation official has testified that the farmers have been told that the river level in the summertime will be exactly the same with or without Burns Creek.

The bill also states that it will provide for control of floods—this, in spite of the fact that a Bureau of Reclamation official has testified that there are no flood control benefits in the Burns Creek project.

It is also stated that the Burns Creek project would provide for the conservation and development of fish and wildlife—this, in spite of the fact that a Department of the Interior official has testified that there are no fish and wildlife benefits in Burns Creek.

Burns Creek is not an irrigation project, even though it is proposed as such. Only 1.7 percent of the total estimated cost of approximately $50 million is allocated to irrigation. It is admitted that the project would provide only 100,000 acre-feet of supplemental water which might be used two or three times in 50 years.

It is primarily a power project to supply power in an area where no power shortage exists and in an area where the investor-owned utilities have definite plans to supply the growing electric power needs.

Economically, it is an unfeasible project. It would not generate enough revenue to pay even 3 percent interest on the interest-bearing investment. As a consequence, revenues must be siphoned from the Palisades project to subsidize Burns Creek, thereby delaying the payout of Palisades and deferring the time when Palisades revenues can be used to assist irrigation.

As has been pointed out in detail previously, we have played an active role in the development of many reclamation projects in our territory, including the Palisades project which generates large quantities of electric power. We supported Palisades because surplus power revenues are to be used to pay off the North Side Minidoka, Michaud Flats, and Fort Hall irrigation projects, thereby conforming to the true concept of reclamation.

The contribution of Burns Creek to irrigation, however, would be insignificant. It is a project primarily for power. Analysis of current data reveal that the power allocation is in fact over 98 percent. Furthermore, though Burns Creek is primarily a power project, it is recognized and admitted by all concerned that it cannot pay its own way. The Bureau has admitted it proposes to sell Burns Creek power below cost, in fact so far below cost that the Bureau's estimated power revenues resulting from Burns Creek would not even pay the interest charges on the project.

Burns Creek integrated "electrically, hydraulically, and financially" with Palisades, as proposed by the bill, would produce a net revenue increase of only $1,125,000, which is $311,000 short of meeting the interest obligation at 3 percent on the Burns Creek investment. It is obvious, therefore, that without help from Palisades, Burns Creek could never pay out. Reclamation would actually be hurt by the use of Palisades revenues to pay for Burns Creek. The large chart before you, a copy of which is attached to my statement, illustrates this fact.

Chart A, the bottom chart, shows that Palisades, without being burdened with Burns Creek, is scheduled to pay off the power allocation (commercial power and irrigation power) in 21 years. The irrigation cost to be repaid from Palisades revenue would be completely amortized at the end of 33 years. At the end of the 33d year an annual surplus of $1,147,800 would become available to aid future worthy irrigation projects if Congress so directed. The payout period for Burns Creek integrated with Palisades would be 59 years. By that time Palisades, without Burns Creek, would have produced a surplus of approximately $30,300,000 as shown by the chart.

Chart B, the upper part of the same large chart, illustrates the effect of integrating Burns Creek with Palisades, or to state it more bluntly, the effect of saddling the high cost, uneconomical Burns Creek project on Palisades. Use of Palisades revenue to help pay Burns Creek interest would delay payout of costs allocated to Palisades power 32 years or until the end of the 53d year. Repayment of Palisades irrigation costs would be delayed 26 years or until the 59th year. Details of this derivation are shown by table B attached to this statement. Contrast this with Palisades without Burns Creek. At the end of the 59th year Palisades, without Burns Creek, would have contributed a surplus of over $30 million which could be used to aid worthy reclamation projects.

This does not recognize the loss to the Nation as a result of postponing the repayment of the irrigation features 26 years. Investment in these features is interest free, but certainly the Government has to pay interest on the money it borrows to build these facilities. I would not agree that it is proper to ignore this feature; however, the Bureau has evidently operated under this principle for years and it apparently has attained some degree of respectability in the minds of some people.

The Bureau has estimated that if Burns Creek is built, taxes foregone because of Federal construction of power facilities would amount to $472,000 per year. During the Burns Creek payout period these foregone taxes would equal $24 million. The taxes and surplus subsidy to Burns Creek therefore (without interest on such subsidy) during the Burns Creek payout period would be:

Loss of taxes	$24,000,000
Loss of Palisades surplus	30,000,000
Total	54,000,000

If interest at 3 percent annually on the taxes and surplus subsidy is added, the total subsidy would be increased to $100 million.

It is recognized that the construction of the Burns Creek project would be a blow to the coal mining industry in the Utah-Wyoming area. In an attempt to alleviate this, language providing that the installation of the generating facilities be scheduled on the basis of providing the additional power requirements of the preference customers has been added. The effect of such amendment will not improve the coal min-

ers' situation but will only lengthen the payout period of the project and make the project even more uneconomical.

Need for river reregulation has been advanced in attempting to justify Burns Creek. Need for such reregulation, however, has not been supported by any tangible evidence that we have been able to find, but seems to be based on speculation as to what some future condition may impose. Even the Bureau of Reclamation does not assign a single dollar of value to this use.

A more logical and economical way to provide reregulation, if it ever be needed, would be to construct a dam to provide a reregulation reservoir of only 17,000 acre-foot capacity which would do the job, and permit Palisades to generate peaking power. According to various estimates, such a dam could be constructed for about $4,500,000. We understand that in 1953 the Bureau gave consideration to this approach and at that time submitted an estimate that such a reregulation dam could be constructed for $2,128,000. In this connection a Bureau witness testified August 1959: "However, we could accomplish the same thing cheaper if we purchased power to firm up Palisades; therefore, we did not believe it was a justified investment."

Despite this admission, the Bureau now proposes to spend almost $50 million for a project, the primary purpose for which they state is reregulation. Further, Bureau studies show that with Burns Creek, the amount of power purchased to firm up Palisades would be reduced by the insignificant amount of $4,000 per year. Does anyone believe that this kind of a benefit justifies the expenditure of almost $50 million? I am not surprised that the Bureau passed by reregulation when it came to allocating costs. We submit, therefore, that further study should be made of the need for reregulation before any action be taken.

Although Burns Creek is a power project, there is absolutely no excuse or justification for the contention that additional power is required in the area. Without a shadow of a doubt there is ample power in the area.

A report to the Federal Power Commission of April 1960 lists the total peak load anticipated in the Utah-Idaho area for 1960, including the total loads of the Bureau of Reclamation's Boise, Minidoka, and Palisades projects, which includes the loads of customers requesting Burns Creek power. The report also shows that there is installed capability available to carry this load, with a surplus in excess of 376,000 kilowatts. This same report shows that in 1963 the surplus (and this figure does not include Burns Creek) will be over 350,000 kilowatts. To assure ample power in the region, Utah Power & Light Co. and other utilities in the immediate area will install almost a million kilowatts in the next 6 years. This capacity, provided at not one penny of cost to the Federal Government, will be entirely adequate to meet the total power requirements in the area including those of the preference customers.

We maintain, as we have maintained from the very first, that the $50 million Burns Creek project is not a reclamation or a water development project but purely and simply a Government power project which would, in an average water year, dump about one-half billion kilowatt hours on an area where no power shortage exists now nor will exist in the future.

To summarize:

1. Irrigation benefits—100,000 acre-feet of storage which might be used two or three times in a 50-year period—are too insignificant to justify this power project.

2. Burns Creek is a power project, pure and simple, 98 percent being allocated to power, and it would produce power for sale in an area where there is a power surplus.

3. It is an uneconomical project. By itself it can never pay off, and integrated with Palisades it would destroy the ability of Palisades to contribute to the financial assistance of other worthy irrigation projects beyond the next half century.

4. Need for re-renegotiation has not been demonstrated, and even if it should be, such regulation could be provided at an estimated cost of $4,500,000, rather than the $50 million required for Burns Creek.

5. Burns Creek would embark the Bureau of Reclamation on a program of public utility responsibility, which is a complete departure from the long-established concept of reclamation.

For the foregoing reasons, we submit to your committee that S. 66 should not be approved.

THE TEMPORARY UNEMPLOYMENT COMPENSATION ACT—SENATOR BYRD OF VIRGINIA, AND CONSIDERATION OF CERTAIN NOMINATIONS

Mr. MANSFIELD. Mr. President, I am happy that the Senate has passed by voice vote the conference report on the Temporary Unemployment Compensation Act of 1961. I was disturbed, however, to read in last Friday's newspapers articles to the effect that there was a personal feud between the President of the United States and the distinguished senior Senator from Virginia [Mr. BYRD]. The stories were based on a report supposedly made by a member of the Finance Committee staff to the effect that the senior Senator from Virginia had canceled and not postponed certain nominations which had been placed before his committee and which his committee had tentatively agreed to consider the next day.

I wish to state for the RECORD that on that afternoon, to my close personal knowledge, the senior Senator from Virginia called back certain members of his committee and stated that it looked as if the Senate would be in session late that evening, probably until 11 or 12 o'clock, and that possibly it might not be in session the next day, St. Patrick's Day, and that therefore it might not be possible to bring up the nominations on Friday, as tentatively agreed, but that they would be brought up at a later date. This was agreed to by the committee.

For the RECORD I believe it ought to be brought out that at the conclusion of the debate on the temporary unemployment compensation bill the Senator from Virginia, the chairman of the committee, immediately asked that conferees be appointed. They were appointed. No conference could be held because the House had not appointed conferees. The House was not in session, and did not return into session until Monday of this week. Even then, despite the fact that there was no business transacted in the House, due to the passing of the distinguished Representative from Tennessee, Mr. Reece, an informal meeting between the conferees of both Houses was held. That meeting was resumed yesterday, after the House had officially appointed its conferees.

As soon as an agreement had been reached, the matter was brought to the attention of both the House and the Senate, and at the earliest opportunity the Senator from Virginia brought the agreement on the conference report to the floor of the Senate for consideration and disposal.

There is a no more fairminded, equitable, just man in the Senate than the distinguished senior Senator from Virginia. He may oppose legislation, just as we may oppose legislation, but to the best of my knowledge, in my 8 years in the Senate, he has never held up legislation because he did not like it. He has always brought it to the floor of the Senate. He has always sought speedy and expeditious consideration of measures referred to his committee.

This statement should be made by me because I had been perturbed by some stories which sought to imply that there was a personal vendetta, or personal feud, so to speak, between the President of the United States and the senior Senator from Virginia.

I wish also to extend my compliments to the Senator from Oklahoma [Mr. KERR]. He performed valiantly on the floor this afternoon. I also wish to compliment the Senator from Delaware [Mr. WILLIAMS] and other members of the committee who expressed their views and who made their viewpoints clear, and who presented their arguments to us, but who were agreeable to what the final verdict of the Senate was, based on the conference report and based on the decision of the Senate as a whole.

I wish to commend the senior Senator from Virginia and to tell him that I am very proud of the fairness and equity and tolerance he always shows on the legislation which comes out of his committee.

Mr. DIRKSEN. Mr. President, if I am not charged with an implied coalition, as I have been charged, or with being a part of an unholy alliance, I would like to say that the distinguished senior Senator from Virginia has a sense of equity and independence unsurpassed not only in the Senate but anywhere in this country. We are proud of the service he has rendered, and we compliment him. He is too big to entertain the vendetta spirit.

Mr. HUMPHREY. Mr. President, I wish to express my appreciation to the conferees and to the chairman particularly, for the agreement that was adopted which related to the amendment on the retirement pensions as they affect the temporary unemployment compensation. As I understand, the amount received under title II of the Social Security Act is excluded from the Williams amendment, which was adopted by the Senate.

Mr. BYRD of Virginia. The Senator is correct.

Mr. HUMPHREY. I believe that to be a very salutary feature in the bill as finally adopted.

I, too, join the Senator from Montana, the majority leader, in stating my personal regard for the senior Senator from Virginia. The comment I read in the

press was totally erroneous. No one has been more considerate or more gracious than the Senator from Virginia, and it is a pleasure to work with him.

Mr. HOLLAND obtained the floor.

Mr. CASE of South Dakota. Mr. President——

Mr. HOLLAND. Does the Senator from South Dakota wish me to yield to him?

Mr. CASE of South Dakota. I merely wish to make a brief statement on the unemployment compensation matter.

Mr. HOLLAND. I yield to the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I was proud to be associated with the distinguished Senator from Virginia [Mr. BYRD] in the vote that was cast on the passage of the unemployment compensation bill when it was before the Senate a few days ago. The fight the Senator from Virginia made to preserve the integrity of the State systems in this matter was a noble fight. When he was overwhelmed by a very scant numerical margin, I thought the bill should not be passed, and my vote was cast that way. In the State of South Dakota employers have made it a matter of pride and effort that they should maintain employment with as much stability as possible. They have been told through the years, that establishing a good experience record would work to their benefit and to the benefit of their employees, by building up reserves in their fund.

Now the employers in South Dakota, as well as in other States, who have made a special effort to maintain stable employment are finding that they are to pay an extra tax in order to make up for the deficiencies in States where a comparable effort to maintain stable employment has not been made.

It does not seem fair to them, and that is why I voted as I did the other day. I do not believe in federalization of the unemployment compensation program. I think we ought to encourage the employers in any State to do what the employers in my State have sought to do, namely, to maintain employment, and not try to operate on the theory that their employees should get help from the fund.

The employees want the fund to be available when it is really needed. They do not want it to be used as a reward for employers who do not have some sense of responsibility.

I was glad to vote with the Senator from Virginia the other day. I do not know of any other way to express my high regard for him than to say that I am glad I voted as I did.

Mr. KUCHEL. Mr. President, will the Senator from Florida yield?

Mr. HOLLAND. I yield.

Mr. KUCHEL. There is no more honorable, able, courageous U.S. Senator sitting today than the distinguished senior Senator from Virginia [Mr. BYRD]. He has gone out of his way, again and again and again, to help Senators who are junior to him. These words come with great respect from one of those who voted opposite the position taken by the senior Senator from Virginia the other day. That has nothing to do with the esteem in which he is held in this body. He has been an excellent Senator. He is a patriotic Member of the Senate. He courageously speaks out either for or against his political party when he feels it his duty so to do.

I believe one of the great privileges connected with service in the Senate is that upon occasion we can have honorable disagreements without in any stint diminishing respect and admiration for our seniors. I desire that the distinguished senior Senator from Virginia know that this sentiment comes from the heart of the senior Senator from California.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, will the Senator from Florida yield briefly?

Mr. HOLLAND. I shall be glad to yield, with the understanding that I expect to speak briefly about the broadcast last night by the British Broadcasting Corp. of the film—the miscalled documentary film—entitled "Harvest of Shame."

I have previously notified all Senators who showed any interest in this subject and, in addition, I have asked the staff of the Senate to advise them again now, so that they may be present, if they wish to be present, while the Senator from Montana takes up matters which he advises me should be handled in a rather speedy way.

I now yield to the Senator from Montana.

Mr. MANSFIELD. I thank the Senator from Florida. I ask the attachés of the Senate to notify the Senators in question, so that they may, if they desire, be present when the senior Senator from Florida makes his remarks.

Mr. HOLLAND. I thank the Senator from Montana.

REPORTS OF COMMITTEE ON RULES AND ADMINISTRATION

AMENDMENT OF SENATE RESOLUTION 33, 87TH CONGRESS, TO ENLARGE MEMBERSHIP OF SPECIAL COMMITTEE ON AGING

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, with an amendment, the resolution (S. Res. 111) amending Senate Resolution 33, 87th Congress, so as to enlarge the membership of the Special Committee on Aging from 9 to 15. I ask unanimous consent for the present consideration of the resolution.

The VICE PRESIDENT. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 111) amending Senate Resolution 33, to enlarge the Special Committee on Aging.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MANSFIELD. Mr. President, the resolution has been cleared with the minority leadership. I ask for its approval.

Mr. CASE of South Dakota. Mr. President, what would the resolution do?

Mr. MANSFIELD. It would increase the size of the Committee on Aging. It would not increase the appropriation. The resolution has been cleared with the minority leadership, and they are in favor of it.

Mr. CASE of South Dakota. I merely heard a reference to increasing the size of a committee, and I wondered whether it was one of the standing committees of the Senate.

Mr. MANSFIELD. The resolution would increase the size of the Committee on Aging.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution (S. Res. 111) was agreed to, as follows:

Resolved, That the first section of Senate Resolution 33, Eighty-seventh Congress, agreed to February 13, 1961, is amended (1) by striking out "nine" and inserting in lieu thereof "twenty-one", (2) by striking out "six" and inserting in lieu therof "fourteen", and (3) by striking out "three" and inserting in lieu thereof "seven".

The title was amended, so as to read: "Amending Senate Resolution 33, Eighty-seventh Congress, so as to enlarge the membership of the Special Committee on Aging from nine to twenty-one."

REAPPOINTMENT OF DR. JEROME C. HUNSAKER AS CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, without amendment, the joint resolution (H.J. Res. 176) to provide for the reappointment of Dr. Jerome C. Hunsaker as citizen regent of the Board of Regents of the Smithsonian Institution, and I submit a report (No. 79) thereon. I ask unanimous consent for the immediate consideration of the joint resolution.

The VICE PRESIDENT. The joint resolution will be stated by title.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 176) to provide for the reappointment of Dr. Jerome C. Hunsaker as citizen regent of the Board of Regents of the Smithsonian Institution.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of the report accompanying the joint resolution under consideration.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the joint resolution (H.J. Res. 176) providing for the reappointment of Dr. Jerome C. Hunsaker as citizen regent of the Board of Regents of the Smithsonian Institution, having considered the same, report favorably thereon without amendment and recommend that the joint resolution do pass.

Title 20, section 42, United States Code, provides in relation to the Institution's Board of Regents that in addition to the Vice President and the Chief Justice of the United States, and Members of Congress, the

Board shall be composed of—" * * * six other persons, other than Members of Congress, two of whom shall be resident in the city of Washington; and the other four shall be inhabitants of some State, but no two of them of the same State."

Dr. Hunsaker's reappointment is within the classification of citizen regents who are resident outside the District of Columbia. He is especially valuable to the Smithsonian because he is one of America's outstanding authorities in the field of aviation research.

A letter in support of House Joint Resolution 176 addressed to Senator MIKE MANSFIELD, chairman of the Committee on Rules and Administration, by Dr. Leonard Carmichael, Secretary of the Smithsonian Institution, with accompanying biography of Dr. Hunsaker, is as follows.

SMITHSONIAN INSTITUTION,
Washington, D.C., February 1, 1961.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: Thank you very much indeed for your letter of January 24, 1961, together with the enclosed copy of Senate Joint Resolution 6, a resolution "To provide for the reappointment of Dr. Jerome C. Hunsaker as citizen regent of the Board of Regents of the Smithsonian Institution."

Dr. Jerome C. Hunsaker is one of America's very distinguished scientists and engineers. He has given most generously of his time in performing his duties as a regent of the Smithsonian Institution. As you know, Dr. Hunsaker is one of America's outstanding authorities in the field of aviation research. In this connection he has been especially valuable to the Smithsonian because it has a special bureau established by act of Congress: The National Air Museum.

I am sure that all the regents and the staff of the Smithsonian Institution most urgently hope that Dr. Hunsaker may be reappointed as a citizen regent of the Institution.

With kindest personal regards.

Sincerely yours,

LEONARD CARMICHAEL,
Secretary.

JEROME C. HUNSAKER

Hunsaker, Jerome C., head, department of mechanical engineering and of the department of aeronautical engineering, Massachusetts Institute of Technology; master of science degree and doctor of science degree from the Massachusetts Institute of Technology; graduate of United States Naval Academy; instructor, MIT, 1912 to 1916; honorary doctor of science degree, Williams College, and honorary doctor of engineering degree, Northeastern University; former chief of aircraft design in the United States Navy; former vice president Bell Telephone Laboratories and Goodyear-Zeppelin Corp.; pioneered research in the development of a wind tunnel and in overcoming technical obstacles standing in the way of better aircraft for America; founder and first president of the Institute of the Aeronautical Sciences in 1932 and edited its publication until 1941; member of the Federal Aviation Commission, 1934; chairman of the National Advisory Committee for Aeronautics in 1941 and member of its executive committee ever since; during the time he was chairman of this committee he participated in the development of pilotless aircraft research stations, high-speed flight stations and other laboratories; served on the War Manpower Commission, 1943, War Production Board, 1942 and 1944; also served on innumerable other boards connected with air problems and scientific research problems; awarded the Navy Cross, Daniel Guggenheim Medal, Franklin Medal, Presidential Medal for Merit, and the Wright Brothers Memorial Trophy; throughout his career he has contributed to this country's knowledge of sweptback wings, dihedral effects, control movements, applications of wire and radio communications to airway safety and the theory of similitude and dimensional analysis.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The VICE PRESIDENT. If there be no amendment, the question is on the third reading of the joint resolution.

The joint resolution was ordered to a third reading, read the third time, and passed.

PRINTING AS A HOUSE DOCUMENT THE PUBLICATION "FACTS ON COMMUNISM—VOLUME II, THE SOVIET UNION, FROM LENIN TO KHRUSHCHEV"

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, with an amendment, the concurrent resolution (H. Con. Res. 51), and I submit a report (No. 80) thereon. I ask unanimous consent for the present consideration of the concurrent resolution.

The VICE PRESIDENT. The concurrent resolution will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (H. Con. Res. 51) to print as a House document the publication "Facts on Communism—Volume II, the Soviet Union, From Lenin to Khrushchev," and to provide for the printing of additional copies.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The amendment of the Committee on Rules and Administration was:

After line 12, to insert a new section, as follows:

SEC. 2. There shall be printed ten thousand three hundred additional copies of such document for the use of the Senate.

The amendment was agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of the report from the Committee on Rules and Administration.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the concurrent resolution (H. Con. Res. 51) authorizing the printing as a House document the publication "Facts on Communism—Volume II, the Soviet Union, From Lenin to Khrushchev," and providing additional copies thereof, having considered the same, report favorably thereon with an amendment, and recommend that the concurrent resolution as amended be agreed to by the Senate.

Of the 50,000 additional copies specified by House Concurrent Resolution 51, 15,000 would be for the use of the House Committee on Un-American Activities, and 35,000 would be for the use of the Members of the House (approximately 80 copies per Member).

The amendment adopted by the Committee on Rules and Administration would provide for the printing of 10,300 additional copies for the use of the Senate (100 copies per Member).

The printing-cost estimate, supplied by the Public Printer, is as follows:

To print as a House document (1,500 copies)	$1,737.96
50,000 additional copies at $411.10 per thousand	20,555.00
Total estimated cost, H. Con. Res. 51 as referred	22,292.96
10,300 additional copies for the Senate	4,234.43
Total estimated cost, H. Con. Res. 51 as amended	26,527.39

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution, as amended, was agreed to.

PRINTING OF A HOUSE DOCUMENT

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, with an amendment, the concurrent resolution (H. Con. Res. 81) to provide for the printing of a House document, and I submit a report (No. 81) thereon. I ask unanimous consent for the present consideration of the concurrent resolution.

The VICE PRESIDENT. The concurrent resolution will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (H. Con. Res. 81) to provide for the printing of a House document.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The amendment of the Committee on Rules and Administration was:

After line 12, to insert a new section, as follows:

SEC. 2. There shall be printed thirty thousand nine hundred additional copies of such document for the use of the Senate.

The amendment was agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of the report of the Committee on Rules and Administration.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the concurrent resolution (H. Con. Res. 81) authorizing the printing as a House document of a revised edition of the brochure "How Our Laws Are Made" (H. Doc. 156, 86th Cong.), by Dr. Charles J. Zinn, and providing additional copies thereof, having considered the same, report favorably thereon with an amendment and recommend that the concurrent resolution as amended be agreed to by the Senate.

There would be printed 132,000 additional copies for the use of the House (approximately 300 copies per Member).

The amendment adopted by the Committee on Rules and Administration would provide for the printing of 30,900 additional copies for the use of the Senate (300 copies per Member).

The printing-cost estimate, supplied by the Public Printer, is as follows:

Back to press, 1st 1,000 copies	$426.90
131,000 additional copies $43.28 per thousand	5,669.68
Total estimated cost, H. Con. Res. 81 as referred	6,096.58
30,900 additional copies for the Senate	1,337.37
Total estimated cost, H. Con. Res. 81 as amended	7,433.95

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution, as amended, was agreed to.

PRINTING OF ADDITIONAL COPIES OF THE REPORT "COMMUNIST TARGET — YOUTH — COMMUNIST INFILTRATION AND AGITATION TACTICS"

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, without amendment, the concurrent resolution (H. Con. Res. 142) authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics," and I submit a report (No. 82) thereon. I ask unanimous consent for the immediate consideration of the concurrent resolution.

The VICE PRESIDENT. The concurrent resolution will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (H. Con. Res. 142) authorizing the printing of additional copies of the report "Communist Target—Youth—Communist Infiltration and Agitation Tactics."

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the text of the report accompanying the concurrent resolution.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the concurrent resolution (H. Con. Res. 142) authorizing the printing of additional copies of the report entitled "Communist Target—Youth—Communist Infiltration and Agitation Tactics," issued by the House Committee on Un-American Activities, 86th Congress, 2d session, having considered the same, report favorably thereon without amendment and recommend that the concurrent resolution be agreed to by the Senate.

Pursuant to House Concurrent Resolution 142 the Committee on Un-American Activities would have printed for its use 100,000 additional copies of the report, submitted by J. Edgar Hoover, Director of the Federal Bureau of Investigation, illustrating Communist strategy and tactics in the rioting which occurred during hearings held by the committee at San Francisco, May 12–14, 1960.

The printing-cost estimate, supplied by the Public Printer, is as follows:

Back to press, 1st 1,000 copies	$164.49
99,000 copies, at $19.72 per thousand	1,952.28
Total estimated cost, H. Con. Res. 142	2,166.77

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 142) was agreed to.

PRINTING OF PAMPHLET ENTITLED "OUR CAPITOL" AS A SENATE DOCUMENT

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, without amendment, the concurrent resolution (S. Con. Res. 17) authorizing the printing of the pamphlet entitled "Our Capitol" as a Senate document and providing for additional copies, and I submit a report (No. 78) thereon. I ask unanimous consent for the immediate consideration of the concurrent resolution.

The VICE PRESIDENT. The concurrent resolution will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (S. Con. Res. 17) authorizing the printing of the pamphlet entitled "Our Capitol" as a Senate document and providing for additional copies.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD, the text of the report of the Committee on Rules and Administration.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the concurrent resolution (S. Con. Res. 17) authorizing the printing of a revised edition of Senate Document 13, 84th Congress, entitled "Our Capitol," and providing additional copies thereof, having considered the same, report favorably thereon without amendment and recommend that the concurrent resolution be agreed to by the Senate.

Additional copies totaling 323,500 would be printed, of which 103,000 copies would be for the use of the Senate (1,000 per Member), and 220,500 would be for the use of the House (500 per Member).

The printing cost estimate, supplied by the Public Printer, is as follows:

To print as a Senate document (1,500 copies)	$552.27
323,500 additional copies, at $63.78 per thousand	20,664.72
Total estimated cost, S. Con. Res. 17	21,216.99

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 17) was agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed as a Senate document, with illustrations, the pamphlet entitled "Our Capitol"; and that three hundred and twenty-three thousand five hundred additional copies shall be printed, of which one hundred and three thousand copies shall be for the use of the Senate and two hundred and twenty thousand five hundred copies for the use of the House of Representatives.

TO PRINT "ACHIEVEMENTS DURING EIGHT YEARS OF A REPUBLICAN ADMINISTRATION" AS A SENATE DOCUMENT

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably, without amendment, the resolution (S. Res. 107) to print "Achievements During Eight Years of a Republican Administration" as a Senate document, and I submit a report (No. 76) thereon. I ask unanimous consent for the present consideration of the resolution.

The VICE PRESIDENT. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 107) to print "Achievements During Eight Years of a Republican Administration" as a Senate document.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. KUCHEL. Mr. President, first, I desire to congratulate the distinguished majority leader for submitting this kind of resolution.

Mr. MANSFIELD. I did not submit it; the Senator's colleague submitted it.

Mr. KUCHEL. Then I thank the majority leader for presenting it. Second, why is there no explanatory material offered in connection with the resolution?

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the report of the Committee on Rules and Administration.

The VICE PRESIDENT. Is there objection?

Mr. HUMPHREY. Mr. President, I gather this is a very short document. [Laughter.] I have no objection.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the resolution (S. Res. 107) authorizing the printing as a Senate document of a study entitled "Achievement During 8 Years of a Republican Administration," submitted by Senator EVERETT MCKINLEY DIRKSEN, having considered the same, report favorably thereon without amendment and recommend that the resolution be agreed to by the Senate.

The printing-cost estimate, supplied by the Public Printer, is as follows:

To print as a Senate document (1,500 copies)	$487.42

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution (S. Res. 107) was agreed to, as follows:

Resolved, That a study entitled "Achievements During Eight Years of a Republican

Administration", inserted in the CONGRESSIONAL RECORD on March 9, at pages 3570 through 3578, be printed as a Senate document.

PRINTING OF ADDITIONAL COPIES OF SYMPOSIUM ENTITLED "LEGAL ASPECTS OF SPACE EXPLORATION"

Mr. MANSFIELD. Mr. President, from the Committee on Rules and Administration, I report favorably with an amendment, the resolution (S. Res. 108) to print with additional copies a symposium entitled "Legal Aspects of Space Exploration," and I submit a report (No. 77) thereon. I ask unanimous consideration of the resolution.

The VICE PRESIDENT. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 108) to print with additional copies a symposium entitled "Legal Aspects of Space Exploration."

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the report of the Committee on Rules and Administration.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Rules and Administration, to whom was referred the resolution (S. Res. 108) authorizing the printing as a Senate document of a symposium entitled "Legal Problems of Space Exploration," and providing additional copies thereof, having considered the same, report favorably thereon with an amendment and recommend that the resolution as amended be agreed to by the Senate.

This resolution would provide that the symposium entitled "Legal Problems of Space Exploration," prepared for the use of the Committee on Aeronautical and Space Sciences, U.S. Senate, by the Legislative Reference Service, Library of Congress, be printed as a Senate document, and that 840 additional copies (the maximum under the $1,200 limitation) be printed for the use of that committee.

The amendment adopted by the Committee on Rules and Administration is pro forma in nature, designed to correct an error in the title of the publication.

The printing-cost estimate, supplied by the Public Printer, is as follows:

To print as a Senate document (1,500 copies)	$38,992.62
840 additional copies, at $1,425.44 per thousand	1,195.32
Total estimated cost, S. Res. 108	40,187.94

A letter in support of S. Res. 108 to Senator MIKE MANSFIELD, chairman of the Committee on Rules and Administration, from Senator ROBERT S. KERR, chairman of the Committee on Aeronautical and Space Sciences, is as follows:

U.S. SENATE,
COMMITTEE ON AERONAUTICAL AND SPACE SCIENCES,
March 20, 1961.

The Honorable MIKE MANSFIELD,
Chairman, Senate Committee on Rules and Administration, Washington, D.C.

DEAR MR. CHAIRMAN: I should like to urge your favorable consideration of Senate Resolution 108, to print as a Senate document the symposium prepared for the committee by the Legislative Reference Service of the Library of Congress.

Through inadvertence, the title is listed in the resolution as "Legal Aspects of Space Exploration." This title should be "Legal Problems of Space Exploration." I would appreciate your committee making this change as a committee amendment.

This document is an updated version of an earlier committee print entitled "Space Law: A Symposium." The demand for this volume was so great, that it was deemed advisable to bring it up to date and reprint it. Much new material has been added, and the title changed to reflect its broader scope. Printing it as a Senate document will allow for broader distribution and greater dissemination among scholars in this field.

Early action by your committee would be greatly appreciated.

With warm regards, I am,

Sincerely,

ROBERT S. KERR, *Chairman.*

The amendment of the Committee on Rules and Administration was:

In line 1, after the word "Legal," to strike out "Aspects" and insert "Problems."

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The resolution as amended was agreed to, as follows:

Resolved, That the symposium entitled "Legal Problems of Space Exploration" prepared for the use of the Committee on Aeronautical and Space Sciences, United States Senate, by the Legisaltive Reference Service, Library of Congress, shall be printed with illustrations as a Senate document. There shall be printed eight hundred and forty additional copies of such Senate document which shall be for the use of the Senate Committee on Aeronautical and Space Sciences.

The title was amended, so as to read: "Resolution to print with additional copies a symposium entitled 'Legal Problems of Space Exploration'."

ORDER FOR PRESIDENT OF THE SENATE OR PRESIDENT PRO TEMPORE TO SIGN BILLS DURING ADJOURNMENT OR RECESS OF SENATE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President of the Senate or the President pro tempore be permitted to sign bills during the adjournment or recess of the Senate.

The VICE PRESIDENT. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT UNTIL FRIDAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate adjourns today, it adjourn until 12 o'clock noon on Friday next.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, again I thank the Senator from Florida for his unfailing courtesy and graciousness in this matter.

Mr. HOLLAND. I am very glad to cooperate with the distinguished majority leader.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (H.R. 4510) to provide a special program for feed grains for 1961, and it was signed by the Vice President.

SUPPORT FOR YOUTH CONSERVATION CORPS

Mr. HUMPHREY. Mr. President, I invite the attention of my colleagues to an editorial from today's New York Times, endorsing establishment of a Youth Conservation Corps. The New York Times editorial in support of this proposal, as embodied in legislation introduced by me, and by Representative JOHN BLATNIK in the House of Representatives, states:

The Youth Conservation Corps today can be a tremendous force for the conservation of resources and the useful employment of American youth in the 1960's.

As I stated yesterday, in commenting on the report that a Labor Department study group is preparing recommendations for establishment of a Youth Conservation Corps, the time is appropriate for such a program, and I feel confident that the Congress should and will give its approval to this worthy measure.

I ask unanimous consent that the New York Times editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 22, 1961]

CCC TO YCC
